

General information:

Country: Russian Federation

Organization or institution responsible for preparing the report:

Ministry of Education of the Russian Federation

Ministry of Science and Higher Education of the Russian Federation

I. Information on legislative, judicial, administrative and other measures taken by the state at the national level

1. Ratification of the Convention [\[1\]](#)

Is your country a state party to the Convention?

Yes

No: Does your country plan to ratify this document?

Yes: Please indicate the stage of the ratification process your country has achieved:

Close to ratification

On the way to implementation

Actively preparing

- Please briefly explain the difficulties encountered in completing the ratification process and how to overcome them:

Describe:

\ obstacles, whether legal, institutional, political or practical

\ ways to overcome them and the extent to which UNESCO can assist in completing the process

No, we are not considering ratification in the near future. Please explain why:

2. Ratification of the Protocol [\[2\]](#) **providing for the establishment of a Commission of Reconciliation and Good Services, which will be responsible for resolving any disputes that may arise between States parties to the Convention against Discrimination in Education**

Has your country ratified the Protocol?

Yes

No, please briefly explain the difficulties encountered:

3. The legal framework governing the protection of the rights guaranteed in the Convention and Recommendations in the national legal system

If your country is a state party to the Convention:

- Does the Convention apply directly to your country's domestic law after ratification?

Yes Not

- If not, has it been incorporated into the national constitution or national law for direct application?

Yes Not

Information is sought here on whether the provisions of the Convention are guaranteed by an internal legal instrument. The report should list the main legal texts (Constitution, legislative act or other provisions) adopted to ensure the right to education for all and to ensure equal educational opportunities. Links, dates, and goals may be provided.

The provisions of the Convention containing the requirements for participating States to combat discrimination in the field of education (Articles 3-5 of the Convention) are reflected in the Constitution of the Russian Federation. In particular, it is guaranteed:

- equality of human and civil rights and freedoms, regardless of circumstances (including gender, nationality, language, origin, property status), any form of restricting citizens' rights on the grounds of social, racial, national, linguistic or religious affiliation is prohibited (part 2 of article 19);
- the right to free choice of the language of education and training (part 2 of article 26);
- the right to education, accessibility and free preschool, basic general and secondary vocational education in state or municipal educational institutions and enterprises, the right on a competitive basis to free higher education in a state or municipal educational institution and enterprise, compulsory basic general education, state support for various forms of education and self-education (article 43);
- freedom of teaching (part 1 of article 44);
- equal rights and obligations with citizens of the Russian Federation for foreign persons and stateless persons, except as otherwise provided by federal law or an international treaty of the Russian Federation (Part 3 of Article 62).

These rights and guarantees were developed in the Federal Law of December 29, 2012 No. 273-Φ3 "On Education in the Russian Federation" (hereinafter - the Law on Education), including the principles of state policy and legal regulation of relations in the field that correlate with the Convention education. In particular:

- recognition of the priority of education;
- ensuring the right of everyone to education, non-discrimination in the field of education;
- the protection and development of ethnocultural characteristics and traditions of the peoples of the Russian Federation in a multinational state;
- freedom of choice to receive an education according to the person's inclinations and needs, creation of conditions for self-realization of each person, free development of his abilities, including the right to choose the forms of education, forms of training, educational organization, the focus of education within the limits provided by the education system, and also providing teachers with freedom in the choice of forms of training, methods of training and education;

- autonomy of educational organizations, academic rights and freedoms of teachers and students, information transparency and public reporting of educational organizations;
- ensuring the rights of teachers, students, parents (legal representatives) of minor students to participate in the management of educational organizations;
- the inadmissibility of limiting or eliminating competition in the field of education;
- a combination of state and contractual regulation of relations in the field of education (part 1 of article 3).

- Have the provisions of the Convention been previously applied and enforced by the courts, tribunals and administrative authorities?

Yes Not

If yes, please illustrate based on available case law and case law. Information may also be provided on judicial, administrative and other competent authorities having jurisdiction over the rights guaranteed by the Convention and the scope of such competence.

II. Information on the implementation of the Convention or Recommendation

1. Non-discrimination and equal opportunities in education in the context of Sustainable Development Goal 4 (SDG 4)

Articles / paragraphs 1 (1), 2 and 3 of the Convention / Recommendations provide for non-discrimination and equal educational opportunities. This part relates to the main objective of the Convention / Recommendation, which is to emphasize the obligation of the state to prohibit any form of discrimination in education, while promoting equal educational opportunities.

*This is in line with the overall commitment to SDG 4, which aims to “**ensure inclusive and equitable quality education and promote lifelong learning opportunities for all**” by 2030. Thus, it covers all SDG 4 targets, but also SDG target 4.5.1 [\[3\]](#)*

- 1.1 Please indicate the measures your government has taken to eliminate and prevent discrimination in the field of education within the meaning of the Convention / Recommendation (check all that apply) [\[4\]](#) (several points may be noted / mentioned):

Constitutional laws and / or laws prohibit discrimination in education

Rules prohibit discrimination in education

Political measures and programs aimed at eliminating and preventing discrimination in the field of education

Access to justice in case of violation of the right to non-discrimination in education

Curriculum Discrimination

Other:

Please provide a brief description of the relevant legal, regulatory or policy texts, including measures to:

└ Non-discrimination in the admission of students to educational institutions

└ Undifferentiated treatment, including foreign citizens residing in your country

The main tasks of the legal regulation of relations in the field of education in the Russian Federation are, inter alia, the creation of conditions for education in the Russian Federation by foreign citizens and stateless persons (article 4 of the Federal Law "On Education in the Russian Federation").

According to article 78 of the Federal Law "On Education in the Russian Federation":

Foreign citizens and stateless persons have equal rights with citizens of the Russian Federation to receive pre-school, primary general, basic general and secondary general education, as well as vocational training in vocational training programs for the professions of workers, positions of employees within the framework of mastering the educational program of secondary general education in publicly and free of charge.

Foreign citizens and stateless persons are entitled to secondary vocational education, higher education and additional professional education at the expense of the federal budget allocations, the budgets of the constituent entities of the Russian Federation or local budgets in accordance with international treaties of the Russian Federation, federal laws or the quota established by the Government of the Russian Federation for the education of foreign citizens in the Russian Federation, as well as at the expense of individuals and legal entities in accordance with agreements on the provision of paid educational services.

In accordance with article 55 of the Law on Education, admission to training at an organization engaged in educational activities is carried out on the basis of equal conditions of admission for all applicants, with the exception of persons who, in accordance with the Law on Education, are granted special rights (advantages) in admission to training (orphans, children without parental care, children with disabilities and others).

