

GUIDELINES FOR THE PREPARATION OF REPORTS BY MEMBER STATES ON THE APPLICATION OF THE 1974 RECOMMENDATION CONCERNING EDUCATION FOR INTERNATIONAL UNDERSTANDING, CO-OPERATION AND PEACE AND EDUCATION RELATING TO HUMAN RIGHTS AND FUNDAMENTAL FREEDOMS

I. Introduction

A. About the 1974 Recommendation

1. UNESCO's 1974 *Recommendation concerning Education for International Understanding, Co-operation and Peace and Education relating to Human Rights and Fundamental Freedoms*¹ (the "1974 Recommendation") aims to promote international education and world peace through understanding, solidarity and cooperation. It was adopted on 19 November 1974 by the General Conference of UNESCO at its 18th session.

2. The 1974 *Recommendation* applies to formal, non-formal and informal education and to all levels, from pre-primary to tertiary and adult education and lifelong learning. The General Conference recommended "*that Member States should apply*" the provisions included in the 1974 *Recommendation* "*by taking whatever legislative or other steps*" that provide institutional (e.g. policies and legal frameworks) and pedagogical (e.g. curricula

teacher training, educational materials, equipment, and student assessment) support for its implementation, based on the "*objectives*", referred to in paragraph 4 of the 1974 *Recommendation*, "*regarded as major guiding principles of education policy*" including: an international dimension and a global perspective on education, cultural diversity, interdependence, communication, rights and responsibilities, international solidarity and cooperation, and problem solving.

3. Today, the principles of the 1974 *Recommendation* apply equally well to Education for Sustainable Development (ESD) and to Global Citizenship Education (GCED) and therefore represent a powerful tool for promoting the 2030 Agenda for Sustainable Development and in particular SDG Target 4.7 on the promotion of sustainable development and global citizenship through education, Target 12.8 on access to information on sustainable development and Target 13.3 on climate change education.

4. The General Conference in its 39th session recommended the use of the 1974 *Recommendation* reporting process to support the implementation and monitoring of Target 4.7 of Sustainable Development Goal 4 (39 C/Resolution 79). The UNESCO Executive Board at its 209th session approved the use of the current guidelines for both the monitoring of the 1974 *Recommendation* and the collection of data needed for the following global SDG indicator for which UNESCO is custodian (209 EX/Decision 18.II):

4.7.1, 12.8.1 and 13.3.1: *The extent to which (i) global citizenship education and (ii) education for sustainable development are mainstreamed in (a) national education policies; (b) curricula; (c) teacher education and (d) student assessment.*

5. Questions marked with an asterisk (*) will be used in the calculation of the respective indicators (**Table 1**). As approved by the Inter-Agency and Expert Group on the SDG Indicators, the indicators will be calculated for primary and secondary education only.

Table 1 Questions used in the calculation of the global SDG indicator for Targets 4.7, 12.8 and 13.3

Policies	Curricula	Teacher education	Student assessment
A2, A4, A5, E1a	B2, B3, B4, E1b	C2, C3, C4, C5, E1c	D2, D3, E1d

B. Reporting obligations

6. The General Conference, at its 18th session, when adopting the *1974 Recommendation* recommended “*that Member States submit [...] reports concerning the action taken by them in pursuance of this recommendation*”. Moreover, in accordance with Article VIII of UNESCO’s Constitution “*Each Member State shall submit to the Organization [...] reports [...] on the action taken upon the recommendations and conventions referred to in Article IV, paragraph 4.*”

7. Thus, **all UNESCO Member States are expected to report on the steps they have taken to implement the 1974 Recommendation** preferably by completing the following questionnaire. Such reporting takes place every four years.

II. Guidelines for completion of the questionnaire

8. This questionnaire and its accompanying guidelines are addressed to Ministers responsible for relations with UNESCO. The questionnaire is typically completed by Ministries of Education and other government authorities responsible for education. Responses should cover, as far as possible, education at all levels of government, including sub-national levels where applicable as well as education outside the government sector.

9. National respondents are encouraged to **consult widely** both within, across and beyond government, including with Ministries of Environment, with national human rights institutions, the education sector, civil society partners and others, as necessary, to gather the information needed to complete the questionnaire.

10. Responses to the seventh consultation should cover:

- (i) the time period 2017-2020;
- (ii) education at all levels of formal education from pre-primary to tertiary education as well as non-formal education;
- (iii) all levels of government that have responsibility for education within the country; and
- (iv) where possible, education outside the government sector.

11. To assist countries in responding to this questionnaire, UNESCO has developed the following set of global citizenship education and education for sustainable development themes. The list is based on a review of current common practices in many countries as well as a review of relevant literature. While the terms ESD and GCED may be used differently in some countries, the list of themes typically captures what are seen as key elements of Target 4.7. Please refer to the definitions of key terms in **Section III** before completing the questionnaire.

Global citizenship education and education for sustainable development

- 1. cultural diversity and tolerance
 - 1.1 international or intercultural understanding, solidarity and cooperation
 - 1.2 intercultural and interreligious dialogue
 - 1.3 local, national and/or global citizenship
- 2. gender equality education
 - 2.1 gender-based equal opportunities
 - 2.2 gender equality and justice
 - 2.3 gender roles, identity and stereotypes

3. human rights education
 - 3.1 equality and non-discrimination based on race, colour, language, religion, disability, political or other opinion, national or social origin, birth or other status
 - 3.2 human rights values, human dignity, justice, inclusion and participation
 - 3.3 respect for human rights and fundamental freedoms (as outlined in international conventions and declarations)
4. peace and non-violence
 - 4.1 friendly relations among peoples and nations
 - 4.2 challenging negative stereotypes, promoting peaceful solutions, learning to live together, including others and preventing violent extremism
 - 4.3 preventing all forms of violence including bullying, verbal abuse and gender-based violence
5. climate change education
 - 5.1 mitigation
 - 5.2 adaptation
 - 5.3 impact reduction
 - 5.4 early warning
6. environmental sustainability
 - 6.1 caring for the planet, protecting nature
 - 6.2 environmental justice
 - 6.3 biodiversity, water
7. human survival and well-being
 - 7.1 environmental health as it pertains to human well-being, disaster risk reduction
 - 7.2 health of the planet for future generations
 - 7.3 sustainable cities and communities
8. sustainable consumption and production
 - 8.1 responsible and sustainable lifestyles
 - 8.2 green economy, green jobs
 - 8.3 sustainable energy

III. Definitions of key terms

Term	Definition
Themes of global citizenship and education for sustainable development	
1. Cultural diversity and tolerance	<i>Education about and for diversity including language, ethnicity, race, religion as well as the development of tolerance, mutual respect and appreciation for cultural diversity. It includes intercultural and interreligious dialogue, understanding, solidarity and co-operation, and citizenship education.</i>
2. Gender equality education	<i>Education that addresses the wider issue of gender equality by promoting new attitudes and patterns of belief, transforming the way people think about traditional gender roles and helping to build long-term sustainable change. It examines how gender roles, activities, needs, opportunities, rights and entitlements affect men, women, girls and boys differently. It deals with the relationships between females and males, their access to and control of resources and the constraints they face relative to each other. It respects the rights of all learners – women, men, boys and girls – equally and gives equal access to learning opportunities, resources and protections. All learners benefit from and are treated in education equally without the limitations set by stereotypes, rigid gender roles and prejudices. It covers gender-based equal opportunities, gender equality and justice, and gender roles, identity and stereotypes.</i>
3. Human rights education	<i>Education that promotes universal respect for and observance of all human rights and fundamental freedoms and thus contributes, inter alia, to the prevention of human rights violations and abuses by providing persons with knowledge, skills and understanding and developing their attitudes and behaviours, to empower them to contribute to the building and promotion of a universal culture of human rights.</i> <i>It includes equality and non-discrimination, human rights values, dignity, justice, inclusion and participation and respect for human rights and fundamental freedoms.</i>
4. Peace and non-violence	<i>Education about peace and peace-building, mediation, conflict prevention and resolution, non-violence, reconciliation and living together peacefully. It includes advocating for friendly relations among peoples and nations, challenging negative stereotypes, promoting peaceful solutions, learning to live together and preventing violent extremism and other forms of violence including bullying.</i>
5. Climate change education	<i>Education to help people, in particular youth, understand, address, mitigate, and adapt to the impacts of climate change. It encourages changes in attitudes and behaviours needed to put the world on a more sustainable development path, and build a new generation of climate change-aware citizens.</i> <i>It covers various responses to climate change including mitigation, adaptation, impact reduction and early warning.</i>
6. Environmental sustainability	<i>Education about responsible interactions with the environment to avoid depletion or degradation and to promote environmental quality and health. It includes, caring for the planet and protecting nature, environmental justice, biodiversity and water.</i>
7. Human survival and well-being	<i>Education that promotes social well-being and harmony including in future generations due to healthy environmental systems. It includes health of the planet and environment related to human well-being, disaster risk reduction and sustainable cities and communities.</i>

