Reporting process for the 10th Consultation of Member States on the application of the 1960 Convention and Recommendation against Discrimination in Education – Contribution from Italian Ministry of Education

Actions for the right to study, against educational poverty and for inclusion

1) "IoStudio" card

The Ministry of Education is committed to the implementation of measures and activities aimed at guaranteeing fairness in accessing training opportunities, promoting inclusive education and guaranteeing the right to quality education. In this regard, the Charter is one of the initiatives put in place for sustainable access to study and in general to the world of cultural services. Launched in the school year 2008/2009, the service card is distributed at schools to all state and equal secondary school students, in order to create the first interinstitutional partnership network in support of the student's right to study, promoting access to culture through offers and facilities in the field of cinema, museums, school materials, narrative, mobility, access to architectural and environmental heritage, study trips, support for the purchase of audio-visual multimedia products, telephony and Internet browsing, the use of technology to support learning. As part of the initiatives aimed at promoting better access to all students, in addition to the scholarships mentioned above, appropriations of 10 million have been provided for teaching aids for pupils with disabilities and an additional 10 million for the loan for use textbooks and digital aids.

2) Educational emergencies

In territories affected by natural disasters or economic and social problems that may compromise the right to study of young people, the MI has launched "Ripartiamo dal scuola", a national medium-long term aid and intervention plan to support school communities and allow them to return to normal. "Ripartiamo dal scuola" is the national aid and intervention plan that the Ministry has launched to support students, families and teachers of the affected territories: through targeted interventions and specific actions, the community can rebuild a new identity and can look again tomorrow.

Inclusion Actions

1) School in hospital and home education

The MI has prepared an allocation of 2.5 million euros per year since 2017. Furthermore, a total exemption from the payment of school fees - based on the ISEE - has been provided for students of fourth and fifth year of second grade of secondary school. On May 15, 2019 the new MI portal was presented: <https://scuolainospital.miur.gov.it/sio/> Hospital schooling and home education are fundamental support programs for children and families and help to tackle early school leaving. Guaranteeing the right to study and educational continuity for those who are unable to attend normal education courses is crucial. The Portal responds to the need to guarantee an ever closer service to students and to support teachers' commitment to the use of technologies. In

Ministero dell'Istruzione
Dipartimento per il sistema educativo di istruzione e di
formazione
Direzione Generale per lo Studente, l'Inclusione e l'Orientamento scolastico
Ufficio II

2017/2018, 68.900 students benefited from it, mainly from kindergarten and primary school (over 70%) and almost 6.000 from secondary school, with the help of 740 teachers. The service is active throughout the national territory, the Regions most involved are Campania, Lazio, Liguria and Sicily. The Home Education service is intended for students of all levels and degrees who are subjected to home therapies that prevent school attendance for a period of time of not less than thirty days, even if not continuous. In 2017/2018, 1.306 pupils made use of this service, for a total of 64.715 hours of home education.

2) Free supply of textbooks

Among the tasks of the Student Administration there is the free supply of textbooks to pupils and less well-off students, according the art. 27 of Law 448 of 23 December 1998. The funds earmarked for the free supply of textbooks, assigned to the Ministry of the Interior, are distributed between the regions by the MI with a directorial decree. The Management also has funds for the purchase of textbooks and other teaching tools, including digital ones, for pupils and students who fall into compulsory school. These funds, set aside for three years (2016, 2017 and 2018), are provided for in paragraph 258 of the 2016 stability law, which defines the indicator of the equivalent economic situation (ISEE) as the basis for the criteria for assigning the contribution. In addition, the Directorate has funds available for scholarships for victims of terrorism and organized crime. The grants are also intended for the children of victims of terrorism, organized crime and duty. Scholarships are awarded annually by the Prime Minister.

3) Inclusion for minors from families in organized crime contexts

"Free to choose" is the title of the Memorandum of Understanding signed on November 5, 2019 at the Ministry of Education with the aim of giving minors from families inserted in organized crime contexts a concrete opportunity. The document was signed by the Minister of Education, the Minister of Justice, the Minister for Equal Opportunities and the Family, the National Anti-Mafia and Counter-Terrorism Prosecutor, the Public Prosecutor at the Court of Reggio Calabria, the President of the Tribunal for Reggio Calabria minors, the Public Prosecutor at the Reggio Calabria Juvenile Court and the President of Libera.