Admission to training on basic general education programs and educational programs of secondary vocational education at the expense of the budgetary appropriations of the federal budget, the budgets of the constituent entities of the Russian Federation and local budgets is carried out on a generally accessible basis

The procedure for admitting citizens to study under the educational programs of preschool, primary general, basic general, secondary general and secondary vocational education is regulated by the relevant regulatory legal acts (orders of the Ministry of Education and Science of the Russian Federation dated April 8, 2014 No. 293, dated January 22, 2014 No. 32, dated January 23, 2014 No. 36).

1.2 Please indicate the actions taken by your government to ensure equal access to all levels and types of education in your country (several points can be noted):

Constitutional laws and / or laws guarantee equal access to education

Rules provide equal access to all levels and types of education

Policies and programs ensure equal access to all levels and types of education

Other :

- Please indicate the relevant legal, regulatory or political texts and provide a brief description of the measures taken :

This is, in particular, included in SDG target 4.1 and partially objective 4.b[\[five\]](#)

Students - foreign citizens and stateless persons who study basic professional educational programs in full-time form, are paid state academic scholarships for students, state scholarships for postgraduate students, residents, assistant trainees, if they study at the expense of budget allocations from the federal budget, budgets of the constituent entities of the Russian Federation and local budgets, including within the quota established by the Government of the Russian Federation, or it is provided for by international treaties of the Russian Federation, in accordance with which such persons are accepted for training (article 36 of the Federal Law "On Education in the Russian Federation").

The training of foreign citizens in the main professional educational programs at the expense of the budgetary allocations of the federal budget within the limits of the quota is carried out with the payment of state academic scholarships to students or state scholarships for graduate students, residents, assistant trainees (for the entire period of training, regardless of academic success) and the provision of living quarters in dormitories on the conditions established for citizens of the Russian Federation studying at the expense of budgetary appropriations of the federal budget.

Foreign citizens applying for training within the quota enjoy the right to study at preparatory departments, preparatory faculties of federal state educational organizations for additional general educational programs that provide training for foreign citizens to master professional educational programs in Russian, at the expense of the federal budget allocations with payment specified scholarships (during the entire period of study, regardless of academic success).

(Article 78 of the Federal Law "On Education in the Russian Federation")

The national project "Education" includes the federal project "Export of Education", within the framework of which it is planned to increase the number of foreign citizens studying in organizations engaged in educational activities under the higher education programs through the development of infrastructure, the implementation of state support for the development of export of Russian education, and the increase in demand and the competitiveness of Russian education. The project corresponds to the objective of the Decree of the President of the Russian Federation of May 7, 2018 No. 204: at least double the number of foreign citizens studying in educational institutions of higher education and scientific organizations, as well as the implementation of a package of measures to employ the best of them in the Russian Federation Federation.

 Please indicate the actions that have been taken and planned in your country to ensure equal opportunities (in terms of access, participation and completion), equal treatment and support for the inclusion of all students (including girls and women, people who are economically and socially marginalized, people with disabilities and other vulnerable groups) in the learning process (several points can be noted):

Providing financial incentives and scholarships	Additional assistance
Providing affirmative action and supportive action	Adapting Education Infrastructure
Ensuring inclusion in regular schools for all students	Adaptation of curricula and methods
Eacher training on inclusive education	Providing language classes for beginners (e.g. refugees)
Ensuring gender equality in science, technology and mathematics (exact sciences) and technical and vocational training (technical and vocational education and training)	Removing administrative barriers to education [6]
Providing re-entry programs for young mothers	Providing flexible learning options
Elimination of all barriers for pregnant girls or young mothers in education	School Diversity Assessment
Other:	The fight against stereotypes and stigma

- Please describe in more detail the measures taken, including measures to ensure gender equality and the empowerment of *girls and women in the field of education and with its help* :

The issues of ensuring equal rights for women and men in the field of education are regulated by the Constitution of the Russian Federation and the norms of industry legislation of the Russian Federation. In accordance with the Law on Education, the right to education in the Russian Federation is guaranteed regardless of gender.

In addition, the Russian Federation approved the National Strategy of Actions for Women for 2017-2022 and the Plan of Actions for its implementation.

The Plan provides for measures to develop the necessary skills and competencies in women and girls in the industries. So, in 2019, the VII National WorldSkills Russia Championship was held in Kazan, in the final of which among 1,232 competitors 402 girls participated.

Federal law guarantees the availability of non-discriminatory quality accessible education for people with disabilities (hereinafter - HIA). For this, conditions are created at all levels of education necessary for all categories of citizens to receive a quality education, to correct developmental disorders and social adaptation.

These conditions are created both in organizations that implement adapted educational programs, and through the organization of inclusive education (accessibility of facilities and services, assistance of qualified specialists, etc.).

For the period 2017-2018 The Concept of development of a psychological service in the education system in the Russian Federation for the period until 2025 was approved. The professional standard "Teacher-psychologist (psychologist in the field of education)" was put into effect. On the basis of the Federal State Budgetary Institution "Russian Academy of Education", the Federal Resource Center for the Psychological Service of the Education System was created.

In addition, the Abilimpix professional skill contest is held, the purpose of which is to ensure effective vocational guidance and motivation of people with disabilities to get a vocational education, to promote their employment and social and cultural inclusion in society.

Foreign citizens and stateless persons are endowed with the same rights as Russian citizens to study at general educational organizations.

One of the tasks set in the Concept of the State Migration Policy of the Russian Federation for 2019-2025 is to work to create favorable conditions by means of training for adapting migrant children to the Russian society.

- Please indicate whether your country has adopted and is revising legislation regarding the minimum age for marriage in order to comply with international standards (18 years):

Please note that child marriage is a discriminatory practice, as often girls can marry at a younger age than boys. Child marriages violate the child's right to education, as they are more likely to drop out of school, and children who are not attending school are more likely to marry.

Yes Not

Please provide a link to relevant laws and regulations:

According to the Family Code of the Russian Federation (Article 13), marriage age is set at eighteen years.

2. Progress made in realizing the right to education in the context of SDG 4

2.1 Preschool education

Pre-school education is not expressly provided for in the Convention / Recommendation. However, the international community is increasingly recognizing the importance of early childhood education and care (ECCE). The Committee on the Rights of the Child initially recognized "the right to early childhood education as starting at birth" (General Comment 7). This has become clearer with the 2010 Moscow Framework for Action and Cooperation^[7]. In the current context of the education agenda for the period up to 2030, under SDG target 4.2, governments now commit themselves to "provide at least one year of free and compulsory early childhood education."

- Does your country have compulsory and free pre-school education?

Preschool education is compulsory. Please indicate the age and duration of study:

Preschool education in the Russian Federation is not an obligatory level of education. The duration of education can vary: it can begin when children reach the age of two months and continue until they reach the age of no more than 8 years.