8. Sustainable consumption and production	<i>Education on the use and production of resources, products and services that have a minimal adverse impact on the environment. It promotes resource and energy efficiency, sustainable infrastructure and green jobs. It includes responsible and sustainable lifestyles, the green economy and sustainable energy.</i>
Dimensions of learning	
Knowledge	<i>Factual information and understanding acquired through study and/or experience.</i>
Skills	<i>The ability to carry out a task well as a result of training, practice and innate aptitude. Skills may be physical, mental or both.</i>
Values	<i>Principles that form the foundation on which individuals conduct themselves and interact with others and with the environment around them.</i>
Attitudes and behaviours	<i>Ability to act on the basis of beliefs and knowledge acquired through study or experience.</i>
Levels of education	
Pre-primary	<i>Education designed to support children's early cognitive, physical, social and emotional development and introduce young children to organized instruction outside of the family context. Participants are usually aged from three years.</i>
Primary and secondary	<i>Education designed to:</i> <i>(i) provide students with fundamental skills in reading, writing and mathematics (i.e. literacy and numeracy) and establish a solid foundation for learning and understanding core areas of knowledge and personal development (primary education); and</i> <i>(ii) prepare students for further education at post-secondary and tertiary levels and for entry into the labour market (secondary education).</i> <i>It includes both general and vocational education.</i>
Tertiary	<i>Education designed to provide learning activities in specialised fields of education. It aims at learning at a high level of complexity and specialisation. It includes both what is commonly understood as academic education and advanced vocational or professional education.</i>
Types of education	
Adult education	<i>Education specifically targeted at individuals who are regarded as adults by their society to improve their technical or professional qualifications, further develop their abilities, enrich their knowledge with the purpose to complete a level of formal education, or to acquire, refresh or update their knowledge, skills and competencies in a particular field.</i>
Formal education	<i>Education that is institutionalized, intentional and planned through public organizations and recognized private bodies which – in their totality – constitute the formal education system of a country. Formal education programmes are recognized by the relevant national or sub-national education authorities. Formal education consists mostly of initial education (e.g., pre-primary, primary, secondary and tertiary education).</i>
Non-formal education	<i>Education that is an addition, alternative and/or a complement to formal education within the process of the lifelong learning of individuals. It is often provided to guarantee the right of access to education for all. It caters to people of all ages but does not necessarily apply a continuous pathway-structure. It may be short in duration and/or low-intensity, and it is typically provided in the form of short courses, workshops or seminars. Non-formal education mostly leads to qualifications that are not</i>

	<i>recognized by the relevant national or sub-national education authorities or to no qualifications at all. Non-formal education includes programmes on life skills including literacy and numeracy, work skills, and social or cultural development. Most types of adult education are also included.</i>
Vocational education	<i>Education that is designed for learners to acquire the knowledge, skills and competencies specific to a particular occupation or trade or class of occupations or trades. Vocational education may have work-based components (e.g. apprenticeships). Successful completion of such programmes leads to labour-market relevant vocational qualifications acknowledged as occupationally-oriented by the relevant national authorities and/or the labour market. Vocational education can be offered at secondary and post-secondary or tertiary levels of education.</i>

IV. Information about the respondent

Country:

TRINIDAD AND TOBAGO

Organization:

Educational Planning Division, Ministry of Education

Date of submission:

V. Other contributors consulted during the completion of this questionnaire

Please indicate below the names of other organizations and contributors consulted during the completion of this questionnaire.

Government institutions including other Ministries (please specify):

National human rights institutions (please specify):

Local and regional authorities responsible for education (please specify):

Other local and regional authorities (please specify):

Organizations representing education stakeholders (e.g. teachers, students, parents, etc.)
(please specify):

Other civil society organizations (please specify):

Others (please specify):

VI. Questionnaire

A. Laws and policies (preamble and paras 4 and 7 of the 1974 Recommendation)

A1a. Please describe any specific national and sub-national laws, legislation or legal framework(s) in your country that govern the promotion of global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes

The Equal Opportunity Act does not explicitly mention the theme of gender equality education. However, the Equal Opportunity Act seeks to prohibit discrimination in educational institutions on the ground of sex, race, ethnicity, origin, religion, marital status or disability. The prohibition of discrimination facilitates the promotion of GCED and ESD themes. The Equal Opportunity Act applies to all levels of education.

The Environmental Management Act explicitly promotes the theme of environmental sustainability. Section 16(1) of the Act provides that one of the functions of the Authority is the promotion of educational and public awareness programmes on the environment. The Environmental Management Act applies to all levels of education.

The Mediation Act does not explicitly provide for education on peace and non-violence. However, the theme of peace and non-violence can be inferred from the legislation as it seeks to promote and regulate mediation and conflict resolution in Trinidad and Tobago.

The Constitution of Trinidad and Tobago does not explicitly mention the theme of human rights education. However, it seeks to ensure equality of treatment and guarantees individuals certain fundamental rights and freedoms.

A1b. Please provide the full names of any laws, legislation or legal frameworks referred to in A1a and, where possible, web links to relevant documents.

1. Equal Opportunity Act, Chapter 22:03

Link: https://rgd.legalaffairs.gov.tt/Laws2/Alphabetical_List/lawspdfs/22.03.pdf

2. Environmental Management Act, Chapter 35:05

Link: https://rgd.legalaffairs.gov.tt/Laws2/Alphabetical_List/lawspdfs/35.05.pdf

3. Mediation Act, Chapter 5:32

Link: https://rgd.legalaffairs.gov.tt/Laws2/Alphabetical_List/lawspdfs/5.32.pdf

4. Constitution of the Republic of Trinidad and Tobago

Link: <https://rgd.legalaffairs.gov.tt/Laws2/Constitution.pdf>

*A2 Please indicate which GCED and ESD themes are covered in national or sub-national laws, legislation or legal frameworks on education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown, 99 = not applicable (e.g. where the given level of government is not responsible for education)

	National				Sub-national			
	Pre-primary	Primary/secondary	Tertiary	Non-formal	Pre-primary	Primary/secondary	Tertiary	Non-formal
1. Cultural diversity and tolerance	0	0	0	0	99	99	99	99
2. Gender equality	1	1	1	1	99	99	99	99
3. Human rights	1	1	1	1	99	99	99	99
4. Peace and non-violence	1	1	1	1	99	99	99	99
5. Climate change	0	0	1	0	99	99	99	99
6. Environmental sustainability	1	1	1	1	99	99	99	99
7. Human survival and well-being	0	0	0	0	99	99	99	99
8. Sustainable consumption and production	0	0	1	0	99	99	99	99

A3a. Please describe any specific current national or sub-national education policies, frameworks or strategic objectives in your country that promote global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes² are mentioned explicitly or are inferred and what types or levels of education are covered.

1. Education Policy Paper 2017-2022 seeks to lay out how the Ministry of Education is committed to achieving its mandate of building the human resource capacity of Trinidad and Tobago, in pursuit of sustainable national development. ESD is included explicitly through the three areas of focus for Trinidad and Tobago: (1) Effective Governance and Administration, (2) Access to Educational Opportunities, and (3) Quality Education. As such, this Education Policy Paper is intended to guide the actions of the Ministry of Education through the next five (5) years in order to advance educational development in Trinidad and Tobago and treat with current challenges within the education system. The Policy is intended to provide the Ministry of Education with the strategic direction to guide its programmes, projects and action plans for the Early Childhood Care and Education (ECCE), Primary, Secondary, Technical/Vocational and Tertiary subSectors for the period 2017-2022.
2. It can be inferred that the social programmes offered by MIC Institute of Technology (MIC-IT) (i.e. MuST and HYPE) affords vulnerable groups access to education and training towards social mobility.
3. The University of Trinidad and Tobago's (UTT) Strategic Plan 2019-2024 implies sustainable development thorough its alignment with the principles of the 2030 National

² See the schema described in paragraph 11 of Section II of these guidelines.

