

**REPORTS BY MEMBER STATES ON THE APPLICATION OF THE 1974  
RECOMMENDATION CONCERNING EDUCATION FOR INTERNATIONAL  
UNDERSTANDING, CO-OPERATION AND PEACE AND EDUCATION RELATING TO  
HUMAN RIGHTS AND FUNDAMENTAL FREEDOMS**

Country:

*SWEDEN*

Organization:

*Ministry of Education and Research*

Date of submission:

*December 18th, 2020*

## **V. Other contributors consulted during the completion of this questionnaire**

Please indicate below the names of other organizations and contributors consulted during the completion of this questionnaire.

### **Government institutions including other Ministries** (please specify):

*Ministry for Education and Research, Swedish National Agency for Education, Swedish Council for higher Education, The Living History Forum, Statistics Sweden, Swedish National Agency for Higher Vocational Education, Lund university, KTH Royal Institute of Technology; Umeå university, Uppsala university.*

### **National human rights institutions** (please specify):

### **Local and regional authorities responsible for education** (please specify):

### **Other local and regional authorities** (please specify):

### **Organizations representing education stakeholders** (e.g. teachers, students, parents, etc.) (please specify):

*The Swedish National Union of Students,*

### **Other civil society organizations** (please specify):

*Swedish Society for Nature Conservation (SSNC)*

### **Others** (please specify):

*Fryshuset. Several other organizations in all categories were invited to participate but did not respond.*

## VI. Questionnaire

### A. Laws and policies (preamble and paras 4 and 7 of the 1974 Recommendation)

A1a. Please describe any specific national or sub-national laws, legislation or legal framework(s) in your country that govern the promotion of global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes<sup>1</sup> are mentioned explicitly or are inferred and what types or levels of education are covered.

The Education Act (2010:800) states that the education must convey and anchor respect for human rights and the fundamental democratic values that Swedish society is based on. Furthermore, the education must be designed in accordance with fundamental democratic values and human rights, such as the inviolability of human life, the freedom and integrity of the individual, the equal value of all human beings, equality and solidarity between people.

In the curricula and syllabi for preschool, pre-primary and primary, secondary education and municipal adult education both GCED and ESD are covered.

Post-secondary and tertiary education as well as non-formal education are governed by specific laws and regulation or through regulation on government grants. GCED and/or ESD themes are usually included in those regulations. For example:

- In the Regulation (2015:218) of the government grant to liberal adult education, themes related to GCED are inferred.
- The higher vocational education act (covering tertiary, non-academic vocational education) promotes in general terms both GCED and ESD themes.

The Higher Education Act, which contains provisions relating to higher education institutions for which the accountable authority is the Government (the below provision is valid also for independent higher education providers), stipulates the following:

- In the course of their operations, higher education institutions shall promote sustainable development to assure for present and future generations a sound and healthy environment, economic and social welfare, and justice.
- Equality between women and men shall always be taken into account and promoted in the operations of higher education institutions.
- Furthermore, in their operations higher education institutions should promote understanding of other countries and of international circumstances.
- Higher education institutions shall also actively promote and widen recruitment to higher education.

The Qualifications Ordinance, annex 2 to the Higher Education Ordinance contains regulations on education outcomes for all higher education degrees. GCED and/or ESD related themes are mentioned or inferred in the outcomes for certain degrees. For example, for a Degree of Bachelor of Science in Nursing the student shall, i.a., demonstrate knowledge of social circumstances that affect the health of children, women and men, demonstrate knowledge of men's violence towards women and violence in close relationships. Another example is that for a Degree of Master of Arts/Science in Secondary/Upper Secondary Education the student shall, i.a., demonstrate the

<sup>1</sup> See the schema described in paragraph 11 of Section II of these guidelines.

capacity to communicate and instil core educational values, including human rights and the fundamental democratic values, demonstrate the capacity to prevent and counteract discrimination and other forms of victimisation of pupil, demonstrate the capacity to respect, communicate and instil the perspective of gender equality and equal rights perspective in educational processes, and demonstrate the capacity to communicate and reflect on issues relating to identity, sexuality and relationships (new provision entering into force on 1 jan, 2021).

Furthermore, the Convention on the Rights of the Child is now incorporated in Swedish Law: ((2018:1197)

A1b. Please provide the full names of any laws, legislation or legal frameworks referred to in A1a and, where possible, web links to relevant documents.