Preschool education is free for everyone: indicate the duration:

The duration of education can vary: it can begin when children reach the age of two months and continue until they reach the age of no more than 8 years.

- Please list the laws and policies that ensure that early childhood education is accessible to all, and provide information on the difficulties your government is having in accessing early childhood education. You can add brief quantitative information

In accordance with article 43 of the Constitution of the Russian Federation, the accessibility and free availability of preschool education in state or municipal educational institutions is guaranteed. Article 5 of the Education Act also mentions that the Russian Federation guarantees accessibility and free of charge in accordance with the federal state educational standard (hereinafter - GEF) of preschool education.

As of January 1, 2020, the availability of preschool education for children aged 3 to 7 years on average in the Russian Federation amounted to 99.05% (as of January 1, 2019 - 99.08%, as of January 1, 2018 - 99.01%, as of January 1, 2017 - 98.94%, as of January 1, 2016 - 98.97%, as of January 1, 2015 - 93.88%).

The issue of ensuring 100% accessibility of preschool education for children aged 2 months to 3 years remains relevant. As of January 1, 2020 the value of the indicator was 87.40% (as of January 1, 2019 - 83.58%, as of January 1, 2018 - 79.81%, as of January 1, 2017 - 76.59%, as of January 1, 2016 - 71.75%, as of January 1, 2015 - 51.86%).

The main reasons for not achieving 100% accessibility for children of this age group:

- a favorable demographic situation in the age group of the population from 0 to 3 years old in municipal districts and urban districts of a number of constituent entities of the Russian Federation;

- the need of the population to obtain places in preschool educational institutions (hereinafter referred to as DOO) is higher than the rate of creating additional places in DOO;

when choosing a pre-primary care parent, the priority is the proximity of the pre-primary care location to the home, which may result in the parents refusing the proposed place in the kindergarten, while the child remains registered as in need of a place.

The solution to the problem of achieving 100% accessibility of preschool education in the constituent entities of the Russian Federation is primarily due to the creation of additional places. Since 2012, the regions with federal support have created more than 1.9 million places, including 174 859 places in 2019.

As part of the activities of the federal project "Promoting the Employment of Women - Creating Conditions for Pre-School Education for Children Under Three Years", the National Project "Demography" provides for the implementation of the following measures:

- updating the mechanisms for supporting the non-state sector in the field of preschool education (subsidizing the creation of additional places);

- Creation of additional places in pre-primary care, including ensuring the necessary conditions for children with disabilities and children with disabilities.

Implementation of programs for retraining and advanced training of women during the period of parental leave within the framework of the indicated national project will also contribute to the growth of indicators of enrollment in preschool education of children.

In addition, in order to create conditions for women to combine responsibilities for raising children with employment, various forms of preschool education are being created: family preschool groups, counseling centers for parents.

2.2 Universal primary and secondary education

Article / paragraph 4 (a) of the Convention / Recommendation provides for universal primary and secondary education. In the context of the education agenda until 2030, SDG target 4.1 calls on states to provide "12 years of free, state-funded, inclusive, fair, quality primary and secondary education, of which at least nine are compulsory."

Primary education

- Is primary education compulsory in your country?

Yes Not

Please indicate the current duration of the compulsory education period and the age of enrollment:

In this part, you can also provide information about the difficulties your government is facing in achieving universal access to primary education. You can add brief quantitative information.

According to article 66 of the Education Act, primary general education is a compulsory level of education.

In accordance with the Law on Education, primary education in Russian educational institutions begins when children reach the age of six years and six months in the absence of contraindications for health reasons, but no later than they reach the age of eight years.

- Is primary education available to everyone for free?

Yes: Please indicate the duration and to what extent.

To do this, please list the laws and policies that ensure universal and free primary education, and indicate whether direct and indirect costs (such as tuition fees, exam fees, school supplies, uniforms, transportation costs and mandatory fees from parents) are charged)

In accordance with the Federal State Educational Standard of Primary Education, approved by order of the Ministry of Education and Science of the Russian Federation of October 6, 2009 No. 373, the term for primary education is four years.

Article 5 of the Law on Education stipulates that the Russian Federation guarantees accessibility and free of charge in accordance with the Federal State Educational Standard of primary general education.

Expenses for the remuneration of employees of educational institutions, training, exams, textbooks, educational and visual aids, teaching aids, games and toys are not charged.

No: Does your country already carry out legal and political reforms aimed at ensuring universal and free primary education?

Yes Not

- Please provide a brief summary of the reforms:

Secondary education

In this section, please provide information on the general accessibility and accessibility of all secondary education, including technical and vocational secondary education and training in your country.

- Is secondary education (basic / complete) available for free?

Yes: Please indicate the duration and to what extent.

Please list the laws and regulations that guarantee free, affordable secondary education, and describe whether direct and indirect costs (such as tuition, exam fees, school supplies, uniforms, transportation costs, and mandatory fees from parents) are covered.

In accordance with GEF of basic general education, approved by order of the Ministry of Education and Science of the Russian Federation dated December 17, 2010 No. 1897, the deadline for receiving basic general education is five years.

According to the GEF of secondary general education, approved by order of the Ministry of Education and Science of the Russian Federation of May 17, 2012 No. 413, the term for secondary education is two years.

The terms for secondary vocational education are established taking into account various forms of training, educational technologies and features of certain categories of students in accordance with the Federal State Educational Standard.

Article 5 of the Law on Education stipulates that the Russian Federation guarantees accessibility and free of charge in accordance with the Federal State Educational Standard of basic, secondary general and secondary vocational education.

Expenses for the remuneration of employees of educational institutions, training, exams, textbooks, educational and visual aids, teaching aids, games and toys are not charged.

No: What measures does your government intend to take to provide free secondary education?

- Is secondary education (basic / complete) compulsory in your country?

Yes Not

- Please provide detailed information on its implementation and indicate the duration of compulsory secondary education and the age of enrollment:

In this part, you can also provide information about the difficulties your government is facing in achieving universal access to secondary education. You can add brief quantitative information.

According to article 66 of the Education Act, basic general and secondary general education are compulsory levels of education

In accordance with GEF of basic general education, approved by order of the Ministry of Education and Science of the Russian Federation dated December 17, 2010 No. 1897, the deadline for receiving basic general education is five years.

According to the GEF of secondary general education, approved by order of the Ministry of Education and Science of the Russian Federation of May 17, 2012 No. 413, the term for secondary education is two years.

The terms for secondary vocational education are established taking into account various forms of training, educational technologies and features of certain categories of students in accordance with the Federal State Educational Standard.

