

GUIDELINES FOR THE PREPARATION OF REPORTS BY MEMBER STATES ON THE APPLICATION OF THE 1974 RECOMMENDATION CONCERNING EDUCATION FOR INTERNATIONAL UNDERSTANDING, CO-OPERATION AND PEACE AND EDUCATION RELATING TO HUMAN RIGHTS AND FUNDAMENTAL FREEDOMS

I. Introduction

A. About the 1974 Recommendation

1. UNESCO's *1974 Recommendation concerning Education for International Understanding, Co-operation and Peace and Education relating to Human Rights and Fundamental Freedoms*¹ (the "*1974 Recommendation*") aims to promote international education and world peace through understanding, solidarity and cooperation. It was adopted on 19 November 1974 by the General Conference of UNESCO at its 18th session.

2. The *1974 Recommendation* applies to formal, non-formal and informal education and to all levels, from pre-primary to tertiary and adult education and lifelong learning. The General Conference recommended "*that Member States should apply*" the provisions included in the *1974 Recommendation* "*by taking whatever legislative or other steps*" that provide institutional (e.g. policies and legal frameworks) and pedagogical (e.g. curricula, teacher training, educational materials, equipment, and student assessment) support for its implementation, based on the "*objectives*", referred to in paragraph 4 of the *1974 Recommendation*, "*regarded as major guiding principles of education policy*" including: an international dimension and a global perspective on education, cultural diversity, interdependence, communication, rights and responsibilities, international solidarity and cooperation, and problem solving.

3. Today, the principles of the *1974 Recommendation* apply equally well to Education for Sustainable Development (ESD) and to Global Citizenship Education (GCED) and therefore represent a powerful tool for promoting the 2030 Agenda for Sustainable Development and in particular SDG Target 4.7 on the promotion of sustainable development and global citizenship through education, Target 12.8 on access to information on sustainable development and Target 13.3 on climate change education.

4. The General Conference in its 39th session recommended the use of the *1974 Recommendation* reporting process to support the implementation and monitoring of Target 4.7 of Sustainable Development Goal 4 (39 C/Resolution 79). The UNESCO Executive Board at its 209th session approved the use of the current guidelines for both the monitoring of the *1974 Recommendation* and the collection of data needed for the following global SDG indicator for which UNESCO is custodian (209 EX/Decision 18.II):

4.7.1, 12.8.1 and 13.3.1: *The extent to which (i) global citizenship education and (ii) education for sustainable development are mainstreamed in (a) national education policies; (b) curricula; (c) teacher education and (d) student assessment.*

5. Questions marked with an asterisk (*) will be used in the calculation of the respective indicators (**Table 1**). As approved by the Inter-Agency and Expert Group on the SDG Indicators, the indicators will be calculated for primary and secondary education only.

Table 1 Questions used in the calculation of the global SDG indicator for Targets 4.7, 12.8 and 13.3

Policies	Curricula	Teacher education	Student assessment

B. Reporting obligations

6. The General Conference, at its 18th session, when adopting the *1974 Recommendation* recommended “*that Member States submit [...] reports concerning the action taken by them in pursuance of this recommendation*”. Moreover, in accordance with Article VIII of UNESCO’s Constitution “*Each Member State shall submit to the Organization [...] reports [...] on the action taken upon the recommendations and conventions referred to in Article IV, paragraph 4.*”

7. Thus, **all UNESCO Member States are expected to report on the steps they have taken to implement the 1974 Recommendation** preferably by completing the following questionnaire. Such reporting takes place every four years.

II. Guidelines for completion of the questionnaire

8. This questionnaire and its accompanying guidelines are addressed to Ministers responsible for relations with UNESCO. The questionnaire is typically completed by Ministries of Education and other government authorities responsible for education. Responses should cover, as far as possible, education at all levels of government, including sub-national levels where applicable as well as education outside the government sector.

9. National respondents are encouraged to **consult widely** both within, across and beyond government, including with Ministries of Environment, with national human rights institutions, the education sector, civil society partners and others, as necessary, to gather the information needed to complete the questionnaire.

10. Responses to the seventh consultation should cover:

- (i) the time period 2017-2020;
- (ii) education at all levels of formal education from pre-primary to tertiary education as well as non-formal education;
- (iii) all levels of government that have responsibility for education within the country; and
- (iv) where possible, education outside the government sector.

11. To assist countries in responding to this questionnaire, UNESCO has developed the following set of global citizenship education and education for sustainable development themes. The list is based on a review of current common practices in many countries as well as a review of relevant literature. While the terms ESD and GCED may be used differently in some countries, the list of themes typically captures what are seen as key elements of Target 4.7. Please refer to the definitions of key terms in **Section III** before completing the questionnaire.

Global citizenship education and education for sustainable development

- 1. cultural diversity and tolerance
 - 1.1 international or intercultural understanding, solidarity and cooperation
 - 1.2 intercultural and interreligious dialogue
 - 1.3 local, national and/or global citizenship
- 2. gender equality education
 - 2.1 gender-based equal opportunities
 - 2.2 gender equality and justice
 - 2.3 gender roles, identity and stereotypes

3. human rights education
 - 3.1 equality and non-discrimination based on race, colour, language, religion, disability, political or other opinion, national or social origin, birth or other status
 - 3.2 human rights values, human dignity, justice, inclusion and participation
 - 3.3 respect for human rights and fundamental freedoms (as outlined in international conventions and declarations)
4. peace and non-violence
 - 4.1 friendly relations among peoples and nations
 - 4.2 challenging negative stereotypes, promoting peaceful solutions, learning to live together, including others and preventing violent extremism
 - 4.3 preventing all forms of violence including bullying, verbal abuse and gender-based violence
5. climate change education
 - 5.1 mitigation
 - 5.2 adaptation
 - 5.3 impact reduction
 - 5.4 early warning
6. environmental sustainability
 - 6.1 caring for the planet, protecting nature
 - 6.2 environmental justice
 - 6.3 biodiversity, water
7. human survival and well-being
 - 7.1 environmental health as it pertains to human well-being, disaster risk reduction
 - 7.2 health of the planet for future generations
 - 7.3 sustainable cities and communities
8. sustainable consumption and production
 - 8.1 responsible and sustainable lifestyles
 - 8.2 green economy, green jobs
 - 8.3 sustainable energy

