

GUIDELINES FOR THE PREPARATION OF REPORTS BY MEMBER STATES ON THE APPLICATION OF THE 1974 RECOMMENDATION CONCERNING EDUCATION FOR INTERNATIONAL UNDERSTANDING, CO-OPERATION AND PEACE AND EDUCATION RELATING TO HUMAN RIGHTS AND FUNDAMENTAL FREEDOMS

I. Introduction

A. About the 1974 Recommendation

1. UNESCO's 1974 *Recommendation concerning Education for International Understanding, Co-operation and Peace and Education relating to Human Rights and Fundamental Freedoms*¹ (the "1974 Recommendation") aims to promote international education and world peace through understanding, solidarity and cooperation. It was adopted on 19 November 1974 by the General Conference of UNESCO at its 18th session.

2. The 1974 *Recommendation* applies to formal, non-formal and informal education and to all levels, from pre-primary to tertiary and adult education and lifelong learning. The General Conference recommended "that Member States should apply" the provisions included in the 1974 *Recommendation* "by taking whatever legislative or other steps" that provide institutional (e.g. policies and legal frameworks) and pedagogical (e.g. curricula, teacher training, educational materials, equipment, and student assessment) support for its implementation, based on the "objectives", referred to in paragraph 4 of the 1974 *Recommendation*, "regarded as major guiding principles of education policy" including: an international dimension and a global perspective on education, cultural diversity, interdependence, communication, rights and responsibilities, international solidarity and cooperation, and problem solving.

3. Today, the principles of the 1974 *Recommendation* apply equally well to Education for Sustainable Development (ESD) and to Global Citizenship Education (GCED) and therefore represent a powerful tool for promoting the 2030 Agenda for Sustainable Development and in particular SDG Target 4.7 on the promotion of sustainable development and global citizenship through education, Target 12.8 on access to information on sustainable development and Target 13.3 on climate change education.

4. The General Conference in its 39th session recommended the use of the 1974 *Recommendation* reporting process to support the implementation and monitoring of Target 4.7 of Sustainable Development Goal 4 (39 C/Resolution 79). The UNESCO Executive Board at its 209th session approved the use of the current guidelines for both the monitoring of the 1974 *Recommendation* and the collection of data needed for the following global SDG indicator for which UNESCO is custodian (209 EX/Decision 18.II):

4.7.1, 12.8.1 and 13.3.1: *The extent to which (i) global citizenship education and (ii) education for sustainable development are mainstreamed in (a) national education policies; (b) curricula; (c) teacher education and (d) student assessment.*

5. Questions marked with an asterisk (*) will be used in the calculation of the respective indicators (Table 1). As approved by the Inter-Agency and Expert Group on the SDG Indicators, the indicators will be calculated for primary and secondary education only.

Table 1 Questions used in the calculation of the global SDG indicator for Targets 4.7, 12.8 and 13.3

Policies	Curricula	Teacher education	Student assessment

B. Reporting obligations

6. The General Conference, at its 18th session, when adopting the *1974 Recommendation* recommended “*that Member States submit [...] reports concerning the action taken by them in pursuance of this recommendation*”. Moreover, in accordance with Article VIII of UNESCO’s Constitution “*Each Member State shall submit to the Organization [...] reports [...] on the action taken upon the recommendations and conventions referred to in Article IV, paragraph 4.*”

7. Thus, **all UNESCO Member States are expected to report on the steps they have taken to implement the 1974 Recommendation** preferably by completing the following questionnaire. Such reporting takes place every four years.

II. Guidelines for completion of the questionnaire

8. This questionnaire and its accompanying guidelines are addressed to Ministers responsible for relations with UNESCO. The questionnaire is typically completed by Ministries of Education and other government authorities responsible for education. Responses should cover, as far as possible, education at all levels of government, including sub-national levels where applicable as well as education outside the government sector.

9. National respondents are encouraged to **consult widely** both within, across and beyond government, including with Ministries of Environment, with national human rights institutions, the education sector, civil society partners and others, as necessary, to gather the information needed to complete the questionnaire.

10. Responses to the seventh consultation should cover:

- (i) the time period 2017-2020;
- (ii) education at all levels of formal education from pre-primary to tertiary education as well as non-formal education;
- (iii) all levels of government that have responsibility for education within the country; and
- (iv) where possible, education outside the government sector.

11. To assist countries in responding to this questionnaire, UNESCO has developed the following set of global citizenship education and education for sustainable development themes. The list is based on a review of current common practices in many countries as well as a review of relevant literature. While the terms ESD and GCED may be used differently in some countries, the list of themes typically captures what are seen as key elements of Target 4.7. Please refer to the definitions of key terms in **Section III** before completing the questionnaire.

Global citizenship education and education for sustainable development

- 1. cultural diversity and tolerance
 - 1.1 international or intercultural understanding, solidarity and cooperation
 - 1.2 intercultural and interreligious dialogue
 - 1.3 local, national and/or global citizenship
- 2. gender equality education
 - 2.1 gender-based equal opportunities
 - 2.2 gender equality and justice

- 2.3 gender roles, identity and stereotypes
- 3. human rights education
 - 3.1 equality and non-discrimination based on race, colour, language, religion, disability, political or other opinion, national or social origin, birth or other status
 - 3.2 human rights values, human dignity, justice, inclusion and participation
 - 3.3 respect for human rights and fundamental freedoms (as outlined in international conventions and declarations)
- 4. peace and non-violence
 - 4.1 friendly relations among peoples and nations
 - 4.2 challenging negative stereotypes, promoting peaceful solutions, learning to live together, including others and preventing violent extremism
 - 4.3 preventing all forms of violence including bullying, verbal abuse and gender-based violence
- 5. climate change education
 - 5.1 mitigation
 - 5.2 adaptation
 - 5.3 impact reduction
 - 5.4 early warning
- 6. environmental sustainability
 - 6.1 caring for the planet, protecting nature
 - 6.2 environmental justice
 - 6.3 biodiversity, water
- 7. human survival and well-being
 - 7.1 environmental health as it pertains to human well-being, disaster risk reduction
 - 7.2 health of the planet for future generations
 - 7.3 sustainable cities and communities
- 8. sustainable consumption and production
 - 8.1 responsible and sustainable lifestyles
 - 8.2 green economy, green jobs
 - 8.3 sustainable energy

III. Definitions of key terms

Term	Definition
Themes of global citizenship and education for sustainable development	
1. Cultural diversity and tolerance	<i>Education about and for diversity including language, ethnicity, race, religion as well as the development of tolerance, mutual respect and appreciation for cultural diversity. It includes intercultural and interreligious dialogue, understanding, solidarity and co-operation, and citizenship education.</i>
2. Gender equality education	<i>Education that addresses the wider issue of gender equality by promoting new attitudes and patterns of belief, transforming the way people think about traditional gender roles and helping to build long-term sustainable change. It examines how gender roles, activities, needs, opportunities, rights and entitlements affect men, women, girls and boys differently. It deals with the relationships between females and males, their access to and control of resources and the constraints they face relative to each other. It respects the rights of all learners – women, men, boys and girls – equally and gives equal access to learning opportunities, resources and protections. All learners benefit from and are treated in education equally without the limitations set by stereotypes, rigid gender roles and prejudices. It covers gender-based equal opportunities, gender equality and justice, and gender roles, identity and stereotypes.</i>
3. Human rights education	<i>Education that promotes universal respect for and observance of all human rights and fundamental freedoms and thus contributes, inter alia, to the prevention of human rights violations and abuses by providing persons with knowledge, skills and understanding and developing their attitudes and behaviours, to empower them to contribute to the building and promotion of a universal culture of human rights.</i> <i>It includes equality and non-discrimination, human rights values, dignity, justice, inclusion and participation and respect for human rights and fundamental freedoms.</i>
4. Peace and non-violence	<i>Education about peace and peace-building, mediation, conflict prevention and resolution, non-violence, reconciliation and living together peacefully. It includes advocating for friendly relations among peoples and nations, challenging negative stereotypes, promoting peaceful solutions, learning to live together and preventing violent extremism and other forms of violence including bullying.</i>
5. Climate change education	<i>Education to help people, in particular youth, understand, address, mitigate, and adapt to the impacts of climate change. It encourages changes in attitudes and behaviours needed to put the world on a more sustainable development path, and build a new generation of climate change-aware citizens.</i>

	<i>It covers various responses to climate change including mitigation, adaptation, impact reduction and early warning.</i>
6. Environmental sustainability	<i>Education about responsible interactions with the environment to avoid depletion or degradation and to promote environmental quality and health. It includes, caring for the planet and protecting nature, environmental justice, biodiversity and water.</i>
7. Human survival and well-being	<i>Education that promotes social well-being and harmony including in future generations due to healthy environmental systems. It includes health of the planet and environment related to human well-being, disaster risk reduction and sustainable cities and communities.</i>
8. Sustainable consumption and production	<i>Education on the use and production of resources, products and services that have a minimal adverse impact on the environment. It promotes resource and energy efficiency, sustainable infrastructure and green jobs. It includes responsible and sustainable lifestyles, the green economy and sustainable energy.</i>
Dimensions of learning	
Knowledge	<i>Factual information and understanding acquired through study and/or experience.</i>
Skills	<i>The ability to carry out a task well as a result of training, practice and innate aptitude. Skills may be physical, mental or both.</i>
Values	<i>Principles that form the foundation on which individuals conduct themselves and interact with others and with the environment around them.</i>
Attitudes and behaviours	<i>Ability to act on the basis of beliefs and knowledge acquired through study or experience.</i>
Levels of education	
Pre-primary	<i>Education designed to support children's early cognitive, physical, social and emotional development and introduce young children to organized instruction outside of the family context. Participants are usually aged from three years.</i>
Primary and secondary	<i>Education designed to:</i> <i>(i) provide students with fundamental skills in reading, writing and mathematics (i.e. literacy and numeracy) and establish a solid foundation for learning and understanding core areas of knowledge and personal development (primary education); and</i> <i>(ii) prepare students for further education at post-secondary and tertiary levels and for entry into the labour market (secondary education).</i> <i>It includes both general and vocational education.</i>
Tertiary	<i>Education designed to provide learning activities in specialised fields of education. It aims at learning at a high level of complexity and specialisation. It includes both what is commonly understood as academic education and advanced vocational or professional education.</i>
Types of education	