- Indicate if your country has adopted and revised legislation regarding the minimum age for admission to work in order to comply with the age of completion of compulsory education:

Please note that laws on the minimum age for admission to employment and laws on compulsory education are interdependent and mutually reinforcing. If the minimum age for admission to employment is lower than the age of completion of compulsory education, the child runs the risk of dropping out of school for work and therefore not completing compulsory education. On the other hand, if the age of completion of compulsory education is lower than the minimum age for admission to employment, upon completion of compulsory education, the door is opened for child exploitation and violation of labor law.

Yes Not

- Please provide a link to relevant laws and regulations:

According to the Labor Code of the Russian Federation, the conclusion of an employment contract is possible, as a rule, with a person who has received a general education.[\[8\]](#)

2.3 Higher education

Article / paragraph 4 (a) of the Convention / Recommendation provides for higher education. The provision of higher education is essential for achieving SDG4, as for objectives 4.3[\[9\]](#) and 4.4[\[10\]](#).

-Please indicate measures taken to ensure non-discrimination under the Convention / Recommendation[\[11\]](#) to obtain and complete higher education, including technical and vocational education and vocational training (several points may be noted / mentioned):

Constitutional laws and / or legislation prohibit discrimination in higher education, including technical and vocational education and training.

Rules prohibit discrimination in higher education, including technical and vocational education and training

Political programs and programs aimed at eliminating and preventing discrimination in higher education, including technical and vocational education and training

Other:

- Please provide a brief description of the relevant legal, regulatory or policy texts, including measures to:

↳ *Non-discrimination in admission of students to higher educational institutions on the basis of the Convention / Recommendation*

↳ *Undifferentiated treatment, including with foreign students*

Everyone has the right on a competitive basis to receive higher education free of charge in a state or municipal educational institution and in an enterprise (clause 3 of Article 43 of the Constitution of the Russian Federation).

In the Russian Federation, the accessibility and competitiveness of free higher education are guaranteed if a citizen receives education at this level for the first time (Clause 3 of Article 5 of the Federal Law "On Education in the Russian Federation").

Foreign citizens have the right to secondary vocational education, higher education and additional professional education at the expense of budgetary allocations of the federal budget, budgets of the constituent entities of the Russian Federation or local budgets in accordance with international treaties of the Russian Federation, federal laws or the quota for the education of foreign citizens established by the Government of the Russian Federation in the Russian Federation, as well as at the expense of individuals and legal entities in accordance with agreements on the provision of paid educational services (clause 3 of Article 78 of the Federal Law "On Education in the Russian Federation"). k

- Please indicate the efforts made by your government to ensure that higher education is equally accessible to all, depending on each person's abilities and / or is available free of charge (several points can be noted / mentioned):

Article 4 of the Convention requires the state to " make higher education accessible to all on the basis of full equality ". Article 13 of the International Covenant on Economic, Social and Cultural Rights further

adds that this should be achieved “ by taking all necessary measures and, in particular, the gradual introduction of free education ” .

Higher education is usually free

Higher education is available on the basis of individual abilities, which are assessed taking into account relevant qualifications and experience.

Higher education is available through financial incentives and scholarships

Higher education is accessible through affirmative action and supportive action.

Higher education is available through a system of re-scoring points between states

Other:

The number of students enrolled in educational programs of secondary vocational and higher education at the expense of budgetary allocations of the federal budget, budgets of the constituent entities of the Russian Federation and local budgets is determined on the basis of control figures for admission to studies by professions, specialties and areas of training at the expense of budgetary appropriations of the federal budget, budgets of constituent entities of the Russian Federation and local budgets.

The federal budget allocations provide financial support for training in higher education educational programs at the rate of at least eight hundred students for every ten thousand people aged seventeen to thirty years living in the Russian Federation.

Organizations engaged in educational activities are entitled to carry out these activities at the expense of individuals and (or) legal entities under agreements on the provision of paid educational services.

Articles 100-101 of the Federal Law "On Education in the Russian Federation"

Public spending on higher education per student is about 347 thousand rubles. per year (at current prices).

The amount of financial resources received in educational institutions of higher education from the implementation of undergraduate, specialty, master's programs, per student, studying under the bachelor's program, specialty, master's program per year: 176 thousand rubles. (state and municipal organizations - 173 thousand rubles, private organizations - 233.7 thousand rubles).

Average consumer prices for training in state and municipal educational institutions of higher education, per semester - 68,260 rubles., Education in non-governmental educational organizations of higher education, per semester - 51,335 rubles. [\[12\]](#)

- Please describe in detail the measures taken and provide brief information on the financial costs of obtaining education in higher public or private educational institutions, if higher education is not free.

2.4 Adult and alternative education

*Article / paragraph 4 (c) of the Convention / Recommendation provides for adult education and alternative education. While SDG 4 aims to “ **ensure inclusive and equitable quality education and promote lifelong learning for all of us** ”, target 4.6 specifically calls on states to “ ensure that all young people and a large proportion of adults, both men and women and women, they knew how to read, write and count . ” In addition, under target 4.4, states should “ expand and diversify training opportunities using a wide range of educational and training methods, so that all youth and adults, especially girls and women, can acquire the appropriate knowledge, skills and competencies for decent work and life ”.*

-Please indicate what efforts your government is making to create a system of continuing education and equal access to education and training opportunities (several points can be noted):

The provision of education to persons who have not received or have not completed the entire course of their primary education

Literacy programs

Providing appropriate training and life skills programs

Providing free training opportunities

Providing flexible learning methods

Providing opportunities for training and qualifications

Other:

--

- Please describe in more detail the measures taken:

In the Russian Federation, education is divided into general education, vocational education, additional education and vocational training, which provide the opportunity to realize the right to education throughout life (lifelong education).

The education system creates the conditions for continuing education through the implementation of basic educational programs and various additional educational programs, providing the opportunity to simultaneously master several educational programs, as well as taking into account existing education, qualifications, and practical experience in obtaining education.

Moreover, by additional education is meant the type of education that is aimed at comprehensively satisfying the educational needs of a person in intellectual, spiritual, moral, physical and (or) professional development and is not accompanied by an increase in the level of education.

Further education includes subspecies such as supplementary education for children and adults and continuing professional education.

Additional education of children and adults is aimed at the formation and development of creative abilities of children and adults, the satisfaction of their individual needs for intellectual, moral and physical improvement, the formation of a culture of a healthy and safe lifestyle, health promotion, as well as the organization of their free time. Additional education of children ensures their adaptation to life in society, vocational guidance, as well as the identification and support of children who have shown outstanding abilities.

Additional general education programs are divided into general and pre-vocational programs. Additional general developmental programs are implemented for both children and adults. Additional pre-vocational programs in the field of arts, physical education and sports are implemented for children.