III. Definitions of key terms

Term	Definition
Themes of global citizenship and education for sustainable development	
1. Cultural diversity and tolerance	<i>Education about and for diversity including language, ethnicity, race, religion as well as the development of tolerance, mutual respect and appreciation for cultural diversity. It includes intercultural and interreligious dialogue, understanding, solidarity and co-operation, and citizenship education.</i>
2. Gender equality education	<i>Education that addresses the wider issue of gender equality by promoting new attitudes and patterns of belief, transforming the way people think about traditional gender roles and helping to build long-term sustainable change. It examines how gender roles, activities, needs, opportunities, rights and entitlements affect men, women, girls and boys differently. It deals with the relationships between females and males, their access to and control of resources and the constraints they face relative to each other. It respects the rights of all learners – women, men, boys and girls – equally and gives equal access to learning opportunities, resources and protections. All learners benefit from and are treated in education equally without the limitations set by stereotypes, rigid gender roles and prejudices. It covers gender-based equal opportunities, gender equality and justice, and gender roles, identity and stereotypes.</i>
3. Human rights education	<i>Education that promotes universal respect for and observance of all human rights and fundamental freedoms and thus contributes, inter alia, to the prevention of human rights violations and abuses by providing persons with knowledge, skills and understanding and developing their attitudes and behaviours, to empower them to contribute to the building and promotion of a universal culture of human rights.</i> <i>It includes equality and non-discrimination, human rights values, dignity, justice, inclusion and participation and respect for human rights and fundamental freedoms.</i>
4. Peace and non-violence	<i>Education about peace and peace-building, mediation, conflict prevention and resolution, non-violence, reconciliation and living together peacefully. It includes advocating for friendly relations among peoples and nations, challenging negative stereotypes, promoting peaceful solutions, learning to live together and preventing violent extremism and other forms of violence including bullying.</i>
5. Climate change education	<i>Education to help people, in particular youth, understand, address, mitigate, and adapt to the impacts of climate change. It encourages changes in attitudes and behaviours needed to put the world on a more sustainable development path, and build a new generation of climate change-aware citizens.</i> <i>It covers various responses to climate change including mitigation, adaptation, impact reduction and early warning.</i>
6. Environmental sustainability	<i>Education about responsible interactions with the environment to avoid depletion or degradation and to promote environmental quality and health. It includes, caring for the planet and protecting nature, environmental justice, biodiversity and water.</i>
7. Human survival and well-being	<i>Education that promotes social well-being and harmony including in future generations due to healthy environmental systems. It includes health of the planet and environment related to human well-being, disaster risk reduction and sustainable cities and communities.</i>

8. Sustainable consumption and production	<i>Education on the use and production of resources, products and services that have a minimal adverse impact on the environment. It promotes resource and energy efficiency, sustainable infrastructure and green jobs. It includes responsible and sustainable lifestyles, the green economy and sustainable energy.</i>
Dimensions of learning	
Knowledge	<i>Factual information and understanding acquired through study and/or experience.</i>
Skills	<i>The ability to carry out a task well as a result of training, practice and innate aptitude. Skills may be physical, mental or both.</i>
Values	<i>Principles that form the foundation on which individuals conduct themselves and interact with others and with the environment around them.</i>
Attitudes and behaviours	<i>Ability to act on the basis of beliefs and knowledge acquired through study or experience.</i>
Levels of education	
Pre-primary	<i>Education designed to support children's early cognitive, physical, social and emotional development and introduce young children to organized instruction outside of the family context. Participants are usually aged from three years.</i>
Primary and secondary	<i>Education designed to:</i> <i>(i) provide students with fundamental skills in reading, writing and mathematics (i.e. literacy and numeracy) and establish a solid foundation for learning and understanding core areas of knowledge and personal development (primary education); and</i> <i>(ii) prepare students for further education at post-secondary and tertiary levels and for entry into the labour market (secondary education).</i> <i>It includes both general and vocational education.</i>
Tertiary	<i>Education designed to provide learning activities in specialised fields of education. It aims at learning at a high level of complexity and specialisation. It includes both what is commonly understood as academic education and advanced vocational or professional education.</i>
Types of education	
Adult education	<i>Education specifically targeted at individuals who are regarded as adults by their society to improve their technical or professional qualifications, further develop their abilities, enrich their knowledge with the purpose to complete a level of formal education, or to acquire, refresh or update their knowledge, skills and competencies in a particular field.</i>
Formal education	<i>Education that is institutionalized, intentional and planned through public organizations and recognized private bodies which – in their totality – constitute the formal education system of a country. Formal education programmes are recognized by the relevant national or sub-national education authorities. Formal education consists mostly of initial education (e.g., pre-primary, primary, secondary and tertiary education).</i>
Non-formal education	<i>Education that is an addition, alternative and/or a complement to formal education within the process of the lifelong learning of individuals. It is often provided to guarantee the right of access to education for all. It caters to people of all ages but does not necessarily apply a continuous pathway-structure. It may be short in duration and/or low-intensity, and it is typically provided in the form of short courses, workshops or seminars. Non-formal education mostly leads to qualifications that are not</i>

	<i>recognized by the relevant national or sub-national education authorities or to no qualifications at all. Non-formal education includes programmes on life skills including literacy and numeracy, work skills, and social or cultural development. Most types of adult education are also included.</i>
Vocational education	<i>Education that is designed for learners to acquire the knowledge, skills and competencies specific to a particular occupation or trade or class of occupations or trades. Vocational education may have work-based components (e.g. apprenticeships). Successful completion of such programmes leads to labour-market relevant vocational qualifications acknowledged as occupationally-oriented by the relevant national authorities and/or the labour market. Vocational education can be offered at secondary and post-secondary or tertiary levels of education.</i>

IV. Information about the respondent

Country:

United Kingdom of Great Britain and Northern Ireland

Organization:

United Kingdom Permanent Delegation to UNESCO

Date of submission:

18.12.2020

V. Other contributors consulted during the completion of this questionnaire

Please indicate below the names of other organizations and contributors consulted during the completion of this questionnaire.