Development goals in its Strategic Theme 7. This is the commitment to national development and transformation through the identification and resolution of societal problems. Within this Strategic theme is the adoption of community initiatives in areas of national importance to ensure relevance to societal needs. The UTT has also committed to engaging niche communities through initiatives designed to increase student civic responsibility.

- A. This Strategic Theme is highlighted in the programmes of research and study in its various Centres of Instruction. For example, among the Programme Learning Outcomes for the Centre for Education programmes is the expectation that graduates:
 - B. demonstrate sound pedagogical knowledge to design culturally relevant instruction
 - C. cater for student diversity within the national context
 - D. adapt to the dynamics of different learning environments
 - E. create awareness of sustainable environment
 - F. assess the impact of globalization on teachers, students and schools
- 4. Specifically at UTT, the Centre for Education offers programmes for the Certificate in Early Childhood Care and Education and the Bachelor of Education with specialisations in Primary Education, Special Needs and Primary Education and Early Childhood Education.

Both of these programmes include courses in Health and Family Life Education (HFLE), History, Contemporary Issues in Education and inclusivity studies through a Survey of Exceptionalities. The programme has also made a foreign language a compulsory study to promote cooperation with the Latin countries that are on the border

- 5. The UTT Education programmes also mention ESD themes specifically in Geography and Science Courses at all levels from:
 - A. Pre-Primary in the ECCE Programme - Thinking scientifically;
 - B. Bachelor of Education Primary and Secondary Teacher Preparation – Social Studies, Science

Other UTT Bachelor, Diploma and Masters Programmes promote ESD themes including the – Marine Sciences, Engineering, Environmental Sciences, and Geological Sciences.

- 6. Act No 77 of 2000 establishes the College of Science, Technology and Applied Arts of Trinidad and Tobago (COSTAATT) as a body corporate with its objectives being to:
 - (a) contribute to national and regional development, social equity and the development of civil society by providing broad-based access to socially responsive and innovative educational programmes and by encouraging scholarly work and applied research;
 - (b) provide programmes that meet internationally acceptable standards, to foster professional and personal development, to prepare students for careers and for advanced study in the areas of science, technology and applied arts;
 - (c) promote a culture of excellence by creating and maintaining an academic climate that fosters innovation, discipline, tolerance of diversity, criticism, self evaluation and peer assessment;
 - (d) promote cross-cultural understanding and mutual respect among peoples;
 - (e) strive to be a centre of excellence for scholarly work and applied research.

7. COSTAATT Graduate Attributes describe the academic abilities, literacies, competencies and personal qualities that the college community agrees its students should develop, during their time with the institution. These institutional objectives are viewed as critically important for student's success in the world of work and in everyday life. The COSTAATT Graduate Attributes, which also embrace the values of GCED and ESD, represent the core attributes that are valued and developed across academic, social and professional settings. These core objectives inform the development of curriculum at the College.
8. The mechanism through which the National Training Agency (NTA) strives to quality assurance and accredit Technical and Vocational Educational and Training (TVET) providers is via a set of Quality Assurance standards or criteria. These criteria documents are used as the benchmark against which the Quality Management Systems (QMS) of TVET institutions are audited and approved under the NTA. Explicit within the criteria governing Centre Approval is the adherence to non – discriminatory and equal opportunity procedures within training institutions' recruitment, assessment and servicing.
9. National Institute of Higher Education, Research, Science and Technology (NIHERST) Strategic Plan 2020-2022, presently laid before the Ministry of Education, strategic objectives and its initiatives to achieve the goals, treat specific themes such as 2 - Gender equality, 5 -Climate change, 6 -Environmental sustainability and -Sustainable consumption and production.
10. In terms of raising awareness and the delivery of a specific body of knowledge, NIHERST has formulated several internal policies that treat specific themes such as theme 4 - peace and non-violence, as well as, theme 7- human survival and well-being, both explicitly and by inference.
11. Youth Training and Employment Partnership Programme (YTEPP) Limited operates at the tertiary level as a technical and vocational education institution and is generally committed to the tenets of global citizenship education (GCED) and education for sustainable development (ESD). The institution does not have specific strategic objectives that target GCED and ESD, however, it maintains an Equal Opportunity Policy which speaks to 3 of the outlined themes of global citizenship and education for sustainable development.

Details are provided below:

A. cultural diversity and tolerance- YTEPP Limited does not have a specific diversity strategy however, the Institution maintains its established Equal Opportunity Policy in all of its programmes.

B. gender equality education - YTEPP Limited does not have a specific gender strategy however, the Institution maintains its established Equal Opportunity Policy in all of its programmes.

C. human rights education - YTEPP Limited does not have a specific human rights strategy however, the Institution maintains its established Equal Opportunity Policy in all of its programmes.

12. University of the West Indies (UWI) - The vision and mission of UWI articulate the promotion of global citizenship education. Also entrenched in the strategic action plan is Education for sustainable development. The School of Education has developed new strategic areas to ensure that the SDGs can be realised. Across courses at UWI, there are specific modules/topics that address various aspects of the GCED, albeit with varying degrees of depth. In some cases, certain themes are explicitly outlined/explored within course assessments and/or projects to deepen students' knowledge and competencies in related areas. In other courses, some themes remain implicitly addressed as a reference point or as further areas for examination.

A3b. **Please provide the full names of any education policies, frameworks or strategic objectives referred to in A3a and, where possible, web links to relevant documents.**

1. Draft Education Policy Paper 2017- 2022: <https://www.moe.gov.tt/education-policy-paper-2017-2022/>

2. Strategic Plan for UTT
3. Validation documents for various UTT programmes
4. Republic of Trinidad and Tobago: Act No 77 of 2000:
<http://www.ttparliament.org/legislations/a2000-77.pdf>
5. COSTAATT Graduate Attributes: **see attachment.**
6. NTA Criteria for Operating a Workforce Assessment Centre
7. NTA Criteria for Centre Approval
8. NIHERST Strategic Plan 2020-2022 “Enabling Society through Science and Innovation”.
9. NIHERST Internal and External Communication – treats theme 4: peace and non-violence
10. NIHERST has Several HSE Policies namely Disaster Management Policy for ICT, Disaster Management/Response and Recovery Policy (General) treat theme 7: human survival and well-being.
11. YTEPP Limited’s approved Equal Opportunity Policy which speaks to 3 of the outlined themes of global citizenship and education for sustainable development – namely:
 - Cultural diversity and tolerance
 - Gender equality
 - Human rights

The Equal Opportunity Policy states:

“YTEPP Limited is committed to promoting equal opportunity in its provision of training in recognition of the principles of equity and social justice and in conforming to the spirit and intent of the equal opportunity and anti-discrimination legislation.

YTEPP Limited recognizes the rights of individuals and groups to be free from discrimination on the grounds of:

- Race
- Colour
- National Origin
- Gender
- Ethnicity
- Disabling Conditions
- Geographic Location
- Religious or Political Beliefs
- Sexuality or Sexual Orientation
- Social and Economic Status
- Marital Status”

The full policy can be found at https://yteppedu-my.sharepoint.com/:w:/g/personal/avabj_ytepp_edu_tt/EVhsFLaz1b1PmdUIwRAueIYB0iIZfuleC5d9yJ-tM4clA?e=bOlhd8

The established Equal Opportunity Policy guides all of our interactions with our stakeholders including beneficiaries and staff. With respect to beneficiaries, this policy guides all processes including recruitment, registration, teaching and learning, trainee support, assessment, and certification.

In addition, YTEPP Limited addresses these thematic issues in its more recently developed specialized programmes at its Woodford Lodge Campus where curriculum design and implementation took these issues into consideration.

These issues are also touched on in the institution's Life Skills and Career Enhancement curricula. These courses are geared toward building employability skills and include content intended to develop interpersonal and intrapersonal skills that lend themselves to developing inclusivity perspectives.

12. UWI - The UWI has started reviewing its strategic priorities to ensure that they enhance their global reach, and Education for sustainable development is achieved. The creation of the Research, Evaluation and Outreach Unit and UWI Psychoeducational Diagnostic and Intervention Clinic are timely to facilitate the realisation of strategic objectives.
<https://youtu.be/Nu1vKPmiU3Y>

13. There is no specific policy that outlines a thematic approach to existing curricula or institutional practice at UWI. However, many of the themes within the GCED are both implicitly and explicitly explored across various faculties, departments and within specific courses. Many of these courses and the relevant descriptions are available within the undergraduate (<https://sta.uwi.edu/resources/documents/facultybooklets/SocsciUndergrad.pdf>) and post graduate (<https://sta.uwi.edu/resources/documents/facultybooklets/2020/PG-FSS-2020-2021.pdf>) handbook for the Faculty of Social Sciences.