Any persons without requirements for the level of education are allowed to master additional general educational programs, unless otherwise stipulated by the specifics of the educational program being implemented.

Additional professional education is aimed at satisfying educational and professional needs, professional development of a person, ensuring the conformity of his qualifications to the changing conditions of professional activity and the social environment.

To the development of additional professional programs are allowed persons with or receiving secondary vocational and (or) higher education.

Additional professional education is carried out through the implementation of additional professional programs (advanced training programs and professional retraining programs).

The continuing education program is aimed at improving and (or) obtaining new competencies necessary for professional activities, and (or) improving the professional level within the framework of existing qualifications.

The professional retraining program is aimed at gaining the competence necessary to carry out a new type of professional activity, the acquisition of a new qualification.

Training in additional professional programs is carried out both once and continuously, and in stages (discretely), including through the development of individual subjects, courses, disciplines (modules), internships, and the use of network forms.

An additional professional educational program may be implemented in full or in part in the form of internships.

Chapter 10 of the Federal Law “On Education in the Russian Federation”

Within the framework of the national project “Education”, the federal project “New Opportunities for Everyone” is being implemented, the purpose of which is to fulfill the task of the Decree of the President of the Russian Federation of May 7, 2018 No. 204: the formation of a system for continuous updating by working citizens of their professional knowledge and their acquisition of new professional skills, including mastery of competencies in the field of the digital economy by all comers[13].

2.5 Providing quality education and learning conditions

Articles / paragraphs 2, 4 (b) and 5 (b) of the Convention / Recommendation provide for quality education. Quality education is fundamental to achieving all the goals of SDG4. This is also highlighted in SDG target 4.a, in which states are encouraged to “create and modernize child-sensitive schools, take into account disabilities and gender, and provide a safe, non-violent, inclusive and effective learning environment for all.

- Please indicate the measures taken by your country to ensure equality in all educational institutions in relation to (several points can be noted / noted):

Establishment of minimum norms and standards in education

Creation of conditions related to the quality of education provided (for example, infrastructure, student-teacher ratio, teaching materials, use of ICT)

Adopt legal or regulatory provisions to ensure that children study in a safe environment free of violence or harassment, including gender-based violence in the school (in and around schools).

- - Please describe in more detail the measures taken:

To ensure this quality assessment, please consider all educational institutions at the same level. You can include information about policies, protocols or codes of conduct.

Currently, the Russian Federation has federal state educational standards for primary general, basic general and secondary general education, approved by orders of the Ministry of Education and Science of the Russian Federation No. 373 dated October 6, 2009, No. 1897 dated December 17, 2010, and May 17, 2010 2012, No. 413 (hereinafter - GEF General Education).

On the basis of Articles 12 and 28 of Federal Law No. 273-Φ3 dated December 29, 2012 “On Education in the Russian Federation”, organizations engaged in educational activities with state-accredited educational programs independently develop educational programs in accordance with federal state educational standards and considering relevant exemplary basic educational programs

In order to ensure a unified educational space on the territory of the Russian Federation and high quality of general education GEF of general education, requirements are established for interdisciplinary, subject and personal results of mastering educational programs of primary general, basic general and secondary general education.

In addition, the GEF of general education provides for the obligation of educational organizations and public authorities of the constituent entities of the Russian Federation in the field of education to ensure the requirements for the implementation of educational programs of primary, basic, general and secondary general education, including personnel, financial, material and technical and other conditions.

Also, according to the requirements of GEF of general education, educational programs of primary general, basic general and secondary general education should contain sections providing for the formation of a healthy and safe lifestyle in students.

Federal state educational standards and federal state requirements provide:

- 1) the unity of the educational space of the Russian Federation;
- 2) the continuity of basic educational programs;

3) the variability of the content of educational programs of the appropriate level of education, the possibility of forming educational programs of various levels of complexity and focus, taking into account the educational needs and abilities of students;

4) state guarantees of the level and quality of education based on the unity of mandatory requirements for the conditions for the implementation of basic educational programs and the results of their development.

(Federal state educational standard - a set of mandatory requirements for education at a certain level and (or) for a profession, specialty and field of study, approved depending on the level of education.)

Federal state educational standards include requirements for:

1) the structure of the main educational programs (including the ratio of the compulsory part of the main educational program and the part formed by the participants in educational relations) and their volume;

2) conditions for the implementation of basic educational programs, including personnel, financial, material and technical and other conditions ;

3) the results of mastering basic educational programs.

In order to ensure the realization of the right to education of students with disabilities, federal state educational standards for the education of these persons are established or special requirements are included in federal state educational standards.

Article 11 of the Federal Law "On Education in the Russian Federation"

2.6 Teachers

Article / paragraph 4 (d) of the Convention / Recommendation provides for the training of teachers. This is in line with SDG target 4.c, which is entirely dedicated to the teaching profession, as it urges states to "significantly increase the supply of qualified teachers".

- Please indicate the measures taken to improve the educational and working conditions of the teaching staff, especially the teaching staff at all levels in your country, as well as regarding the training of teachers (several points can be noted / mentioned):

The average salary of teachers is competitive or at least comparable to the salary in another field of activity requiring similar or equivalent qualifications (at all levels)

Initial training and continuing professional development provided

Minimum standards and qualifications required for the teaching profession

Measures taken to strengthen the social status and attractiveness of the teaching profession

Control and monitoring systems

Measures taken to increase the number of women in leadership positions in education

Other:

- Please describe in more detail the measures taken:

By order of the Government of the Russian Federation dated December 31, 2019 No. 3273-r, the basic principles of the national system of professional development of teachers, including the national system of teacher growth, were approved.

The basic principles include measures aimed at ensuring the availability of quality education in general educational organizations of the constituent entities of the Federation, the continuous professional development of teachers, stimulating the professional growth of teachers.

It also provides for annual monitoring of the provision of schools and other educational organizations with personnel, as well as the formation of a list of the most popular pedagogical positions in the context of educational subjects.

A network of centers for the continuous professional development of teachers will be formed throughout the country. In 2019, such centers were opened and operate in 11 constituent entities of the Russian Federation.

The basic principles also include the development of a federal model for the certification of heads of general educational organizations, the formation of a personnel reserve for school leaders, and the adoption of the professional standard "Head in the field of general education".

It is also important to note that the basic principles provide for the approval of a unified federal system of scientific and methodological support for teachers of the general education system, which is aimed at improving the quality of general education.

The basic principles provide for stimulating the professional growth of teachers by testing and introducing an updated system of qualification categories, modernizing the certification system, expanding the system of professional skills contests, developing and implementing a mentoring system as one of the most effective mechanisms for young teachers to enter the profession comfortably.