4) Memorandum of understanding with UNICEF

The protocol signed on 24 October 2018 between the MI Student Directorate and UNICEF allows to strengthen interventions aimed at giving students greater information on their individual rights, but also at promoting behaviors concretely respectful of the principles of inclusion and prevention of all forms of discrimination and violence. The aim is to spread the culture of the rights of children and adolescents, working for the full implementation of the principle of non-discrimination and the promotion of active digital education for a conscious use of new technologies and social networks. With this aim in mind, the Project "School Friend of Children and Teens" was born in which more than 1.200 schools of all levels and degrees join annually. The project is aimed at promoting knowledge and implementation of the Convention on the rights of the child and adolescence".

5) Supply of teaching aids

As required by art. 7 of the d. lgs. 63/2017, for the three-year period 2017-2020, the Student DG has allocated 10 million euros per year to schools that welcome students with disabilities.

6) Integration of Roma, Sinti and Caminanti pupils

With the aim of promoting the right to education for minorities, the following national training projects have been launched for the years 2016/2020 in the context of the protection of foreign minors in Italy or of Roma groups, Sinti Caminanti: for the years 2017/2019 the FAMI project "Multiannual training plan for managers and teachers of schools with a high incidence of foreign pupils", with a financing of 4.000.000 euros, involving a total of 1000 school managers, 10.000 teachers and 2000 units of ATA staff; for the years 2016/2020 the FAMI project "MICSE

Ministero dell'Istruzione
Dipartimento per il sistema educativo di istruzione e di
formazione
Direzione Generale per lo Studente, l'Inclusione e l'Orientamento scolastico
Ufficio II

- Mediator for interculture and social cohesion in Europe", with a funding of 2.500.000 euros, to start and continue professional improvement and updating courses, and three-year degree courses experimental for the role of cultural mediator.

The Directorate General for MI students has been collaborating since 2013 in the "National Program for the inclusion and integration of Roma, Sinti and Caminanti children", promoted, in the framework of the actions of the PON "Inclusion", by the Ministry of Labor and social policies, together with the Ministry of Health and the Istituto degli Innocenti.

The project activities are present in the main metropolitan cities: Bari, Bologna, Catania, Florence, Genoa, Messina, Milan, Naples, Reggio Calabria, Rome, Turin and Venice.

Main objectives of the project are:

- improve the participation and school integration of Roma, Sinti and Caminanti minors, in particular those who attend primary and secondary school;
- to involve the whole class, and not only Roma, Sinti and Caminanti students, in educational actions and training activities;
- facilitate the access of minors and their families to health and social services;
- consolidate territorial governance;
- create a collaboration network between the cities participating in the project.

<https://www.minori.gov.it/it/minori/progetto-rsc-report-di-valitazione-intermedia-2019>

7) MI / AGIA Memorandum of Understanding

The Memorandum of Understanding with the Guarantor Authority for children and adolescents (Agia) sets common objectives that mainly concern the protection and dissemination of the rights of children and young people. Particular attention is given to the right to study, to well-being, to play, especially for the weakest categories.

In preparation for the national seminar dedicated to the representatives for the integration of foreign pupils, adopted pupils and inclusion, meetings were held to present the Guidelines for adopted minors and unaccompanied foreign minors at the Didacta international fair which took place in Florence in September 2019, also with the disclosure of illustrated brochures.

The national seminar "Inter-educational actions: the age group 0-6 years, minors outside the family of origin", held in Rome on 10 December 2019, is also worth mentioning. During the training day, intended for the representatives of the offices regional school systems of the integrated education system 0-6 years, the inclusion of pupils with disabilities and the integration of foreign minors, work proposals were provided for the activity with children of nursery schools and kindergartens, elaborated in light of the provisions of the New York Convention and the legislation on the integrated system 0/6 years. The initiative is part of the wider dissemination of knowledge of the Convention among professional figures who work with people of minor age, with the aim of making the Convention's rights concrete and applied in daily practice.

On this occasion the two brochures were presented:

"Illustrated compendium of guidelines for the right to study of pupils and pupils outside the family of origin"

"Illustrated compendium of the guidelines for the right to study of adopted minors"

created with the aim of promoting the dissemination of knowledge of the guidelines and with them of the practices that can facilitate the school integration of pupils outside the family of origin and the pupils adopted.