Government institutions including other Ministries (please specify):

Department for Education (England) and Devolved Administrations of Wales, Scotland and Northern Ireland

National human rights institutions (please specify):

Government Equalities Office, The Equality and Human Rights Commission,

Local and regional authorities responsible for education (please specify):

Aberdeenshire Council, The Scottish Attainment Challenge,

Other local and regional authorities (please specify):

Organizations representing education stakeholders (e.g. teachers, students, parents, etc.) (please specify):

Other civil society organizations (please specify):

Education Policy Institute

Others (please specify):

Student Loans Company, Deloitte,

VI. Questionnaire

A. Laws and policies (preamble and paras 4 and 7 of the 1974 Recommendation)

A1a. Please describe any specific national or sub-national laws, legislation or legal framework(s) in your country that govern the promotion of global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes² are mentioned explicitly or are inferred and what types or levels of education are covered.

Education in the United Kingdom is devolved, and so there is some variance in the approach to Education for Sustainable Development. We have identified relevant links to official curriculums (detailed in the next sections)

England: There is no statutory requirement for Sustainable Development Education in the National Curriculum in England. However, Sustainable Development education forms part of a range of subjects in the National Curriculum. There are also a number of government funded programmes that schools and pupils can choose to participate in to enhance their learning of sustainable development.

Northern Ireland: Education For Sustainable Development is part of the required minimum content for Key Stage 3.

Scotland: Learning for Sustainability is a cross-curricular approach, that weaves together global citizenship, sustainable development education and outdoor learning.

Wales: Education for Sustainable Development and Global Citizenship provides learners, at all stages of education, an understanding of the broad themes of Sustainable Development.

A1b. Please provide the full names of any laws, legislation or legal frameworks referred to in A1a and, where possible, web links to relevant documents.

Northern Ireland <https://www.legislation.gov.uk/nisr/2007/46/introduction/made>

Scotland <https://education.gov.scot/education-scotland/scottish-education-system/policy-for-scottish-education/policy-drivers/learning-for-sustainability>

Wales <https://hwb.gov.wales/storage/eaf467e6-30fe-45c9-93ef-cb30f31f1c90/common-understanding-for-school.pdf>

² See the schema described in paragraph 11 of Section II of these guidelines.

*A2 Please indicate which GCED and ESD themes are covered in national or sub-national laws, legislation or legal frameworks on education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown, 99 = not applicable (e.g. where the given level of government is not responsible for education)

	National				Sub-national			
	Pre-primary	Primary/secondary	Tertiary	Non-formal	Pre-primary	Primary/secondary	Tertiary	Non-formal
1. Cultural diversity and tolerance	0	0	0	0	0	0	0	0
2. Gender equality	0	0	0	0	0	0	0	0
3. Human rights	0	0	0	0	0	0	0	0
4. Peace and non-violence	0	0	0	0	0	0	0	0
5. Climate change	0	0	0	0	0	0	0	0
6. Environmental sustainability	0	0	0	0	0	0	0	0
7. Human survival and well-being	0	0	0	0	0	0	0	0
8. Sustainable consumption and production	0	0	0	0	0	0	0	0

A3a. Please describe any specific current national or sub-national education policies, frameworks or strategic objectives in your country that promote global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes³ are mentioned explicitly or are inferred and what types or levels of education are covered.

Relevant UK policies on Global Citizenship Education and Sustainable Development Non-statistical indicator

Education in the United Kingdom is devolved, and so there is some variance in the approach to Education for Sustainable Development. We have identified relevant links to official curriculums:

England: There is no statutory requirement for Sustainable Development Education in the National Curriculum in England. However, Sustainable Development education forms part of a range of subjects in the National Curriculum. There are also a number of government funded programmes that schools and pupils can choose to participate in to enhance their learning of sustainable development.

Northern Ireland: Education For Sustainable Development is part of the required minimum content for Key Stage 3.

³ See the schema described in paragraph 11 of Section II of these guidelines.

Scotland: Learning for Sustainability is a cross-curricular approach, that weaves together global citizenship, sustainable development education and outdoor learning.

Wales: Education for Sustainable Development and Global Citizenship provides learners, at all stages of education, an understanding of the broad themes of Sustainable Development.

<https://sdgdata.gov.uk/4-7-1/>

Teaching the Goals (4.7)

In England, the national curriculum provides teachers with the opportunity to teach pupils about Global Goal topics which teachers are free to expand on if they choose. For example, the Citizenship curriculum teaches pupils about the rule of law, justice system and how laws are shaped and enforced. Citizenship also teaches about the diverse national, regional, religious and ethnic identities in the UK and the need for mutual respect and understanding.

The British Council is helping to create a school resource, focused on Goal 4.7, designed to teach students across the UK about the Goals.

Activity snapshot:

- Barrowford Primary School in Lancashire is teaching its pupils about the Goals through the primary national curriculum. Pupils hold half termly exhibition evenings to display their knowledge of the Goals, to raise awareness of them and to change the habits of community members.
- The University of Warwick has developed an undergraduate degree in Global Sustainable Development - the first course of its kind - and encourages students to run sustainability campaigns on campus.
- Secondary Geography trainee teachers at the University of Worcester are introduced to the Goals early in their course with a taught session exploring the World's Largest Lesson. They choose a Goal to focus on in their inaugural lesson and deliver an 'Environment Day' at a local secondary school. Trainees plan lessons introducing pupils to the Goals in their entirety and a closer look at eight specific Goals.

Children in schools across Scotland are entitled to study Learning for Sustainability as part of the Curriculum. This aims to provide pupils with the skills, knowledge and values to live socially, economically and environmentally sustainable lives in a global society. The Scottish Government should have published an action plan to further promote Learning for Sustainability in June 2019.

The UN Regional Centre of Expertise (RCE) Cymru is part of an international UN-led network, facilitates collaboration across Welsh Universities to research, develop and promote a greater understanding of sustainability and well-being of current and future generations. It is central to co-developing the sustainable 'Wales we want'. RCE Cymru is a community guided in part by the Welsh Universities' Future Generations Group (HEFGG).