In 2017, the Bank of Additional Professional Programs for teachers of secondary vocational education and heads of professional educational organizations was formed and posted on the Internet (<https://dpo-spo.mirea.ru>).

Also since 2012, according to the May Decree of the President of the Russian Federation of May 7, 2012 No. 597, one of the goals of state policy is to increase the salaries of teachers.

The Ministry of Education of Russia has developed a draft Concept for the development of the digital educational environment of additional professional (pedagogical) education (hereinafter - the draft Concept of the DSPPES DSP).

The unified federal portal DPPO <http://fedproekt.ru> , where the database of the best electronic educational programs and resources for the organization of training in programs of additional professional (pedagogical) education is located.

In general, the level of professional training of Russian teachers is at a high level: all teachers undergo training on refresher programs once every 3 years. In addition, it is worth noting that the national project "Education" provides for:

- involvement of teachers under the age of 35 in various forms of support and accompaniment in the first three years of work;
- passing a voluntary independent assessment of professional qualifications by teaching staff;
- raising the level of professional mastery in the formats of continuing education by teachers.

In pursuance of the list of instructions of the President of the Russian Federation of January 15, 2020 No. Pr-113 on the approval of the procedure and conditions for the payment of a monthly monetary remuneration of at least 5,000 rubles from the federal budget, providing for the preservation of payments previously established in the constituent entities of the Russian Federation for these purposes starting Since September 1, 2020, the Ministry of Education of Russia has developed a draft decree of the Government of the Russian Federation regarding the payment of monthly cash compensation for classroom teaching staff.

In the period from September to December 2020, 806,307 teachers will receive this monthly remuneration for classroom management.

In the Russian Federation, the special status of teachers in society is recognized and the conditions are created for them to carry out professional activities. Pedagogical workers in the Russian Federation are granted rights and freedoms, social support measures aimed at ensuring their high professional level, conditions for the effective fulfillment of professional tasks, increasing social significance, and the prestige of pedagogical work.

Teachers enjoy the following academic rights and freedoms:

- 1) freedom of teaching, free expression of one's opinion, freedom from interference in professional activity;
- 2) freedom of choice and use of pedagogically sound forms, means, methods of training and education;
- 3) the right to creative initiative, the development and application of copyrighted programs and methods of training and education within the framework of an ongoing educational program, a separate academic subject, course, discipline (module);
- 4) the right to choose textbooks, teaching aids, materials and other means of training and education in accordance with the educational program and in the manner established by legislation on education;
- 5) the right to participate in the development of educational programs, including curricula, calendar curricula, work items, courses, disciplines (modules), teaching materials and other components of educational programs;
- 6) the right to carry out scientific, scientific, technical, creative, research activities, participate in experimental and international activities, develop and introduce innovations;
- 7) the right to free use of libraries and information resources, as well as access to information and telecommunication networks and databases, educational and methodological materials, museum funds, educational and technical support facilities in accordance with the local regulatory acts of the organization carrying out educational activities necessary for the qualitative implementation of pedagogical, scientific or research activities in organizations engaged in educational activities;
- 8) the right to free use of educational, methodological and scientific services of an organization engaged in educational activities in the manner established by the legislation of the Russian Federation or local regulatory acts;
- 9) the right to participate in the management of an educational organization, including in collegial management bodies, in the manner established by the charter of this organization;
- 10) the right to participate in the discussion of issues related to the activities of the educational organization, including through governing bodies and public organizations;
- 11) the right to associate in public professional organizations in the forms and in the manner established by the legislation of the Russian Federation;
- 12) the right to appeal to the commission for the settlement of disputes between participants in educational relations;
- 13) the right to protect professional honor and dignity, to a fair and objective investigation of violations of professional ethics of teachers.

Teachers have the following labor rights and social guarantees:

- 1) the right to shortened working hours;
- 2) the right to additional professional education in the field of pedagogical activity at least once every three years;
- 3) the right to an annual basic extended paid vacation;
- 4) the right to a long vacation for up to one year at least every ten years of continuous pedagogical work;
- 5) the right to early appointment of an old-age insurance pension;
- 6) the right to provide teachers registered as needing living quarters out of turn for residential premises under social tenancy agreements, the right to provide specialized premises for housing premises;

Teachers living and working in rural areas, workers' settlements (urban-type settlements) are entitled to compensation for the costs of housing, heating and lighting.

Article 47 of the Federal Law "On Education in the Russian Federation"

- Have there been cases of discrimination in relation to teacher training in your country?

A: Has your government solved this problem?

Yes

Not

Not

2.7 Respect for human rights and fundamental freedoms

Article / paragraph 5 (1) (a) of the Convention / Recommendation provides for respect for human rights and fundamental freedoms. This is described in task 4.7. [\[14\]](#) Please note that this section contributes to the overall monitoring of Articles / Paragraph 5 (1) (a) of the Convention / Recommendation, and that consultations on the Recommendation on education in the spirit of international understanding, cooperation and peace and education in respect of human rights and fundamental Freedoms of 1974 is used specifically for monitoring SDG target 4.7.1.

- Please indicate the national efforts undertaken in the direction of education aimed at the holistic development of the individual and strengthening respect for human rights and fundamental freedoms (several points can be noted / mentioned):

The curriculum includes human rights education

Educational and / or extracurricular activities organized in the field of human rights education

Other:

2.8 Private schools

Articles / paragraphs 2 (c) and 5 (1) (b) of the Convention / Recommendations provide for education in private schools.

- Does your country have a regulatory framework regarding the establishment and functioning of private educational institutions?

Yes Not

- Please provide a brief description:

Regulatory legal aspects of the creation and functioning of private educational institutions are enshrined in the Law on Education and Decree of the Government of the Russian Federation of October 28, 2013 No. 966 on the licensing of educational activities.

In the Russian Federation, an educational organization, depending on who it is created, is state, municipal or private.

A private educational organization is an educational organization created in accordance with the legislation of the Russian Federation by an individual or individuals and (or) a legal entity, legal entities or their associations, with the exception of foreign religious organizations.

- Do legal provisions prohibiting discrimination on the grounds listed in the Convention / Recommendation apply [\[15\]](#) applied to private educational institutions?

Yes Not

- Please briefly describe which laws, regulations or political measures guarantee that the development of education in private schools does not give rise to discrimination and that private schools offer an appropriate alternative in your country :

In accordance with article 19 of the Constitution of the Russian Federation, the State guarantees the equality of human and civil rights and freedoms, regardless of gender, race, nationality, language, origin, property and official position, place of residence, religion, beliefs, membership of public associations, and other circumstances. Any form of restriction of the rights of citizens on the grounds of social, racial, national, linguistic or religious affiliation is prohibited.