Adult education	<i>Education specifically targeted at individuals who are regarded as adults by their society to improve their technical or professional qualifications, further develop their abilities, enrich their knowledge with the purpose to complete a level of formal education, or to acquire, refresh or update their knowledge, skills and competencies in a particular field.</i>
Formal education	<i>Education that is institutionalized, intentional and planned through public organizations and recognized private bodies which – in their totality – constitute the formal education system of a country. Formal education programmes are recognized by the relevant national or sub-national education authorities. Formal education consists mostly of initial education (e.g., pre-primary, primary, secondary and tertiary education).</i>
Non-formal education	<i>Education that is an addition, alternative and/or a complement to formal education within the process of the lifelong learning of individuals. It is often provided to guarantee the right of access to education for all. It caters to people of all ages but does not necessarily apply a continuous pathway-structure. It may be short in duration and/or low-intensity, and it is typically provided in the form of short courses, workshops or seminars. Non-formal education mostly leads to qualifications that are not recognized by the relevant national or sub-national education authorities or to no qualifications at all. Non-formal education includes programmes on life skills including literacy and numeracy, work skills, and social or cultural development. Most types of adult education are also included.</i>
Vocational education	<i>Education that is designed for learners to acquire the knowledge, skills and competencies specific to a particular occupation or trade or class of occupations or trades. Vocational education may have work-based components (e.g. apprenticeships). Successful completion of such programmes leads to labour-market relevant vocational qualifications acknowledged as occupationally-oriented by the relevant national authorities and/or the labour market. Vocational education can be offered at secondary and post-secondary or tertiary levels of education.</i>

IV. Information about the respondent

Country:

Cyprus

Organization:

Ministry of Education, Culture, Sport and Youth:

- Cyprus Pedagogical Institute, Ministry of Education, Culture, Sports and Youth

- Office for European and International Affairs, Life Long Learning and Adult Education

Date of submission:

29/12/2020

V. Other contributors consulted during the completion of this questionnaire

Please indicate below the names of other organizations and contributors consulted during the completion of this questionnaire.

Government institutions including other Ministries (please specify):

Ministry of Education, Culture, Sport and Youth, Agriculture Research Institute, Cyprus Tourism Organisation, Department of Environment, Department of Forestry, Energy Service, the Game and Fauna Service, Directorate General of European Programs Coordination and Development, Lifelong Learning Agency, Research Promotion Foundation, Ministry of Justice and Public Order, Office of the Commissioner for Children's Rights, Office of the Commissioner for Administration.

National human rights institutions (please specify):

NGO Support Center, Future World Center, "Hope For Children" CRC Policy Center

Local and regional authorities responsible for education (please specify):

In Cyprus education is under the auspices of the Ministry of Education, Culture, Sport and Youth.

Other local and regional authorities (please specify):

Organizations representing education stakeholders (e.g. teachers, students, parents, etc.) (please specify):

Cyprus Parents Association, Teachers Trade Unions POED, OELMEK, OLTEK,

Other civil society organizations (please specify):

AKTI, CARDET, CYMEPA, TERRA CYPRIA (the Cyprus Conservation Foundation), Cyprus Energy Agency, MIGS, Cyprus Family Planning Association, CSI, Foni Council

Others (please specify):

Universities, Research Centers

VI. Questionnaire

A. Laws and policies (preamble and paras 4 and 7 of the 1974 Recommendation)

- A1a. Please describe any specific national or sub-national laws, legislation or legal framework(s) in your country that govern the promotion of global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes² are mentioned explicitly or are inferred and what types or levels of education are covered.

In Cyprus, there is no particular law/legislation/legal frameworks regarding GCED and ESD. However, GCED and ESD are directed in multiple legislation/legal frameworks, based on which national GCED and ESD policy frameworks have been or are being developed.

Below, there are some national laws which set the legal framework for Cyprus' policies on ESD/GCED:

- Children Law (1956) makes a provision for the care and welfare of children in the certain cases
[http://www.mlsi.gov.cy/mlsi/sws/sws.nsf/All/86CD3D9C9F22BACEC2256E7E004D60F2/\\$file/Childrens%20Law%201956.pdf?OpenElement](http://www.mlsi.gov.cy/mlsi/sws/sws.nsf/All/86CD3D9C9F22BACEC2256E7E004D60F2/$file/Childrens%20Law%201956.pdf?OpenElement)
- The Law No. 134(I) of 2011 on the combat against certain forms of racism and xenophobia (<http://melaproject.org/sites/default/files/2018-02/Law%20no.%20134%28I%29%20on%20the%20combat%20against%20certain%20forms%20of%20racism%20and%20xenophobia%20of%2021%20October%202011.pdf>) is coping with the incidents of violence or hatred against a group of persons identified on the basis of race, colour, religion, genealogy or ethnic or national origin in a way which disturbs public order or is threatening, abusive or offensive character.
- The Equal Treatment (Racial or Ethnic Origin) Law of 2004 (59 (I) / 2004) (<https://www.ilo.org/dyn/natlex/docs/ELECTRONIC/84138/102953/F1919283843/CYP84138%20Gre.pdf>) establishes a general framework for combating discrimination based on racial or ethnic origin in order to ensure that the principle of equal treatment is applied.
- The Law on Aliens and Immigration (CHAPTER 105) (https://www.ilo.org/dyn/natlex/natlex4.detail?p_lang=en&p_isn=83801&p_country=CYP&p_count=392&p_classification=17&p_classcount=16) includes provisions for the education of immigrant children and their rights for equal treatment.
- The Law for Equal Treatment for Men and Women in Employment and Vocational training (<http://www.mlsi.gov.cy/mlsi/dl/dl.nsf/All/4F1DB719F3AA8A73C22581CB0041B58A?OpenDocument>) aims at applying the principle of equal treatment between men and women as regards access to vocational guidance, vocational education and training and their terms and conditions and access to employment and the professions.
- Law No. 18(I) of 2008 concerning the equal treatment of men and women related to the access of commodities and services (https://www.ilo.org/dyn/natlex/natlex4.detail?p_lang=en&p_isn=83585&p_country=CYP&p_count=506&p_classification=05&p_classcount=34) establishes the general

² See the schema described in paragraph 11 of Section II of these guidelines.

framework for combating discrimination based on sex, in terms of access to and provision of goods and services, in order to ensure the application of the principle of equal treatment.

- The Law for the Ratification of the Convention on the Rights of the Child, 1990 (L.243 / 1990) which has been signed by the Republic of Cyprus in 1991
- The 2000 and 2004s Laws provide for the Prevention of Violence in the Family and Protection of Victims. The Law is related to any unlawful act, omission or behaviour which results in the direct infliction of physical, sexual or mental injury to any member of the family by another member of the family and includes violence used for purpose of sexual intercourse without the consent of the victim as well as for the purpose of restricting its liberty (http://www.familyviolence.gov.cy/upload/legislation/laws_2000_and_2004_en.pdf).
- The Law N° 91(I) of 2014 on Preventing and Combating the Sexual Abuse and Sexual Exploitation of Children and Child Pornography provides for the surveillance of persons convicted of sexual offences against children as well as the Elimination of child labour, protection of children and young persons. It also includes provisions regulating the Special Protection of Persons who are Victims of Trafficking and Exploitation.
- The regulations on the operation of Public Secondary Schools (2016, http://www.moec.gov.cy/dme/nomothesia/mesi/b_peri_leitourgias_dimosion_scholeion_mesis_ekpaidefsis_kanonismoi_kdp_60_2017.pdf) ensure the implementation of the regulations without any discrimination in regard to race, colour, language, religion, political or other beliefs of the child or his/hers parents, his/hers national or social origin, sexual preferences, abilities, birth or financial condition, with respect to his/hers right for life and development, dignity and personal value, the right to express his/hers opinion and to participate in decision making procedures. Additionally, the regulations protect children against any kind of violence, his/hers personal and family life as well as personal privacy. The regulations on the operation of Public Primary Schools have been recently amended in order to include relevant references. It is expected to be ratified by the Parliament soon.

A1b. Please provide the full names of any laws, legislation or legal frameworks referred to in A1a and, where possible, web links to relevant documents.

Please refer to A1a for the web links.

*A2 Please indicate which GCED and ESD themes are covered in national or sub-national laws, legislation or legal frameworks on education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown, 99 = not applicable (e.g. where the given level of government is not responsible for education)

	National				Sub-national			
	Pre-primary	Primary/secondary	Tertiary	Non-formal	Pre-primary	Primary/secondary	Tertiary	Non-formal
1. Cultural diversity and tolerance	1	1	9	1	99	99	99	99
2. Gender equality	1	1	9	1	99	99	99	99
3. Human rights	1	1	9	1	99	99	99	99
4. Peace and non-violence	1	1	9	1	99	99	99	99

7. Human survival and well-being	1	1	9	1	99	99	99	99
8. Sustainable consumption and production	1	1	9	1	99	99	99	99

A3a. Please describe any specific current national or sub-national education policies, frameworks or strategic objectives in your country that promote global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes³ are mentioned explicitly or are inferred and what types or levels of education are covered.

