

GUIDELINES FOR THE PREPARATION OF REPORTS BY MEMBER STATES ON THE APPLICATION OF THE 1974 RECOMMENDATION CONCERNING EDUCATION FOR INTERNATIONAL UNDERSTANDING, CO-OPERATION AND PEACE AND EDUCATION RELATING TO HUMAN RIGHTS AND FUNDAMENTAL FREEDOMS

I. Introduction

A. About the 1974 Recommendation

1. UNESCO's *1974 Recommendation concerning Education for International Understanding, Co-operation and Peace and Education relating to Human Rights and Fundamental Freedoms*¹ (the "1974 Recommendation") aims to promote international education and world peace through understanding, solidarity and cooperation. It was adopted on 19 November 1974 by the General Conference of UNESCO at its 18th session.

2. The *1974 Recommendation* applies to formal, non-formal and informal education and to all levels, from pre-primary to tertiary and adult education and lifelong learning. The General Conference recommended "*that Member States should apply*" the provisions included in the *1974 Recommendation* "*by taking whatever legislative or other steps*" that provide institutional (e.g. policies and legal frameworks) and pedagogical (e.g. curricula, teacher training, educational materials, equipment, and student assessment) support for its implementation, based on the "*objectives*", referred to in paragraph 4 of the *1974 Recommendation*, "*regarded as major guiding principles of education policy*" including: an international dimension and a global perspective on education, cultural diversity, interdependence, communication, rights and responsibilities, international solidarity and cooperation, and problem solving.

3. Today, the principles of the *1974 Recommendation* apply equally well to Education for Sustainable Development (ESD) and to Global Citizenship Education (GCED) and therefore represent a powerful tool for promoting the 2030 Agenda for Sustainable Development and in particular SDG Target 4.7 on the promotion of sustainable development and global citizenship through education, Target 12.8 on access to information on sustainable development and Target 13.3 on climate change education.

4. The General Conference in its 39th session recommended the use of the *1974 Recommendation* reporting process to support the implementation and monitoring of Target 4.7 of Sustainable Development Goal 4 (39 C/Resolution 79). The UNESCO Executive Board at its 209th session approved the use of the current guidelines for both the monitoring of the *1974 Recommendation* and the collection of data needed for the following global SDG indicator for which UNESCO is custodian (209 EX/Decision 18.II):

4.7.1, 12.8.1 and 13.3.1: *The extent to which (i) global citizenship education and (ii) education for sustainable development are mainstreamed in (a) national education policies; (b) curricula; (c) teacher education and (d) student assessment.*

5. Questions marked with an asterisk (*) will be used in the calculation of the respective indicators (**Table 1**). As approved by the Inter-Agency and Expert Group on the SDG Indicators, the indicators will be calculated for primary and secondary education only.

B. Reporting obligations

6. The General Conference, at its 18th session, when adopting the *1974 Recommendation* recommended “*that Member States submit [...] reports concerning the action taken by them in pursuance of this recommendation*”. Moreover, in accordance with Article VIII of UNESCO’s Constitution “*Each Member State shall submit to the Organization [...] reports [...] on the action taken upon the recommendations and conventions referred to in Article IV, paragraph 4.*”

7. Thus, **all UNESCO Member States are expected to report on the steps they have taken to implement the 1974 Recommendation** preferably by completing the following questionnaire. Such reporting takes place every four years.

II. Guidelines for completion of the questionnaire

8. This questionnaire and its accompanying guidelines are addressed to Ministers responsible for relations with UNESCO. The questionnaire is typically completed by Ministries of Education and other government authorities responsible for education. Responses should cover, as far as possible, education at all levels of government, including sub-national levels where applicable as well as education outside the government sector.

9. National respondents are encouraged to **consult widely** both within, across and beyond government, including with Ministries of Environment, with national human rights institutions, the education sector, civil society partners and others, as necessary, to gather the information needed to complete the questionnaire.

10. Responses to the seventh consultation should cover:

- (i) the time period 2017-2020;
- (ii) education at all levels of formal education from pre-primary to tertiary education as well as non-formal education;
- (iii) all levels of government that have responsibility for education within the country; and
- (iv) where possible, education outside the government sector.

11. To assist countries in responding to this questionnaire, UNESCO has developed the following set of global citizenship education and education for sustainable development themes. The list is based on a review of current common practices in many countries as well as a review of relevant literature. While the terms ESD and GCED may be used differently in some countries, the list of themes typically captures what are seen as key elements of Target 4.7. Please refer to the definitions of key terms in **Section III** before completing the questionnaire.

Global citizenship education and education for sustainable development

1. cultural diversity and tolerance
 - 1.1 international or intercultural understanding, solidarity and cooperation
 - 1.2 intercultural and interreligious dialogue
 - 1.3 local, national and/or global citizenship
2. gender equality education
 - 2.1 gender-based equal opportunities
 - 2.2 gender equality and justice
 - 2.3 gender roles, identity and stereotypes
3. human rights education
 - 3.1 equality and non-discrimination based on race, colour, language, religion, disability, political or other opinion, national or social origin, birth or other status
 - 3.2 human rights values, human dignity, justice, inclusion and participation
 - 3.3 respect for human rights and fundamental freedoms (as outlined in international conventions and declarations)
4. peace and non-violence
 - 4.1 friendly relations among peoples and nations
 - 4.2 challenging negative stereotypes, promoting peaceful solutions, learning to live together, including others and preventing violent extremism
 - 4.3 preventing all forms of violence including bullying, verbal abuse and gender-based violence
5. climate change education
 - 5.1 mitigation
 - 5.2 adaptation
 - 5.3 impact reduction
 - 5.4 early warning
6. environmental sustainability
 - 6.1 caring for the planet, protecting nature
 - 6.2 environmental justice
 - 6.3 biodiversity, water
7. human survival and well-being
 - 7.1 environmental health as it pertains to human well-being, disaster risk reduction
 - 7.2 health of the planet for future generations
 - 7.3 sustainable cities and communities
8. sustainable consumption and production
 - 8.1 responsible and sustainable lifestyles
 - 8.2 green economy, green jobs
 - 8.3 sustainable energy

III. Definitions of key terms

Term	Definition
Themes of global citizenship and education for sustainable development	
1. Cultural diversity and tolerance	<i>Education about and for diversity including language, ethnicity, race, religion as well as the development of tolerance, mutual respect and appreciation for cultural diversity. It includes intercultural and interreligious dialogue, understanding, solidarity and co-operation, and citizenship education.</i>
2. Gender equality education	<i>Education that addresses the wider issue of gender equality by promoting new attitudes and patterns of belief, transforming the way people think about traditional gender roles and helping to build long-term sustainable change. It examines how gender roles, activities, needs, opportunities, rights and entitlements affect men, women, girls and boys differently. It deals with the relationships between females and males, their access to and control of resources and the constraints they face relative to each other. It respects the rights of all learners – women, men, boys and girls – equally and gives equal access to learning opportunities, resources and protections. All learners benefit from and are treated in education equally without the limitations set by stereotypes, rigid gender roles and prejudices. It covers gender-based equal opportunities, gender equality and justice, and gender roles, identity and stereotypes.</i>
3. Human rights education	<i>Education that promotes universal respect for and observance of all human rights and fundamental freedoms and thus contributes, inter alia, to the prevention of human rights violations and abuses by providing persons with knowledge, skills and understanding and developing their attitudes and behaviours, to empower them to contribute to the building and promotion of a universal culture of human rights.</i> <i>It includes equality and non-discrimination, human rights values, dignity, justice, inclusion and participation and respect for human rights and fundamental freedoms.</i>
4. Peace and non-violence	<i>Education about peace and peace-building, mediation, conflict prevention and resolution, non-violence, reconciliation and living together peacefully. It includes advocating for friendly relations among peoples and nations, challenging negative stereotypes, promoting peaceful solutions, learning to live together and preventing violent extremism and other forms of violence including bullying.</i>
5. Climate change education	<i>Education to help people, in particular youth, understand, address, mitigate, and adapt to the impacts of climate change. It</i>