Global Education (4.7) Education for Sustainable Development and Global Citizenship (ESDGC) is delivered throughout compulsory education in Wales. A 2014 review discovered that pupils' understanding of the key concepts of sustainable development and global citizenship develops

appropriately as they progress through school and is secure for each of the seven themes for ESDGC.

Wales's new curriculum takes a transformational approach that embeds ESDGC throughout the curriculum through an international dimension, aiming to develop pupils to be ethical, informed citizens.

Wales's International Education Programme provides individuals with the knowledge and skills necessary to contribute in a global community, with elements of the project relevant to ESDGC, ESDGC teacher training and Wales-Lesotho teacher placements.

Activity Snapshot:

ChangeMakers is a global citizenship project which has been delivered since 2012 by partners including Welsh Centre for International Affairs, Fair Trade Wales, Oxfam Cymru, Christian Aid, CAFOD and the Centre for Alternative Technology. ChangeMakers develops young people as global citizens. In the two years since 2016 for which data is available, the programme has focussed on the global topic of refugees and asylum seekers, working with seven schools and 119 ChangeMakers. ChangeMakers have delivered peer learning to over 4,000 of their peers, raised awareness in their communities, and schools have started the journey to become Schools of Sanctuary, all led by ChangeMaker students. Participating schools have embedded the topic into their curriculum and increased their confidence in teaching this topic.

Ysgol Bro Hyddgen was established as Machynlleth local authority's first all-through (primary plus secondary) school in 2014. The next stage of the project will see the construction of a flagship school building that will, for the first time, bring the primary and secondary campuses on the same site with brand new sporting and community facilities. The new school will be the first all-through school in the UK with Passivhaus accreditation. This means it has been built to exacting standards to require a minimum of energy for heating and cooling. Work is expected to start on site in 2019 with the school due to open by September 2020.

Keep Northern Ireland Beautiful has every school in Northern Ireland committed to engaging in the pupil-led Eco-Schools programme, delivering inclusive and equitable quality education that supports critical thinking and the acquisition of knowledge and skills needed to promote sustainable lifestyles.

The UK's Chevening programme offers scholarships as an opportunity for future leaders and decision-makers around the world to develop professionally and academically. In 2018, the UK welcomed 1,750 scholars from 160 countries and territories and provided 100 additional places for scholars across Sub-Saharan Africa. The scheme promotes values such as human rights and sustainable development.

Wales - more detailed response from the Welsh Centre for International Affairs (WCIA):
WCIA submission for the Wales/UK Response to the UNESCO Seventh Consultation on the implementation of the 1974 Recommendation concerning Education for International

Understanding, Co-operation and Peace, and Education relating to Human Rights and Fundamental Freedoms December 2020 Responding to the UNESCO Recommendation concerning Education for International Understanding, Co-operation and Peace, and Education relating to Human Rights and Fundamental Freedoms, Welsh Centre for International Affairs has wide ranging programme which aims to promote sustainable development and global citizenship, fostering respect for the environment, creating peaceful and just societies, countering hate speech and discrimination, and defending human rights.

Education in both formal and non-formal settings is vital for learning and understanding human rights. However, an understanding of an individual's own rights and empathy with those whose rights are not respected is something gained by experience as much as by taught content. The WCIA education team works proactively to support children and young people in Wales to become 'ethical, informed citizens of Wales and the world' – one of the key purposes of the new Welsh curriculum. We do this by providing a programme of events and opportunities which develop young people's knowledge, skills and confidence, enabling them to think critically and creatively and solve local and global problems. We also ensure young people feel able to express their views on these key issues and to take action individually and collectively.

WCIA also leads the Wales Alliance for Global Learning (WAGL) which has over 70 members NGOs, local authority representatives and education practitioners. WAGL aims to ensure global learning (including global citizenship education, peace education, environmental education and rights based education) is prominent in the curriculum and throughout lifelong learning.

A globally responsible Wales: Global learners become 'ethically informed citizens of Wales and the world'. They recognise that their actions here in Wales have an impact beyond our borders. For example, they are more likely to buy Fair Trade and campaign on global issues. Global learners understand that global issues are complex and can assess sources of information for accuracy and quality. "Hearing some inspirational things from people, this really opened my eyes to how the world worked, and how I could make a difference in the future" school pupil

A more equal Wales: Global learners are more empathetic and have a strong sense of fairness. They value diversity and can talk positively about race and equality. Global learning has a strong impact on the most disadvantaged pupils. "Before I started the ChangeMakers project, I was one of the people that thought that refugees and asylum seekers should not come to this country. After, I learned that it is not their fault, and that they are only coming here because they have to, not because they want to, and they want a better life." Ronnie.

The WCIA Global Learning Programme includes:

- Changemakers – where students learn about specific rights based global issues in some depth, then work together, often collaborating in the community, to create positive change;
- Mock COP – Model United Nations climate change conferences which enable young people to understand how issues such as climate change justice, the differing impacts on countries how countries need to work together to find just solutions. Youth Climate Ambassadors are supported to plan their own actions.
- In-school Model United Nations Conferences and bespoke workshops, supporting an in-depth understanding of international issues, critical thinking and debating skills;

- A Peace Schools Scheme – a whole-school programme, recommended by Welsh Department for Education and Skills and Future Generations Commissioner, enabling learners to learn about peace issues, understand their rights as young people, develop conflict-resolution skills and take a lead as young peacemakers in their schools, communities and beyond;
- A Young Peacemakers Awards, enabling young people to express their hopes and aspirations about peace in critical and creative ways and to undertake projects as global citizens.
- Erasmus+ projects collaborating to share learning on the Peace schools scheme. These projects enable young people from participating countries to share perspectives, and to work together to critically explore values and attitudes and how to create an environment in which positive and inclusive values thrive.

Learner Voices Peace Schools pupil, Solomon Entwhistle (Year 9) "Article 12 of the Rights of the Child says we have the right to express our views on all matters affecting us and to have them taken seriously. I am preparing a presentation for my Explorer Scouts so that everyone can learn."

Peace Schools Pupil, Judy Morgan (Year 10) "Learning about conscientious objectors and how Wales welcomed immigrants in the past really influenced my views, and I see things differently." WCIA International Volunteering through IVS Work camps.