The Republic of Cyprus through the Cyprus Ministry of Education, Culture, Sport and Youth (MOECSY), which has the responsibility for coordinating the actions for ESD amongst all interested bodies (governmental services, NGO's, academia, etc.), has developed the National Action Plan for ESD, which covers all the education levels from pre-primary till life long education and all forms of education (formal, non-formal and in formal), based on the Decision of the Council of Ministers. It is the Cyprus official strategy for integrating ESD in Cyprus Education system and the Civil Society. This National Action Plan is based on the UNECE Strategy for ESD and takes, also, in consideration the Cyprus particularities and needs. The National Action Plan has been approved by the Council of Ministers and is being implemented since 2007. The "National Action Plan for Environmental Education focused on Sustainable Development" can be downloaded from

³ See the schema described in paragraph 11 of Section II of these guidelines.

the official website of the Cyprus MOECSY (http://www.paideia.org.cy/upload/Arthrografia/29_1_2008_sinoptiko_keimeno_stratigikou_sxedias_mos_perivallontiki_ekpaidevsi.pdf). Also, it is noted that the Cyprus National Action Plan for ESD has been included in the revised Strategy for Sustainable Development as a horizontal issue of implementation under the axes “Education and Training”. The official document can be downloaded by the official web-site of the Ministry of Agriculture, Environment and Natural Resources at the following address: (<http://www.cyprus.gov.cy/moa/Agriculture.nsf/All/04D327E3AEAEA22DC22573B100627691?OpenDocument>). It is noted that the National Strategic Planning for Environmental Education with a focus on Sustainable Development is planned to be updated based on new developments and challenges for ESD, covering the period 2020-2030.

Education for Sustainable Development has a central role in the Cyprus Government Policy and for that reason ESD National Strategy is infused in main national policies and integrated horizontally in the following :

- Review on the implementation of the Agenda 2030 in Cyprus (<https://sustainabledevelopment.un.org/content/documents/15886Cyprus.pdf>)
- National Strategy for Climate Change
- National Strategy and Action Plan for Biodiversity
- National Action Plan of joined Maritime Policy

Revised National Strategy for Sustainable Development

ESD is based on strategic documents developed by the different Ministries such as:

Review on the implementation of the Agenda 2030 in Cyprus: The MOECSY has already made significant progress in the implementation of SDG4 (ensure inclusive and equitable quality education and promote lifelong learning), having as a main mission the continuous upgrade of education in order to ensure the provision of learning opportunities to all learners, through the implementation of an educational policy which embodies the values of equality, inclusivity, creativeness and innovation, aiming at a life-long, balanced and wholesome development, while, in parallel, strengthening culture and supporting cultural creativity. Cyprus provides free and easily accessible education to everyone at all education levels (pre-primary, primary, secondary general and secondary technical and vocational education and training), without discrimination. (<https://sustainabledevelopment.un.org/content/documents/15886Cyprus.pdf>)

National Strategy for Climate Change: Climate change in the context of formal and non - formal education is an issue of interdisciplinary investigation and interconnected with all the issues of environment and sustainable development as a matter of national, regional and international interest. The consideration of climate change in this context relies on the fact that climate change is not a mono-dimensional problem, cut off from the rest of the issues, but could be the apparent cause and consequence of a chain of direct and indirect human effects on all environmental issues. Within this context the issue of climate change is examined and treated in the Cypriot educational system through: a) Curriculum on Environmental Education (EE) and Education for Sustainable Development (ESD), b) Educational tools for the study of climate change, c) Non - formal education and climate change, d) Education and training of teachers on climate change, e) Environmental Education Programs.

National Strategy for biodiversity: The promotion of the concept of biodiversity at all the levels of formal education of the Cypriot Educational System is developed in an organized manner, and its interconnections with other issues of sustainable development are pursued. Through the implementation of the National Curriculum of EE/ESD, the thematic unit of biodiversity is analyzed in terms of learning outcomes, which are important for students to acquire in primary education. At the same time, this thematic unit is interconnected with all the other thematic units of the National Curriculum, on the basis of interconnections, as well as with the systemic framework for examining the issues of environment and sustainable development ([http://www.moa.gov.cy/moa/environment/environmentnew.nsf/all/5B978F5843406DE4C225857D006267C1/\\$file/Biodiversity%20Strategy%20and%20Action%20Plan%20CY.pdf?openelement](http://www.moa.gov.cy/moa/environment/environmentnew.nsf/all/5B978F5843406DE4C225857D006267C1/$file/Biodiversity%20Strategy%20and%20Action%20Plan%20CY.pdf?openelement))

National Action Plan of Joined Maritime Policy: Issues related to maritime environment are strengthened in our educational system, and marine consciousness is developed at all educational levels, through actions strengthening and enriching the National Curriculum with issues related to maritime environments, through enrichment and application of environmental education programs, production of educational material on maritime issues and interconnection of the school with stakeholders and services dealing with maritime environment.

Revised National Strategy for Sustainable Development: ESD is an intrinsic part of the revised national Strategy for Sustainable Development. It has been introduced as a horizontal aspect, which permeates all the areas that constitute the National Strategy for Sustainable Development

The MOECSY, has officially incorporated the ESD process in the school syllabi by preparing the curriculum for ESD. This involves all levels of education and aims at shaping the Sustainable School which will act as an agent bringing about the change in education and society. As mentioned in the introduction of the curriculum for ESD Education in Cyprus, the program aims at making students able to provide conditions of sustainability and to adopt sustainable lifestyles, in a school which will be working as a model-agency that promotes sustainability and applies it in school life. It is noted that the program is developed simultaneously covering the levels of education from Pre-school to Higher Secondary and the Technical Vocational Education (**see also**, http://archeia.moec.gov.cy/mc/2/perivallontiki_ekpaidefsi.pdf).

The MOECSY has also set up the Unit of Education for the Environment and Sustainable Development , at the Cyprus Pedagogical Institute, to develop and coordinate the policy and the implementation of ESD. The Unit of Education for the Environment and Sustainable Development of the Cyprus Pedagogical Institute in cooperation with the Educational Departments, introduced officially in teachers professional development, obligatory courses and seminars on ESD competences and Curriculum as well as courses for integrating SDGs in Schools through ESD Curriculum (http://www.moec.gov.cy/dkpe/synedria_seminaria.html).

The non-formal and informal ESD consist the basic branch of the policy for education. For that reason one of the main actions that included in the “National Action Plan for Environmental Education focused on Sustainable Development” is the promotion and the empowerment of non-formal education in the Cyprus Educational System as a supporting and complementary structure to the work that schools are doing. It is for this reason that the Unit of Education for Environment and Sustainable Development (Pedagogical Institute), as the responsible body of integrating the Strategy for Environmental Education and Sustainable Development, has developed the networking of Governmental Environmental Education Centres and all the schools from all educational levels participated to their environmental education programs. In order all parties informed about the Network of the Centres for Environmental Education and its’ inclusion to the formal educational policy as a complimentary structure to schools with the aim of connecting non-

formal with informal education, every year a specific circular is distributed by the MOECSY, addressing the importance of non-formal education in ESD activities (see also: **10.04.7./24.9.2018:” Call for participation to the network of Environmental Education Centers)**

Cyprus has as a priority task for schools to become sustainable in the long term by organizing their Sustainable Environmental Educational Policy, are encouraged to work with the local populations and all the other stakeholders, in a specific issue that is related with the needs and particularities of the community and the school with the aim of intervene to the community with specific actions and measures that will improve the quality of life in local context. For this purpose, the guide for school and community collaboration titled “Key stones for school and community collaboration on Sustainable Development”, that was authored in the framework of the EU project Codes, is translated in Greek and is used as the main tool for supporting schools to work cooperatively with local communities and used non-formal and informal education intrinsically during the examination of an ESD issue (http://www.moec.gov.cy/dkpe/chrisimo_yliko.html).

In regard to GCED, Cyprus has set up a number of policy documents setting the main objectives for the development and implementation of GCED.

The MOECSY’s antiracist policy «Code of Conduct against Racism & Guide for Managing and Recording Racist Incidents» is being implemented with the support of the Cyprus Pedagogical Institute (CPI) since the school year 2014-2015 (<http://naos.risbo.org/wp-content/uploads/2017/04/Cyprus-antiracism-code.pdf>). The antiracist policy was developed based on the Follow-up Report of Cyprus for Recommendation No 20 and a recommendation by the Anti-Discrimination Body. The development and implementation of the policy responds to the European Commission’s against Racism and Intolerance guideline No 10 and is also in line with various international and European conventions that Cyprus has ratified, such as the Convention on the Rights of the Child, the Council of Europe’s Recommendation CM/Rec(2010)5 of the Committee of Ministers to member states , the Convention on the Elimination of All Forms of Violence Against Women , and the European Social Charter. The policy conceptualizes racism in a broad manner, including all sorts of discrimination. It includes definitions of basic concepts which form the theoretical background (e.g. racism, racist incident, discrimination, stereotypes, diversity, etc.), outlines the responsibilities and commitments, expected by each member of the school community, and provides the steps to be followed by schools for dealing with racist incidents in a practical rubric. It provides schools and teachers with a detailed plan on how to deal with and prevent racist incidents. As the antiracist views diversity as a multidimensional phenomenon, involving various aspects of people’s identities, it is expected to contribute to the decrease of bullying and discrimination based on any form of diversity in schools, including religion, beliefs, ethnicity, language, appearance, disability, gender, sexual orientation, etc. Schools implementing the anti-racist policy are expected to record and manage all forms of racist incidents.

CYPRUS OBSERVATORY ON SCHOOL VIOLENCE (COSV) (http://www.moec.gov.cy/paratiritirio_via/): The MOECSY has designed and developed the National Strategy for Preventing and addressing–School Violence, which has a four-year timeframe of implementation. The Strategy’s areas include : a) creation of information systems regarding the extent and forms of violence in schools, b) designing and implementation of legislative and administrative measures for child-protection, c) empowerment of parents, educators and principals, d) training of children in positive and nonviolent behaviors, e) child participation in the development and implementation of policies and measures and f) development

of an inter-disciplinary model of services. Very recently the Ministry has decided to restructure its Services in order to enhance the level of support given to schools to prevent and to address school violence. According to its role and responsibilities, and based on the aforementioned Strategy, the Cyprus Observatory on School Violence (COSV) of the CPI has developed and implemented actions that aim to prevent and address conflicts, bullying and violence in schools (nursery, primary, secondary education). COSV provides support to school units for the implementation of actions and programs aimed at improving the school climate, with the ultimate aim of reducing violence in schools. These programs, which are school-based and they have a two-year duration, are the “Prevention and Management of School Conflicts” and the “Prevention and Management of School Bullying”. For the first program, schools are supported to find effective ways of managing student conflicts and for the second program the COSV supports schools in the implementation of the Ministry’s anti-bullying policy, which deals with recognising, preventing and combating bullying.