	<i>encourages changes in attitudes and behaviours needed to put the world on a more sustainable development path, and build a new generation of climate change-aware citizens.</i> <i>It covers various responses to climate change including mitigation, adaptation, impact reduction and early warning.</i>
6. Environmental sustainability	<i>Education about responsible interactions with the environment to avoid depletion or degradation and to promote environmental quality and health. It includes, caring for the planet and protecting nature, environmental justice, biodiversity and water.</i>
7. Human survival and well-being	<i>Education that promotes social well-being and harmony including in future generations due to healthy environmental systems. It includes health of the planet and environment related to human well-being, disaster risk reduction and sustainable cities and communities.</i>
8. Sustainable consumption and production	<i>Education on the use and production of resources, products and services that have a minimal adverse impact on the environment. It promotes resource and energy efficiency, sustainable infrastructure and green jobs. It includes responsible and sustainable lifestyles, the green economy and sustainable energy.</i>
Dimensions of learning	
Knowledge	<i>Factual information and understanding acquired through study and/or experience.</i>
Skills	<i>The ability to carry out a task well as a result of training, practice and innate aptitude. Skills may be physical, mental or both.</i>
Values	<i>Principles that form the foundation on which individuals conduct themselves and interact with others and with the environment around them.</i>
Attitudes and behaviours	<i>Ability to act on the basis of beliefs and knowledge acquired through study or experience.</i>
Levels of education	
Pre-primary	<i>Education designed to support children's early cognitive, physical, social and emotional development and introduce young children to organized instruction outside of the family context. Participants are usually aged from three years.</i>
Primary and secondary	<i>Education designed to:</i> <i>(i) provide students with fundamental skills in reading, writing and mathematics (i.e. literacy and numeracy) and establish a solid foundation for learning and understanding core areas of knowledge and personal development (primary education); and</i> <i>(ii) prepare students for further education at post-secondary and tertiary levels and for entry into the labour market (secondary education).</i> <i>It includes both general and vocational education.</i>

Tertiary	<i>Education designed to provide learning activities in specialised fields of education. It aims at learning at a high level of complexity and specialisation. It includes both what is commonly understood as academic education and advanced vocational or professional education.</i>
Types of education	
Adult education	<i>Education specifically targeted at individuals who are regarded as adults by their society to improve their technical or professional qualifications, further develop their abilities, enrich their knowledge with the purpose to complete a level of formal education, or to acquire, refresh or update their knowledge, skills and competencies in a particular field.</i>
Formal education	<i>Education that is institutionalized, intentional and planned through public organizations and recognized private bodies which – in their totality – constitute the formal education system of a country. Formal education programmes are recognized by the relevant national or sub-national education authorities. Formal education consists mostly of initial education (e.g., pre-primary, primary, secondary and tertiary education).</i>
Non-formal education	<i>Education that is an addition, alternative and/or a complement to formal education within the process of the lifelong learning of individuals. It is often provided to guarantee the right of access to education for all. It caters to people of all ages but does not necessarily apply a continuous pathway-structure. It may be short in duration and/or low-intensity, and it is typically provided in the form of short courses, workshops or seminars. Non-formal education mostly leads to qualifications that are not recognized by the relevant national or sub-national education authorities or to no qualifications at all. Non-formal education includes programmes on life skills including literacy and numeracy, work skills, and social or cultural development. Most types of adult education are also included.</i>
Vocational education	<i>Education that is designed for learners to acquire the knowledge, skills and competencies specific to a particular occupation or trade or class of occupations or trades. Vocational education may have work-based components (e.g. apprenticeships). Successful completion of such programmes leads to labour-market relevant vocational qualifications acknowledged as occupationally-oriented by the relevant national authorities and/or the labour market. Vocational education can be offered at secondary and post-secondary or tertiary levels of education.</i>

IV. Information about the respondent

Country:

Republic of Serbia

Organization:

Ministry of Education, Science and Technological Development of the Republic of Serbia

Date of submission:

10.12.2020.

V. Other contributors consulted during the completion of this questionnaire

Please indicate below the names of other organizations and contributors consulted during the completion of this questionnaire.

Government institutions including other Ministries (please specify):

National human rights institutions (please specify):

Local and regional authorities responsible for education (please specify):

Other local and regional authorities (please specify):

Organizations representing education stakeholders (e.g. teachers, students, parents, etc.) (please specify):

Other civil society organizations (please specify):

Others (please specify):

VI. Questionnaire

A. Laws and policies (preamble and paras 4 and 7 of the 1974 Recommendation)

A1a. Please describe any specific national or sub-national laws, legislation or legal framework(s) in your country that govern the promotion of global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes² are mentioned explicitly or are inferred and what types or levels of education are covered.

The Law on the Fundamentals of the Education System, which regulates the basics of the system of preschool, primary and secondary education and adult education, prescribes elements of the quality of education in the Republic of Serbia. Principles, goals, and programs of education and upbringing, educational standards and development of students' competencies are aimed, among other things, at providing conditions for the respect of human rights and the rights of every child, student and adult while, respecting human dignity, fostering the openness, cooperation, tolerance and awareness of cultural and civilisational links, as well as development of basic moral values, justice, truth, solidarity, fairness, and responsibility.

The Law on Primary Education prescribes the goals of primary education, which are, inter alia, aimed at developing positive human values while providing a stimulating and safe environment for the full development of students, non-violent behaviour and establishing zero tolerance for violence, developing a sense of solidarity and constructive cooperation with others and competences for understanding and respecting the rights of the child, human rights, civil liberties, racial, national, cultural, linguistic, religious, gender, sexual and age equality and tolerance, as well as developing awareness of the importance of sustainable development, protection and preservation of nature and environment and environmental ethics. Law on the Fundamentals of the Education System - LFES ("Official Gazette of RS", No. 88/2018-other law, 10 / 2019, 27 / 2018-other law and 6/2020), prescribes the prohibition of discrimination and violence in educational institutions. On the basis of the Law, special rulebooks have been adopted which prescribe not only actions in situations of violence and discrimination, but also the obligation to prevent them. The rulebooks prescribe the obligation to prepare preventive annual programmes and evaluate them. This ensures the so-called All school approach in prevention that includes employees, parents, students as well as planning various preventive activities both within the teaching process and taking into account extracurricular activities. The Law on the Fundamentals of the Education System prescribes interdisciplinary competencies that teachers of all subjects are obliged to continuously develop in students (we especially emphasize interdisciplinary competencies for Responsible Participation in a Democratic Society, Communication and Cooperation) through the teaching their subjects. LFES also defined the right to education and upbringing in Article 3: "Every person has the right to education and upbringing." Furthermore, LFES states that citizens of the Republic of Serbia are equal in exercising the right to education, that persons with disabilities have the right to education and upbringing that respects their educational needs, emphasizing individual or group additional support in teaching and learning. Foreign citizens, as well as a stateless person and a person seeking citizenship have the right to education and upbringing under the same conditions and in the manner prescribed for citizens of the Republic of Serbia. Article 4 of this Law states that 1) upbringing and education of children in the year before starting school, 2) primary education and upbringing of students and adults, as well as 3) secondary education of regular and irregular

² See the schema described in paragraph 11 of Section II of these guidelines.

students, under equal conditions, are free of charge. The law further ensures equality and accessibility of the exercise of the right to education based on social justice and the principle of equal opportunities without discrimination, respect for human rights and the rights of every child, student and adult, and respect for human dignity; education in a democratically organized and socially responsible institution which fosters openness, cooperation, tolerance, awareness of cultural and civilizational connection in the world, commitment to basic moral values, values of justice, truth, solidarity, freedom, fairness and responsibility, and in which full respect for the rights of the child, student and adult is ensured.

The mission of higher education is to continuously transfer and create scientific knowledge and professional competencies through organized studies and research, which enable, first of all, social, cultural, economic and other progress of our country and its citizens, in the constantly changing circumstances of life and development.

Modernization of study programmes as a mandatory continuous process that will ensure harmonisation between the expected learning outcomes and the required competencies of graduates.

Establishment of institutional and other forms of cooperation, formation of **intra-university and inter-university network**.

The activity of higher education is based on the following goals: openness to the public and citizens; respect for the humanistic and democratic values of national and European traditions and the values of cultural heritage and respect for human rights and civil liberties, including the prohibition of all forms of discrimination.

All persons who have passed the general, vocational or artistic Matura exam have the right to higher education, in accordance with this law and the law governing secondary education.