The CCIVS (under UNESCO) has a 100-year history of running workcamps, where international volunteers join together to make a difference in a local community or situation. CCIVS conducted an evaluation of the Raising Peace Camps programme in 2019. Results showed a significant increase in "the willingness to further engage for Human Rights Education and the Sustainable Development Goals". The young people share in intercultural exchange, learn new transferable skills but particularly engage with the social justice and rights issues tackled by the project.

Annually, WCIA hold a Raising Peace workcamp in Wales with 10 – 15 young people from a variety of countries to work alongside volunteers from Wales. In 2018 they were involved in supporting Pride Cymru in preparing and holding their Pride Parade. This raised their own awareness of the Gender Rights as well as for people in Wales. "It made me understand the reality and how difficult life can be for many LGBT+ people in the world. It made me feel like I want to change a lot of things" – international volunteer.

WCIA promotes international volunteering opportunities to young people through schools, colleges and universities and supports them in finding appropriate projects. WCIA also partners with other organisations to support their international mobility goals. For example, Cardiff University sponsors around 30 students each year to go on IVS workcamps. The current programme is mostly in Asia. Chrishan Kamalan, WCIA trustee, went on a Peace camp in Minsk (then in the USSR) in 1989 and went to university afterwards and says, "Going to University, I then joined groups like Amnesty International, which at the time were doing a lot of work on the promotion of human rights, especially in this kind of context, the European context. It also led to an interest in internationalism, European affairs..." 30 years later Chrishan is still committed to the cause of Human Rights.

European Solidarity Corps Volunteers WCIA has managed European Voluntary Service and European Solidarity Corps volunteer programmes for young people (aged 18 – 30) to offer up to 12 months service in another country for many years. A significant proportion of the volunteers in Wales engage in non-formal education work with young people, for example with Boys & Girls Clubs of Wales, Promo Cymru and Valleys Kids. Having international volunteers has a positive impact on young people, widening perspectives and enabling them to consider their basic rights in the context of human rights globally.

WCIA has a number of partnerships with organisations in other countries to enable young people from Wales to spend time working and learning in another country eg for the last 6 years volunteers have gone to Moldova.

Over many years WCIA has been enabled by the ESC programme to support short term volunteering for young people with fewer opportunities from Wales. The current programme sponsor 20 – 30 such placements annually. The outcomes for young people can be dramatic in terms of raised aspirations and life chances. Many go on to engage in longer term volunteering and other international mobilities.

The outcomes in terms of understanding human rights and promoting peace can be lifelong. Our current programme partners with Taff Housing, working with young people who have experienced homelessness. Engaging with young people in non-formal education, in both school and out of education settings has delivered significant outcomes in terms of promoting International Understanding, Co-operation and Peace, and Education relating to Human Rights and Fundamental Freedoms in Wales. The value of experience alongside classroom learning cannot be overestimated. Both non-formal and formal learning brings a growing awareness of human rights issues, and an ability to cooperate with others to work for a more sustainable and peaceful world – locally and globally.

Annex 1: Examples of Integrating Human Rights Education in our Peace Schools

In their journey to become a Peace School, Ysgol David Hughes on Angelesy developed an anti-bullying campaign; learnt about the Holocaust and the plight of refugees and asylum seekers today and responded creatively and empathically to their stories. They learnt about the effects of the nuclear bombs on Hiroshima and Nagasaki and learnt about Sadako, a Japanese girl who tried to create 1,000 paper cranes as symbols of peace before she died at 11 years old.

In Ysgol Dyffryn Aman in Carmarthenshire, pupils critically considered the pros and cons for the UK being involved in bombing Syria, developed Kindness Ambassadors and a Global Goalkeepers scheme, whereby young people raised awareness of the extent of the climate emergency and played a leading role in organising events and campaigns such as Youth Strike 4 Climate.

In Ysgol Acrefair, a primary school in Wrexham, young people explored Sustainable Development Goal 16 (Peace, Justice and Strong Institutions). They looked at how children had been affected by bombing and rationing in WWII and linked that to the contemporary food crisis in Yemen. They practised what they were able to cook with limited rations, looked at food poverty in their own area, and organised donations to their local food bank. They also looked at the global fashion industry and its impact on the environment.

In all of these projects, respect for the United Nations Convention of the Rights of the Child (UNCRC) was pivotal, forming a basis for respect for human rights and empowering children and young people to learn and take action about issues that were important to them to promote a peaceful and sustainable society – locally and globally.

A3b. Please provide the full names of any education policies, frameworks or strategic objectives referred to in A3a and, where possible, web links to relevant documents.

*A4. Please indicate which GCED and ESD themes are covered in national or sub-national education policies, frameworks or strategic objectives affecting each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	1	9	1
2. Gender equality	1	1	9	1
3. Human rights	1	1	9	1
4. Peace and non-violence	1	1	9	1
5. Climate change	1	1	9	1
6. Environmental sustainability	1	1	9	1
7. Human survival and well-being	1	1	9	1
8. Sustainable consumption and production	1	1	9	1

*A5 Please indicate whether national or sub-national education policies, frameworks or strategic objectives on education provide a mandate to integrate GCED and ESD in the following areas by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown, 99 = not applicable (e.g. where the given level of government is not responsible for education)

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
National				
Design or revision of the curricula	1	1	1	1
Setting of programme learning objectives	1	1	1	1
Textbook development	0	0	0	0
Teacher education and training	0	0	0	0
Assessment of student outcomes	0	0	0	1
Sub-national				
Design or revision of the curricula	1	1	1	1
Setting of programme learning objectives	1	1	1	1
Textbook development	0	0	1	1
Teacher education and training	0	0	0	0
Assessment of student outcomes	0	0	0	1

B. Curriculum (paras 4 and 10-19 of the *1974 Recommendation*)

B1a. Please describe in which ways GCED and ESD are mainstreamed in school curricula. Indicate whether topics are taught as standalone subjects or are integrated into the curricula of other subjects. Explain whether GCED and/or ESD themes⁴ are mentioned explicitly or are inferred and what types or levels of education are covered.