INTEGRATION OF PUPILS WITH A MIGRANT BACKGROUND AND SAFEGUARDING THEIR RIGHT TO EDUCATION (https://www.pi.ac.cy/pi/files/epimorfosi/entaxi/policy_paper.pdf): The MOECSY has developed and implemented an upgraded educational policy aiming at the smooth integration of pupils with migrant background into the educational system of Cyprus. The policy document was approved by the Minister of Education and Culture and the departments of the MOECSY have developed an action plan with a variety of targeted actions, through the prism of an intercultural approach, anti-racist education and the methodology of teaching Greek as a second language. The action plan 2016-18 has been evaluated and based on this evaluation the action plan 2020-22 has been submitted to the Minister. The policy focuses on the revision of terms and definitions, mapping-out of the migrant population, combating racist incidents, preparatory, transition and induction-support phases, utilizing and teaching mother tongues, teaching Greek as a second language, teacher and school leaders training, and cooperation of schools with local authorities to open the school to the community. A special programme for the education of unaccompanied minors in schools is offered with an effort to empower these children especially in education, technical training, work and employment, access to basic services and the active participation and social inclusion with a view to obtaining further educational and professional qualification. Training opportunities include the creation of school networks to support schools for teaching Greek as a second language, involving blended learning method (seminars, teleconferences, Moodle platform), in Primary and Secondary Education from the CPI.

Furthermore, in March 2019, a European Commission peer counselling session was prepared and implemented in Nicosia, Cyprus by the Cyprus Pedagogical Institute (CPI) on behalf of the MoECSY’s Interdepartmental Committee. The focus was on integration of students with a migrant background into school education, with particular attention to the reception phase. The MoECSY’s aim was that the peer counselling session would allow it to: (i) collect examples of good practice; (ii) learn from the experiences of its EU peers; (iii) better understand the challenges to integration of students with a migrant background; and (iv) receive recommendations for a reception phase tailored to the Cypriot context and its education system which will prepare newcomers for entering smoothly in the school education. The findings should feed into the reformulation of the existing policy paper and into a new action plan 2019-2021 on the education of students with migrant background in Cyprus in order to create a comprehensive strategic plan. It involved peers from four EU Member States (Netherlands, Sweden, Greece and Belgium), SIRIUS (the EU Policy Network on Migrant Education) and the European Commission. From the Cypriot side, a range of stakeholders attended, including Ministry staff, CPI staff, teachers and school leaders, school

inspectors, teacher union and parents' associations' representatives. The peers presented their national and institutional perspectives and reform processes and discussed possible policy options for Cyprus. This resulted in concrete policy suggestions for the design of a reception phase as well as other issues regarding the wider field of integration of students with a migrant background.

HUMAN RIGHTS AND SEXUALITY EDUCATION THROUGH THE HEALTH EDUCATION CURRICULUM: The MOECYS implements human rights, antiracist and intercultural education through the Health Education Curriculum (HEC) since 2011. The HEC and the learning objectives include clearly defined success indicators related to issues concerning human rights education. More particularly, the success indicators of HEC include indicators associated with intimidating behavior (such as ... "perceive intimidating behavior, to recognize and resist this", "to propose solutions for addressing the phenomenon of bullying in the school") violence (such as "distinguish the negative consequence arising from any form of exclusion or discrimination", "to distinguish forms of violence, physical, sexual, psychological, socioeconomic") social identities/gender development (such as "recognizing factors that affect the development of social gender"). Additionally, the curriculum includes success indicators relating to respect for diversity (e.g. "To identify and judge the existence of stereotypes in the immediate and wider surroundings", "To engage in acts of respect for diversity ", "To highlight the positive effects of diversity in the classroom, in the family and in their community", "critically analyze diversity in sexual orientation"). The success indicators included in HEC relate to human rights and taking action for peaceful coexistence (e.g. "To suggest and to manifest behaviors that show respect for the rights of others at school", "To describe the rights of the child, such as those contained in the Convention on the rights of the child of the UN" and "To propose and implement actions that contribute to defending the rights of the child in school and community", "To recommend and to engage in acts or actions that promote healthy coexistence/symbiosis of people at school and in the community»).

Also, sexuality education is also part of the reformed HEC which has been implemented in schools since September 2011. The Health Education Curriculum promotes active citizenship learning objectives related to critical awareness of stereotypes and social exclusion consequences. The inclusion of sexuality education through health education as a compulsory subject, begins from pre-school up to secondary school. The themes that are mostly related to sexuality education are included in the thematic unit called "Family planning, sexual and reproductive health". This sub-thematic unit includes topics which are directly referred to a comprehensive understanding of sex and reproductive health such as local and European Law, stereotypes, family violence, homophobia, the role of religion and the media. This fact gives the opportunity to teachers to directly liaise themes of this particular thematic unit (and its sub-themes) with other thematic areas of the curriculum such as peer pressure, values of life, gender stereotypes, self-esteem, safety, assertiveness, rights and obligations and substance misuse. Pupils therefore have the opportunity to understand that sexuality and sexual behaviour is associated with their overall life, others' lives and the society as a whole. According to methodological guidelines, sexuality education in Cyprus is being approached in a way that people who regard themselves either as "conservative" or "progressive" would not feel being offended or excluded or being in a difficult situation during the lesson.

Specifically, sexuality education is based on the World Health Organization guidelines and includes topics related to a holistic understanding of sexual and reproductive health such as the national and European legal framework, stereotypes, domestic and other forms of violence, risky sexual behaviour, homophobia, the role of religion and media etc. Thematic unit 3.1 of the Health

Education Curriculum is not approached independently, but is offered to draw links with other Health Education Curriculum thematic units as well as other subjects, in order to ensure the holistic negotiation of sexual health issues. Therefore, students have the opportunity to understand that sexuality and sexual behaviours are related to their lives in general, the lives of others and society as a whole. Sexuality education, as included in Health Education, may contribute to the prevention and dealing of social problems such as sexual violence, bullying, unwanted pregnancies in teenagers, trafficking, homophobia, risky sexual behaviours, HIV/AIDS and other STDs, reproduction of gender stereotypes, violence against women, stigmatization and discrimination of marginalized groups such as LGBT students etc. Based on the methodological approach of Health Education, sexuality education is approached in a way that no students, from any background, will feel insulted, excluded or uncomfortable during the lesson. On the contrary, each student is empowered through their own cultural and ethical framework in order to acquire the skills and adopt the attitudes, values and behaviours which enhance their resistance to the early initiation of sexual activities and/or involvement in high risk sexual behaviours. The learning objectives of sexuality education in the Health Education Curriculum aim to the promotion of critical social realization of the various perspectives on issues of sexuality and not to a moralistic position in favour of against any choice of sexual behaviour. Sexuality education, based on the Health Education Curriculum, does not aim to teach what is 'right' or 'wrong' in relation to family planning and sexual life - always in the context of international, European and national legal framework and of the International Declaration of Human Rights. The learning objectives are based on the health promotion approach and aim to provide opportunities to students in order to critically explore the various social factors which determine issues of sexuality, and to understand the ways in which society may influence the attitudes, choices and behaviours of a person in relation to sexuality issues. The Health Education Curriculum does not agree or disagree with the ideas expressed in the media or by religion, as the aim is to enable students to critically discuss the potential roles of the media or religion in the ways people think or behave. It therefore, provides a platform through which trafficking may be identified and prevented.

GENDER EQUALITY: The MOECSY is focused on ensuring equal opportunities in education for all genders on a non-discriminatory basis at all levels of education. The Ministry has formed an Interdepartmental Committee with representatives from all its departments and services. This Committee oversees and coordinates all gender equality issues related to actions taken. The work of the Committee has resulted to the development of an Action Plan which promotes gender equality, targeting to the inclusion of gender equality in matters related to the structures of the educational system and to the teacher in-service training.

A3b. Please provide the full names of any education policies, frameworks or strategic objectives referred to in A3a and, where possible, web links to relevant documents.

Note: All the educational policies and frameworks on ESD / GCED in formal and non-formal education level are indicated and described in details in A3a (Question), with the relevant websites added. Please retrieved information for this question from the A3a Question.

*A4. Please indicate which GCED and ESD themes are covered in national or sub-national education policies, frameworks or strategic objectives affecting each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	1	1	1
2. Gender equality	1	1	1	1
3. Human rights	1	1	1	1
4. Peace and non-violence	1	1	1	1

B. Curriculum (paras 4 and 10-19 of the 1974 Recommendation)

B1a. Please describe in which ways GCED and ESD are mainstreamed in school curricula. Indicate whether topics are taught as standalone subjects or are integrated into the curricula of other subjects. Explain whether GCED and/or ESD themes⁴ are mentioned explicitly or are inferred and what types or levels of education are covered.

GCED has been included in the curricula through the introduction of the new subject "Health Education" in 2011. The Health Education Curriculum (HEC) and learning objectives include clearly defined success indicators related to issues concerning cultural diversity and tolerance, gender equality, human rights, peace and non-violence and consumer education. These themes are not only included in the HEC, but they are also integrated in other curriculum subjects, such as language and arts.