*A4. Please indicate which GCED and ESD themes are covered in national or sub-national education policies, frameworks or strategic objectives affecting each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	1	1	1
2. Gender equality	1	1	1	1
3. Human rights	1	1	1	1
4. Peace and non-violence	1	1	1	1
5. Climate change	1	1	1	1
6. Environmental sustainability	1	1	1	1
7. Human survival and well-being	1	1	1	1
8. Sustainable consumption and production	0	1	1	1

*A5 Please indicate whether national or sub-national education policies, frameworks or strategic objectives on education provide a mandate to integrate GCED and ESD in the following areas by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown, 99 = not applicable (e.g. where the given level of government is not responsible for education)

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
National				
Design or revision of the curricula			0	0
Setting of programme learning objectives			1	0
Textbook development			0	0
Teacher education and training			1	0
Assessment of student outcomes			0	0
Sub-national				
Design or revision of the curricula			1	1
Setting of programme learning objectives			1	1
Textbook development			99	0
Teacher education and training			1	9
Assessment of student outcomes			1	1

B. Curriculum (paras 4 and 10-19 of the *1974 Recommendation*)

B1a. Please describe in which ways GCED and ESD are mainstreamed in school curricula. Indicate whether topics are taught as standalone subjects or are integrated into the curricula of other subjects. Explain whether GCED and/or ESD themes³ are mentioned explicitly or are inferred and what types or levels of education are covered.

Early Childhood Care and Education (ECCE)

The ECCE Curriculum is designed according to five strands:

1. Wellness
2. Effective Communication
3. Aesthetic Expression
4. Intellectual Empowerment
5. Citizenship

The curriculum is integrated so that children's learning in all areas occurs primarily through the in-depth explorations of themes and projects, which are organized in such a way that they cut across subject matter lines, bringing together various aspects of the curriculum into meaningful association.

Primary and Secondary

Integrated into the curricula of other subjects.

³ See the schema described in paragraph 11 of Section II of these guidelines.

Some of the themes are explicitly stated at the Primary and secondary levels

Post-Secondary Non-Tertiary and Tertiary

1. At MIC-IT, a Lifeskills component is integrated into the main programme delivery. The topics covered include overall themes such as personal development, mature relationships, citizenship, community involvement, etc.
2. These themes are integrated in UTT's preparation for teachers at the Pre-school and Primary school level.
3. Specific programmes of study at UTT are designed for Tertiary students with specific courses for areas of Environmental Sustainability. The Global Citizens education themes are integrated in several courses for the preparation of teachers – Survey of exceptionalities, HFLE Education, Social Studies, Contemporary Issues
4. GCED and ESD objectives may be taught in standalone courses in specific discipline areas or integrated in the curricula of other subjects across COSTAATT.
5. Generally the identified GCED and ESD themes are infused in the curricula of particular courses but are not mentioned explicitly as GCED and ESD initiatives. The details for the various themes are listed below:

1. cultural diversity and tolerance	YTEPP Limited, in collaboration with corporate partners has, for the past six years, conducted computer literacy training that is dedicated to the needs of the differently abled through one of its mobile computer training units; teaching and learning activities are managed by an instructor who is certified to manage learning for special education groups. Additionally, the general idea of diversity and tolerance is engaged in the design of curricula that takes into consideration and includes the needs of persons with diverse characteristics. To this end, the institution encourages and has enrolled, trained and certified persons with varying levels of disability.
2. gender equality education	YTEPP Limited participated in the Caribbean Education for Employment Project (CEfE) from 2014 to 2018 and was able to establish its Institute of Cosmetology (IOC) as a centre of excellence for that occupational area in the region. One of the underlying themes in that project was gender mainstreaming. As a result of our participation in that project, YTEPP Limited conducted a gender sensitivity assessment and instituted policies and practices to effect equality attitudes and practices institution wide but in particular in our operations at the IOC. Our intention is to facilitate transformation of gender perspectives in the cosmetology sector. Also coming out of that project, YTEPP Limited reviewed its Life Skills and Career Enhancement curricula to more comprehensively address gender-related issues in the work place in particular and in interpersonal relations in general.
3. human rights education	This area is not addressed specifically in formal curricula, however, human rights values regarding equality and non-discrimination underlie the institution's Equal Opportunity Policy which guides all of our operations.
4. peace and non-violence	This area is not addressed specifically in formal curricula, however, peace and peace-building, mediation, conflict prevention and resolution, non-violence, reconciliation and living together peacefully

	are the underlying approaches that guide the interpersonal relations content in our Life Skills and Career Enhancement courses.
5. climate change education	This area is not addressed specifically in formal curricula.
6. environmental sustainability	This area, as a component of the CEfE project, was subject to much work at YTEPP Limited. The institution, as part of the project, conducted an environmental sustainability assessment and introduced institution-wide initiatives to reduce, recycle and reuse resources. In addition the construction and implementation of our IOC practices are in place to promote environmental sustainability and health .
7. human survival and well-being	This area is not addressed specifically in formal curricula but is an underlying theme for environmental sustainability.
8. sustainable consumption and production	This area is not addressed specifically in formal curricula but is an underlying theme for environmental sustainability.

6. At UWI, the Health and Family Life Education (HFLE) Curriculum is integrated into all subject areas. This is necessary because the life skills approach is used. This approach focuses on Education for Sustainable Development as it prepares people to become active citizens who can make a valuable contribution to society.

7. Theme 1 and 2 are covered within the following courses at UWI:

SOCI 2010-Anthropology I
 SOCI 2031-Anthropology II
 SOCI 3029-Caribbean Social Structure I
 SOCI 2022-Social Gerontology
 SOWK-Disability Studies
 SOCI 3019-Social Policy Analysis

Themes 3 and 4 are embedded within the following courses at UWI:

SOCI 2030-Social Development policy
 CRMJ 6004-Terrorism & Political Violence
 CRMJ 6005-Victims of Crimes: Rights and Welfare
 CRMJ 6011: Restorative Justice
 SOWK 6014-Communication, Culture and Conflict
 SOWK 6017-Conflict Resolution: Theory and Approaches

8. GCED themes are overtly mentioned in program development objectives and in the objective of a broad cross section of courses in Literary Cultural And Communication studies at UWI.

B1b. Please provide examples of curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents.

Early Childhood Care and Education

<https://web.oas.org/childhood/EN/Lists/Recursos%20%20Planes%20Nacionales/Attachments/141/6.%20National%20Early%20Childhood%20Care%20and%20Education%20Curriculum%20Guide.pdf>

Primary and Secondary

Social Studies, Health and Family Life Education, Geography, Values Character and Citizenship Education, English Language Arts (primary and secondary).

Primary curriculum guides: <https://www.moe.gov.tt/curriculum-guides/>

Secondary curriculum guides: <https://www.moe.gov.tt/secondary-3/>

Post-Secondary, Non-Tertiary and Tertiary

1. Validation documents for various UTT programmes
2. FYEC 100 First Year Experience Course at COSTAATT– includes topics on: individual social responsibility, appreciating human diversity, environmental citizenship and sustainable development, the ecological footprint and climate change, and appreciating biodiversity.
3. Objectives are also integrated in curricula in discipline areas such criminal justice, sociology, social work, psychology, early childhood care and education, and environmental studies. Specifically, these objectives may be integrated in courses that are focussed on gender studies, environmental management, terrorism, constitutional law, and community policing courses at COSTAATT.
4. GCED and ESD issues are indirectly addressed in YTEPP Limited employability skills development courses – Life Skills and Career Enhancement. As October 2020, these two courses have been merged. The new course is now offered in an online format; the GCED and ESD related content in the new course is detailed below.