In England, the national curriculum provides teachers with the opportunity to teach pupils about Global Goal topics which teachers are free to expand on if they choose. For example, the Citizenship curriculum teaches pupils about the rule of law, justice system and how laws are shaped and enforced. Citizenship also teaches about the diverse national, regional, religious and ethnic identities in the UK and the need for mutual respect and understanding. The British Council is helping to create a school resource, focussed on Goal 4.7, designed to teach students across the UK about the Goals.

In Scotland, through the Curriculum for Excellence, children and young people in Scotland are supported to become successful learners, confident individuals, responsible citizens and effective contributors to society.

Education for Sustainable Development and Global Citizenship (ESDGC) is delivered throughout compulsory education in Wales. A 2014 review discovered that pupils' understanding of the key concepts of sustainable development and global citizenship develops appropriately as they progress through school and is secure for each of the seven themes for ESDGC. Wales's new

⁴ See the schema described in paragraph 11 of Section II of these guidelines.

curriculum takes a transformational approach that embeds ESDGC throughout the curriculum through an international dimension, aiming to develop pupils to be ethical, informed citizens.

Wales's International Education Programme provides individuals with the knowledge and skills necessary to contribute in a global community, with elements of the project relevant to ESDGC,

ESDGC teacher training and Wales-Lesotho teacher placements. 'Education in Wales: Our national mission' pulls together the educational reforms needed to secure the effective implementation of Wales's new curriculum. It calls upon international best practice and the education performance expertise of the global Organisation for Economic Co-operation and Development (OECD).

The 'four purposes' for the new curriculum link directly to the Goals. They seek:

- Ambitious, capable learners ready to learn throughout their lives.
- Enterprising, creative contributors ready to play a full part in life and work.
- Healthy, confident individuals ready to lead fulfilling lives as valued members of society.
- Ethical, informed citizens ready to be citizens of Wales and the world.

Keep Northern Ireland Beautiful has every school in Northern Ireland committed to engaging in the pupil-led Eco-Schools programme, delivering inclusive and equitable quality education that supports critical thinking and the acquisition of knowledge and skills needed to promote sustainable lifestyles.

B1b. Please provide examples of curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents.

The UK's Voluntary National Review of progress towards the SDGs.

Integrated studies	9	9	9	9	9	9	9	9
Other (please specify)								

***B4** Please indicate the approaches used to teach GCED and ESD in primary and secondary education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Global citizenship and education for sustainable development
GCED/ESD are taught as separate subject(s)	0
Cross-curriculum approach (e.g. GCED/ESD are taught in more than one subject but not throughout the curriculum)	1
Integrated approach (e.g. GCED/ESD are taught throughout the whole curriculum)	0
Whole school approach (e.g. GCED/ESD are integrated in the school ethos, management, governance, curriculum, teacher training, teaching practices, the learning environment and in learning experiences in the community and life outside school)	1

B5 Please indicate which human rights education themes are taught as part of the curriculum at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
3. Human rights education				
3.1 equality and non-discrimination based on race, colour, language, religion, disability, political or other opinion, national or social origin, birth or other status	0	1	9	1
3.2 human rights values, human dignity, justice, inclusion and participation	0	1	9	1
3.3 respect for human rights and fundamental freedoms (as outlined in international conventions and declarations)	0	1	9	1

C. Teacher education (including the training of trainers and educators) (paras 4 and 33-37 of the 1974 Recommendation)

C1a. Please describe in which ways GCED and ESD are mainstreamed in initial training and in continuing professional development of teachers, trainers and educators. Indicate whether all teachers, trainers and educators or only some are required to receive training to teach GCED and/or ESD.

England: There is no statutory requirement for Sustainable Development Education in the National Curriculum in England (and therefore training on it is not compulsory). However, elements of Sustainable Development topics are embedded in a range of subjects in the curriculum. In England, the national curriculum provides teachers with the opportunity to teach pupils about Global Goal topics which teachers are free to expand on if they choose. There are also a number of government-funded programmes that schools and pupils can choose to participate in to enhance their learning of sustainable development.

Aspects of GCED and ESD are embedded and taught across the science, geography and citizenship programmes of study. National curriculum in England: science programmes of study - GOV.UK (www.gov.uk) National curriculum in England: geography programmes of study - GOV.UK (www.gov.uk) Citizenship programmes of study for key stages 1 and 2 - GOV.UK (www.gov.uk) National curriculum in England: citizenship programmes of study for key stages 3 and 4 - GOV.UK (www.gov.uk)

Northern Ireland: Education For Sustainable Development is part of the required minimum content for Key Stage 3. <https://www.legislation.gov.uk/nisr/2007/46/introduction/made>

Wales: Wales's International Education Programme provides individuals with the knowledge and skills necessary to contribute in a global community, with elements of the project relevant to ESDGC, ESDGC teacher training and Wales-Lesotho teacher placements.

Newly-qualified teachers will have encountered ESDGC as part of their training and their knowledge should be recognised and shared throughout the school and further developed through their induction programme. Other teachers should be offered the opportunity for continuing professional development in this area. As ESDGC becomes established within schools everyone involved in their respective roles should receive appropriate training.

Scotland: Learning for Sustainability is a cross-curricular approach to creating coherent, rewarding and transformative learning experiences. It's all about learners, educators, schools and their wider communities building a socially-just, sustainable and equitable society. It supports an effective whole-school and community approach by weaving together global citizenship, sustainable development education, and outdoor learning.

Learning for Sustainability is an important component of Curriculum for Excellence, an entitlement for learners, and a core part of teachers' professional standards. It supports the development of knowledge, skills and values at the heart of the curriculum's four capacities and provides a mechanism for promoting and working towards the UN's Sustainable Development Goals - all in a wide range of education settings.

Learning for Sustainability has been developed and informed by work of the 'One Planet Schools Working Group' and the 'Learning for Sustainability National Implementation Group'. This culminated in a 'Vision 2030+' report in 2016, which recommended that: All learners should have an entitlement to Learning for Sustainability. In line with the new GTCS Professional Standards, every practitioner, school and education leader should demonstrate Learning for Sustainability in their practice. Every school should have a 'whole-school' approach to Learning for Sustainability

that is robust, demonstrable, evaluated and supported by leadership at all levels. All school buildings, grounds and policies should support Learning for Sustainability. A strategic national approach to support for Learning for Sustainability should be established. Scottish Ministers have accepted all five of the above strategic objectives as well as the other recommendations outlined by both groups. A new (June 2019) Learning for Sustainability Action Plan sets out how the Scottish Government will, with others, implement the recommendations of the Vision 2030+ report.