- Does your country have a political education framework for minimum educational standards regarding the rights of parents / legal guardians to provide religious and moral education to their children?

Yes Not

2.9 Rights of national minorities

Article / paragraph 5 (1) (c) of the Convention / Recommendation provides for the rights of national minorities. National minorities, who often face language barriers, are among the specific groups mentioned in the Convention.

- Please indicate the legal, political and regulatory measures that protect the rights granted to national minorities to carry out their own educational activities (several points can be noted):

Constitutional laws and / or laws protect the right to education of national minorities

Legislation or regulation guarantees the right of national minorities to study in their native language

Curriculum adapted to the needs of national minorities

Teachers trained to adapt to the needs of national minorities

Other:

- Please provide a brief description of the provisions:

In accordance with article 14 of the Law on Education, citizens of the Russian Federation are entitled to receive pre-school, primary general and basic general education in their native language from among the languages of the peoples of the Russian Federation, as well as the right to study their native language from among the languages of the peoples of the Russian Federation, including the Russian language as a mother tongue, within the possibilities provided by the education system, in the manner established by the legislation on education. The realization of these rights is ensured by the creation of the necessary number of relevant educational organizations, classes, groups, as well as the conditions for their functioning. Teaching and studying the mother tongue from among the languages of the peoples of the Russian Federation, including Russian as the mother tongue, within the framework of state-accredited educational programs are carried out in accordance with the Federal State Educational Standard.

The Concept of teaching the native languages of the peoples of the Russian Federation and the Action Plan for its implementation for 2020–2024 were approved.

For the organization of scientific research in the field of native languages and culture of the peoples of Russia and the development of relevant textbooks, the Fund for the Preservation and Study of the Mother Languages of the Peoples of the Russian Federation was created (founders are the Ministry of Education of Russia and the FADN of Russia). In 2019, the Foundation developed 64 original mock-ups of textbooks and teaching aids in native languages.

Activities aimed at preserving and developing the languages of the peoples of the Russian Federation are also provided for in the framework of the departmental target program "Scientific,

methodological, methodological and personnel support for teaching the Russian language and languages of the peoples of the Russian Federation”.

In accordance with the Comprehensive Plan of Activities for the Socio-Economic and Ethnocultural Development of Gypsies in the Russian Federation (approved by the Deputy Prime Minister of the Russian Federation V.L. Mutko, March 27, 2019 No. 2738p-P44), the organization of development and testing of an additional professional program for preschool teachers educational and general education organizations for teaching the Russian language to children for whom it is not native, including preschool children who do not attend educational organizations.

The official language of the Russian Federation throughout its territory is Russian.

Republics have the right to establish their state languages. In government bodies, local authorities, state institutions of the republics they are used along with the state language of the Russian Federation.

The Russian Federation guarantees all its peoples the right to preserve their mother tongue and create conditions for its study and development.

The Russian Federation guarantees the rights of indigenous peoples in accordance with generally recognized principles and norms of international law and international treaties of the Russian Federation.

Citizens of the Russian Federation have the right to receive pre-school, primary general and basic general education in their native language from among the languages of the peoples of the Russian Federation, as well as the right to study their native language from among the languages of the peoples of the Russian Federation, including Russian as a native language, within opportunities provided by the education system. The realization of these rights is ensured by the creation of the necessary number of relevant educational organizations, classes, groups, as well as the conditions for their functioning.

The language and languages of education are determined by the local regulatory acts of the organization carrying out educational activities under the educational programs it implements, in accordance with the legislation of the Russian Federation. The free choice of the language of education, the mother tongue being studied from among the languages of the peoples of the Russian Federation, including the Russian language as the mother tongue, the state languages of the republics of the Russian Federation, is carried out at the request of the parents (legal representatives) of minors studying for admission (translation) to study under the preschool educational programs educational institutions having state accreditation to educational programs of primary general and basic general education.

-As for educational standards in educational institutions managed by minorities, please describe the existing regulatory framework:

The information may also cover linguistic opportunities, such as the availability of student learning in the mother tongue, the use of language teaching in educational policy, multilingualism, etc.

Work is underway to improve educational programs, textbooks and teaching aids in the native language and literature of the peoples of the Russian Federation with a view to introducing them into the educational process. As of February 2020, the state register of approximate educational programs for general education contains 68 native language programs for 16 languages of the peoples of the Russian Federation and 33 literary reading and native literature programs for 15 languages of the peoples of the Russian Federation.

Currently, the current federal list of textbooks contains 222 textbooks in 11 native languages. In Russian schools, literature is also studied as a subject in the language of the indigenous peoples of the Russian Federation, and in some subjects of the Russian Federation, additionally, geography or regional studies.

2.10 Rights of refugees and migrants

The rights of refugees and migrants are not expressly provided for in the Convention / Recommendation. However, the Convention and Recommendation call on states to eliminate and

prevent discrimination in the field of education, based in particular on national origin.^[16] In this context, a number of Member States participating in the ninth round of the Consultations reported on measures taken to ensure the right of refugees and migrants to education. The growing mobility and influx of refugees around the world and the emergence of serious educational challenges, as well as the framework recently adopted by the international community,^[17] demonstrate the ability for states to report on measures taken to integrate refugees and migrants into their education systems.

In addition, this aspect is also consistent with SDG target 4.5, which calls on states “to ensure equal access to education and vocational training at all levels for vulnerable groups”, including “children in vulnerable situations”, and covers most of the goals of SDG4.

- Please briefly describe the existing legal and political framework that protects the right to quality education for refugees and migrants in your country.

In accordance with Article 72 of the Constitution of the Russian Federation, the joint jurisdiction of the Russian Federation and the constituent entities of the Russian Federation is to protect the rights and freedoms of man and citizen; protection of the rights of national minorities; ensuring law, order and public safety.

Foreign citizens and stateless persons in the Russian Federation are vested with the rights and obligations on an equal basis with Russian citizens, including studying at general educational organizations in the corresponding territory of residence.

One of the tasks set in the Concept of the State Migration Policy of the Russian Federation for 2019-2025, approved by Decree of the President of the Russian Federation of October 3, 2018 No. 622, is to conduct focused work to create favorable conditions by means of training for painless adaptation of migrant children to Russian society as a resource for the painless adaptation and integration of their parents (labor migrants) into Russian society, the prevention of criminal manifestations, and the prevention of ethnic conflicts.

In a number of constituent entities of the Russian Federation, regional concepts of migration policy have been approved in order to adapt migrant children to Russian society.