Only the curriculum for the Preschool and the upper secondary school have been translated to English the other links are only available in Swedish.

| 8. Sustainable consumption and production | 1           | 1                 | 1        | 0          | 99           | 99                |          | 99         |

A3a. Please describe any specific current national or sub-national education policies, frameworks or strategic objectives in your country that promote global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes<sup>2</sup> are mentioned explicitly or are inferred and what types or levels of education are covered.

In general laws and regulations mentioned in section A1a also reflect education policies and strategic objectives.

The curricula of pre-primary, primary and secondary education, and municipal adult education, all cover Education for Sustainable Development and Global Citizenship Education, although those specific concepts are not mentioned explicitly. However, sub-concepts such as gender equality and human rights are mentioned explicitly.

As mentioned in section A1a post-secondary and tertiary education as well as non-formal education are governed by specific laws and regulation or through regulation on government grants. GCED and/or ESD themes are usually included in those regulations. National agencies or organisations responsible for the implementation may however define more specific objectives. For example, the specific concept of GCED is not mentioned explicitly in the Regulation (2015:218) of the government grant to liberal adult education. However, according to the regulation, the objective of the government grant to liberal adult education, is, amongst others, to:

- Support activities that contribute to strengthening and developing democracy
- Make it possible for an increased diversity of people to influence their life situation and create participative involvement in societal development.
- Bridge educational gaps and raise the level of education and cultural awareness in society.

In the Swedish National Council of Adult Education's terms for the government grant to liberal adult education (study associations and folk high schools), terms related to GCED, such as human rights and democratic values, are explicitly referred to.

According to the provisions of the Higher Education Act (1992:1434) universities and university colleges have to promote sustainable development. Sustainable development means that the present and future generations are ensured a healthy and good environment, economic and social welfare, and justice.

A3b. **Please provide the full names of any education policies, frameworks or strategic objectives referred to in A3a and, where possible, web links to relevant documents.**

| Assessment of student outcomes           | 1           | 1                     | 1        | 1                    |

**B. Curriculum** (paras 4 and 10-19 of the 1974 Recommendation)

B1a. Please describe in which ways GCED and ESD are mainstreamed in school curricula. Indicate whether topics are taught as standalone subjects or are integrated into the curricula of other subjects. Explain whether GCED and/or ESD themes<sup>3</sup> are mentioned explicitly or are inferred and what types or levels of education are covered.

GCED and ESD are not standalone subjects but integrated into the curricula and syllabi. Neither GCED or ESD are mentioned explicitly but are inferred in the different curricula and syllabi. Sustainable development is mentioned though. The same applies for the preschool, compulsory school, preschool class and the school-age educare, for the compulsory school for pupils with learning disabilities, for the Sami school and for the compulsory special needs school. It also applies to the upper secondary school, the upper secondary school for students with learning disabilities, and to municipal adult education.

For the study associations and folk high schools of the mainly non-formal liberal adult education, there is no national or sub-national governance of the curricula and syllabi. Each study association or folk high school has the freedom to integrate GCED and ESD themes in the education and other activities offered, either as standalone subjects or integrated into other subjects.

Within higher vocational education there is no national or sub-national governance of learning outcomes in qualifications and course syllabi. These are decided by each education provider.

An overview of the work of HEI can be found here as the Swedish Higher Education Authority (UKÄ) was tasked by the Swedish government to conduct an evaluation of efforts by universities and university colleges to promote sustainable development, pursuant to the provisions of the Higher Education Act (1992:143) in March 2016: <https://english.uka.se/about-us/publications/reports--guidelines/reports--guidelines/2018-02-15-how-swedish-heis-work-in-promoting-sustainable-development.html>

B1b. Please provide examples of curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents.

See answer in A1b.

**C. Teacher education** (including the training of trainers and educators) (paras 4 and 33-37 of the *1974 Recommendation*)

C1a. Please describe in which ways GCED and ESD are mainstreamed in initial training and in continuing professional development of teachers, trainers and educators. Indicate whether all teachers, trainers and educators or only some are required to receive training to teach GCED and/or ESD.