8) National observatory for the integration of foreign students and for interculture

It is a reconvened consultation body, partially renewed in its composition after two years of interruption, with the Ministerial Decree 1119 of 04/12/2019 and met on December 16, 2019. The date chosen is not accidental because it follows the third national summit of diasporas (December 14), whose goal is to promote the economic, social, cultural exchange between the Italy and the countries of origin of the resident migrants. Countering stereotypes and involving the talents and professionalisms of this plural Italy and the new generations.

The task of the Observatory is to identify solutions for adapting school integration policies to the real needs of an increasingly multicultural and constantly changing school.

Objectives of the Observatory:

- Promote and suggest actions for the integration of foreign pupils and for intercultural education and verify their implementation;
- Solicit interinstitutional agreements, also with other competent ministries;
- To encourage didactic and methodological experimentation by enhancing the good practices of the schools;
- Formulate proposals on integration legislation.

The current Observatory is composed of representatives of the competent Ministries (Internal and Foreign), experts from universities, associations from the third sector, research bodies and institutes, school managers, representatives of associations of the new generations, as well as representatives of the various Directorates-General of the Ministry of Education.

The Observatory carries out its activity through five working groups on issues deemed to be priority:

- Italian L2 and enhancement of multilingualism;
- Training of school staff and adult education;
- Active participation of students, new generations and citizenship;
- Intercultural perspectives;
- Make school in the suburbs.

In particular, the latter group has prepared with the USR Liguria and the University of Genoa the national seminar "The peripheries in the center. The mending of the suburbs. Schools and territory in comparison" which took place in Genoa on February 21, 2020 and which has dedicated attention and analyzed operational proposals on the aspects of greater fragility of pupils and families in contexts of social complexity.

Equal Opportunities and for Respect Education, in accordance with the "Respect Guidelines" issued by MIUR in 2017

In compliance with the provisions of paragraph 16 of article 1 of Law 107 of 2015 which establishes that: *"The three-year plan of the educational offer ensures the implementation of the principles of equal opportunity by promoting schools of all levels education for gender equality, prevention of gender-based violence and all discrimination, in order to inform and raise awareness among students, teachers and parents on the issues indicated in article 5, paragraph 2, of the decree-law of 14 August 2013, n. 93, converted, with modifications, by law 15 October 2013, n. 11"* we point out:

1) Education portal to affectivity – www.noisiamopari.it

The MI has designed and created the Noi Siamo Pari online platform in order to support the teachers' commitment and contribute to constantly enriching our school's educational offer, to adapt it to the delicate educational tasks to which it is called. Inside the platform there are teaching materials and projects created by schools and associations on issues relating to equal opportunities. Furthermore, information, exchange and support tools are proposed with the aim of carrying out a capillary self-training action on the issues of education for affectivity, mutual respect,

Ministero dell'Istruzione
Dipartimento per il sistema educativo di istruzione e di
formazione
Direzione Generale per lo Studente, l'Inclusione e l'Orientamento scolastico
Ufficio II

equal opportunities, as well as the prevention of the phenomenon of bullying and cyberbullying in schools of all levels.

2) November 25 - International Day for the Elimination of Violence Against Women.

The International Day for the Elimination of Violence against Women occurs on 25 November each year. In order to sensitize all the school institutions, the MI issues every year a note of awareness on the day of November 25th established by the United Nations since 1999. The circular aims to incentivize the school institutions to start awareness, prevention and contrast to all forms of violence and discrimination.

3) March 8 - International Women's Day (commonly referred to as Women's Day)

In view of the International Women's Day, the student DG invites all schools of all levels to carry out an in-depth study of issues related to gender equality and the fight against discrimination, referred to in art. 3 of the Italian Constitution. On this occasion, the student DG, under the High Patronage of the Presidency of the Republic, also promotes a Competition that aims to make students think about the issue of male violence against women and gender discrimination. In the a.s. 2015/2016 the National Competition was: "1946 - 2016: Towards full active citizenship. 70 years from the vote of women", addressed to all schools of all levels. For the 2019/2020 school year, the Competition, entitled "With respect by educating", aims to make people reflect on the theme of education in respect for the workplace and in all living spaces. Educating to respect means educating to the difference, to the freedom of choice of others, to knowing how to live relationships in which the will and characteristics of others have the same weight as ours.

4) Plan for teacher training

The Ministry, in October 2016, launched the 2016-2019 Teacher Training Plan, financed with 325 million for the three-year period. Among the priorities of training, which is compulsory and permanent, there are the prevention of discomfort (4.6), which is also reflected in the development of a culture of equal opportunities and respect for the other, and education for citizenship (4.7), which includes gender equality.