Life Skills Module Overview

Gender Roles & Parenting Strategies

- Sex and Gender - Cultural Stereotypes
- Changing Gender Roles – In the 21st Century, Issues relating to Gender,
- Parenting – Permissive Parenting, Uninvolved Parenting, Authoritarian Parenting, Authoritative Parenting, Parenting Styles in a Nutshell, The Recommended Parenting Approach
- Self-Reflection
- Summary

Understanding My Environment

- Understanding the Environment
- Practicing sustainable development principles in the workplace and at home
- Causes and effects of climate change – political, economic, social, technological, legal, environment.
- Self-Reflection

Patriotism

- Icebreaker Activity: I'm Trinbagonian
- The Concept of Patriotism
- Why patriotism is important to you?
- Attributes of a patriotic citizen
- Our culture
- Community Service Project

- Self-Reflection

Healthy Lifestyles

- The Joy of Living
- Life Choices
- Balanced Diet – What we eat, Food Group Servings, A 2000 Calorie Diet
- Exercise and Body Type – Three Body Types, Ectomorph Body Type, Mesomorph Body Type, Endomorph Body Type, Know Your Body Type
- Self-Reflection

With respect to our occupational skills courses, please note the following:

- Aesthetics, conducted at our IOC, Module B.4 Use environmentally sustainable work practices and techniques in the disposal of salon implements and materials.
- All courses conducted at our IOC have environmentally sustainable practices embedded in the practice, and trainees are expected to incorporate these in their daily practices such as in disposal of waste, plastics and chemicals
- Agricultural courses (including Tilapia and Crop Production) include environmentally sustainable practices as guided by their relevant Standards. For example, Unit 1 of the Occupational Standard outlines the following

- 1.7 Contain and dispose of waste according to organizational procedures,
- 1.8 Work in a manner which minimises damage to the environment, self and others

which is incorporated into the course guide. In addition, under environmental sustainability in the Crop production Course for example, is the safe use, storage and disposal of chemicals (for example, fertilizers). This is covered under the Unit, Maintain Health of Crops

- All courses developed through YTEPP Limited's collaborations under the CEfE Project (IOC and Automotive Technician) have had gender sensitive language included and observe cultural diversity, in keeping with the GCED and EDS themes. For example, the Element, Communicate in the Workplace from the Beauty Therapy Standard includes:
5. "3 Communicate with customers and colleagues from diverse backgrounds 3.1 Treat customers and colleagues with respect and sensitivity according to salon policies and procedures 3.2 Consider cultural differences in all verbal and non-verbal communication according to salon policies and procedures 3.3 Use gestures or simple words to communicate where language barriers exist according to salon policies and procedures 3.4 Obtain assistance from colleagues or supervisors when required according to salon policies and procedures".
 6. The CARICOM HFLE curriculum is designed to facilitate the mainstreaming of GCED and ESD. UNESCO has also supported the delivery of HFLE. At the School of Education (UWI), HFLE is taught as a stand-alone course in the Youth Guidance Programme, and it is infused in other programmes, such as the Post Graduate Diploma in Education. <https://sta.uwi.edu/fhe/education/youthguidance>.

***B2** Please indicate which GCED and ESD themes are taught as part of the curriculum at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	1	1	1
2. Gender equality	1	1	1	1
3. Human rights	1	1	1	1
4. Peace and non-violence	1	1	1	1
5. Climate change	1	1	1	1
6. Environmental sustainability	1	1	1	1
7. Human survival and well-being	1	1	1	1
8. Sustainable consumption and production	1	1	1	1

***B3** Please indicate in which subjects or fields of study GCED and ESD are taught in primary and secondary education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Cultural diversity and tolerance	Gender equality	Human rights	Peace and non-violence	Climate change	Environmental sustainability	Human survival and well-being	Sustainable consumption and production
Arts								
Civics, civil or citizenship education	1		1	1				
Ethics/moral studies								
Geography					1	1		1
Health, physical education and sports								
History	1		1					
Languages	1	1	1	1	1	1	1	1
Mathematics								
Religious education	1		1	1				
Science								1
Social studies	1	1	1	1	1	1	1	
Integrated studies								
HFLE								
Agricultural Science								1

***B4** Please indicate the approaches used to teach GCED and ESD in primary and secondary education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Global citizenship and education for sustainable development
GCED/ESD are taught as separate subject(s)	
Cross-curriculum approach (e.g. <i>GCED/ESD are taught in more than one subject but not throughout the curriculum</i>)	1
Integrated approach (e.g. <i>GCED/ESD are taught throughout the whole curriculum</i>)	
Whole school approach (e.g. <i>GCED/ESD are integrated in the school ethos, management, governance, curriculum, teacher training, teaching practices, the learning environment and in learning experiences in the community and life outside school</i>)	0

B5 Please indicate which human rights education themes are taught as part of the curriculum at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
3. Human rights education	1			
3.1 equality and non-discrimination based on race, colour, language, religion, disability, political or other opinion, national or social origin, birth or other status	1	1	1	1
3.2 human rights values, human dignity, justice, inclusion and participation	1	1	1	1
3.3 respect for human rights and fundamental freedoms (as outlined in international conventions and declarations)	1	1	1	1

C. Teacher education (including the training of trainers and educators) (paras 4 and 33-37 of the *1974 Recommendation*)

C1a. Please describe in which ways GCED and ESD are mainstreamed in initial training and in continuing professional development of teachers, trainers and educators. Indicate whether all teachers, trainers and educators or only some are required to receive training to teach GCED and/or ESD.

Early Childhood Care and Education

Each Administrator/ Teacher and Teacher at all Government and Government Assisted ECCE centres is well qualified. These officers hold either a Bachelor's degree in Education (B.Ed.) in ECCE or a Master's degree in Education (M.Ed.) in ECCE, while the Teacher Assistants and Auxiliary members of staff possess either a Certificate or a Bachelor's degree in ECCE. These are obtained from accredited Universities.

The ECCE Division conducts continuous professional development throughout the year for both private and public sector staff to ensure that the delivery of quality services within the ECCE sector is maintained in keeping with GCED.

Primary and Secondary:

In alignment with the overarching goal of education: "Ensuring inclusive and quality education for all and promote lifelong learning". The Teacher Education, Performance and Professional Development Division of the MOE, ensures that all educators entering into the education system are equipped with training which informs them of their role and responsibility as an educator, as well as, respective methodologies and pedagogies for inclusive and effective education for effective student achievement. All educators are required to undergo a two (2) year induction in-service programme where these topics are highlighted with regard to the role of the educator.

Post-Secondary, Non-Tertiary and Tertiary

1. During the period 2017 – 2018, the NTA's National Life Skills Unit coordinated and guided training institutions in the execution and delivery of the National Life Skills Education Programme at the post-secondary level (16+), using the standardized National Life Skills curriculum and workbook. This programme is designed to build positive and noble character, confidence, enthusiasm and discipline in citizens for the advancement of Trinidad and Tobago.
2. YTEPP Limited conducts 1 – 3 day workshops on areas of concern with trainers at the beginning of each teaching period, it does not engage in teacher preparation or professional development. However, the institution encourages its trainers to avail themselves of professional development opportunities that are conducted by the National Training Agency of Trinidad and Tobago and other approved institutions.
3. In 2020, COSTAATT developed a Train the Trainer Certificate programme, which is currently under review by the College's quality assurance in teaching and learning mechanisms. When implemented, all teachers at the College will be required to undertake this certificate programme. The programme encompasses elements of the GCED and/or ESD goals including: cultural diversity and tolerance, gender equality education, human rights education, environmental sustainability, and human survival and well-being.

4. At UTT All Teacher preparation for Pre-Primary (ECCE) and the Primary School Teachers are required to receive training in Courses that integrate GCED and ESD.

A. GCED

- i. Contemporary Issues in Education
- ii. Social Studies
- iii. Health and Family Life Education
- iv. Alternative Dispute Resolution
- v. Citizenship Education
- vi. Foreign Language study - Spanish

B. ESD

- i. Science Education
- ii. Social Studies
- iii. Agricultural Science

5. At the School of Education at UWI, teacher training is paramount. The School recognises that to have a competitive advantage; there is the need to reposition to ensure that GCED and ESD are mainstreamed. Consequently, there is a shift towards revising programmes to ensure that GCED and ESD are mainstreamed. This is also necessary to bring the School of Education at the forefront of Education and Training, and it will be the institution of choice for persons who require training.

6. Numerous faculties and departments at UWI, while not directly involved in teacher training, through multidisciplinary programme offerings, shape knowledge attitudes and approaches to subject area teachers. Many of UWI's students become teachers at the primary and secondary levels. A number of core courses are offered for teachers who specialize in specific areas, e.g. Social Studies (High School) and Sociology (Advance Levels). There are two electives (sociology of Education I and II) which give students a critical sense of the educational environment and that treat with issues of social stratification, inequalities, diversity, inclusion and human rights. The course also delves into issues of professionalism, assessment and social change. Some staff members are also involved in the training of teachers via professional development workshops that touch on critical areas of the environment, population, social stratification.