As described in A1, The Higher Education Act stipulates that:

- In the course of their operations, higher education institutions shall promote sustainable development to assure for present and future generations a sound and healthy environment, economic and social welfare, and justice.
- Equality between women and men shall always be taken into account and promoted in the operations of higher education institutions.
- Furthermore, in their operations higher education institutions should promote understanding of other countries and of international circumstances.
- Higher education institutions shall also actively promote and widen recruitment to higher education.

In addition, GCED and/or ESD related themes are mentioned or inferred in the qualification outcomes for degrees in education:

- Students shall demonstrate the capacity to communicate and instil core educational values, including human rights and the fundamental democratic values, demonstrate the capacity to prevent and restrain discrimination and other forms of harassment of children/pupils, demonstrate the capacity to respect, communicate and instil a gender equal and equal rights perspective in educational processes, From 1 Jan, 2021, students shall also demonstrate the capacity to communicate and reflect on issues relating to identity, sexuality and relationships. (the latter provision is valid for all teacher education programmes except pre-school).
- Students shall also demonstrate the capacity to make assessments in educational processes on the basis of relevant scientific, social and ethical aspects with particular respect for human rights, especially children's rights according to the Convention on the Rights of the Child, and sustainable development.

As for continuing professional development, the Education Act specifies that the provider of education must ensure that the staff at preschool units and school units are given opportunities for competence development. Moreover, the provider must ensure that preschool teachers, teachers and other staff at the preschool and school units have the necessary insights into the regulations that apply to the school system.

The Swedish National Agency for Education provides web-based modules for continuing professional development, some of which includes issues concerning GCED and ESD. For instance, there is one module about promoting equal treatment.

For the liberal adult education, there is no national regulation regulating the specific competence or diploma of teachers at folk high schools or activity leaders at study associations. However, insight into the regulations that apply to the liberal adult education as well as insight into questions

related to democracy, human rights, diversity and equality is a requirement for the initial training of folk high school teachers as well as other training provided for e.g. activity leaders.

In higher vocational education, there is no national regulation regulating the specific competence or diploma of teacher or trainers.

C1b. Please provide examples of teacher training policies or curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents. If possible, include examples related to initial training and to continuing professional development.

The educational plan for the folk high school teacher programme:  
<https://liu.se/studieinfo/program/l1fh1/4881>

In Sweden, public-sector HEIs have considerable autonomy within a system of management by objectives. Within the framework of national regulations that apply to the higher education sector, primarily the Higher Education Act and the Higher Education Ordinance, HEIs take most decisions themselves. These decisions cover such areas as organisation; internal allocation of resources; educational offerings; educational content and design; how many students are admitted and what research is conducted. Qualifications are regulated in the Qualifications Ordinance, stipulating for each higher education degree the knowledge and skills that the student should have attained in order to be awarded the specific degree. It is up to the HEI to determine how to ascertain the student's knowledge and skills, for example, they are free to design the curriculum and decide on examination and student assessment methods.

\*C2 Please indicate whether teachers, trainers and educators are trained to teach GCED and ESD during initial or pre-service training and/or through continuing professional development. Please enter the appropriate number in each white cell.

**KEY:** 0 = no, 1 = yes, 9 = unknown

|                                                                                    | Pre-primary | Primary and secondary | Tertiary | Non-formal education |

| Attitudes and behaviours | 1           | 1                     | 1        | 1                    |

\*C5 Please indicate whether teachers, trainers and educators are trained to use the following approaches to teach GCED and ESD in primary and secondary education by entering the appropriate number in each white cell.

**KEY:** 0 = no, 1 = yes, 9 = unknown

|                                                                                                                                                                                                                                                    | Global citizenship and education for sustainable development |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------|
| GCED/ESD are taught as separate subject(s)                                                                                                                                                                                                         | 9                                                            |
| Cross curriculum approach (e.g. GCED/ESD are taught in more than one subject but not throughout the curriculum)                                                                                                                                    | 9                                                            |
| Integrated approach (e.g. GCED/ESD are taught throughout the whole curriculum)                                                                                                                                                                     | 9                                                            |
| Whole school approach (e.g. GCED/ESD are integrated in the school ethos, management, governance, curriculum, teacher training, teaching practices, the learning environment, and in learning experiences in the community and life outside school) | 9                                                            |

D. Student assessment (paras 4 and 5 of the *1974 Recommendation*)

D1a. Please describe in which ways GCED and ESD are covered in student assessments and examinations. Indicate whether students are assessed only on their knowledge of and skills related to the topics being tested or also on their values, attitudes and/or behaviours.