C1b. Please provide examples of teacher training policies or curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents. If possible, include examples related to initial training and to continuing professional development.

The British Council provides Teacher training on ESDGC <https://connecting-classrooms.britishcouncil.org/courses/local-and-global-citizenship>

Secondary Geography trainee teachers at the University of Worcester are introduced to the Goals early in their course with a taught session exploring the World's Largest Lesson. They choose a Goal to focus on in their inaugural lesson and deliver an 'Environment Day' at a local secondary school. Trainees plan lessons introducing pupils to the Goals in their entirety and a closer look at eight specific Goals. <https://www.worcester.ac.uk/courses/pgce-secondary-geography#course-content>

*C2 Please indicate whether teachers, trainers and educators are trained to teach GCED and ESD during initial or pre-service training and/or through continuing professional development. Please enter the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Initial or pre-service training				
For teachers of selected subjects only (in which GCED or ESD are typically taught)	0	1	9	9
For teachers of other subjects	9	9	9	9
Continuing professional development				
For teachers of selected subjects only (in which GCED or ESD are typically taught)	1	1	9	1
For teachers of other subjects	9	9	9	9

*C3 Please indicate on which GCED and ESD themes pre-service or in-service training is available for teachers, trainers and educators at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	9	9	9	9
2. Gender equality	9	9	9	9
3. Human rights	9	9	9	9
4. Peace and non-violence	9	9	9	9
5. Climate change	9	9	9	9
6. Environmental sustainability	9	9	9	9
7. Human survival and well-being	9	9	9	9
8. Sustainable consumption and production	9	9	9	9

*C4 Please indicate whether teachers, trainers and educators are trained to teach the following dimensions of learning in GCED and ESD. Please enter the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Knowledge	1	1	9	1
Skills	0	0	9	0
Values	1	1	9	1
Attitudes and behaviours	1	1	9	1

*C5 Please indicate whether teachers, trainers and educators are trained to use the following approaches to teach GCED and ESD in primary and secondary education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Global citizenship and education for sustainable development
GCED/ESD are taught as separate subject(s)	0
Cross curriculum approach (e.g. GCED/ESD are taught in more than one subject but not throughout the curriculum)	1
Integrated approach (e.g. GCED/ESD are taught throughout the whole curriculum)	0
Whole school approach (e.g. GCED/ESD are integrated in the school ethos, management, governance, curriculum, teacher training, teaching practices, the learning environment, and in learning experiences in the community and life outside school)	1

D. Student assessment (paras 4 and 5 of the 1974 Recommendation)

D1a. Please describe in which ways GCED and ESD are covered in student assessments and examinations. Indicate whether students are assessed only on their knowledge of and skills related to the topics being tested or also on their values, attitudes and/or behaviours.

England Aspects of ESD and GCED are taught across and within a number of curriculum subjects, eg science, geography, citizenship and therefore would be examined as part of the arrangements for the examination of these subjects at GCSE and A level (secondary). There are no national testing arrangements in these subjects in primary. Tertiary education is the responsibility of individual Higher Education Institutions (HEIs)

- TIMSS 2019 grade 4 (year 5 in England):

<https://timssandpirls.bc.edu/timss2019/frameworks/framework-chapters/science-framework/science-content-domains-fourth-grade/> - see in particular Earth's physical characteristics, resources, and history and Earth's weather and climates towards the end of the page.

- TIMSS 2019 grade 8 (year 9 in England):

<https://timssandpirls.bc.edu/timss2019/frameworks/framework-chapters/science-framework/science-content-domains-eighth-grade/> - see Earth's processes, cycles, and history, and Earth's resources, their use, and conservation towards the bottom of the page

- PISA 2018 (15 year olds): https://www.oecd-ilibrary.org/education/pisa-2018-assessment-and-analytical-framework_f30da688-en see Table 4.2 (p103) for contexts in which PISA questions are set, many of which relate to ESD, and Table 4.6 (p106) for the specific topics covered

Cross- UK: Sustainability Literacy Test The “sustainability literacy test” is an international online multiple choice questionnaire of online questions evaluating basic knowledge and understanding of sustainable development issues. Designed for any student enrolled in a higher or further education institution, the test is designed to be used at any level regardless of the type of study pursued and is free to use. The EAUC is part of the Regional / National Expert Committee (RNEC) and have been working with universities from across the UK and Ireland alongside colleagues from Business Schools who are members of the UK and Ireland PRME (Principles for Responsible Management Education) Chapter to provide the UK and Ireland specific questions. The test is also supported by a number of United Nations institutions and international academic networks. It is a useful tool for any university or college that wants to embrace the sustainable development journey. More information on the test can be found here: www.sustainabilitytest.org.

Imperial College developed an assessment framework for educational institutions to evaluate the contribution of their educational programmes to sustainability by reviewing the alignment of their intended learning outcomes to the enabling conditions for a vision of sustainability based on the Sustainable Development Goals (SDGs). The tool is based on a systemic grouping of the SDGs into eight sustainability attributes, namely, Safe Operating Space, Just Operating Space, Resilient Sustainable Behaviours, Alternative Economic Models, Health and Wellbeing, Collaboration, Diversity and Inclusion, and Transparency and Governance, and uses a word code developed specifically for each sustainability attribute to assess the coverage of the SDGs in master's programmes' learning outcomes. The tool uses multi-criteria analysis to compare and rank programmes according to the alignment of their learning outcomes to the sustainability

attributes and their contribution to sustainability. It was first tested using data from a University's eighteen master's programmes on a range of subjects and subsequently applied to compare forty UK and European master's programmes focusing on environment and sustainability. Findings demonstrate that even environmental programmes face some important gaps related to health, wellbeing, diversity, inclusion, and collaboration, amongst others, and reinforce the need for all universities to understand the contribution of their programmes to sustainability. The application of the tool can generate empirical evidence on the effectiveness of university programmes and establish a strong argument regarding the potential of education as a tool for achieving the SDGs.