The National Curriculum for ESD has been introduced officially in the pre-primary and primary education. The curriculum of ESD, according to the educational level that is referred to, is developed in indicators and learning outcomes. For example in primary education, has been introduced with two teaching periods from A' to D' class under the frames of the subject Life Education. In E'-F' class EE/ESD is a separate subject and is taught in one teaching period. The program in primary education is developed in twelve thematic units of an international, regional and national interest (forest, water, litter, poverty, urban development, desertification, production and consumption, energy, tourism, means of transport, culture and environment, biodiversity).. The above thematic units are a tool for each school to examine and study its own Sustainable Environmental Educational Policy (SEEP), which is based on the study and examination of an issue of sustainable development selected from all the participants in the learning process (students, teachers, principals, local populations etc.) related to: a) the needs and the interests of students and teachers, b) the environmental problems faced by the school, c) the particular characteristics, problems and needs of the community in which the school is situated, d) the environmental issues which influence, in the short-term or in the long-term, the quality of life of people in a local and international level. For that purpose a specific guide has been developed for teachers in primary education, including all the learning outcomes for each thematic unit, for all the classes in primary education in order to help teachers implement effectively the curriculum of ESD, on the basis of the learning outcomes that must be attained by each grade. The guide with the learning outcomes is available on-line to all the teachers http://archeia.moec.gov.cy/sd/557/odigos_efarmogis_programmatos_spoudon_perivallontikis_ekpaidefsis.pdf.

Additionally, in the school guide "Integrating ESD Curriculum in Primary Education: Guide for Teachers" there are specific references for the importance of non-formal and informal education and the need schools to use Governmental network of EECs as key place of non-formal learning for environmental and sustainable development issues. (http://archeia.moec.gov.cy/sd/557/odigos_efarmogis_programmatos_spoudon_perivallontikis_ekpaidefsis.pdf).

⁴ See the schema described in paragraph 11 of Section II of these guidelines.

B1b. Please provide examples of curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents.

The HEC and its learning objectives include clearly define success indicators related to issues concerning GCED. More particularly, the success indicators of HEC include indicators associated with intimidating behavior (such as "perceive intimidating behavior, to recognize and resist this", "propose solutions for addressing the phenomenon of bullying in the school"), violence (such as "distinguish the negative consequence arising from any form of exclusion or discrimination", "to distinguish forms of violence, physical, sexual, psychological, socioeconomic"), social identities/gender development (such as "recognizing factors that affect the development of social gender"). Additionally, the curriculum includes success indicators relating to respect for diversity (e.g. "to identify and judge the existence of stereotypes in the immediate and wider surroundings", "to engage in acts of respect for diversity", "to highlight the positive effects of diversity in the classroom, in the family and in their community", "critically analyse diversity in sexual orientation"). The success indicators included in the HEC relate to human rights and taking action for peaceful coexistence (e.g. "to suggest and to manifest behaviors that show respect for the rights of others at school", "to describe the rights of the child, such as those contained in the Convention on the Rights of the Child of the UN" and "to propose and implement actions that contribute to defending the rights of the child in school and community", "to recommend and to engage in acts or actions that promote healthy coexistence/symbiosis of people at school and in the community"). Similar indicators are included in other subjects as well.

Note: This question for ESD integration in school curricula has already been answered in question B1a

*B2 Please indicate which GCED and ESD themes are taught as part of the curriculum at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	1	1	1
2. Gender equality	1	1	1	1
3. Human rights	1	1	1	1
4. Peace and non-violence	1	1	1	1
5. Climate change	1	1	1	1
6. Environmental sustainability	1	1	1	1
7. Human survival and well-being	1	1	1	1
8. Sustainable consumption and production	1	1	1	1

*B3 Please indicate in which subjects or fields of study GCED and ESD are taught in primary and secondary education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Cultural diversity and tolerance	Gender equality	Human rights	Peace and non-violence	Climate change	Environmental sustainability	Human survival and well-being	Sustainable consumption and production
Arts	1	1	1	1	1	1	1	1

Other (please specify)								

*B4 Please indicate the approaches used to teach GCED and ESD in primary and secondary education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Global citizenship and education for sustainable development
GCED/ESD are taught as separate subject(s)	1
Cross-curriculum approach (e.g. <i>GCED/ESD are taught in more than one subject but not throughout the curriculum</i>)	1
Integrated approach (e.g. <i>GCED/ESD are taught throughout the whole curriculum</i>)	1
Whole school approach (e.g. <i>GCED/ESD are integrated in the school ethos, management, governance, curriculum, teacher training, teaching practices, the learning environment and in learning experiences in the community and life outside school</i>)	1

B5 Please indicate which human rights education themes are taught as part of the curriculum at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
3. Human rights education				
3.1 equality and non-discrimination based on race, colour, language, religion, disability, political or other opinion, national or social origin, birth or other status	1	1	1	1
3.2 human rights values, human dignity, justice, inclusion and participation	1	1	1	1
3.3 respect for human rights and fundamental freedoms (as outlined in international conventions and declarations)	1	1	1	1

C. Teacher education (including the training of trainers and educators) (paras 4 and 33-37 of the *1974 Recommendation*)

C1a. Please describe in which ways GCED and ESD are mainstreamed in initial training and in continuing professional development of teachers, trainers and educators. Indicate whether all teachers, trainers and educators or only some are required to receive training to teach GCED and/or ESD.

According to educators' initial training, it is noted that all universities offer compulsory or optional modules on Education for Sustainable Development.

Special emphasis in Cyprus is given to ESD professional Development. The Unit of Education for Environment and Sustainable Development (EESD) is responsible for ESD teachers, educators, trainers professional development. A series of ESD professional development courses for teachers, principals and other stakeholders offered by the Unit of EESD, both obligatory and optional.

A) For **the training of teachers educators, trainers** in ESD, various series of compulsory and optional seminars and courses are promoted in school-based training, central training, education and training courses through action research, fieldwork training and training in outdoor environments.

1) More specifically, in the level of **compulsory education in ESD issues**, three series of programs of education and training of teachers in primary education are carried out throughout the year. The mandatory training involves all teachers of pre-primary and primary schools. Specifically, each school is required to choose a teacher, as the coordinator of the school for EE/ESD, who is trained in the implementation of the curriculum for EE/ ESD, and then acts as the trainer of EE/ESD of his/her colleagues of his/her school unit.

2) **Optional teacher education and training courses for ESD** are offered, which last 15-20 hours each in the following subjects:

- The sustainable school
- The teaching strategies of ESD
- The use of external environments as key tools and means for ESD
- Training in the use of new technologies in ESD
- Training in the use and application of educational materials produced by groups of teachers, to support the areas of the curriculum.
- Using ESD competences to integrate SDGs in schools context. The above training courses for ESD, concern educators at all levels of education (Pre-primary, Primary and Secondary Education).

B) **Professional Development in ESD for leaders and Principals** Regarding school principals, In the field of ESD has been introduced in the mandatory education and training courses of newly appointed principals of Primary and Secondary education. In the context of the specific field, the principals are introduced to the basic principles and aspects of ESD, to the concept of the sustainable school and the way of planning and implementation of ESD School plans. However, particular importance is attached to the area of leadership and sustainable schools, since the role of principals is crucial for creating sustainable schools. Accordingly, the obligatory courses for assistant directors in secondary education include a module on ESD. Assistant principals are introduced to

the key principals of ESD, as well as to the concept and content of sustainable schools. In addition, their role in promoting ESD in school is discussed, as well as the innovations, which can be promoted in a school through the newly established curriculum for EE / ESD.

Since 2017, a new strand was introduced on directors and assistant directors' mandatory courses on ESD which is related to ESD competences. The aim is to train principals and assistant principals as the leading team of their school to take ownership of the Competences and be able to guide their educators on what they should know, on what they should be able to do, on how they should live and work with others, and on how they should be if they are to contribute for making their school sustainable. The competences are clustered around three essential characteristics of ESD UNECE Competences — a holistic approach; envisioning change; and achieving transformation.

During the years 2017-2020 around 250 Principals from Primary and Secondary Education, and 350 assistant principals from Secondary Education participated in the compulsory education and training courses for ESD.

All education and training programs offered are posted on the website of the Pedagogical Institute (<http://www.pi.ac.cy/pi/index.php?lang=el>) and in the website of the Unit of EESD (<http://www.moec.gov.cy/dkpe/index.html>).

C1b. Please provide examples of teacher training policies or curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents. If possible, include examples related to initial training and to continuing professional development.

Examples of continuing professional development on ESD:

a) **Compulsory Education and Training courses of pre-primary teachers for the implementation of the NC (National Curriculum) of EE/ESD.** It is implemented on an annual basis at three time periods. It is developed in three phases: a) the first phase informs teachers about the philosophy, principles, pedagogical framework of the NC, as well as the way of its effective implementation, b) the second phase concerns the explanation of the methodological framework for the implementation of the NC and the teaching techniques used, as well as the basic steps for planning the ESD School plan [Sustainable Environmental Education Policy (SEEP)] of the school, c) the third phase of the training of teachers involves the implementation of quality standards relating to the assessment of the school unit in relation to the effective promotion of SEEP in their school.

b) **Compulsory training courses for primary teachers on ESD Competences-SDGs and their integration in the school context.**

These courses aim to facilitate teachers understand the content and the importance of each SDG and be competent to elaborate on them in the school process. The innovation regarding all the courses is that they are developed on ESD competences aiming to help teachers to understand the theory of ESD competences, the meaning and the inner content of each competence and how competences can be applied in school and in non-formal setting, to facilitate them to define the ESD competences according to the specific school context and issue that intend to work on, to familiarize them with activities on each ESD competence and to exercise them how to use ESD competences to organize a lesson, or a project on SDGs. The courses are divided in two parts- theoretical and practical. The theoretical focus on ESD, teachers' competences and SDGs, on ESD competences and how they can be used on ESD curriculum, on the ways that ESD teachers competences can be used for infusing SDGs in the learning process (such as climate change, sustainable cities and communities, urban development, well-being-good health etc.). The practical part is focused on workshops based on elaborating on various SDGs by using ESD competences.