A foreign citizen can enrol in study programmes under the same conditions as a domestic citizen in terms of previous education.

A1b. Please provide the full names of any laws, legislation or legal frameworks referred to in A1a and, where possible, web links to relevant documents.

A3a. Please describe any specific current national or sub-national education policies, frameworks or strategic objectives in your country that promote global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes³ are mentioned explicitly or are inferred and what types or levels of education are covered.

The goals to be achieved through global education are fully compatible with the goals and principles of legal and strategic documents that define and determine the youth sector in Serbia, i.e. the Law on Youth ("Official Gazette of RS", No. 50/11) and the National Youth Strategy for period 2015-2025 ("Official Gazette of RS", No. 22/15), and the Action Plan for the implementation of the National Youth Strategy for the period 2018-2020 ("Official Gazette of RS", No. 99/18,) where the basic principles are support for personal and social empowerment of young people; respect for human and minority rights, equality and non-discrimination; equal opportunities for all; the importance of young people and their social role; active youth participation and cooperation; social responsibility and solidarity. Global education in Serbia, as a topic, is in the process of finding its place and aspects of global education are applied through the reform of the education system, campaigns that promote the rights of migrants and refugees in Serbia, the National Youth Strategy, youth work programmes, Education Development Strategy 2020, etc. Also, one of the most important current initiatives in the region is to increase regional mobility, participation of young people in decision-making and social inclusion, improving the European spirit of cooperation, understanding and tolerance, and is implemented through the Regional Office for Youth Cooperation of the Western Balkans, which has realised three competitions in the amount of over 2.2 million euros, with more than 100 projects approved and over 2400 partnerships concluded. The annual contribution of the Republic of Serbia is EUR 389,000, and as the Republic of Serbia is the initiator of cooperation within the six signatories of the agreement, during 2019, about EUR 416,000 were donated from the budget for the work of local branches. In April 2019, a two-year Action Plan for cooperation with UNICEF (2019-2020) was signed, with a total value of over USD 500,000. The document envisages cooperation between UNICEF and the Ministry of Youth and Sports in the field of youth social entrepreneurship (*implementation of the UPSHIFT programme*), U-Report platform, volunteerism, dialogue with young people in local self-government units on social cohesion, construction of two inclusive children's playgrounds in Serbia, and the Ministry of Education, Science and Technological Development and institutions of education and upbringing and specialized institutes dealing with the improvement of education and evaluation of the quality of education. Principles of global education, their importance for the development of a sustainable (global) society are issues that should be the subject of a series of trainings (or some other forms of professional development - meetings, forums, round tables) that would be of national importance and implemented by the Ministry of Education, Science and Technological Development in cooperation with the Institute for Education Improvement, and other relevant educational and upbringing institutions and civil society. All stakeholders in the educational process (and parents) should be involved in such dissemination, in order to strengthen the development and expansion of the network of *global citizens*. MoESTD emphasizes the human rights education. With the aim of promoting the values of non-discrimination, equality and respect for all, curricula related to education for democracy and civil society were introduced into the curriculum of primary and secondary schools in the academic year 2001/2002, and they are realised within the subject *Civic Education*. Now *Civic Education* has the status of a compulsory elective subject/programme in all grades of primary school and in all grades of secondary education. With the support of UNICEF, the Manual for Schools was prepared in the

³ See the schema described in paragraph 11 of Section II of these guidelines.

implementation of the Professional Instruction for the Inclusion of Refugee Students/Asylum Seekers in the Education System - Diversity in 21st Century Schools. In 2019, the Ministry of Education, Science and Technological Development announced a public competition for associations in the field of sustainable development and global citizenship in the amount of over EUR 66,000. For 2020, a public competition was also realized. Priority areas in which financial support is planned are:

1. Education for sustainable development:

- 10 projects,
- Total sum – RSD 2.680.000,00

2. Support to the development of activities on the prevention of risky behaviours and gender stereotypes through empowering young people to participate in sports activities:

- 3 projects;
- Total sum – RSD 1.950.000,00

3. Improving the competencies of educators and teachers through professional development realized in the languages of national minorities or training in the field of education of national minorities (support of Serbian as a non-mother tongue, realization of the elective subject of mother tongue/minority language with elements of national culture, development of language competencies of teachers, etc:

- 12 projects;
- Total sum – RSD 3.900.000,00

4. Support for distance learning through the creation of digital, interactive content in accordance with the teaching and learning programmes for primary and secondary education:

- 6 projects;
- Total sum – RSD 1.470.000,00

A foreign citizen can enrol in study programmes under the same conditions as a domestic citizen in terms of previous education.

A3b. Please provide the full names of any education policies, frameworks or strategic objectives referred to in A3a and, where possible, web links to relevant documents.

Law on Higher Education ("Official Gazette of RS", No. 88/17, 27/18-other law, 73/18, 67/19 and 6/20-other laws), Article 97.

Design or revision of the curricula				
Setting of programme learning objectives				
Textbook development				
Teacher education and training				
Assessment of student outcomes				

B. Curriculum (paras 4 and 10-19 of the *1974 Recommendation*)

B1a. Please describe in which ways GCED and ESD are mainstreamed in school curricula. Indicate whether topics are taught as standalone subjects or are integrated into the curricula of other subjects. Explain whether GCED and/or ESD themes⁴ are mentioned explicitly or are inferred and what types or levels of education are covered.

Formal teaching and learning programmes in primary education, based on the general goals and outcomes of education, are focused on the process and learning outcomes that are defined as functional knowledge of students and show what the student will be able to do, undertake, perform, thanks to the knowledge, attitudes and skills he/she has built and developed during one year of studying a specific subject.

In 2017, in accordance with the Action Plan for the Implementation of the Education Strategy until 2020, the MoESTD started working on educational reform, primarily through the preparation of new curricula for primary education teaching and learning. The programmes are outcome-oriented and should ensure the development of interdisciplinary competences, one of which is "Responsible participation in a democratic society", which is recognized in the outcomes related to respect for human rights and freedoms. Within the new programmes of the elective programme *Civic Education*, the goal of teaching and learning is for the student to become aware of his rights and responsibilities by studying the basic principles, values and procedures of civil society, sensitive to the needs of individuals and the community and ready to actively act in the community, respecting democratic values. Within other subjects, in accordance with their possibilities, outcomes related to respect for gender equality, diversity and intercultural dialogue are introduced. Respect for democratic values and procedures, responsible, humane and tolerant behaviour in society, sensitivity to social injustice, cooperation and teamwork are some of the outcomes related to human rights, which are found in the curricula.

B1b. Please provide examples of curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents.

The new educational paradigm promotes a new concept of teaching and learning that is:

- outcome oriented;
- key and interdisciplinary competences have been introduced;
- learning reaches the prescribed standards of achievement;
- project teaching has been introduced;
- new programmes were introduced: information and computer science, technique and technology, physical and health education.

New elective programmes for gymnasiums:

- Language, media and culture
- Individual, group and society
- Health and sports
- Education for sustainable development
- Art and design
- Applied sciences
- Applied sciences 1
- Applied sciences 2
- Fundamentals of geopolitics

⁴ See the schema described in paragraph 11 of Section II of these guidelines.