5) Funded projects

In November 2016, the Department for Equal Opportunities of the Prime Minister, in collaboration with MI, published a call for the presentation of school educational initiatives on the prevention and fight against all forms of sexual and gender-based violence, open to all public schools, on the national territory - in implementation of the Extraordinary Action Plan against sexual and gender-based violence. The call encouraged the creation of partnerships between schools and NGOs working in this sector. The total amount allocated was € 5 million and the selected projects started their activities on February 1, 2017. In 2017, as part of the MI 10-Action Plan for an open, inclusive and innovative school - funded with the PON's 840 million for the School - 120 million have been foreseen for projects on Global Citizenship Skills, which include respect for diversity and active citizenship. Another series of measures that contribute to the promotion of the culture of respect and equal opportunities and to the fight against violence and discrimination, passes through sport, which is and must increasingly become a place of female participation at all levels. The Ministry has paid particular attention to the physical activity of boys and girls, also through specific actions to support teachers. Particular mention should be made of the "Class sports" initiative, also carried out thanks to the contribution of CONI, which consists in the enhancement of physical education in primary school, as a tool for the promotion of correct lifestyles and values from a young age, thanks to the inclusion of the specialized figure of the School Sports Tutor. Over time there has been a constant increase in participation by state schools, which has reached 70%. In addition, school sport brings with it a message to raise awareness among young people about the fight against violence against women, with the #NoViolenzaControLeDonne campaign. Since 2017, all athletes participating in the international student championships take to the field wearing a symbol of the campaign on their shirt. The initiative kicked off in Palermo

Ministero dell'Istruzione
Dipartimento per il sistema educativo di istruzione e di
formazione
Direzione Generale per lo Studente, l'Inclusione e l'Orientamento scolastico
Ufficio II

with the orienteering world championship.

Actions against all forms of discrimination

1) Actions against religious and racial discrimination

The MI, in order to combat racism and pursue an education to respect differences and against all forms of discrimination, has promoted, in collaboration with the Union of Italian Jewish Communities (UCEI), initiatives and projects aimed at handing down and strengthening awareness among young people of the memory of the Shoah and renew the memory of those events. In this regard, in 2002 the national competition "Young people remember the Shoah" was launched, one of the best practices of MI aimed at stimulating the younger generations to study and research on the issue of the Shoah. The competition is aimed at students of the first and second cycle of education and has the ultimate goal of promoting the study and deepening of the history of the Shoah and of anti-Jewish persecutions, intended as a universal lesson to combat all forms of racism and discrimination. Since its inception, over 7.000 schools have participated in the competition, for a total of over 300.000 students. For the 2019/2020 school year the Competition will reach its 18th edition and like every year the winners will be awarded at the Quirinale by the President of the Republic Sergio Mattarella. Over the years, itinerant exhibitions have been organized throughout the national territory, collecting the best works created by students over the various years. During the last school year, the works collected as part of the competition have given rise to two appointments: the first, in February 2019, at Palazzo Chiamonte Steri in Palermo; the second, at the Shoah Memorial in Milan, in the months of March and April. As regards the training of teachers, the first national seminar on the issues of the Shoah was held on 15 and 16 April 2019, entitled "Passage of Witness: the memory of the Shoah by survivors of school practices", in which they participated over 200 teachers from all over Italy. The active commitment of educational institutions and places of education, in fact, is the best vehicle so that the lesson of the Shoah is not dispersed, but rather is a warning against any form of persecution, religious in fact, but also of gender. The initiatives aimed at stimulating the fight against discrimination include the creation of the "School and Memory" portal, dedicated to the didactics of the Shoah and designed with the aim of providing teachers, trainers and students with a useful tool for information and training on the issue of the Shoah. Its main task, however, remains to create a platform for the exchange of the best Best Practices in the didactics of the Shoah between schools throughout the national territory, so that schools feel involved and protagonists in educating equality and in the fight against racism of all kinds. As part of the initiatives related to the Italian Presidency of the International Holocaust Remembrance Alliance (IHRA), which took place between March 2018 and March 2019, the conference "The innocent enemy. Incitement to hatred in contemporary Europe ". The meeting, which was held on 12 November 2018 at the Shoah Memorial in Milan, aimed to analyze and describe hate speech processes from various points of view: historical (the characteristics of anti-Semitic propaganda and type discriminatory from the National Socialist regime to date), legal ("pro" and "no hate" rules and legislation: a weakness of the law in the face of these phenomena?), sociological and communication (the trivialization of hatred and aspects related to hate speech on the web) and educational-didactic (indications to contrast the spread of hate speech).