Teachers have the opportunity to apply various activities on SDGs organized on ESD based competences, reflect on them and suggest other ESD competence- based ideas and activities that can be applied in their school context and through ESD curriculum.

Example for training course on ESD competences:

Examples of competences pursued in teachers' professional development course on the SDG "well-being-good health"

- Consider in a systemic view the socio-political-economic dimensions of health and well-being. Recognize the root causes that impacted negative health and well-being and understand that health and well-being issues are complex and need a holistic interpretation, including values, beliefs and attitudes. (systems thinking)
- Envision different scenarios regarding people's health and well-being. Understand how the world might change if strategies that promote health and well-being implemented and replicated, share ideas and discuss policies and actions that can change life to better, including health and emotional well-being behaviours in daily routine that prevent discriminations, xenophobia, bullying, tobacco, drugs etc. (futures)

Examples of initial training on ESD:

Frederick University offers on a compulsory basis, one module on sustainable development issues (ENV300), one on ESD methods (ENV402), one science module integrating environmental issues within science education (SCI100) and on an optional basis 2 more modules specialising on science and ESD. Students interested on these issues, also, have the option of choosing ESD topics for their dissertation.

Similarly, the Department of Pre-Primary Education offers 2 modules on sustainable development issues and education (ENV301: Environmental and Social Studies at pre-primary Education and ENV401 Approaches of Environmental Studies at Pre-Primary Education).

It is important for Cyprus that a cross-departmental on-line postgraduate program on Education for the Environment and Sustainable Development, addressing a variety of professionals (including educators who wish to integrate SD in their professional practice) has been offered by the Frederick University in 2017. The international distance master course on ICT and ESD and is addressed in a variety of professionals abroad. The master course curriculum is driven by a learning paradigm that merges three theories of learning, namely: experiential learning, constructivist learning and transformative learning. Students have access to and a complete understanding of a vast array of virtual collaboration tools and related resources geared towards student-generated questions that drive the content, processes and methods embedded in the learning experience. The program reflects the realities of the global/local environments and provides foundational courses together with highly specialized modules in the area of ICT-enabling education for sustainable development. Activities are designed to meet students' various learning styles and encourage them to experience personal change towards learning to live together sustainably. (<http://dl.frederick.ac.cy/en/ict-in-esd-program-profile>)

University of Cyprus in initial teachers training courses offers the subject EPA187: Environmental Issues. Students have the opportunity to inform about various environmental issues and also introduce to the main principals of Environmental Education and how EE can be implemented in school procedure (<http://www.ucy.ac.cy/data/scienceed/Undergrad10-11GR.pdf>) (p.166). University of Cyprus in 2018-2019 under the master Learning in Sciences and in Environment, introduced the strand "Environmental Education-Education for Sustainable Development". The students that attend this strand receive the qualifications to work in educational process with ESD.

University of Nicosia in student teachers initial training (primary and pre-primary) offers a series of subjects in sciences include principals and didactic methods of ESD (http://www.unic.ac.cy/nqcontent.cfm?a_id=5624), (<http://fysikeseapistimes-unic.blogspot.com>)

Examples of continuing professional development on issues related to GCED:

In terms of training and in continuing professional development of teachers, trainers and educators in GCED, the Cyprus Pedagogical Institute (CPI) offers several opportunities, both obligatory and optional, to teachers of all levels on issues related to GCED such as antiracist education, education for children with a migrant background, teaching Greek as a second language etc. Specifically, the following programmes are implemented or supported by the CPI :

1.IMAGINE PROGRAMME: Since 2017, the CPI and MOECSY have been supporting, under the guidelines of the Bicomunal Technical Committee of Education, the IMAGINE programme, in collaboration with the Association for Historical Dialogue and Research at the "Home for Cooperation". The programme includes experiential activities related to human rights and anti-racism within the education for a culture of peace. It is under the auspices of the Technical Committee on Education and has been approved by the negotiators of the two communities. Following the successful completion of the activities of the Imagine Education Programme (2017-2019) and the participation of approximately 5000 pupils and 600 teachers from all the communities in Cyprus, the programme team has announced its continuation for the school year 2019-2020 and has enriched it with more activities and meetings between children. During the programme, pupils engage in pedagogical activities in which Greek-Cypriot pupils will come into contact with Turkish-Cypriot pupils of the same age, accompanied by their teachers. Activities are held in the UN controlled area of Ledra Palace during school time. The programme pillars include an anti-racist workshop in schools and contact preparation (before the meeting with pupils from the Turkish Cypriot/Greek Cypriot community). Imagine trainers visit classrooms and engage children in experiential activities discussing issues of stereotyping, discrimination and racism as components of the culture of violence and preparing the conditions for a bi-communal meeting in the "Home for Cooperation". Then the pupils participate in bi-communal activities that take place in three languages (Greek, Turkish, English), with the option of repetition.

2.TEACHER TRAININGS ON ISSUES RELATED TO HUMAN RIGHTS AND DISCRIMINATION: The CPI offers teacher trainings related to issues of human rights and discrimination in the context of professional learning (school-based seminars, the yearly two-day teacher training for primary and secondary school teachers one-day trainings, afternoon seminars, action research professional learning scheme). Indicative titles are seen below:

- Implementing the antiracist policy at our school: Challenges in the management of racist incidents;
- Human relations and crisis management in the school community: From conflict to respect of diversity;
- Teaching Greek as a second language;
- Stereotypes, prejudices, racism: Towards an education on the basis of human rights;
- What if it was you? An approach for human rights and peace education.
- Integration of migrant pupils in the general classroom;
- Management of pupils' problematic behaviors - Preventing and dealing with offensive behavior;
- Bullying;
- Empowering new generations: Encouraging and cultivating creativity and critical thinking;
- Integration of pupils with migrant biography into the mainstream classroom;
- "I do not forget" and Critical Education for peace: New openings;
- Cultivating empathy;
- Human relations and crisis management in the school community: From conflict to respect of diversity;
- Stereotypes, prejudices, racism: Towards an education on the basis of human rights;
- Sexuality education and prevention of abuse incidents;
- Developing positive home-school relations;

- Promoting gender equality in children of 5th and 6th grade.

3.CYPRUS OBSERVATORY ON SCHOOL VIOLENCE (COSV) : The MOECYS has designed and developed the National Strategy for Preventing and addressing School Violence, which has a four-year timeframe of implementation. According to its role and responsibilities, and based on the aforementioned Strategy, the Cyprus Observatory on School Violence (COSV) of the CPI has developed and implemented actions that aim to prevent and address conflicts, bullying and violence in schools (nursery, primary, secondary education). COSV provides support to school units for the implementation of actions and programs aimed at improving the school climate, with the ultimate aim of reducing violence in schools. These programs, which are school-based and they have a two-year duration, are the “Prevention and Management of School Conflicts” and the “Prevention and Management of School Bullying”. For the first program, schools are supported to find effective ways of managing student conflicts and for the second program the COSV supports schools in the implementation of the Ministry’s anti-bullying policy, which deals with recognising, preventing and combating bullying.

At the time being, COSV conducts a number of training activities:

- optional online seminars, which aim to enhance teachers’ competences in managing violence and delinquency.
- optional online seminars aiming to equip teachers with skills, knowledge and attitudes so that they achieve “Peace classrooms” as a means of preventing violence and conflicts
- optional online seminars for teachers to enhance their psychological resilience skills amidst coronavirus global crisis
- a school-based optional seminar entitled “prevention and management of challenging student behavior”
- a school-based optional seminar entitled “Non-violence communication”
- a school network, with 11 participating schools, which are trained and supported in handling challenging behavior by using Systemic Interventive tools.

In addition, a national-level research has been awarded by the COSV, after an open call announcement, to an academic, at the beginning of October 2019 and it will be completed in 2023. It aims to collect quantitative and qualitative data about violence in education, from all schools of all levels in Cyprus. In the meantime, the schools are requested to record bullying incidents online in a specific platform that has been created for this purpose. Efforts are made so that this platform becomes a comprehensive platform for recording and monitoring various types of school violence such as bullying, racism, vandalism, physical or sexual violence, drug related behaviors, delinquency etc. Moreover, the COSV collects data concerning good practices for the prevention of violence in schools, it evaluates these practices and it organizes an annual conference where the best practices are awarded, thus receiving visibility and outreach.

Also, COSV participates as a partner in the following European projects:

- Erasmus+ KA3 project entitled “SeBI: Securing the Best Interest of the Child in Educational School Administration” (November 2019 – November 2022). The SEBI project, aims at providing valuable advice and suggestions which can be adopted across Europe regarding the assuring of the best interest of the child in Educational School Administration. It particularly aims to safeguard the best interests of children with migrant background.
- Erasmus+ KA3 project entitled “SAFER: Social competences and Fundamental Rights for preventing bullying (including on-line bullying)” (1/12/20 – 30/11/23). This project aims to experiment the innovative method of “Whole School & Community Approach” in preventing and combating bullying.

- Erasmus+ KA2 project entitled “CICADA: Children’s life quality: participation, recreation and play” (October 2019 – October 2021). This project aims to map children’s and young people’s quality of life and to inform policy about existing and emerging good practices, challenges and opportunities across the partner countries.