- - Economy and business
- - Religions and civilizations
- - Methodology of scientific research
- - Modern technologies

Within the Joint Initiative of the Council of Europe and the European Union "Programme of Support of the European Union and the Council of Europe to the Western Balkans and Turkey", through the project "Promoting Democratic Culture in Schools" a framework was adopted of twenty competencies from the Model of Competences from the group of values, group of attitudes, group of skills and group of knowledge and critical understanding, and schools organized a large number of diverse activities, with pedagogical approaches appropriate for the development of competencies for democratic culture and creating a more pleasant, interesting and safer school environment, while strengthening their capacity to eliminate violent, discriminatory and anti-democratic structures in school and school environment, promoting school ethos and providing support to students. Out of the twenty competencies included in the basic model, most schools opted for competencies from the group of attitudes - openness to cultural diversity, as well as other beliefs, views and practices and competencies from the group of skills - cooperation skills and conflict resolution skills (8). This is followed by competencies - respecting/valuing human dignity and human rights, a group of values - valuing democracy, justice, fairness, equality and rule of law, a group of values - responsibility, group of attitudes - respect, group of attitudes - empathy, group of skills, valuing cultural diversity - group of values, civic thinking - group of attitudes, knowledge and critical understanding of self - group of knowledge and critical understanding, knowledge and critical understanding of the world - group of knowledge and critical understanding, understanding of (inter) cultural differences - group of values, skills of analytical and critical thinking - group of skills, flexibility and adaptability - group of skills, listening and observing skills - group of skills, and linguistic, communication and multilingual skills - group of skills. Examples of content that leads to democratic competencies can be found in the publication at the link:

The result of this project of the Council of Europe, in which MoESTD actively participated, is the incorporation of Guidelines, opinions and recommendations into teaching and learning programmes for the second grade of high school in which elements of democratic culture are clearly marked, i.e., contents that support and encourage respect for diversity, active implementation of tolerance, protection against discrimination within the education system. As a follow-up of these activities, MoESTD, in cooperation with the Council of Europe, is implementing the project "Quality Education for All", which takes examples of good practice and promotes continuity in the process of promoting democratic culture in schools. A total of 60 schools were involved in the new project activities. C. Teacher education (including the training of trainers and educators) (paras 4 and 33-37 of the *1974 Recommendation*)

C1a. Please describe in which ways GCED and ESD are mainstreamed in initial training and in continuing professional development of teachers, trainers and educators. Indicate whether all teachers, trainers and educators or only some are required to receive training to teach GCED and/or ESD.

The Law on the Fundamentals of the Education System prescribes measures for improving the quality of teaching and sets goals and general outcomes in accordance with the vision of education as the basis of a "knowledge-based society". In the defined goals and outcomes of education and upbringing of students, the emphasis is placed on general competencies and the development of specific knowledge and skills for life in modern society. In order to contribute to the efficiency and equal rights and access to education of all students, the teacher should also have competencies related to the prevention of violence in schools, motivation of students to learn, building tolerance, prevention of discrimination. The Rulebook on Competency Standards for the Teacher Profession and their Professional Development provides basic guidance to employees and institutions, in order to provide professional standards on what teaching is considered successful.

The Rulebook on Continuous Professional Development and Advancement to the Titles of Teachers, Educators and Professional Associates determines the forms of professional development, priority areas for professional development, programmes and manner of organizing professional training and other issues of importance for the development of the system of continuous professional development.

Approved professional development programmes are published in the catalogue on the website of the Institute for Education Improvement. In the Catalogue of the programmes of continuous professional development of teachers, educators and professional associates for the school years 2018/2019, 2019/2020 and 2020/2021, as one of the priority areas is to strengthen the educational role of an educational institution through the development of programmes for the prevention of violence, discrimination, abuse and neglect. Within the compulsory professional development, one of the five priority areas of compulsory teacher training, determined by the Rulebook on Continuous Professional Development of Teachers, Educators and Professional Associates is: creating a tolerant and non-discriminatory environment for each individual, as well as violence prevention, discrimination prevention and inclusion of children from socially marginalized groups. Programme contents related to education for democracy and civic society are part of the Curriculum for teaching and learning for primary and secondary schools, and are realized through the curriculum of *Civic Education*. This subject has the status of a compulsory elective programme that is chosen for each school year. During 2017, the Institute for the Education Improvement, in accordance with the Action Plan for the implementation of the Education Strategy until 2020, prepared new curricula of teaching and learning for primary education and upbringing. The programmes are outcome-oriented and should ensure the development of interdisciplinary competencies, one of which is "Responsible participation in a democratic society", which is recognized in the outcomes related to respect for human rights and freedoms. Within the new programmes of the compulsory elective programme *Civic Education*, the goal of teaching and learning is for the students to become aware of their rights and responsibilities by studying the basic principles, values and procedures of civil society, sensitive to the needs of individuals and the community and ready to actively act in the community.

Within other subjects, in accordance with their possibilities, outcomes related to respect for gender equality, diversity and intercultural dialogue are introduced. Respect for democratic values and procedures, responsible, humane and tolerant behaviour in society, sensitivity to social injustice, cooperation and teamwork are some of the outcomes related to human rights, which are found in the curricula.

In the Catalogue of the programmes of continuous professional development of teachers, educators and professional associates for the school year 2018/2019, 2019/2020, and 2020/2021 (<http://zuov.gov.rs/katalozi-programa-stalnog-strucnog-usavrsavanja/>) there is a total of 32 programmes dealing with human rights. In the area of improving competencies for civic values, there are 7 programmes, and 24 programmes have the aim to improve the capacity of teachers and other professional associates to act in the field of protection against violence and discrimination. Within the Catalogue of Accredited Programmes for Teachers and Professional Associates, there are several accredited seminars. The accredited programme/seminar "ALL OUR IDENTITIES" has a special place here. So far, the seminar has had 7 realizations attended by 140 participants, of whom 12 men and 128 women who are teachers of *Civic Education*, primary school teachers, subject teachers of social subjects in primary and secondary school. The trainings were realized in 2017. Aim of the programme: Inclusion of gender perspective in primary education through direct engagement of teachers, through their empowerment to introduce interventions in teaching content, as well as through changing attitudes about gender roles and gender relations, for further development of a fair and sustainable society – Intersectionality, how gender identity intersects with others.

Civic Education is recognized by other stakeholders in education and youth as an adequate place for the implementation of smaller projects aimed at introducing a gender perspective, sensitizing young people to the topics of discrimination and inequality. Projects that have been realized/are being realized:

- Science is female (Centre for Women's Studies, Centre for the Promotion of Science);
- Be a man (Centre E8);
- I can say no- love is not violence (AWC);
- Anti-trafficking (ASTRA)

The curriculum of the subject of Civic Education for the 4th grade envisages the realization of topics related to the choice of faculty, continuation of career (after secondary vocational school).

Training was realised for teachers, educational inspectors and advisors for the implementation of the Rulebook on detailed criteria for recognizing forms of discrimination by an employee, child, student or third party in an educational institution. In 2017, three three-day trainings for teachers and seven two-day workshops for students from two secondary schools and four primary schools were realised with the topic of developing the spirit of tolerance and non-discrimination. In primary schools, the participants were seventh and eighth grade students, while in secondary schools, students from the first to the fourth grade were included. At the end of the training, the teachers presented their research activities with their students through public presentations attended by their colleagues, students and parents. Within the joint project under the working title "Improving the competencies of institutions for prevention and treatment in cases of discrimination", the implementation of which is funded by GIZ, and in cooperation with the Centre for Interactive Pedagogy, the MoESTD implemented TOT training for educational inspectors and advisors on the implementation of the Rulebook on actions by an institution in case of suspicion or established discriminatory behaviour and insulting the reputation, honour or dignity of a person (*"Official Gazette of RS"*, No. 85/2018), and through online training, 300

teachers and professional associates from preschool, primary and secondary schools were educated. In the next phase of the Project, we plan to continue the training of employees in education through the development of a Guide for the implementation of this Rulebook, as well as a Guide for parents, which will be published on the website of the Ministry. The Institute for the Education Improvement has accredited about 100 professional development programmes for employees in education, which are related to strengthening of the competencies for creating a safe, non-violent and tolerant school environment in working with students and parents (Appendix 1). The total number of programs on the Minister's list of programs of national importance is 30, and they deal closely with the topic of prevention of violence and discrimination (Appendix 1). New training programmes have been developed for teachers aimed at building institutional capacity for inclusive education and diversity management: "Training for planning, implementing and monitoring measures to prevent dropouts" - developed in cooperation with the UNICEF Office to Belgrade - is on the List of programmes of public interest approved by the Minister. This list includes the programmes "Teachers as carriers of quality education for all children" and "Activities to support all students - differentiation of teaching." Their goal is to provide support in the planning and implementing of differentiated teaching that supports learning and progress of all children. The content of the training is related to a new approach in the implementation of teaching and learning programmes focused on educational outcomes and the development of key competencies of students.

C1b. Please provide examples of teacher training policies or curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents. If possible, include examples related to initial training and to continuing professional development.