C1b. Please provide examples of teacher training policies or curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents. If possible, include examples related to initial training and to continuing professional development.

Early Childhood Care and Education

Professional development sessions are designed towards the holistic development of reflexive professionals who are sensitive to the need to combine caring and advocacy with school and classroom management skills, effective leadership, and information and communication technology in creating appropriate learning opportunities for all children.

Primary and Secondary:

See:

- “Draft Education Policy Paper 2017-2022”
- Inclusive Policy in Education 2018

Post-Secondary, Non-Tertiary and Tertiary

1. GCED and/or ESD goals are included in the COSTAATT Train the Trainer Certificate and the programmes in Early Childhood Care and Education (ECCE) at the certificate, associate and bachelor's levels.
2. Validation documents for various UTT programmes.
3. The revised programmes and new programmes at UWI, for example, the revised MA of Arts in Leadership in Technical Vocational Education and Training, the new M.Ed. in STEM Education are examples of the latest programmes that have infused GCED and ESD in many of the courses. (websites are not yet available because they are still going through the approval process). The other programmes older than five years are now being reviewed, and GCED and ESD will be infused in all of the courses.

***C2** Please indicate whether teachers, trainers and educators are trained to teach GCED and ESD during initial or pre-service training and/or through continuing professional development. Please enter the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Initial or pre-service training				
For teachers of selected subjects only (in which GCED or ESD are typically taught)	9	1	1	1
For teachers of other subjects	9	1	1	1
Continuing professional development				
For teachers of selected subjects only (in which GCED or ESD are typically taught)	9	1	1	1
For teachers of other subjects	9	1	9	1

***C3** Please indicate on which GCED and ESD themes pre-service or in-service training is available for teachers, trainers and educators at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	1	1	1
2. Gender equality	1	1	1	1
3. Human rights	1	1	1	1
4. Peace and non-violence	1	9	1	1
5. Climate change	1	1	1	0
6. Environmental sustainability	1	1	1	0
7. Human survival and well-being	1	1	1	0
8. Sustainable consumption and production	1	9	1	0

*C4 Please indicate whether teachers, trainers and educators are trained to teach the following dimensions of learning in GCED and ESD. Please enter the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Knowledge	1	1	1	1
Skills	1	1	1	1
Values	1	1	1	1
Attitudes and behaviours	1	1	1	1

*C5 Please indicate whether teachers, trainers and educators are trained to use the following approaches to teach GCED and ESD in primary and secondary education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Global citizenship and education for sustainable development
GCED/ESD are taught as separate subject(s)	0
Cross curriculum approach (e.g. GCED/ESD are taught in more than one subject but not throughout the curriculum)	1
Integrated approach (e.g. GCED/ESD are taught throughout the whole curriculum)	1
Whole school approach (e.g. GCED/ESD are integrated in the school ethos, management, governance, curriculum, teacher training, teaching practices, the learning environment, and in learning experiences in the community and life outside school)	1

D. Student assessment (paras 4 and 5 of the 1974 Recommendation)

D1a. Please describe in which ways GCED and ESD are covered in student assessments and examinations. Indicate whether students are assessed only on their knowledge of and skills related to the topics being tested or also on their values, attitudes and/or behaviours.

Early Childhood Care and Education

Authentic assessments are used to evaluate young children's growth and development and flows directly from the experiences in which they have been engaged.

Primary and Secondary:

Knowledge, values, attitudes/behaviours are assessed

Post-Secondary, Non-Tertiary and Tertiary

1. Examinations, Agricultural Science Projects, Projects in the communities, Practicum in the schools (UTT)
2. For all programmes offered at COSTAATT, students learning outcomes are developed based on Bloom's domains of educational objectives. Consequently, achievement of

student learning outcomes is determined by assessing knowledge and skills in the discipline area, as well as values, attitudes and/or behaviours.

3. The Revised Life Skills Course addresses select GCED and ESD issues. The course is implemented online through the YTEPP Moodle learning management platform. Assessments are conducted in the online environment utilizing ICT to assess learning particularly in the cognitive and affective domains. In some cases, beneficiaries are also required to conduct practical exercises and submit reports, thus targeting the psychomotor domain as well. The assessments for the related modules in the curriculum are detailed below:

Gender Roles & Parenting Strategies

In order to receive a Gender Awareness Badge at the end of the module candidates are required to complete the following assignments:

- Complete the Sex Vs Gender Quiz
- Research a recent article on changing gender roles
- Analyse a comic case study

Understanding my Environment

Candidates must complete the following

- Online Quiz: Evidence of Pollution
- Discussion Forum: Let's Discuss - Pollution Prevention
- Energizer Forum: Research assignment
- ePortfolio submissions

Patriotism

Candidates must complete the following:

- Discussion Forum: Do you know the National Anthem?
- I'm a Trinbagonian Quiz:
- Patriotic Word Search
- Cultural Linkage Exercise
- ePortfolio Activity
- Community Service Proposal Form
- Community Service Report

Healthy Lifestyles

Candidates must complete the following:

- Discussion Forum: The Joy of My Life
- Group Activity: Identify and describe five (5) types of exercise
- ePortfolio: Complete the food journal or PDF copy of Health and Fitness apps (Lose It! or Samsung Health) activity, tracking your meal and snack intake for seven (7) days

4. At UWI this varies by courses. In some courses, lecturers test across cognitive, affective and behavioural domains. The type of assessment is also tied to the specific objectives of the course. Increasingly student assessments at UWI are including reflective papers which assess synthesis of knowledge offered in relation to GCED and applicability to their lives and decision-making processes. In addition, the focus on access and appraising real life primary data is driving greater fine appreciation of ethical, judicial and inclusionary imperatives

*D2 Please indicate whether the GCED and ESD themes below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	1	1	1
2. Gender equality	1	1	1	1
3. Human rights	1	1	1	1
4. Peace and non-violence	1	1	1	1
5. Climate change	1	1	1	1
6. Environmental sustainability	1	1	1	1
7. Human survival and well-being	1	1	1	1
8. Sustainable consumption and production	1	1	1	9

*D3 Please indicate which of the dimensions of learning in GCED and ESD below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Knowledge	1	1	1	1
Skills	1	1	1	1
Values	1	1	1	1
Attitudes and behaviours	1	1	1	1

E. Mainstreaming of GCED and ESD in laws and policies, curricula, teacher education and student assessment (paras 4-5, 7, 10-19 and 33-37 of the 1974 Recommendation)

*E1 Based on your responses to questions in the previous four sections (laws and policies, curricula, teacher education and student assessment) please indicate to what extent global citizenship education (GCED) and education for sustainable development (ESD) are mainstreamed⁴ in (a) education laws and policies, (b) curricula (c) teacher education (including the training of trainers and educators) and (d) student assessment in your country. Please enter the appropriate number in each white cell in the table below.

KEY:

0 Not at all

GCED and ESD are not mainstreamed.

1 Partially

Some GCED and/or ESD themes⁵ are mainstreamed. Select this option if GCED is mainstreamed but ESD is not (or vice versa).

2 Extensively

Most GCED and ESD themes are mainstreamed.

9 Not known

It is not known whether GCED and ESD are mainstreamed or not.

99 Not applicable

The given level of government does not have responsibility for the given component (policies, curricula, teacher education or student assessment) and/or does not have responsibility for the given level or type of education. This may occur at the national level in federal countries where education is the responsibility of individual states or at the sub-national level in small countries where there is only one level of government.

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
National				
(a) Education laws and policies	2		1	1
(b) Curricula	2		1	2
(c) Teacher education	2		1	9
(d) Student assessment	2		1	9
Sub-national				
(a) Education laws and policies			1	1
(b) Curricula			2	1
(c) Teacher education			2	9
(d) Student assessment			1	1

⁴ GCED and ESD are mainstreamed if their themes are mentioned explicitly in relevant documents and are expected to be implemented by the relevant authorities (e.g. Ministries, regional or local education authorities), educational institutions (e.g. schools, colleges and universities) and/or education professionals (e.g. teachers, lecturers, trainers and educators) as appropriate.

⁵ Refer to the schema in paragraph 11 of Section II of these guidelines.