In accordance with the Federal Law of October 22, 2013 No. 284-ФЗ “On Amending Certain Legislative Acts of the Russian Federation Regarding the Definition of Powers and Responsibilities of State Authorities of the Subjects of the Russian Federation, Local Self-Government Bodies and Their Officials in the Field of Interethnic Relations”, a question development and implementation of measures aimed at ensuring the social and cultural adaptation of migrants is referred to the authority of local authorities.

Admission of citizens, including migrants, to study in educational programs of primary, basic, general and secondary general education, as well as transfer of students from one organization engaged in educational activities in educational programs of primary, basic, general and secondary general education, to other organizations carrying out educational activities on educational programs of the appropriate level and focus is carried out in accordance with the orders of the Ministry of Education and Science of the Russian Federation dated January 22, 2014 No. 32 and dated March 12, 2014 No. 177.

Admission of citizens to organizations carrying out educational activities on educational programs of primary, basic, general and secondary general education is carried out upon the personal application of the parent (legal representative) of the child upon presentation of the original document proving the identity of the parent (legal representative), or the original document proving the identity of the foreign citizen and stateless person in the Russian Federation in accordance with Article 10 of the Federal Law of July 25, 2002 No. 115-ФЗ “On the Legal Status of Foreign Citizens in the Russian Federation”.

- Please briefly indicate the measures taken by national and local authorities to ensure the right of refugees and migrants to education (several points can be noted / mentioned):

Inclusion in basic education

Language courses

Special training for teaching staff

And initiatives to combat discrimination and promote cultural diversity and mutual recognition

Alternative administrative procedure (placement of tests, set of evidence, etc.)

Accelerated Training Programs

Informal and / or alternative educational programs

Financial support

Other innovative measures:

Please briefly describe the measures taken:

In order to socially adapt migrants, local testing centers have been opened on the basis of educational organizations located on the territory of the constituent entities of the Russian Federation.

The main goal of the centers is to help foreign citizens, including children of migrants, in their adaptation and integration into Russian society. This goal is served by a system of free consultations and programs for intensive study of the Russian language and preparation for testing on the basis of educational organizations of higher education, as well as psychological preparation for passing the exam.

The relevant ministries of the constituent entities of the Russian Federation are implementing a number of measures for the adaptation and integration of migrants in society: recommendations are being developed for specialists of the respective institutions, olympiads are organized for migrant children, linguistic camp shifts for migrant children, round tables are held for teachers and specialists, in training programs topics include organizing work with students and interacting with migrant families, as well as the prevention of ethnic conflicts and xenophobia.

Within the framework of the national project "Education", the federal project "Export of Education" is being implemented, aimed at fulfilling the task of the Decree of the President of the Russian Federation of May 7, 2018 No. 204: an increase of at least two times the number of foreign citizens studying in educational institutions of higher education and scientific organizations, as well as the implementation of a set of measures to employ the best of them in the Russian Federation^[18].

III. Methods used to draw the attention of various authorities in the country to tools and remove obstacles

1. Problems and obstacles

1.1 Please indicate and provide any information on the difficulties encountered in the implementation of key provisions of the Convention / Recommendation (including legal and practical obstacles), as well as on the main issues that need to be addressed to further advance the right to education in your country (can be noted / noted a few points):

Problems related to equal access and inclusion in education (such as poverty and socio-economic factors, cultural and traditional attitudes, remoteness, migration and displacement, etc.)

Problems related to the quality of education (for example, lack of qualified, trained and motivated teachers, unsupported or inadequate teaching and learning, as well as the school environment, etc.)

Problems associated with the system and management (such as budget constraints, lack or weakness of monitoring systems - including lack of reliable data, lack of a favorable / inconsistent / outdated legal and political environment, lack of involvement of relevant stakeholders and lack of cooperation / coordination at different levels etc.)

Other:

The main tasks aimed at improving and developing higher education

Solving the problems of the development of higher education is planned within the framework of the federal projects "Young Professionals (increasing the competitiveness of vocational education)", "Export of Education" of the national project "Education", as well as the federal project "New Opportunities for Everyone", aimed at developing lifelong education, including through:

continued work to ensure global competitiveness of Russian higher education;

achievement of the target indicator of Russia's place in the world in the presence of universities in the TOP-500 global university ratings - 13th place by 2021, 10th place by 2024;

solving problems of modernization of higher education, ensuring its high quality and accessibility, including with a view to changing the situation on the labor market;

ensuring a double increase in the number of foreign citizens studying at Russian universities;

providing grant support to universities for the development and implementation of additional educational programs that ensure personal growth, expansion and updating of professional knowledge of citizens and the acquisition of new professional skills in accordance with rapidly changing technologies;

conducting an information campaign among the adult population about the need and opportunities for continuing education (vocational training and additional education) on the basis of universities;

creation of a platform for continuing education in order to navigate and support citizens in choosing educational programs and organizations implementing such programs.

Formation of a network of educational institutions of higher education, which allows the population of each federal district and constituent entity of the Russian Federation to receive education that meets international standards.

Support and development of the leadership group of Russian universities, ensuring the presence in the global rankings of 40 Russian universities in 2019, at least 50 universities by 2024.

Support for regional universities that have significant scientific and educational potential and are included in the strategic development agenda of their regions.

Conducting a comprehensive assessment of the effectiveness of state support to regional ("core") universities from 2016 to 2019, as well as the actual potential of a regional network of universities, determining a set of requirements, compliance with which will give universities the right to apply for state support in the competitive selection of programs and projects development of universities developed jointly with regional authorities and aimed at training highly sought-after personnel in the basic sectors of the economy and social sphere.

Maintaining the unity of the system of scientific certification, collegiality of interaction at the all-Russian expert sites of scientific certification, creating opportunities for competition and an objective assessment of scientific achievements within the framework of the common legal and certification space.

(Report of the Government of the Russian Federation to the Federal Assembly of the Russian Federation on the implementation of state policy in the field of education, 2019^[19])

1.2 Please provide a brief assessment of the effectiveness of the methods introduced to address the obstacles encountered:

2. Raising awareness

UNESCO governing bodies emphasized the need for awareness-raising. Given the importance of regulatory action at the national level, the Convention needs to be widely disseminated with the support of UNESCO National Commissions.

- Have measures been taken to draw the attention of various authorities of the country to the Convention / Recommendation and their provisions on the right to education and to raise awareness of the principles of non-discrimination and equality of educational opportunities? (several points can be noted)

Translation of the Convention / Recommendation into national and possibly local languages

Dissemination and promotion of the main content of the Convention / Recommendation or the basic principles of the right to education

Raising public awareness through advocacy materials on the Convention / Recommendation or the basic principles of the right to education

Activities carried out or supported by the National Commission to promote non-discrimination and equal educational opportunities, as well as to stimulate debate on critical issues regarding the rights enshrined in documents