*C5 Please indicate whether teachers, trainers and educators are trained to use the following approaches to teach GCED and ESD in primary and secondary education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Global citizenship and education for sustainable development
GCED/ESD are taught as separate subject(s)	1
Cross curriculum approach (e.g. GCED/ESD are taught in more than one subject but not throughout the curriculum)	1
Integrated approach (e.g. GCED/ESD are taught throughout the whole curriculum)	1
Whole school approach (e.g. GCED/ESD are integrated in the school ethos, management, governance, curriculum, teacher training, teaching practices, the learning environment, and in learning experiences in the community and life outside school)	1

D. Student assessment (paras 4 and 5 of the 1974 Recommendation)

D1a. Please describe in which ways GCED and ESD are covered in student assessments and examinations. Indicate whether students are assessed only on their knowledge of and skills related to the topics being tested or also on their values, attitudes and/or behaviours.

The Rulebook on the assessment of students in primary education and upbringing determines the manner, procedure and criteria for assessing success in compulsory subjects, elective programmes, activities and conduct and other issues of importance for the assessment of students and adults in primary education and upbringing.

Assessment is an integral part of the teaching and learning process which provides constant

monitoring of the achievement of prescribed outcomes and standards of student achievement,

Rulebook on general standards of achievement - educational standards for the end of compulsory education ("Official Gazette of RS - Education Gazette", No. 5/2010)

Rulebook on educational standards for the end of the first cycle of compulsory education for the subjects Serbian language, Mathematics and Nature and Society ("Official Gazette of RS - Education Gazette", No. 5/2011)

Monitoring the development, progress and realisation of student achievement during the school year is performed by formative and summative assessment.

Formative assessment, in terms of this rulebook, is regular monitoring and evaluation of progress in achieving the prescribed outcomes, standards of achievement and engagement within the compulsory subject, elective programmes, and activities

Summative assessment, in terms of this rulebook, is the evaluation of student achievement at the end of the programme unit or at the end of the semester in the compulsory subject, elective programmes, activities and conduct, and is determined on the basis of defined criteria.

<https://www.pravno-informacioni-sistem.rs/SlGlasnikPortal/eli/rep/sgrs/ministarstva/pravilnik/2019/34/10/reg>

According to the Law on Primary Education, Article 61, Student Success and Assessment, Student Success in Election Programmes and Activities is assessed descriptively: exceptional, good and satisfactory. The student is assessed at least four times a semester, and if the weekly fund of classes of a compulsory subject, elective programme or activities is one class, then at least twice a semester. In the first grade, the final grades from the compulsory subjects and from the elective programmes and activities are entered in the student's report book and the student moves on to the next grade.

The final grade from the election programmes and activities is descriptive: exceptional, good and satisfactory, and it does not affect the general success of students.

*D2 Please indicate whether the GCED and ESD themes below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

E. Mainstreaming of GCED and ESD in laws and policies, curricula, teacher education and student assessment (paras 4-5, 7, 10-19 and 33-37 of the 1974

Recommendation)

*E1 Based on your responses to questions in the previous four sections (laws and policies, curricula, teacher education and student assessment) please indicate to what extent global citizenship education (GCED) and education for sustainable development (ESD) are mainstreamed⁵ in (a) education laws and policies, (b) curricula (c) teacher education (including the training of trainers and educators) and (d) student assessment in your country. Please enter the appropriate number in each white cell in the table below.

KEY:

0 Not at all *GCED and ESD are not mainstreamed.*

1 Partially *Some GCED and/or ESD themes⁶ are mainstreamed. Select this option if GCED is mainstreamed but ESD is not (or vice versa).*

2 *Most GCED and ESD themes are mainstreamed.*

Extensively

9 Not known *It is not known whether GCED and ESD are mainstreamed or not.*

99 Not applicable *The given level of government does not have responsibility for the given component (policies, curricula, teacher education or student assessment) and/or does not have responsibility for the given level or type of education. This may occur at the national level in federal countries where education is the responsibility of individual states or at the sub-national level in small countries where there is only one level of government.*

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
National				
(a) Education laws and policies			2	
(b) Curricula				
(c) Teacher education				
(d) Student assessment				
Sub-national				
(a) Education laws and policies				
(b) Curricula				
(c) Teacher education				
(d) Student assessment				

⁵ GCED and ESD are mainstreamed if their themes are mentioned explicitly in relevant documents and are expected to be implemented by the relevant authorities (e.g., Ministries, regional or local education authorities), educational institutions (e.g., schools, colleges and universities) and/or education professionals (e.g., teachers, lecturers, trainers and educators) as appropriate.

⁶ Refer to the schema in paragraph 11 of Section II of these guidelines.

F. Technical and vocational education and training (paras 25-29 of the 1974 *Recommendation*)

F1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in technical and vocational education and training. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

Since 2017, in accordance with the Action Plan for the implementation of the Education Strategy until 2020, the MoESTD has begun working on educational reform, primarily through the preparation of new curricula of teaching and learning for primary education and upbringing. The programmes are outcome-oriented and should ensure the development of international competencies, one of which is "Responsible Learning in a Democratic Society", which is recognized in the outcomes related to respect for human rights and freedoms. Within the new programme of the elective programme *Civic Education*, the objective of teaching and learning is to make students study the basic principles, values and procedures of civil society, and thus become aware of their rights and responsibilities, sensible to the needs of individuals and community, and willing to actively take part in the community while respecting democratic values. Within other subjects, in accordance with their possibilities, outcomes are introduced which are related to respect for gender equality, diversity and intercultural dialogue. Respect for democratic values and procedures, responsible, humane and tolerant behaviour in the society, sensitivity to social injustice, cooperation and teamwork are some of the outcomes that are related to human rights that can be found in the preparatory programmes.

Within the compulsory professional development, one of the five priority areas of compulsory teacher training, determined by the Rulebook on Continuous Professional Development of Teachers, Educators and Professional Associates is: creating a tolerant and non-discriminatory environment for each individual, as well as violence prevention, discrimination prevention and inclusion of children from socially marginalized groups. Programme contents related to education for democracy and civic society are part of the Curriculum for teaching and learning for primary and secondary schools, and are realized through the curriculum of *Civic Education*. This subject has the status of a compulsory elective programme that is chosen for each school year. In 2017, the Institute for the Education Improvement, in accordance with the Action Plan for the implementation of the Education Strategy until 2020, prepared new plans and programmes of teaching and learning for primary education. The programmes are outcome-oriented and should ensure the development of interdisciplinary competencies, one of which is "Responsible participation in a democratic society", which is recognized in the outcomes related to respect for human rights and freedoms. In the new programmes of the compulsory elective program *Civic Education*, the goal of teaching and learning is for the students to become aware of their rights and responsibilities by studying the basic principles, values and procedures of civil society, sensitive to the needs of individuals and the community and ready to actively participate in the community. Within other subjects, in accordance with their possibilities, outcomes related to respect for gender equality, diversity and intercultural dialogue are introduced. Respect for democratic values and procedures, responsible, humane and tolerant behaviour in society, sensitivity to social injustice, cooperation and teamwork are some of the outcomes related to human rights, which can be found in the curricula.

In the Catalogue of the programme of continuous professional development of teachers, educators and professional associates for the school year 2018/2019, 2019/2020 and 2020/2021 (<http://zuov.gov.rs/katalozi-programa-stalnog-strucnog-usavrsavanja/>) there is a total of 32 programmes dealing with human rights. In the area of improving competencies for civic values, there are 7 programmes, and 24 programmes with the aim to improve the capacity of teachers

and other professional associates to act in the field of protection against violence and discrimination. Within the Catalogue of Accredited Programmes for Teachers and Professional Associates, there are several accredited seminars. The accredited programme/seminar "ALL OUR IDENTITIES" has a special place. So far, the seminar has had 7 realizations attended by 140 participants, of which 12 men and 128 women who are teachers of *Civic Education*, primary school teachers, subject teachers of social subjects in primary and secondary school. The trainings were realized in 2017. Aim of the programme: Inclusion of gender perspective in primary education through direct engagement of teachers, through their empowerment to introduce interventions in teaching content, as well as through changing attitudes about gender roles and gender relations, for further development of a fair and sustainable society – Intersectionality, how gender identity intersects with others.