4.TEACHER TRAINING ON THE IMPLEMENTATION OF THE MOECSY’S ANTIRACIST POLICY: The MOECSY’s antiracist policy «Code of Conduct against Racism & Guide for Managing and Recording Racist Incidents» is being implemented with the support of the Cyprus Pedagogical Institute (CPI) since the school year 2014-2015.. The policy conceptualizes racism in a broad manner, including all sorts of discrimination. It includes definitions of basic concepts which form the theoretical background (e.g. racism, racist incident, discrimination, stereotypes, diversity, etc.), outlines the responsibilities and commitments, expected by each member of the school community, and provides the steps to be followed by schools for dealing with racist incidents in a practical rubric. It provides schools and teachers with a detailed plan on how to deal with and prevent racist incidents. As the antiracist views diversity as a multidimensional phenomenon, involving various aspects of people’s identities, it is expected to contribute to the decrease of bullying and discrimination based on any form of diversity in schools, including religion, beliefs, ethnicity, language, appearance, disability, gender, sexual orientation, etc. Schools implementing the anti-racist policy are expected to record and manage all forms of racist incidents. For the school year 2019-2020, the policy was implemented across schools and reports were received from 129 schools for a total of 245 racist incidents. Of the 129 schools, 88 reported zero racist incidents while 41 reported the 245 incidents in total. These were based on various aspects of diversity. The Cyprus Pedagogical Institute (CPI) has offered support to schools in various ways such as the following, for the implementation of the antiracist policy:

- Continuous update of website (presentations, FAQs, supportive material etc)
- Support helpline (phone and email)
- Parents information leaflet in 5 languages (Greek, English, Arabic, Turkish, Russian)
- Focused training opportunities (school based seminars, optional afternoon seminars, network meetings, conferences in collaboration with relevant NGOs and Bodies, e.g. UNHCR, Commissioner for Children’s Rights etc)
- Creation of School Network across Cyprus for the support of the implementation of the antiracist policy with central and local training and support meetings held every few months

The creation of the school network appears to be the most effective support strategy for schools implementing the policy. The school teams created in the various districts had the opportunity to exchange experiences and views on policy implementation processes and reflect on their role and ways of managing the behaviours of colleagues, children and parents. The support of schools and teachers for the implementation of antiracist policy by the CPI has been multi-dimensional and ongoing throughout the year (eg. educational activities in various contexts and lines of communication).

5.INTEGRATION OF PUPILS WITH A MIGRANT BACKGROUND AND SAFEGUARDING THEIR RIGHT TO EDUCATION

Education and training of teachers in intercultural education and teaching of Greek as a second language is necessary in order to provide them with the tools to respond adequately to the everincreasing challenges of their profession. The Cyprus Pedagogical Institute, in cooperation with the Directorates of the MoEC has in recent years organized a variety of training activities (workshops, conferences, seminars – experiential learning workshops, optional seminars, school seminars, etc.), with the aim of raising awareness and for supporting primary and secondary education teachers on matters regarding the integration of pupils with migrant background. In particular, emphasis was placed on issues of addressing diversity and the

implementation of an anti-racist policy, as well as on teaching Greek as a second language. Additionally, in the case of secondary education, the Cyprus Pedagogical Institute provides - on an annual basis since 2008 - school-level support to teachers participating in the 'Learning Greek as a Second Language Programme'. In addition, a website has been developed which includes informative, educational and support material for the teaching of Greek as a second language, as well as material for the implementation of the anti-racist policy of the MoECSY

6.HUMAN RIGHTS AND SEXUALITY EDUCATION THROUGH THE HEALTH EDUCATION CURRICULUM

The CPI supports teachers with multiple types of teacher training on the Health Education Curriculum every year. For example, the CPI planned a series of trainings for primary education teachers for the school year 2019-2020 on teaching sexuality education through the implementation of the Health Education curriculum. A total of 70 teachers participated in a total of three whole day training seminars based on the sexuality education handbook for primary education "Life journey". They were also informed of the policy regarding the prevention, recognition and dealing of child sexual abuse. The teachers were committed to implement the sexuality education activities in their classrooms and participated in a reflection process during the final meetings.

7.GENDER EQUALITY: The MOECSY is focused on ensuring equal opportunities in education for all genders on a non-discriminatory basis at all levels of education. The Ministry has formed an Interdepartmental Committee with representatives from all its departments and services. This Committee oversees and coordinates all gender equality issues related to actions taken. The work of the Committee has resulted to the development of an Action Plan which promotes gender equality, targeting to the inclusion of gender equality in matters related to the structures of the educational system and to the teacher in-service training. Examples of the implementation of the action plan are given below:

- Training courses aiming to raise awareness on gender issues related to the gap between men and women in labour, targeting to all teachers in primary and secondary education, all career counselors in secondary education and all inspectors in primary and secondary education (CPI, Career Counselling and Educational Service and Ministry of Labour, Welfare and Social Insurance).
- Training of teachers and parents on issues related to gender, through school-based training seminars and programmes (CPI).
- Workshops for teachers in primary and secondary education (CPI, Mediterranean Institute of Gender Studies).
- In-service training of teachers on issues related to prevention and combating delinquency with reference to transgender relationships (Departments of Education and CPI).
- Organizing conferences/seminars on gender issues for teachers of all levels (CPI).
- Implementing programmes in schools with the aim of promoting gender equality and respect among all children in class, irrespective of their background or gender (Educational Psychology Service, MOECSY).
- Workshops for teachers and pupils aiming at the promotion of equality and inclusion (Career Counselling and Educational Service, MOECSY).
- School competitions on promoting gender equality

Website on gender equality - Launching a website dedicated to Gender Equality (Pedagogical Institute), which includes useful information, bibliography and teaching material for promoting equal opportunities of both genders and gender mainstreaming in the educational process. The content of the website is frequently updated.

*C2 Please indicate whether teachers, trainers and educators are trained to teach GCED and ESD during initial or pre-service training and/or through continuing professional development. Please enter the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Initial or pre-service training				
For teachers of selected subjects only (in which GCED or ESD are typically taught)	1	1	1	1
For teachers of other subjects	1	1	1	1
Continuing professional development				
For teachers of selected subjects only (in which GCED or ESD are typically taught)	1	1	1	1
For teachers of other subjects	1	1	1	1

*C3 Please indicate on which GCED and ESD themes pre-service or in-service training is available for teachers, trainers and educators at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	1	1	1
2. Gender equality	1	1	1	1
3. Human rights	1	1	1	1
4. Peace and non-violence	1	1	1	1
5. Climate change	1	1	1	1
6. Environmental sustainability	1	1	1	1
7. Human survival and well-being	1	1	1	1
8. Sustainable consumption and production	1	1	1	1

*C4 Please indicate whether teachers, trainers and educators are trained to teach the following dimensions of learning in GCED and ESD. Please enter the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Knowledge	1	1	1	1
Skills	1	1	1	1
Values	1	1	1	1
Attitudes and behaviours	1	1	1	1

*C5 Please indicate whether teachers, trainers and educators are trained to use the following approaches to teach GCED and ESD in primary and secondary education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Global citizenship and education for sustainable development
GCED/ESD are taught as separate subject(s)	0
Cross curriculum approach (e.g. <i>GCED/ESD are taught in more than one subject but not throughout the curriculum</i>)	1
Integrated approach (e.g. <i>GCED/ESD are taught throughout the whole curriculum</i>)	1
Whole school approach (e.g. <i>GCED/ESD are integrated in the school ethos, management, governance, curriculum, teacher training, teaching practices, the learning environment, and in learning experiences in the community and life outside school</i>)	1

D. Student assessment (paras 4 and 5 of the *1974 Recommendation*)

D1a. Please describe in which ways GCED and ESD are covered in student assessments and examinations. Indicate whether students are assessed only on their knowledge of and skills related to the topics being tested or also on their values, attitudes and/or behaviours.

One of the basic policies systematically promoted by the MOECSY concerns the Individual and School Progress Report. Individual Progress Report both in pre-primary and primary education includes topics that refer to Personal and Social Awareness-Emotional Empowerment. The Individual Progress Reports examine pupils' values, attitudes and/or behaviours on relevant to GCED issues, such as empathy skills, respect to the rules of the classroom, respect to the rules of the school, communication and collaboration with others, respect to others and constructive contribution to dispute resolution. Moreover, the understanding of concepts in relation to cultural diversity and tolerance, gender equality, human rights are evaluated through the HEC.

On ESD the focus in student assessment is on knowledge and skills related to the topic that being tested. Attitudes and values rarely are examined. This can be justified because the ESD

issues are not consider as obligatory issues of student assessment. The ways of the examination are mainly qualitative evaluation (students' portfolio, implementation of projects).

*D2 Please indicate whether the GCED and ESD themes below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	1		
2. Gender equality	1	1		
3. Human rights	1	1		
4. Peace and non-violence	1	1		
5. Climate change	1	1		
6. Environmental sustainability	1	1		
7. Human survival and well-being	1	1		
8. Sustainable consumption and production	1	1		

*D3 Please indicate which of the dimensions of learning in GCED and ESD below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Knowledge	1	1	1	1
Skills	1	1	1	1
Values	1	1	0	0
Attitudes and behaviours	1	1	0	0

E. Mainstreaming of GCED and ESD in laws and policies, curricula, teacher education and student assessment (paras 4-5, 7, 10-19 and 33-37 of the 1974 Recommendation)

*E1 Based on your responses to questions in the previous four sections (laws and policies, curricula, teacher education and student assessment) please indicate to what extent global citizenship education (GCED) and education for sustainable development (ESD) are mainstreamed⁵ in (a) education laws and policies, (b) curricula (c) teacher education (including the training of trainers and educators) and (d) student assessment in your country. Please enter the appropriate number in each white cell in the table below.

KEY:

- 0 Not at all** GCED and ESD are not mainstreamed.
- 1 Partially** Some GCED and/or ESD themes⁶ are mainstreamed. Select this option if GCED is mainstreamed but ESD is not (or vice versa).
- 2 Extensively** Most GCED and ESD themes are mainstreamed.
- 9 Not known** It is not known whether GCED and ESD are mainstreamed or not.
- 99 Not applicable** The given level of government does not have responsibility for the given component (policies, curricula, teacher education or student assessment) and/or does not have responsibility for the given level or type of education. This may occur at the national level in federal countries where education is the responsibility of individual states or at the sub-national level in small countries where there is only one level of government.