2) May 17 - International Day against Homophobia

The European Union has called the International Day against Homophobia (resolution of the European Parliament of April 26, 2007) for 17 May each year, or against any form of prejudice based on sexual orientation. The principles that inspire the day are the constitutive principles of both the European Union and the Italian Constitution: respect for human rights and fundamental freedoms, equality between all citizens and non-discrimination. These are also the conditions that allow society to promote the inclusion of each and every one and to fight against any offense to people. Each year the Ministry sends a note to all educational institutions to reiterate the importance of the Day by inviting schools to start awareness-raising initiatives against inequalities and promote a valorisation of diversity.

Ministero dell'Istruzione
Dipartimento per il sistema educativo di istruzione e di
formazione
Direzione Generale per lo Studente, l'Inclusione e l'Orientamento scolastico
Ufficio II

3) No Hate Speech. Ideas against hate speech through human rights education

In implementation of the commitments contained in the National Plan for the prevention of bullying and cyberbullying at school presented on 17 October 2016, in reference to the note prot. n.2501 of 25 March 2016 with which the Student DG launched an awareness and information action on the topic of instigation to hate online and the risks that it represents, the MI, in collaboration with the Italian Delegation to the For the 2016/2017 school year, the Assembly of the Council of Europe has promoted a competition reserved for second grade secondary school students in order to promote a process of reflection and awareness on the risks and dangers of violence and hatred. line. The winning class was offered an award trip to Strasbourg for the second parliamentary session from 24 to 28 April 2017.

4) Promotion and awareness of the positive and aware use of new technologies and of countering bullying and cyberbullying

The most recent reform processes in progress, aimed at promoting a new public interest in the recognition of real primary rights of citizens in the digital space, most recently, the adoption of the Regulation of the European Parliament and of the Council, relating to the protection of individuals with regard to the processing of personal data, as well as the free movement of data (GDPR679/16), see the Ministry engaged in strengthening the main experiences and skills needed within its own administration, but also to society as a whole, thanks to the activities implemented within the European Better Internet for Kids strategy launched in 2012 by European Commission. The European Digital Agenda aims at the entry of all Europeans into the digital world, but for young people, the use of the Internet presents particular needs and vulnerabilities that must be treated specifically. On 18 June 2017 the law of 29 May 2017, n. 71, "Provisions for the protection of minors for the prevention and contrast of the cyberbullying phenomenon". Subsequently, the "Guidelines for the prevention and contrast of cyberbullying" were published, envisaged as a flexible and updatable tool to respond to the educational and pedagogical challenges linked to the constant evolution of new technologies. The main actions carried out by the Student DG find an appropriate place within this regulatory frame-work: A. the Safer Internet Center - Connected Generations project, B. the Elisa Platform, C. the Interinstitutional Technical Table - L.71/ 2017.

A) The Safer Internet Center

The Safer Internet Center - Generazioni Connesse project, since 2014 has contributed to making the programs put in place by the Ministry ever more qualified, is co-financed by the European Commission within the Connecting Europe Facility (CEF) - Telecom program, member of a network promoted by the European Commission and which takes the form of the online platform "Better Internet for Kids" managed by European Schoolnet, in close collaboration with INSAFE (network that gathers all European SIC) and Inhope (network that gathers all European hotlines). The project is coordinated by the MI with the partnership of some of the main Italian companies that deal with network security: Guarantor Authority for Children and Adolescents, State Police, the Ministry for Cultural Heritage and Activities, the Universities of Florence and 'La Sapienza' of Rome, Save the Children Italy, Telefono Azzurro, the EDI onlus cooperative, Skuola.net and the DIRE press agency and the Autonomous Authority Giffoni Experience. The Safer Internet Center SIC) was created to provide information, advice and support to children, young people, parents, teachers and educators who have experiences, including problems, related to the Internet and to facilitate the reporting of illegal online material. The Project sought to develop services with an innovative and higher quality content, in order to guarantee them to move safely "in the environment" online, considering, at the same time, the connected investment as a 'virtuous' opportunity for a 'social' and economic growth of the whole community. SIC is aimed at younger generations, actively involving teachers, parents, organizations, associations and companies to make the network a better and safer environment for both human and scholastic-professional growth, with actions that have brought field of (in) training tools useful to promote a positive and critical use of the Network and to prevent possible situations of hardship. In particular, the main actions carried out are