F. Technical and vocational education and training (paras 25-29 of the 1974 Recommendation)

F1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in technical and vocational education and training. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

1. There has been no specific initiative to promote GCED and/or ESD in TVET at MIC-IT except for the general mandate of the programme.
2. The NTA hosted a TVET Webinar titled “Sustainable Development in TVET” on Wednesday 21st November, 2018. This webinar exposed viewers to ways to:
 - Integrate sustainable development concepts into TVET courses and programmes;
 - Adopt sustainability practices within institutions; and
 - Analyse existing curricula and typical working processes in specific occupational sectors, to identify significant learning and working situations that are highly relevant for sustainable development.

The NTA additionally hosted an online presentation on “Women in TVET Entrepreneurship” on 3rd November 2020. The presentation exposed the audience to:

Ways women are empowered through TVET entrepreneurship

How access can be gained by women for programmes in TVET

Insights from successful women in TVET entrepreneurship

3. YTEPP Limited’s participation in the CEfE project was a major driver for the infusion of diversity and environmental sustainability perspectives into the operations of the institution. The intended outcomes of this project included:
 - Output #8 – Strategies developed and implemented for gender mainstreaming in the program and in graduate employment.
 - Output #9 – Environmental and community issues addressed across the new or renewed program.
 - Output #10 – Curriculum modules created and in use specifically related to entrepreneurship, gender and the environment.

In the project evaluation, all of these objectives were met, and have been maintained since the completion of the project.

Our IOC has had at least 2 (out of 32) male applicants of our hairdressing and esthetics programmes since inception (2016), and in our general cosmetology programmes, our barbering programmes have included female trainees at least 30% enrolment.

1. The UWI’s School of Education has two TVET programmes to date. The MA in Leadership in TVET and Workforce Development and the Post Graduate Diploma in Competency-Based Education for TVET instructors. Both programmes promote GCED and ESD. The SDCs are central cogs in both programmes. The students have presented

at conferences on the importance of the SDGs in TVET. During the internship, the MA students must ensure the ESD is the focus.

G. Adult education (para 30 of the 1974 Recommendation)

G1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in adult education and other forms of non-formal education including youth education, out-of-school education, etc. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

1. There has been no specific initiative to promote GCED and/or ESD in TVET at MIC-IT except for the general mandate of the programme.
2. Since opening its doors in 1998, the NIHERST National Science Centre (NSC) has supported the following themes under education for sustainable development (ESD): (i) Gender equality (ii) Climate change education, (iii) environmental sustainability, (iv) human survival and well-being and (v) sustainable consumption and production, via the following avenues:

A. Year-round learning opportunities via its Visitor and Outreach Programme

Annually, over 20,000 visitors and outreach participants interact with thematic exhibit areas which focus on the aforementioned themes. At the Raging Planet exhibit, persons explore natural disasters, disaster risks and preparedness and understand the impact of global warming and climate change on the occurrence and severity of some of these hazards. In the area of Renewable Energy Technologies, persons explore and participate in hands-on, interactive activities that build awareness of resource and energy efficiency and products and services that have a minimal adverse impact on the environment. Over the years, a variety of topics have been additionally explored through activities conducted with visitors and participants such as include biodiversity, water conservation and environmental protection. Persons are encouraged to improve and demonstrate responsible behaviours that put Earth on a more sustainable path.

B. Out-of-school Youth Programmes

- (1) **iSTEM Club:** Formerly known as Science Club, the iSTEM Club was rebranded and launched in 2018 not only to provide Since then, for one term out of each academic year focusses on a theme under ESD.
 - a. During the 2018/2019 academic year: **Term 2: Water-Food-Energy Nexus**
63 members explored the connections between water, food and energy and investigated applications and opportunities for sustaining and enhancing the nexus, within the context of the Caribbean.
 - b. During the 2019/2020 academic year: **Term 2: Engineering Our Existence**
77 members explored a variety of STEM topics such as civil engineering, manufacturing, energy, sustainability and materials science, within the context of the Caribbean. The term was cut short by the the GORTT's instruction to close schools as part of T&T's COVID-19 risk mitigation strategy.
- (2) **Caribbean Youth Science Forum (CYSF):** This forum is aimed at developing the next generation of S&T professionals from the region whose knowledge and skills contribute to the improvement of society. Participants leave with greater capacity for problem-solving using scientific methodologies and have greater knowledge of the diverse careers in STI. The programme contributes to a knowledge-driven economy through provision of academic and social activities that facilitate the development of 21st century skills.

Themes under ESD such as green architecture, renewable energy technologies, energy management, global warming and climate change, disaster risk management using GIS mapping technology, biodiversity, sustainable agriculture and food production, and many more topics have been presented and explored over sixteen (16) instalments of the forum from 1999-2017.

CYSF provided its alumni of over 2,300 Caribbean STEM students with the opportunities to discuss issues in Science and Technology (S&T), develop networks with students in other countries, and interact with eminent regional and international scientists. Participants were encouraged to pursue careers in STEM fields and the experience fostered cooperation among Caribbean countries in S&T popularisation. Students participated in academic lectures and workshops, field trips, a problem-solving challenge, debates, and a myriad of complementary social activities over each instalment of the 8-day forum.

C. Thematic Science Weeks and UN Observances

Science Weeks aimed to present informal science education provided visitors with a better grasp of science concepts, processes and issues through simulation, experimentation, demonstrations, workshops and exhibits. More recently, displays and age-appropriate activities were developed to highlight and celebrate the universality of the aforementioned ESD themes during the following events:

- (1) Held from 3rd – 8th June 2019, the Environment and Oceans Science Week commemorated the observance of United Nations' (UN) World Environment Day and UN World Oceans Day. Visitors explored both themes and relevance of protecting the environment and preservation of oceanic ecosystems to local and regional practice and sustainability. 149 tours (117 families, 7 preschools, 17 primary schools, 8 secondary schools) were conducted for the 1,715 persons who visited the Centre to participate in the activities. Visitors' feedback reported that the objectives were achieved, and that exposure gained was meaningful. The responses indicated as follows:
 - Of the student population, 88.0% indicated that they were more interested in science with 82.0% indicating increased confidence towards studying science; 91.6% desire for science in school to be as fun and interactive as delivered during the tour
 - 97.3% of adults were satisfied with their tours with 86.4% indicating increased interest in science, 89.1% expressing increased confidence towards science and 87.3% desiring to learn more
 - 88.8% of visitors (both children and adults) agreed that the tour brought to their attention the relevance of science in everyday life with 95.3% indicating their learned something new; 95.3% would recommend the experience to others with 94.2% desiring to visit the NSC in the future
 - Regarding the development of 21st century learning and innovation skills, visitors 13 years and older agreed that they were given opportunities to practise their skills: oral and written communication (74.4%), teamwork and collaboration (82.9%), problem solving (82.9%), critical thinking (82.3%), and creativity and innovation (89.0%)
- (2) UN World Water Day was observed between 2nd -7th March 2020 via the Water and Climate Change Action Science Week which highlighted the importance of conserving water and adjusting human habits to ensure that climate change goals are met. The event attracted a total of 1,837 visitors including 13 families, 6 preschools, 20 primary schools, 15 secondary schools. Visitor feedback demonstrated that the event successfully met its intended objectives:
 - 95.8% of adults, including teachers and heads of households, were satisfied with their tours with 70.8% indicating increased interest in science, while 91.7% of them

expressed increased confidence towards science and 81.3% desiring to learn more

- Of the student population, 82.1% indicated that they were more interested in science with 76.9% indicating increased confidence towards studying science; 96.6% desire for science in school to be as fun and interactive as delivered during the tour
- 90.9% of visitors (both children and adults) agreed that the tour brought to their attention the relevance of science in everyday life with 90.9% indicating their learned something new; 95.8% would recommend the experience to others with 95.8% desiring to visit the NSC in the future
- Regarding the development of 21st century learning and innovation skills, surveyed visitors agreed that they were given opportunities to practise their skills via exhibit areas and activities: Oral & written communication: 75.8%; Teamwork and collaboration: 82.1%; Problem solving: 75.8%; Critical thinking: 80%; Creativity and innovation: 82.1%

(3) International Girls in ICT: In honour of International Girls in ICT Day, NIHERST hosts over 100 female students for a series of information and communication technology (ICT) workshops and a hackathon. These events takes place in May at the NIHERST National Science Centre. Focus is on topics as Robotics, 3D Printing, Mobile App Development and Computer Construction, the sessions exposed the students to concepts such as coding and programming, and their practical applications in a range of fields. The girls learned skills such as writing code for robots and circuit boards, controlling and giving functionality to these devices. They were also challenged to create a mobile application that solves a real world problem.