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
National				
(a) Education laws and policies	2	2	1	2
(b) Curricula	2	2	2	2
(c) Teacher education	2	2	2	2
(d) Student assessment	0	0	1	0
Sub-national				
(a) Education laws and policies	99	99	99	99
(b) Curricula	99	99	99	99
(c) Teacher education	99	99	99	99
(d) Student assessment	99	99	99	99

⁵ GCED and ESD are mainstreamed if their themes are mentioned explicitly in relevant documents and are expected to be implemented by the relevant authorities (e.g. Ministries, regional or local education authorities), educational institutions (e.g. schools, colleges and universities) and/or education professionals (e.g. teachers, lecturers, trainers and educators) as appropriate.

⁶ Refer to the schema in paragraph 11 of Section II of these guidelines.

F. Technical and vocational education and training (paras 25-29 of the 1974 Recommendation)

F1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in technical and vocational education and training. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

Through the Cyprus Rural Network Programme, educational programs are implemented in rural areas by all members of the network (Producers groups, farmers' trade unions, LEADER Groups etc.).

Throughout the years, the CESC has run many activities aimed at raising awareness for not only the public but also targeted audiences. e.g. 'Young Farmers educational seminars' this was several seminars specifically for farmers to raise awareness of good farming practice.

Also the Department of Technical and Vocational Education of the Ministry of Education, Culture, Sports and Youth, develops a series of post-secondary courses (for 2 years) based on various sustainable issues such as renewable energy, blue growth, organic farming in an attempt to support youth to reorient to the green-jobs.

Additionally, in VET education the revised curricula include various modules and courses on sustainable issues such as solar energy, landscaping, circular economy. It is noteworthy that these modules are linked with the labour market and provide opportunities to students to acquire firsthand experiences in the green-market.

Another interesting for VET Education and green jobs has been developed from the Frederick University in the framework of a YENESIS Project funded by EU. The aim of this guide is to provide fundamental information to secondary and VET students who are in the process of deciding or have already decided that they will follow a green career path. This guide explains what exactly a green job is and how this type of employment can prevent them from becoming young people neither in employment nor in education and training (NEETs) and can secure their future as active members of their society. Furthermore, the horizontal skills that are necessary for a green worker are presented. This guide also aims to present to VET students potential job positions that they can pursue in the fields of Renewable Energy, Energy Efficiency, Sustainable Tourism and Sustainable Mobility. The importance of each field and its contribution to the development of the green market is also explained. Finally, some links for green job hunting are provided to the students, as well as some personal stories of people who have successfully established themselves as green workers for drawing inspiration (<https://youthemploymentmag.net/2019/11/28/yenesis-guide-on-sustainability-competences-for-green-jobs-to-be-disseminated-in-secondary-schools/>).

G. Adult education (para 30 of the *1974 Recommendation*)

- G1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in adult education and other forms of non-formal education including youth education, out-of-school education, etc. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

ESD in adult and youth is integrated through the Ministry of Education, Culture, Sports and Youth as well as through many other stakeholders as NGOs, Youth Board of Cyprus and local authorities. Through various outdoor activities, campaigns and interventional programs aim to engage actively youth and the civil society in sustainability and empower them to act for more just and sustainable societies.

An example of good practice is the Young Innovators programme of EIT Climate-KIC Cyprus. It is a signature educational programme that aims to foster a systemic view on current climate challenges and empower young people to develop innovative solutions through Problem-based Learning experiences. With the Young Innovators programme, students are invited to join this journey where they are introduced to a systems innovation approach. Systems innovation approach is based on the awareness that any change that is planned to be introduced in a particular sector in society will affect and be affected by other parties. Taking a systems innovation approach enables students to explore the relationships between such interconnected aspects and also to take account of the people who are affected, their values, their expectations and their reactions. Involving students working towards a healthy and sustainable planet, and encouraging them to act as catalysts for systemic change, is critical. The thinking around climate innovation needs to start now as these young people are the business, societal and national leaders of tomorrow. Under the Young Innovators Climate-KIC Cyprus organized in Cyprus the "Climathon", initiative as part of the global competition initiative which brings together thousands of volunteers each year to deliver solutions to the problems and challenges their city faces as a result of climate change. Climathon, aims to develop innovative solutions that will make their city environmentally friendlier, more sustainable, and thus increase the quality of life for residents. In Cyprus, the Climathon Climate Marathon participants invited to submit their ideas for the following three challenges: a) Nature-based solutions, b) sustainable food systems, c) Digital nudging as a pro-climate action enabler.

H. Research and International Co-operation (paras 41-45 of the *1974 Recommendation*)

- H1 Please describe what kinds of research or experimentation have been carried out to improve the implementation of GCED and/or ESD. Describe briefly how the results of such activities have influenced education policies, curricula and/or teaching practices.

The last years an emphasis is given to ESD research in Cyprus context. The efforts focused on getting more funds from various EU mechanisms and other funding tools for ESD research. Also, there is an increasing motivation from various research centres to conduct research on ESD field. This motivation supports the efforts to create a culture of ESD at all the level of education and the civil society, improve the policy documents for ESD and SD, fill the gaps that exist on ESD and create a culture of research on ESD at national level. Also, the research results impacted the formation of ESD educational policies on ESD such as the ESD National Curriculum, policy that every school has to design and implement its Educational Policy for Environment and Sustainable Development, based on the whole school/institution approach, the formation of the policy for creating the Governmental Network of Environmental Education Centers as the Cyprus official non-formal structure for integrating ESD in non-formal contexts. The research on ESD in Cyprus, impacted also the development and reformation of ESD

professional development courses with emphasis on teacher professional development based on ESD competence based approach.

H2 Please indicate which types of activities are available that promote international co-operation at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Hosting of international meetings on GCED and/or ESD	1	1	1	1
Participation in international meetings abroad on GCED and/or ESD	1	1	1	1
Support for programmes hosting foreign students, researchers and/or teachers	1	1	1	1
Membership of international networks including ASPnet	1	1	1	1
Joint research projects on GCED and/or ESD with foreign institutions	1	1	1	1
Other activities (please specify):				

I. Any other comments

- 11 Please indicate whether your country has faced any constraints, in particular related to global or national crises, including natural disasters, in implementing the 1974 Recommendation during the reporting period.

Cyprus does not have a comprehensive Adult Education policy that explicitly targets GCED and/or ESD in adult education nor a comprehensive legislative framework for Adult Education and Training. Instead, there are a number of legislative provisions related to the different authorities involved. However, it should be noted that, generally, adult education programmes belonging to either the formal or the non-formal sector (e.g. evening schools, Adult Education Centers), operate as basic pillars of individual development, active citizenship, social cohesion and quality of life for every citizen in Cyprus.

The new Lifelong Learning Strategy (LLLS) 2020-2027, which is under the auspices of the MoECSY following a relevant decision by the Council of Ministers (no.88672, dated 23/1/2019) and is currently under development, foresees to further promote equal opportunities, equity and inclusion and to broaden the rights to and within education and training. One of its main aims is to promote all adult citizens' access and participation in lifelong learning and employability through a variety of actions that fall within the spectrum of formal and non-formal adult education. All the involved stakeholders and parties (whether private or public) will collaborate to offer courses aiming to satisfy different needs for lifelong learning making a paradigm shift in education in Cyprus that recognizes the need for learning beyond numeracy, literacy and digital skills and expanding on attitudes, values and behaviours and life skills in general with the use of information and communication technologies. Finally, it is expected that this Strategy will serve as an appropriate medium to address global citizenship education as well as education for sustainable development through relevant programmes and actions that will be developed in the framework of the aforementioned strategy, in close collaboration with other organisations belonging to the formal and the non-formal sector, such as NGOs.

It should be also noted that, although GCED and EDS themes identified in several parts of the questionnaire (e.g. A2, B3) are not specifically covered in programmes belonging to the non-formal adult education sector, one of their main aim is to promote active citizenship education in a lifelong learning perspective, by providing seamless access to education for all citizens based on human values such as equality, inclusion and participation. In this context, the Ministry of Education, Culture, Sport and Youth (MoECSY) provides programmes that are free of charge to various disadvantaged groups, such as illiterate people, prisoners, senior citizens and people with disabilities, in an effort to encourage participation, while a number of other lifelong learning programmes are offered for a very small fee. The Evening Classes of Technical Schools offer one-year programmes leading to the acquisition of a certificate, or three-year programmes leading to the acquisition of a leaving certificate equivalent to that awarded to graduates of Secondary Technical and Vocational Education as far as the technical component is concerned. The programmes offer continuing education and training to employed or unemployed adults, in order to be able to respond more effectively to the contemporary demands of the labour market. Individuals attending the above programmes pay limited fees approved by the Council of Ministers.

This policy applies to all publicly subsidized education/training programmes leading to qualifications at levels up to and including ISCED 3/EQF 4, which belong to the formal adult education sector, such as the Evening Schools (Evening schools of Secondary General Education and Evening Schools of Technical and Vocational Education). Participation in Evening Schools is free of charge as they fall within the overall education policy of the

Ministry of Education, Culture, Sport and Youth providing free of charge education for both primary and secondary education (lower and upper secondary). Evening Schools of Technical and Vocational Education and Apprenticeship System of Vocational Education and Training, which provide ISCED3 for adults, are second-chance schools of great importance for the effectiveness of the education system as a basic pillar of individual development, social cohesion and quality of life for every citizen. In 2017 the new framework of second chance schools was introduced aiming at introducing new timetable, curricula and the operating regulations, as to enhance participation of adults in education and training. This framework is more flexible and adult friendly. The main purpose of the new scheme is to provide compensatory education to adults – enhance their basic skills and empower adult learners, which in turn, will help them to enter or re-enter the labour market, the society and social networks and lifelong and continuing education.

Overall, it should be stressed that the social character of Adult Education, which defines its position to the educational sector, is highlighted in the provided programmes, which complement the efforts of the country to enable seamless access of adults in learning, by giving particular attention to those most in need or those belonging to vulnerable social groups.

- 12 Please provide any other relevant information or clarifications regarding the implementation of the 1974 Recommendation or the mainstreaming of GCED and ESD in your country's education system.