Ministero dell'Istruzione
Dipartimento per il sistema educativo di istruzione e di
formazione
Direzione Generale per lo Studente, l'Inclusione e l'Orientamento scolastico
Ufficio II

summarized below:

- **Online awareness activities: information and communication campaigns aimed at students, young people in general, teachers and parents.**

Through the youtube and social channels, cartoon videos and video tutorials were first produced and then promoted in order to make children, parents and educators in general think about the positive and conscious use of the network: <https://www.youtube.com/user/GenerazioniConnesse/playlists>
<https://www.facebook.com/generazioniconnesse/>
<https://twitter.com/saferinternetit>
https://www.instagram.com/generazioni_connesse/

- **International day of online security, Safer Internet Day**

Safer Internet Day (SID) 2020 is the world day for network security, established and promoted by the European Commission, which is celebrated on the second Tuesday of February. For all schools that want to offer a contribution to the Safer Internet Day 2020 celebrations, it is required to upload their events online on the website www.generazioniconnesse.it obtaining visibility at national and European level.

- **E-policy in schools**

Development of an internal E-policy through a new platform for teacher training. The platform supports teachers at every stage of the shared path, up to the return of the E-policy, a fundamental document for planning and / or updating digital education activities, as well as useful for identifying actions to prevent bullying and cyberbullying phenomena to be foreseen in the PTOF, as required by the regulatory provisions. The course is dedicated to primary and secondary schools and from the school year. 2019-20 is also extended to secondary schools.

- **Evaluation and monitoring**

The Project makes use of the scientific contribution and evaluation activities of the University of Florence and the University of Rome "La Sapienza" to carry out monitoring actions.

- **Youth consultation group**

A youth consultation group has been set up within the Safer Internet Center which is constantly involved in the project activities. The SIC Youth Panel, on the one hand, has the task of spreading the project activities and the initiatives carried out, on the other hand, it is an active protagonist of the activities by producing information and awareness materials to give voice to the young people themselves and promote the their ideas and opinions.

- **Seminars for professionals**

Another activity planned within the Project is the realization of a cycle of 7 training and awareness seminars, dedicated to childhood professionals (social workers, pediatricians, psychologists, educators, teachers and school managers).

- **Listening and reporting lines for problems related to online activities**

The CEF - Telecom program provides, among other actions, the financial support of a Helpline for each co-financed project. Therefore, the Project provides for the strengthening of the S.O.S. The Telefono Azzurro (1.96.96) and the chat <http://www.azzurro.it/chat.html>. Among the actions of the Project, the strengthening of the two Hotlines, <http://www.azzurro.it/it/clicca-e-segnala> of SOS Il Telefono Azzurro and www.stop-it.it of Save the Children Italia Onlus, reserved for users of the Network to report the online presence of child pornography and any kind of illegal or potentially content harmful, present on the web. The Hotlines are directly connected with the Postal Police and it is possible to make reports anonymously.

- **Advisory Committee**

The SIC also makes use of a National Advisory Board, a working group that boasts excellent skills and know-how, thanks also to the presence, within a technical table, of the most authoritative subjects of the telecommunications companies, of the ICT and the web.

- **"Better Internet for Kids" Policies - SIC international character**

The Generazioni Connesse project is also projected at European Cooperation level in synergy with the other safer Internet Centers for the exchange of good practices, materials, educational and communication resources. The

Ministero dell'Istruzione
Dipartimento per il sistema educativo di istruzione e di
formazione
Direzione Generale per lo Studente, l'Inclusione e l'Orientamento scolastico
Ufficio II

safest Internet Center English was actively illustrated at all the meetings planned by the European Commission: Safer Internet Forum and Insafe training meetings, aimed at promoting the exchange of good practices. Furthermore, all the activities described above were promoted within the # SaferInternet4EU campaign, launched by Commissioner Mariya Gabriel, as well as giving them visibility in a European and international context.