Events were supported by a variety of public and private sector stakeholders that undertake work in areas of relevance to the themes.

D. **NIHERST's Environmental Solutions for Sustainable Communities programme and Resilient TnT projects** seeks to develop solutions to societal pain points by leverage innovative technologies. This Rainwater Harvesting Programme is an environmental initiative to address water scarcity in a sustainable way. To date, **eighteen (18) schools** and **four (4) community centres** across Trinidad have been equipped with RWHS installed by **NIHERST**. The introduction of safe and modern rainwater harvesting practices to these water scarce communities was seen as a viable solution and a means of self-reliance and sustainable living. The selected sites are also disaster shelters and will be especially useful to this community which may be cut off from the rest of the country after disasters like landslides and flooding. Climate change continues to exacerbate the intensity of natural disasters such as drought and flooding, rainwater harvesting systems therefore are promoted as cost effective practical steps that small island nations like Trinidad and Tobago can take towards adaptation. Members of communities learn to build technologically-improved rainwater harvesters, the science behind rainwater harvesting, maintenance procedures and entrepreneurship. Over 15 persons were trained in each community to install RWH systems and to sell this new service in and beyond their communities. It is envisioned that residents in the communities will benefit from trained personnel installing improved quality rainwater harvesting systems. At stakeholder consultations residents expressed interest in installing such a system. The programme promoted awareness of the need to conserve water and assistance in the management of freshwater as a sustainable resource, by over children and adults in each of the rural communities engaged. In the village of Cumana, seventy-eight percent (78%) of the residents felt that their knowledge on the water cycle, water conservation and RWHS had increased a lot. In the town of Barrackpore, ninety percent (90%) felt that their knowledge on the water cycle, eighty percent (80%) on water conservation and one hundred percent (100%) on RWHS had increased a lot.

Training including discussions and questions to probe livelihood opportunity for RWH and entrepreneurship. The following are examples of how the training and exposure impacted trainees and residents:

- Three trainees advanced their businesses and will utilise this RWH model, one in the use of rainwater for her ice production business, a second in opening of an elderly home in their community and other in her pastry making business.
- Trainees and residents at the stakeholder consultation envisioned utilising the model in their agricultural practices.
- Plumbers and Construction personnel trained expressed additional skills learnt in their field that will be utilised to assist residents in their and neighbouring communities.

E. **Caribbean Women in Science and their Careers:** In 2011, NIHERST launched the Caribbean Women in Science and their Careers, booklet and website. It documents and promotes public awareness of the contribution, and often pioneering efforts, of Caribbean women in various science-based and technological disciplines and professions, including medicine, engineering, and the natural sciences.

F. **NIHERST/NASA International Internship (NASA I²):** NASA continues its internship education exchange programme with NIHERST and provides national students with the opportunity to conduct research work under mentorship of a member of NASA's science and engineering workforce. Tertiary level students at the undergraduate and graduate level experienced cutting-edge research in a world-renowned environment and gained preparatory experience for STEM careers in their areas of study. Interns worked alongside international peers at the NASA Ames Research Centre in California. This project has influenced participants to pursue further research work at local institutions related to research areas pursued at NASA. To date 14 nationals have increased knowledge gains in research methodologies in novel areas of STEM and increased hands-on experience in unique scientific research fields

G. **FIRST® LEGO® LEAGUE (FLL) TRINIDAD AND TOBAGO:** NIHERST's partnership with FIRST LEGO® League (FLL) attracts over eighteen (18) teams representing a total of one hundred and thirty-eight (138) students. This is a global programme with a presence in 80 countries. Geared toward participants of 9 to 16 years (ages vary by country of participation), the programme utilises theme-based challenges to engage children in research, problem solving, and engineering. The cornerstones of the programme are its Core Values, which emphasize contributions of others, friendly competition, learning, and community involvement. Theme based challenges are based on a real-world scientific topic, this includes, water and climate change.

The feedback of coaches, participants and parents on FLL was recorded as follows:

- The majority of coaches (at least 77%) reported seeing improvement in the knowledge, skills and attitudes of team members. This included an increased understanding of how S&T could be used to solve real-world problems and an understanding of basic science principles (100%); an understanding of potential careers in S&T (85%); and increased life and workplace skills (92%-100%).
- Participants indicated an increased interest S&T, careers, and school. Most team members agreed or strongly agreed that they would like to learn more about computers and robotics (97%); learn more about S&T (96%); learn more about how S&T can be used to solve problems in the real world (95%). They also reported that they were more interested in having a job that used S&T (89%); were better at Math and Science than before (85%); and would like to become a scientist or an engineer (68%). Participants also reported that they were more interested in going to college/university and also plan on further pursuing other inventions/ideas and their team's invention – recorded as 91%, 91% and 87% respectively.
- Many parents saw positive changes with their child as a result of FLL. At least 65% of parents reported an observed increased interest of their child in S&T and in school, and 61%-83% reported positive results on their child's skills, knowledge and attitudes.

3. YTEPP Limited has conducted training in ICT for approximately 800 differently abled persons over the past 5 years on our mobile computer training unit that has been specially outfitted to service the needs of the differently abled.
4. The Research Evaluation and Outreach unit at UWI undertake many adult education programmes. These programmes are geared towards building individuals' capacity in various educational disciplines. For example, The Certificate in Leadership of TVET was delivered to the staff of National Training Authority and TVET leaders in Belize (EU funded in collaboration with the German Chamber of Commerce and GFA Consulting Group GmbH). Also, a Certificate in Sign Language was delivered to individuals who wished to become competent in Sign Language basics.

H. Research and International Co-operation (paras 41-45 of the 1974 *Recommendation*)

H1 Please describe what kinds of research or experimentation have been carried out to improve the implementation of GCED and/or ESD. Describe briefly how the results of such activities have influenced education policies, curricula and/or teaching practices.

1. YTEPP Limited has not conducted a comprehensive evaluation of its initiatives that can be related to GCED and ESD.
2. In 2018, COSTAATT undertook the exercise to review its degree programmes, core curriculum (general education) and graduate attributes. Stakeholder feedback (students, graduates, faculty, and employers) informed the revision of the College's curriculum to better align to the need of these constituents. Elements of the GCED and/or ESD global objectives would have been considered during these review exercises and integrated in the curricula as necessary.
3. Research in these areas is conducted by Faculty at UTT. The findings are reflected upon and may be incorporated to update curricula.
4. The School of Education at UWI has a long tradition on Research. Evidence-based decision making is one of the mantras of the institution. The staff conduct research on many disciplines and have presented in many international conferences and published widely. More recently, there is evidence to show the GCED and ESD are considered in their research activities. One example is the series of webinars conducted by the School of Education on various topics. It was clear that the School of Education is a trailblazer in implementing GCED and ESD in the region.

H2 Please indicate which types of activities are available that promote international co-operation at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Hosting of international meetings on GCED and/or ESD	0		1	9
Participation in international meetings abroad on GCED and/or ESD	1		1	1
Support for programmes hosting foreign students, researchers and/or teachers	0		1	1
Membership of international networks including ASPnet	1		1	9
Joint research projects on GCED and/or ESD with foreign institutions	0		1	9
Other activities (please specify):			9	9

I. Any other comments

- 11 Please indicate whether your country has faced any constraints, in particular related to global or national crises, including natural disasters, in implementing the 1974 Recommendation during the reporting period.

1. The global reduction in resource prices had restricted funding for some specialisations and projects. The Bachelor of Education secondary specialisations in History, Sociology and Geography were discontinued. These would have prepared students in tertiary level studies, projects and research in GCED and/or ESD. However, the effort continues with the Pre-primary, Primary and Special Needs specialisations. (UTT)
2. The Pandemic which began in 2020 has restricted research and outreach to communities. (UTT)
3. The School of Education at UWI has not experienced any major crisis before the pandemic. What the pandemic has done is to reorient the School of Education towards GCED to ensure that it maintains the complete advantage in Global Citizen Education.

- 12 Please provide any other relevant information or clarifications regarding the implementation of the 1974 Recommendation or the mainstreaming of GCED and ESD in your country's education system.

On the NIHERST work programme are several internal policies and projects that would treat other themes under the GCED and ESD e.g. cultural diversity and tolerance as well as, environmental sustainability. These policies and projects are yet to be initiated