Regarding pre-primary, primary and secondary education: Values and attitudes are almost exclusively described in general sections of the curriculum (core curricula) with rules and guidelines concerning the entire education, whole school staff and all subjects. Syllabus covers mainly the fields of skills and knowledge/critical understanding. Further so are pupil values and attitudes not assessed on an individual level like knowledge and skills. Values and attitudes are monitored on a more structural level by the Swedish School Inspectorate. Knowledge and skills are assessed on an individual level by grades and ongoing formative assessment.

If GCED or ESD is part of the core content and/or the knowledge requirements teachers have to assess the child/pupil accordingly. It is therefore difficult to fill in D2 since those themes are not generally included in all subjects as a knowledge requirement even though preschools and schools always work with the themes.

It is a responsibility of each higher education institution to design examinations and student assessments in order to ascertain that students meet the learning outcomes enumerated in the Higher Education Ordinance (see answer to A1a). As well, HEI:s in their operations are to promote the aspects enumerated in the Higher Education Act (see answer to A1A).

\*D2 Please indicate whether the GCED and ESD themes below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

|                                           | Pre-primary | Primary and secondary | Tertiary | Non-formal education |
|-------------------------------------------|-------------|-----------------------|----------|----------------------|
| 1. Cultural diversity and tolerance       | 1           | 1                     | 9        | 9                    |
| 2. Gender equality                        | 1           | 1                     | 9        | 9                    |
| 3. Human rights                           | 1           | 1                     | 9        | 9                    |
| 4. Peace and non-violence                 | 1           | 1                     | 9        | 9                    |
| 5. Climate change                         | 1           | 1                     | 9        | 9                    |
| 6. Environmental sustainability           | 1           | 1                     | 9        | 9                    |
| 7. Human survival and well-being          | 1           | 1                     | 9        | 9                    |
| 8. Sustainable consumption and production | 1           | 1                     | 9        | 9                    |

\*D3 Please indicate which of the dimensions of learning in GCED and ESD below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

**KEY:** 0 = no, 1 = yes, 9 = unknown

|                          | Pre-primary | Primary and secondary | Tertiary | Non-formal education |
|--------------------------|-------------|-----------------------|----------|----------------------|
| Knowledge                | 1           | 1                     | 9        | 9                    |
| Skills                   | 1           | 1                     | 9        | 9                    |
| Values                   | 0           | 0                     | 9        | 9                    |
| Attitudes and behaviours | 0           | 0                     | 9        | 9                    |

**E. Mainstreaming of GCED and ESD in laws and policies, curricula, teacher education and student assessment** (paras 4-5, 7, 10-19 and 33-37 of the 1974 Recommendation)

\*E1 Based on your responses to questions in the previous four sections (laws and policies, curricula, teacher education and student assessment) please indicate to what extent global citizenship education (GCED) and education for sustainable development (ESD) are mainstreamed<sup>5</sup> in (a) education laws and policies, (b) curricula (c) teacher education (including the training of trainers and educators) and (d) student assessment in your country. Please enter the appropriate number in each white cell in the table below.

**KEY:**

**0 Not at all**

*GCED and ESD are not mainstreamed.*

**1 Partially**

*Some GCED and/or ESD themes<sup>6</sup> are mainstreamed. Select this option if GCED is mainstreamed but ESD is not (or vice versa).*

**2 Extensively**

*Most GCED and ESD themes are mainstreamed.*

**9 Not known**

*It is not known whether GCED and ESD are mainstreamed or not.*

**99 Not applicable**

*The given level of government does not have responsibility for the given component (policies, curricula, teacher education or student assessment) and/or does not have responsibility for the given level or type of education. This may occur at the national level in federal countries where education is the responsibility of individual states or at the sub-national level in small countries where there is only one level of government.*

|                                 | Pre-primary | Primary and secondary | Tertiary | Non-formal education |
|---------------------------------|-------------|-----------------------|----------|----------------------|
| <b>National</b>                 |             |                       |          |                      |
| (a) Education laws and policies | 2           | 2                     | 2        | 1                    |
| (b) Curricula                   | 2           | 2                     | 99       | 99                   |
| (c) Teacher education           | 2           | 2                     | 2        | 1                    |
| (d) Student assessment          | 2           | 2                     | 99       | 9                    |
| <b>Sub-national</b>             |             |                       |          |                      |
| (a) Education laws and policies | 99          | 99                    | 99       | 99                   |
| (b) Curricula                   | 99          | 99                    | 99       | 99                   |
| (c) Teacher education           | 99          | 99                    | 99       | 99                   |
| (d) Student assessment          | 99          | 99                    | 99       | 99                   |