B) ELISA Platform Project - Training of referent teachers

With the issuance of the "Guidelines for actions to prevent and combat bullying and cyberbullying", and the subsequent "National Plan for the prevention of bullying and cyberbullying at school" presented in October 2016, the Ministry of Education wanted give a strong signal of recovery of bullying and cyberbullying prevention activities, making specific financial resources available to schools to implement national initiatives, with the aim of involving as many educational institutions as possible and creating a national network aimed at contrasting youth unease. Furthermore, as required by Law 71/2017 and by the update of the Guidelines for the prevention and countering of cyberbullying (MIUR note prot. No. 5515 of 27-10-2017), the MI has undertaken to implement a National Training Plan for referring teachers to combat bullying and cyberbullying, requiring all schools and regional school offices to identify at least one referring teacher for bullying and cyberbullying. In fact, in collaboration with the Department of Education, Languages, Interculture, Literature and Psychology of the University of Florence, the ELISA platform (E-learning of Teachers on Anti-bullying Strategies) was prepared and launched <https://www.piattaformaelisa.it/piattaforma-e-learning/> to equip schools with effective intervention tools on cyberbullying and bullying. To meet this objective, two specific actions have been carried out: an area dedicated to schools for online monitoring of bullying and cyberbullying and a section dedicated to teachers for training through modules and learning aimed at teachers.

C) Interministerial Technical Table

Following the entry into force of Law 71/2017 "Provisions for the protection of minors for the prevention and contrast of the phenomenon of cyberbullying", the Interinstitutional Technical Table was established with DPCM 2566 of 20 October 2017, whose coordination is entrusted to the Ministry of Education. The objective of the Table, which took place in February 2018, is to produce an Integrated Action Plan for the fight against and prevention of cyberbullying, in compliance with the European directives on the matter and within the framework of the European Union's multi-annual program (referred to in Decision 1351/2008/EC of the European Parliament and of the Council, of 16 December 2008) and implement a data collection system aimed at monitoring the evolution of the phenomena, also using collaboration with the Postal and Communications Police and with other police forces. The table met on 10 July 2019, resuming activities for the drafting of the Integrated Action Plan envisaged by the standard.

B) Participation in Interinstitutional Tables

The Minister of Education participates in several interinstitutional tables aimed at contrasting phenomena related to the incorrect use of new media, such as, for example, cyberbullying. In this field he contributed to the Report "OECD - Global Relations Strategy and Participation Plan of the Education Policy Committee 19-20 November 2019, Item 5 - Idea Exchange: Children and Technology", with note M_pi.AOODGSIP U.0004907.06-11-2019 .

Actions for the National Plan to combat trafficking and serious exploitation of human beings 2019-2020

- 1) The Student DG of the MI provided, as far as it is concerned, a Contribution for the National Plan for the fight against trafficking and the serious exploitation of human beings 2019-2020 in October 2019.
- 2) **Actions for the culture of legality**

In partnership with the Chamber of Deputies and the Senate of the Republic, the MI student management organizes the following competitions every year to promote the culture of legality in order to exercise active citizenship in various sectors: 1) "From parliamentary classrooms to classrooms. Constitution lessons"; 2) "A day in the Senate"; 3) "Senate & Environment"; 4) "Witnesses of rights"; 5) "I would like a law that ..."; 6) "Training day in Montecitorio"; 7) "Parlawiki - Build the Democracy Vocabulary".

Actions for health education and correct lifestyles

1) Memorandum of Understanding Ministry of Education - Ministry of Health

Over the years, the MI Student DG has started various activities and collaborations, aimed at schools of all levels and degrees, to protect the right to health, raise awareness of prevention issues and promote correct lifestyles. In February 2019, the protocol of understanding with the Ministry of Health was renewed and the document of Integrated Policy Addresses for the school that promotes health was signed, a document that integrates what has already been defined in the renewed protocol. To implement the memorandum of understanding, a new joint committee was set up which organized itself into working groups on the following topics: 1. Lifestyles, Nutrition, Nutrition; 2. Addictions, Mental Health, Eating Disorders; 3. Disability and Inclusion; 4. Affection; 5. Prevention of infectious diseases, Vaccinations.