Civic Education is recognized by other actors in education and youth as an adequate place for the implementation of smaller projects aimed at introducing a gender perspective, sensitizing young people to the topics of discrimination and inequality. Projects that have been realized/are being realized:

- Science is female (Centre for Women's Studies, Centre for the Promotion of Science);
- Be a man (Centre E8);
- I can say no - love is not violence (AJC);
- Anti-trafficking (ASTRA)

The curriculum of the subject of *Civic Education* for the 4th grade envisages the realization of topics related to the choice of faculty, continuation of career (after secondary vocational school).

Training of teachers, educational inspectors and advisors for the implementation of the Rulebook on detailed criteria for recognizing forms of discrimination by an employee, child, student or third party in an educational institution has been implemented. In 2017, three three-day trainings for teachers and seven two-day workshops were held for students from two high schools and four primary schools, on the topic of developing the spirit of tolerance and non-discrimination. In primary schools, the participants were seventh and eighth grade students, while in secondary schools, students from the first to the fourth grade were included. At the end of the training, the teachers presented their research activities with their students through public presentations attended by their colleagues, students and parents. Within the joint project under the working title "Improving the competencies of institutions for prevention and treatment in cases of discrimination", the implementation of which is funded by GIZ, and in cooperation with the Centre for Interactive Pedagogy, the MoESTD implemented TOT training for educational inspectors and advisors on the implementation of the Rulebook on acting in case of suspected or established discriminatory behaviour and insulting the reputation, honour or dignity of a person (*Official Gazette of RS No. 85/2018*), and there were 300 teachers and professional associates from preschool, primary and secondary schools who participated in an online training. In the next phase of the Project, we plan to continue with the training of employees in education through the development of a Guide for the implementation of this Rulebook, as well as a Guide for parents, which will be published on the website of the Ministry.

G. Adult education (para 30 of the *1974 Recommendation*)

- G1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in adult education and other forms of non-formal education including youth education, out-of-school education, etc. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

The program of functional primary education for adults, in the Republic of Serbia, is implemented in 65 primary schools on the territory of 16 school administrations. This program was attended by 6,299 adult students who dropped out of primary school in 2020, or never started it for any other reason, and are older than 15 years of age, while 6,156 adult students started their education this year. 834 teachers and 73 andragogical assistants are participating in the implementation of the Curriculum of adult primary education according to the functional primary education for adults model. In 65 primary schools that plan to implement the program of primary adult education for about 6200 students, 834 teachers participate. Professional training for the implementation of the functional primary education for adults program in 2021 is planned for 268 teachers for Module 1 - basic andragogical skills. For Module 2 - training for the implementation of individual subjects in the functional primary education for adults program, training is planned for 792 teachers. Module 3 - training of andragogical assistants, in 2021, it is necessary to conduct 43 andragogical assistants. In the past period, 447 teachers have already improved their competencies for the implementation of programs for functional primary education for adults and for working with adults. Andragogical assistants, 30 of them have already been trained in the prescribed manner, while 43 need to be trained. We expect that in schools, after the necessary training of teachers and andragogical assistants, the dropout rate will decrease, and that teachers will have the transfer of acquired competencies to regular classes (defining outcomes, project teaching, digital skills, using the EPALE platform in work, assessment of progress, learning strategies ...).

Staff training is not only crucial for quality in formal education, but also in public administration. NAPA, in cooperation with the Council of Europe on the project "Human Resources Management in Local Self-Government - Phase 2" in 2021, will pay special attention to improving the standards of andragogical competencies of coaches, tools for self-assessment of coaching skills and protocols for monitoring the work of trainers. later during training. In addition, a model of the procedure of accreditation of mentors and coaches as implementers of professional training of NAPA will be built, with the determination of the procedure of their engagement.

In cooperation with the Council of Europe project, NAPA expects the establishment and development of an Assessment Center as an assessment method to assess coaching competencies. A training program for NAPA employees for the application of the Assessment Centre method will be prepared and implemented. Through this training, NAPA employees will learn how to prepare instruments and tasks for the needs of assessment, get acquainted with the way of assessing competencies and coordinating the assessments of different assessors. Within the Tempus Foundation, there are national teams for the implementation of several European networks, which through their regular activities provide teaching staff with opportunities for professional development and training at the national and international level.

EPALE - the electronic platform for adult education in Europe is one of these networks and was created as an initiative of the European Commission with the aim to bring together all professionals in adult education, including educators, trainers and other practitioners, policy

makers, researchers and others. actors involved in adult education. The EPale network operates under the auspices of the largest European program to support education - Erasmus + and is available in 38 European countries. At the European level, the network is coordinated by the Central Support Team (CSS) while in each network it is implemented by the National Support Team (NSS). In Serbia, the NSS has been operating within the Tempus Foundation since 2017 and currently has over 1,600 registered members. As part of its regular activities, EPale, the national support team in Serbia, carries out a series of activities aimed at promoting adult education, supporting the adult education system and professional development of staff engaged in adult education: Within the regular activities of this network in Serbia during 2021, the following activities are planned:

- Organizing an EPale regional conference, which brings together practitioners and professionals in the field of adult education from Serbia and the region on the topic of improving digital competencies of adults. This event was planned for 2020, however, due to the corona virus pandemic, it was postponed to next year. Organisation of award-winning competitions for the best blog on the EPale platform and sending of authors of the best articles (trainees in education of adults) to professional development in international conferences in the field of adult education;
- participation of the Serbian delegation in the annual EPale conference in Europe;
- holding seminars in cooperation with the Euroguidance Centre for employees in the social protection sector who work with adults who form an activation plan - job search and / or additional training. Employees in the social protection sector will get acquainted with the basic concepts and resources of career guidance and counselling, plan career guidance and counselling activities for service users and cooperate with career guidance and counselling actors at the local level. The seminars will be free for participants and will be organized periodically throughout the year in different parts of Serbia. When selecting participants, they will strive to include various practitioners who work as case managers or in a different way with users of social protection services, in order to empower them to develop competencies, make decisions, get involved in additional education and training programs;
- • holding lectures on the Internet - webinars with the aim of introducing teaching and working staff in adult education and the general public with the possibilities and functionalities of the EPale network, as well as current topics in adult education at the national and European level;
- Participation of adult education professionals in international live and online conferences organized by CSS and national support teams from other countries.

In addition, through regular activities such as blogging, publications, news, events, encouraging collaboration through group participation and networking with colleagues from other European countries, the EPale national support team works throughout the year to inform practitioners and professionals in adult education, and on the promotion of adult education and current topics in this field at the national and European level, then on the promotion of examples of good practices in adult education, encouraging discussions and gathering information and materials relevant to the adult education sector.

In addition, the EPale network is constantly being improved, and in 2021 the platform will receive a special section intended for opportunities for professional development of staff engaged in adult education. Also, EPale offers the possibility of networking and connecting with colleagues across Europe, opportunities for collaboration and peer learning.

In addition to the activities of the EPALE network, other networks will continue to operate within the Tempus Foundation in 2021, which will organize accredited seminars and conferences as part of their regular activities.

As part of support for career guidance and counselling activities in schools, starting with Euroguidance, the Europass Centre in 2021 will continue to organize several different trainings for teachers, professional associates and other employees in primary and secondary schools. All trainings of the Euroguidance and Europass Centre as well as other activities of the Tempus Foundation are free of charge. The trainings are intended for teachers, professional associates, from primary and secondary schools for adult education, as well as pedagogical and andragogical assistants, and the topics of the trainings are the following:

- • Basic training "Career guidance and counselling in high school" - The training is intended for teachers, professional associates and other employees in high schools who do not have much experience in career guidance and counselling and want to get acquainted with this area and the role of teachers in implementing these activities. During the training, participants can learn more about the modern concept of career and career guidance and counselling activities that have already been successfully implemented by their colleagues in schools.
- • Advanced training: "Improving the quality of career guidance activities through effective planning of the school team for career guidance and counselling / professional orientation" - This training is intended for teachers and professional associates who already carry out career guidance / professional orientation activities and participate and / or coordinate work school Team for career guidance and counselling / professional orientation. By participating in this training, teachers and professional associates will be able to improve their knowledge of skills that are important for students to be able to manage their careers and learn about ways to organize team activities that would contribute to the development of relevant skills in students for career guidance and counselling.
- • Online training "Improving the competencies of teachers and professional associates for the implementation of career guidance and counselling activities" - This training takes place mainly through an online platform with one live meeting lasting 18 hours that takes place over 5 weeks. The aim of the training is to improve the competencies of the participants in accordance with the framework of competencies defined in the Proposal of Standards for Career Guidance and Counselling Services and other documents dedicated to the quality of career guidance and counselling.
- • Training "Preparing students for the labour market - self-assessment skills and presentation to employers" - This training aims to train teachers and professional associates to independently conduct teaching and extracurricular activities to prepare students for the labour market, with special emphasis on self-assessment competencies and presentation skills. The training is designed to improve the competencies of teachers and professional associates for the preparation of students for the labour market through interactive work and exchange between participants.
- • Training "Career information for students and European Europass tools for presenting skills and knowledge" - This online training of the Europass Centre lasting 5 weeks is dedicated to training teachers and professional associates to use Europass tools for presenting skills and knowledge in working with students and for organizing career information activities for students. The first meeting during this training is realized directly in the duration of two hours, and the rest of the training is realized online through

the learning platform.