<sup>5</sup> GCED and ESD are mainstreamed if their themes are mentioned explicitly in relevant documents and are expected to be implemented by the relevant authorities (e.g. Ministries, regional or local education authorities), educational institutions (e.g. schools, colleges and universities) and/or education professionals (e.g. teachers, lecturers, trainers and educators) as appropriate.

<sup>6</sup> Refer to the schema in paragraph 11 of Section II of these guidelines.

**F. Technical and vocational education and training** (paras 25-29 of the 1974 *Recommendation*)

F1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in technical and vocational education and training. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

In Sweden, vocational education and training is included in upper secondary school and adult education at upper secondary level and use the same curricula. All answers concerning upper secondary school above also apply to vocational education and training at upper secondary level.

In 2017, the Swedish government tasked the National Agency for Education with proposing changes to the curricula for upper secondary school, upper secondary special school and adult education to clarify the school's mission to counteract traditional gender patterns, to shape and convey values such as equality between women and men and that actively and consciously promote their equal rights and opportunities. In 2018, The National Agency presented their proposals, one of which clarifies that the school's gender equality mission also includes workplace-based learning.

In 2018 the government tasked the National Agency for Education with analysing, and if necessary, suggest how, teaching in the knowledge area of sex education in the compulsory school system, upper secondary school, upper secondary special school and adult education better can be supported by clarifications in the curricula for the school forms. In 2019 the National Agency presented proposals that emphasise that the area should be treated regularly and that the education shall promote students' health and well-being, strengthen the ability to make conscious and independent choices, contribute to the understanding of one's own and others' rights, convey the importance of voluntariness and reciprocity, highlighting power relations linked to gender and notions of honour and develop students' critical attitudes to representations of relationships and sexuality. The proposals include all vocational education and training at upper secondary level.

Furthermore, in Sweden the folk high schools of the liberal adult education provide vocational education and training. All answers above concerning liberal adult education therefore also apply to vocational education and training.

**G. Adult education** (para 30 of the 1974 *Recommendation*)

G1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in adult education and other forms of non-formal education including youth education, out-of-school education, etc. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

The proposals concerning equality between women and men and those concerning sex education that are mentioned in F1, include the curriculum for municipal adult education.

**H. Research and International Co-operation** (paras 41-45 of the 1974 Recommendation)

H1 Please describe what kinds of research or experimentation have been carried out to improve the implementation of GCED and/or ESD. Describe briefly how the results of such activities have influenced education policies, curricula and/or teaching practices.

H2 Please indicate which types of activities are available that promote international co-operation at each level of education by entering the appropriate number in each white cell.

**KEY:** 0 = no, 1 = yes, 9 = unknown

|                                                                              | Pre-primary | Primary and secondary | Tertiary | Non-formal education |

**I. Any other comments**

- 11 Please indicate whether your country has faced any constraints, in particular related to global or national crises, including natural disasters, in implementing the 1974 Recommendation during the reporting period.

- 12 Please provide any other relevant information or clarifications regarding the implementation of the 1974 Recommendation or the mainstreaming of GCED and ESD in your country's education system.

In Sweden, public-sector HEIs have considerable autonomy within a system of management by objectives. Within the framework of national regulations that apply to the higher education sector, primarily the Higher Education Act and the Higher Education Ordinance, HEIs take most decisions themselves. These decisions cover such areas as organisation; internal allocation of resources; educational offerings; educational content and design; how many students are admitted and what research is conducted. Qualifications are regulated in the Qualifications Ordinance, stipulating for each higher education degree the knowledge and skills that the student should have attained in order to be awarded the specific degree. It is up to the HEI to determine how to ascertain the student's knowledge and skills, for example, they are free to design the curriculum and decide on examination and student assessment methods.

To answer this document was somewhat difficult as we lack detail information regarding to some answers. We tried though to give as accurate answers as possible.