2) Participation and inter-ministerial tables

The MI also participates in the following inter-ministerial tables set up at the Ministry of health: 1. Urban Health - City and Health Working Table, at the Ministry of Health, made up of members of MI, Ministry of Infrastructure and Transport, Ministry of the Environment, Protection of the Territory and the Sea, Interregional Coordination of Prevention, National Association of the Municipalities of Italy, the Higher Institute of Health, the Italian Hygiene Society, the Italian Healthy Cities Network, with the aim of producing a policy document aimed at promoting the integration of health policies with urban planning policies; 2. Intersectoral table for the promotion of correct lifestyles in public administrations, to make employees aware of the issues of prevention and promotion of correct lifestyles; 3. The Observatory for the fight against the spread of gambling and the phenomenon of serious addiction, set up at the Ministry of Health in agreement with the Ministry of Finance, with the task of defining the guidelines, monitoring dependencies and verifying the effectiveness of the treatments and preventive actions undertaken. Finally, there are some associations and foundations, with which the MI has signed memoranda of understanding and agreements, to prepare calls for students or the promulgation of educational offers, related to health issues: Italian Association for Cancer Research (AIRC Foundation); Italian Red Cross (CRI); Umberto Veronesi Foundation (FUV); Italian Society of Urology (SIU); Melanoma Italian Intergroup (IMI); Italian Scientific Association for Research and Education in Sleep Medicine (ASSIREM); Italian Institute of Donation (IID); Biological gift; Italian League for the Fight against Cancer (LILT); Italian Blood Volunteers Association (AVIS); Italian Thyroid Association (AIT); Italian Salvation Society; Italian Society of Pediatrics (SIP); National Council of Psychologists Order (CNOP).

3) Contrast to the use of drugs and psychotropic substances

On August 7, 2017 MI and the Prime Minister signed the Memorandum of Understanding on the prevention of drugs in school age. The parties have also signed a collaboration agreement (pursuant to article 15 of L. 241 of 1990). The Steering Committee, made up of members of the Student DG and the Drug Policy Department, has prepared the three-year plan of activities that identifies teachers, students and parents as recipients, to whom information and training campaigns are addressed. In particular, teachers of schools of all levels have been involved in a training plan (online and in presence) precisely on the issues of addiction.

4) Promotion of road safety

Road education is one of the priorities on which MI works to promote the culture of street safety among young people. Edustrada is the national project for road education in schools, an operational tool that uses new methodologies to increase the involvement of students and teachers. The www.edustrada.it platform is an interactive space dedicated to schools, of all types and levels, to allow participation in the initiative. The training offer includes educational projects, meetings in schools, materials, information content and competitions, which promote the active participation of students and teachers. The Project calls for awareness and internalization of values that lead to taking on responsible and constructive forms of coexistence. The portal was started by the MI student management in 2017, in collaboration with the Ministry of infrastructure and transport, the traffic police, the psychology department of the Sapienza University of Rome, the Italian cycling federation and the Italian motorcycle federation, the Automobile club of Italy, the Ania Foundation.

Actions for environmental education and sustainability

1) World Soil Day

On December 5, 2013, in the framework of the Global Soil Partnership, with the unanimous support of the members of the Food Agricultural Organization, and with the support of the United Nations, World Soil Day was recognized for the first time. Since 2014, the World Day Soil is held every year on December 5 to focus attention on the importance of healthy soil and to promote its sustainable management. On 29 November 2019, the student administration of the MI issued a circular addressed to all schools of all levels and inviting schools to carry out further studies on the topic also thanks to the materials indicated in the note itself, with the aim of promoting sustainable management soil intended as a non-renewable resource.

2) PON "For the School" 2014-2020

On December 13, 2019, MI presented the theme of this year's projects to which European funds should be dedicated: "Educating for sustainability. The stories of the PON Scuola". 3.157 new projects will be financed with 113 million euros; more than 2 million students are those involved so far, over 52.000 projects already funded, almost 8.000 institutions involved. The National Operational Program "For the School - Skills and learning environments" held by the MI in the context of the Programming of the European Structural Funds 2014-2020 has a total financial envelope of over 2.8 billion euros.

Actions after Covid 19 epidemic

The Ministry of Education has dedicated a section on the home page to Covid 19

<https://www.istruzione.it/coronavirus/index.html>

In particular, for the law enforcement, please see: <https://www.istruzione.it/coronavirus/norme.html>

The following documents are those with the basic principle of the contrast of any discrimination and the implementation of full inclusion:

- 1) Letter from the Minister of Education to schools - protection of the right to education for pupils with disabilities April 27, 2020
- 2) Adoption of the Document for the planning of school, educational and training activities in all Institutions of the National Education System for the 2020/2021 school year
- 3) Guidance and orientation document for the resumption of activities in the presence of educational services and kindergartens