In addition to the mentioned trainings, Euroguidance Centre, as part of its regular activities, will organize additional activities in 2021, such as conferences, individual consultations, study visits, as well as publishing materials on career guidance and counselling for career practitioners to support their work.

Another European network for employees in education, which operates within the Tempus Foundation, and within which various activities of professional development of teaching staff are implemented, is eTwinning. As part of the regular activities of the eTwinning network, in 2021 it is planned to realize accredited seminars, one national conference and one international conference. These events are intended for teachers in primary and secondary schools as well as in schools that implement functional primary education for adults and cover topics such as the use of ICT tools in teaching. Through these seminars, the teaching staff improves their digital competencies and also learns how to improve the digital skills of students through the application of ICT tools in teaching.

Within the activities of promotion and support for participation in the Erasmus + program and submission and implementation of institutional projects in the field of adult education, it is planned to hold workshops for writing mobility projects and strategic partnerships within the Erasmus + program to raise the competencies of employees in education establishing international cooperation.

In Penitentiary Institutions, a total of 325 participants attended the Adult Primary Education Program according to the model of functional primary adult education, while it is planned to include 429 participants in the 2021.

Secondary education for students older than 17, financed from the budget of the Republic of Serbia, in 2020, was realized in 68 secondary schools, on the territory of 16 school administrations. The program of secondary adult education was attended by 308 participants older than 17 years. In 2021, the realization of formal secondary adult education is planned on the territory of 16 school administrations, in 70 secondary schools. It is planned to enrol 175 adult students, in the first grade of secondary education.

The implementation of the Law on National qualifications framework and the Law on Adult Education has opened a channel of non-formal education with a publicly recognized organizer of adult education activities for the acquisition of qualifications. With the development of the non-formal education system, by providing the opportunity to acquire the necessary qualifications and competencies through this system, the non-formal education system is becoming a mechanism that adults are increasingly beginning to use in meeting their educational needs.

With the annual plan of adult education for 2020, 60 schools, people's universities and other organizations planned the realization of 190 accredited programs through 889 trainings for 6,044 candidates. The beneficiaries of the program are individuals, representatives of employers, companies, legal entities, the unemployed from the National Employment Service records, public companies and local governments. Sources of funding are the own funds of candidates or employers, public companies, companies, local self-government, National Employment Service, Associations.

H. Research and International Co-operation (paras 41-45 of the 1974 Recommendation)

H1 Please describe what kinds of research or experimentation have been carried out to improve the implementation of GCED and/or ESD. Describe briefly how the results of such activities have influenced education policies, curricula and/or teaching practices.

The research on gender-based violence in schools, conducted in cooperation with UNICEF, enabled the development of the Manual for Schools, in order to prevent gender-based violence.

http://www.mpn.gov.rs/wp-content/uploads/2015/08/Istrazivanje_rodno_zasnovanog_nasilja_u_skolama_u_Srbiji.pdf

The Ministry supported the participation in the international research "Children of Europe on the Internet", the results of the research were given in the form of recommendations for safe use of the Internet and prevention of electronic violence among children and youth

<https://www.unicef.org/serbia/publikacije/koriscenje-interneta-kod-dece-i-mladih-u-srbiji>

H2 Please indicate which types of activities are available that promote international co-operation at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Hosting of international meetings on GCED and/or ESD				
Participation in international meetings abroad on GCED and/or ESD				
Support for programmes hosting foreign students, researchers and/or teachers				
Membership of international networks including ASPnet				
Joint research projects on GCED and/or ESD with foreign institutions				
Other activities (please specify):				

I. Any other comments

- II Please indicate whether your country has faced any constraints, in particular related to global or national crises, including natural disasters, in implementing the 1974 Recommendation during the reporting period.

Availability of education during the Covid-19 epidemic

Respecting and applying in practice the Millennium Development Goal 4: "*Quality education: Achieving inclusive and quality education for all children confirms the belief that education is the most powerful and proven means of sustainable development*", the Ministry has implemented a special operational plan for teaching in minority languages, as well as additional support in the education of students from vulnerable social groups. With the aim of mapping good practice, the Ministry, together with the UNICEF Office to Belgrade, has conducted a research "Monitoring the participation and learning process of students from vulnerable groups during the implementation of educational work by distance learning", which are available at: <http://www.mpn.gov.rs/wp-content/uploads/2020/06/4.b-Prvi-izve%C5%A1taj-osetljive-grupe-u%C4%8Denje-na-daljinu.pdf>.

The obtained data are used to plan further measures to develop resources, increase coverage and improve the quality of distance learning.

Telephone SOS line for providing psychosocial support to students, parents and employees (which was previously intended for reporting school violence) in education during the organization of educational work by distance learning during the pandemic in the period from March to June. Nearly 250 calls were made to SOS counsellors, in most cases (up to 50%) calls were made by parents, then employees in educational institutions (up to 30%) and students (up to 20%).

Support in distance learning for students of the Roma national minority

Students living in substandard Roma settlements watched distance learning via TV, online classrooms, Viber groups, as well as all other students. For students who do not have any of the opportunities offered, the school printed educational material that was available to parents for a certain period of time. Educational material was delivered to students in Roma settlements and through e.g., teachers of religious instruction or teachers of the *Romani language with elements of national culture*, who live either in the settlement itself or in its vicinity. Mentioned research "Monitoring the participation and learning process of students from vulnerable groups during the realization of educational work by distance learning" <http://www.mpn.gov.rs/wp-content/uploads/2020/06/4.b-Prvi-izve%C5%A1taj-osetljive-grupe-u%C4%8Denje-na-daljinu.pdf>, gives an insight into the situation, but also the needs of students of the Roma national minority, as well as students from other sensitive social groups. According to the collected data, out of the total number of students, 1.20% of them do not have adequate internet access, while 0.80% do not have a suitable device for internet access. On the other hand, out of the total number of students in Serbia, 40.02% of Roma students who need additional support in education do not have internet access, and 19.94% of them do not have a suitable device (TV, smartphone, tablet, computer). In primary schools, 56% of students belonging to the Roma national minority who need additional support in education, followed distance learning through TV or online classes, while the rest received alternative forms of support (preparation of printed material, support of a pedagogical assistant). The data obtained by the mentioned research show that students of the Roma national minority make up 1.87% of students having this type of educational work, in relation to the total number of

students for whom printed materials are prepared. During the state of emergency, pedagogical assistants-PA (there are 261 of them in the system) who provide support to Roma students who need this support in primary schools, provided adequate support for distance learning through a number of activities:

- support in doing homework in 63.81% of cases;
- for 55.71% of cases, cooperation was realized with teachers who produce teaching materials, and PAs participated in the distribution of these materials;
- support to students in mastering and using information and communication technologies in 50% of cases.