***D2** Please indicate whether the GCED and ESD themes below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	0	1	9	0
2. Gender equality	0	1	9	0
3. Human rights	0	1	9	0
4. Peace and non-violence	0	1	9	0
5. Climate change	0	1	9	1
6. Environmental sustainability	0	1	9	1
7. Human survival and well-being	0	1	9	1
8. Sustainable consumption and production	0	1	9	1

***D3** Please indicate which of the dimensions of learning in GCED and ESD below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Knowledge	0	1	9	1
Skills	0	1	9	1
Values	1	1	9	1
Attitudes and behaviours	1	1	9	1

E. Mainstreaming of GCED and ESD in laws and policies, curricula, teacher education and student assessment (paras 4-5, 7, 10-19 and 33-37 of the 1974 Recommendation)

*E1 Based on your responses to questions in the previous four sections (laws and policies, curricula, teacher education and student assessment) please indicate to what extent global citizenship education (GCED) and education for sustainable development (ESD) are mainstreamed⁵ in (a) education laws and policies, (b) curricula (c) teacher education (including the training of trainers and educators) and (d) student assessment in your country. Please enter the appropriate number in each white cell in the table below.

KEY:

0 Not at all

GCED and ESD are not mainstreamed.

1 Partially

Some GCED and/or ESD themes⁶ are mainstreamed. Select this option if GCED is mainstreamed but ESD is not (or vice versa).

2 Extensively

Most GCED and ESD themes are mainstreamed.

9 Not known

It is not known whether GCED and ESD are mainstreamed or not.

99 Not applicable

The given level of government does not have responsibility for the given component (policies, curricula, teacher education or student assessment) and/or does not have responsibility for the given level or type of education. This may occur at the national level in federal countries where education is the responsibility of individual states or at the sub-national level in small countries where there is only one level of government.

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
National				
(a) Education laws and policies	0	1	0	1
(b) Curricula	0	1	99	1
(c) Teacher education	1	1	99	1
(d) Student assessment	0	1	0	1
Sub-national				
(a) Education laws and policies	0	0	0	0
(b) Curricula	0	1	99	1
(c) Teacher education	1	1	99	1
(d) Student assessment	0	1	0	1

⁵ GCED and ESD are mainstreamed if their themes are mentioned explicitly in relevant documents and are expected to be implemented by the relevant authorities (e.g. Ministries, regional or local education authorities), educational institutions (e.g. schools, colleges and universities) and/or education professionals (e.g. teachers, lecturers, trainers and educators) as appropriate.

⁶ Refer to the schema in paragraph 11 of Section II of these guidelines.

F. Technical and vocational education and training (paras 25-29 of the 1974 Recommendation)

- F1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in technical and vocational education and training. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

No information yet.

G. Adult education (para 30 of the 1974 Recommendation)

- G1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in adult education and other forms of non-formal education including youth education, out-of-school education, etc. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

Sustainability Literacy Test

The “sustainability literacy test” is an international online multiple choice questionnaire of online questions evaluating basic knowledge and understanding of sustainable development issues. Designed for any student enrolled in a higher or further education institution, the test is designed to be used at any level regardless of the type of study pursued and is free to use. The EAUC is part of the Regional / National Expert Committee (RNEC) and have been working with universities from across the UK and Ireland alongside colleagues from Business Schools who are members of the UK and Ireland PRME (Principles for Responsible Management Education) Chapter to provide the UK and Ireland specific questions. The test is also supported by a number of United Nations institutions and international academic networks. It is a useful tool for any university or college that wants to embrace the sustainable development journey. More information on the test can be found here: www.sustainabilitytest.org.

WCIA also leads the Wales Alliance for Global Learning (WAGL) which has over 70 members NGOs, local authority representatives and education practitioners. WAGL aims to ensure global learning (including global citizenship education, peace education, environmental education and rights based education) is prominent in the curriculum and throughout lifelong learning.

H. Research and International Co-operation (paras 41-45 of the 1974 Recommendation)

- H1 Please describe what kinds of research or experimentation have been carried out to improve the implementation of GCED and/or ESD. Describe briefly how the results of such activities have influenced education policies, curricula and/or teaching practices.

No direct research or experimentation, however, the UK participates in OECD PISA and England and Northern Ireland participate in TIMSS, both of which include an assessment of science and contextual questionnaires which are relevant to the teaching of ESD.

- TIMSS 2019 grade 4 (year 5 in England):
<https://timssandpirls.bc.edu/timss2019/frameworks/framework-chapters/science-framework/science-content-domains-fourth-grade/> - see in particular Earth’s physical characteristics, resources, and history and Earth’s weather and climates towards the end of the page.
- TIMSS 2019 grade 8 (year 9 in England):
<https://timssandpirls.bc.edu/timss2019/frameworks/framework-chapters/science->

[framework/science-content-domains-eighth-grade/](#) - see Earth's processes, cycles, and history, and Earth's resources, their use, and conservation towards the bottom of the page

- PISA 2018 (15 year olds): https://www.oecd-ilibrary.org/education/pisa-2018-assessment-and-analytical-framework_f30da688-en see Table 4.2 (p103) for contexts in which PISA questions are set, many of which relate to ESD, and Table 4.6 (p106) for the specific topics covered

H2 Please indicate which types of activities are available that promote international co-operation at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Hosting of international meetings on GCED and/or ESD	1	1	1	1
Participation in international meetings abroad on GCED and/or ESD	1	1	1	1
Support for programmes hosting foreign students, researchers and/or teachers	1	1	1	1
Membership of international networks including ASPnet	1	1	1	1
Joint research projects on GCED and/or ESD with foreign institutions	1	1	1	1
Other activities (please specify):	1	1	1	1

I. Any other comments

I1 Please indicate whether your country has faced any constraints, in particular related to global or national crises, including natural disasters, in implementing the 1974 Recommendation during the reporting period.

The impact of the pandemic on children's education generally is likely to have had consequences for the teaching of GCED and ESD but it is not possible to quantify this.

I2 Please provide any other relevant information or clarifications regarding the implementation of the 1974 Recommendation or the mainstreaming of GCED and ESD in your country's education system.