For students who did not have access to the Internet or who had poor connection, the school provided printed assignments that were taken from the school and returned to the school after the final exam. Most PAs were in contact with the students they support at least three times a week. Communication took place by phone (81.43%), Viber and WhatsApp (69.52%), via social networks (42.38%) and e-mail addresses 15.42%. PAs communicated with the parents of their students at least twice a week and provided the necessary information regarding distance learning. MoESTD, in cooperation with UNICEF, initiated and implemented a number of measures aimed at supporting the education of children and students from vulnerable social groups:

- providing ToyBox packages (3000 pieces) for the poorest families (Roma living in informal settlements and other poorest in those locations), children in foster families and social welfare institutions, to support learning activities through play at home. The package contains 15 items - toys and didactic material (for children aged one to ten) and is designed to support joint activities of children and adults and encourage learning through play. The information accompanying this package has also been translated into Romani.

- a play corner has been established on the UNICEF website: <https://www.unicef.org/serbia/kutak-za-igru> where you can find suggestions for games and an invitation to join the #LearningAtHome campaign or #Game Corner, as and information on RTS TV channels;

- on RTS 2 every working day from 7.30 am a preschool programme is broadcast on the initiative of the MoESTD and with the support of UNICEF, while on RTS 1 within the action RTS and UNICEF FOR PARENTS, daily within the Morning programme, there are shows in which experts of different profiles give parents advice on health and protection against infection, as well as on encouraging children's development, psychological and social support, play and learning activities and stress prevention;

- launched an initiative (cooperation between MoESTD, SIPRU team and UNICEF) to provide support to schools in order to include the entire population of school children in distance learning through: the formation of digital libraries that would contain digital devices that could be used by families and teachers in need, as well as strengthening the capacity of pedagogical assistants to support students online and mobilize online peer support.

The total coverage of students belonging to the Roma national minority who need additional support in education covered by some form of distance learning in secondary schools is 91%. Among the students from this group, 75% are involved in TV and online classes, and for the rest some form of alternative classes is organized.

Support in distance learning for students with developmental and physical disabilities

In addition to activities that support children and students from all vulnerable social groups, as way to ensure continuous learning with the support of children and students with disabilities, the following was done:

- A letter was sent to all primary and secondary schools with instructions to pay special

attention to the organization of educational work of distance learning for children with developmental disabilities;

- Additional recommendations were sent to schools for students with disabilities in order to continue learning and daily routines that are important to children as much as possible, through distance learning and support for children and families;

- A letter was sent to all municipalities with a recommendation for organizing the work of commissions for assessing the need for additional educational, health and social support for children and students (interdepartmental commissions) in order to provide the necessary additional support to children and students also during the state of emergency. During the preparation of the mock final exam in the online environment, schools received special instructions on the modalities of adapting this exam to students who are educated according to an individual educational plan. In collaboration with UNICEF, a list of digital resources to support distance learning for children with disabilities has been developed, which is complementary to the list of digital tools prepared by SIPRA and available to schools along with other guidelines prepared by the MoESTD for schools in relation to the education of children who need additional support. An initiative has been launched for the development of the project "Library of Digital Technologies", which is aimed at equipping schools with the largest number of students from vulnerable groups with digital technologies, but also at improving the digital competencies of teachers and students. As for schools that educate students in longer home and hospital treatment, they have many years of experience and developed practice of distance learning for students who are educated in special conditions due to their health condition. In addition to having classes through TV channels, in the conditions of a pandemic, information technologies, SMS messages, Skype, Viber, social networks, as well as learning platforms, electronic textbooks and learning materials that can be found on the Internet are used in working with students. The work is planned and organized 1: 1, in accordance with the individual educational plan, and great help and support in learning is provided by the parents of students with whom the teachers are in daily contact. In homes for children and young people, there is distance learning too, carried out through the coordinator of the institution, who forwards instructions regarding classes to the person who is with the students (educator, nurse) and from whom the school receives feedback.

Support in distance learning for migrant students and asylum seekers

With the beginning of the establishment of distance learning, MoESTD sent a request to the Commissariat for Refugees and Migration to provide support and provide parents and children of school age with the possibility to follow educational contents for distance learning in Serbian, which are broadcast on the Second and Third RTS channels. Also, parents and school-age children were referred to the MoESTD website and found the desired educational material.

All primary and secondary schools involving migrant students/asylum seekers are encouraged to maintain electronic communication with their students accommodated in reception centres and asylum centres. Teachers deliver educational material via Viber, WhatsApp and other social networks. The link <https://www.unicef.org/serbia/en/open-digital-educational-tools-interactive-online-teaching-and-learning> was also sent to schools, where there are open and free digital tools with different methods of learning Serbian as a foreign language. MoESTD monitored the participation of migrant students regarding distance learning: in Banja Koviljača - 11 students, Krnjača 160, Adaševci - 3, Vranje 38, Bogovađa 33, in Bosilegrad 21, Sombor 4, Sjenica 20 students and Šid station 47 school children.

After the end of distance learning in 2019/20, during the first two weeks of June 2020, students had the opportunity, if they wished, to improve their grades and make up for missed

lessons. In cooperation with UNICEF, the MoESTD provided ToyBox packages for children living in centres for refugees and migrants, and the information that accompanies this package has been translated into Arabic, Farsi and Pashto. Migrant students accommodated in reception centres also have access to a play corner on the UNICEF website: <https://www.unicef.org/serbia/kutak-za-igru> where they can find suggestions for games and an invitation to join the campaign # LearningAtHome or #Game Corner, as well as information about RTS programmes.

Distance learning in 8 languages of national minorities

Along with distance learning in the Serbian language, distance learning was realized for students who attend all classes in their mother tongue, i.e., the language of a national minority. In providing as many digital and other online resources as possible for the implementation of distance learning in the languages of national minorities, the Ministry was significantly supported by the national councils of national minorities. In addition to the fact that all students have the opportunity to follow classes in Serbian on the channels RTS2, RTS3 and RTS Planet - which is an additional learning of Serbian as a non-native language, in cooperation with RT Vojvodina and minority media from Monday, March 23, 2020, we started with recording and broadcasting of mother tongue classes, in all 8 languages of national minorities in which all classes are conducted. In addition to the public services RTS and RT Vojvodina, other private, minority and local media were involved in this very important task of recording and broadcasting: Panon RTV, TV Kopernikus, Sandzak Television, TV Bujanovac: RTV SPEKTRI, local TV Preševo: RTV ALDI, RT Caribrod, RTV OK Kovačica, RTV Pančevo, TV Banat from Vršac, TV Petrovac, RTV Stara Pazova. In addition to that, educational content is available on YouTube channels and the websites of national councils of national minorities. The schedule of broadcasting classes in the languages of national minorities as well as important information can be found at the link: "Distance learning in the languages of national minorities" <https://www.rasporednastave.gov.rs/obrazovanje-manjine.php>.

339 teachers who teach in one of the 8 languages of the national minority participated in the preparation and delivery of educational content. During distance learning, 3,310 educational episodes were recorded and broadcast in 8 languages of national minorities.

In the period from September 1 to December 1, 2020, a total of **2470 lessons** for mother tongue and literature and other subjects for primary and secondary schools were recorded in Albanian, Slovak, Hungarian, Bosnian, Bulgarian, Romanian and Ruthenian. Teachers who teach in Croatian work through the Google classroom. 291 teachers who teach in the languages of national minorities joined. The Ministry obtained additional 25 Camtasia licenses for recording of lessons for distance learning, **a total of 34 Camtasia licenses were submitted** to the national councils. Classes are published on the portals of national councils of national minorities and are available to everyone. All information regarding classes in the school year 2020/21 has been translated into 8 languages of national minorities. So far, more than 60 online classes have been recorded for *Serbian as a non-mother tongue* according to the A and B models in Subotica and Bujanovac, supported by the OSCE Mission; the plan is 336. In the field of inclusive education for educational institutions, we are preparing a set of recommendations on the inclusion of children and students from vulnerable social groups in education after a period of distance learning, in accordance with the Professional Instruction given to schools. In cooperation with the UNICEF Office to Serbia - school ICT libraries are established and teacher capacities are developed in schools with a significant number of Roma students and children from vulnerable groups most severely affected by emergencies, providing relevant additional support (including learning and psychosocial support) to children from vulnerable groups in the context of the COVID-19 pandemic.

We are having negotiations with the Council of Europe on the establishment of a single platform on which all educational content in the languages of national minorities will be published.

- I2 Please provide any other relevant information or clarifications regarding the implementation of the 1974 Recommendation or the mainstreaming of GCED and ESD in your country's education system.

--
