

- The school should place the GNH Progress Wheel in strategic places, so that; it serves as a constant reminder for school improvement.

An example of GNH Progress Wheel is shown below:

SSA Ratings Key

- 1 = The indicator is seldom or never found in the individual, classroom or the school. It is not a day to day norm, nor is it an impression that people would take away from a visit to this school (25%).
- 2 = The indicator is found in some individuals, classes, and sometimes in the school. It is not regular or frequent – most classes and individuals or the school do not demonstrate this. It is the exception, not the norm (50%).
- 3 = The indicator is found in most individuals, classes and at most of the times throughout the school. This is the norm in the school – not the exception (75%).
- 4 = The indicator is found in all individuals, classes and throughout the school at all times. Any visitor to the school will recognize this quality (100%).

3. School Performance Scorecards

- Academic learning Scorecard (ALS): ALS comprises of results of classes III, VI, X and XII (percentage of student performing above 45%, 60% and 70%) and the pass percentage of classes IX and XI.
- Enabling Practices Scorecard (EPS): EPS scorecard measures effectiveness of critical processes and practices of school management, quality and impact of teaching and training, infrastructure, and rigour and effectiveness of school planning processes.

- Gross National Happiness Scorecard (GNH): GNH scorecard measures achievement on GNH values and practices in schools as measured through the GNH indicators.

Who will use school performance score cards?

Dzongkhag Education Officers, Assistant Dzongkhag Education Officers, Thromdey Education Officers and Assistant Thromdey Education Officers.

How to use school performance score cards.

1. DEOs/TEOs/ADEOs/ATEOs should visit the schools twice a year, once in the beginning of the academic year to assess on School Enabling Practices (EPS) and Gross National Happiness (GNH) scorecards. During the visit, DEOs/TEOs/ADEOs/ATEOs will confirm SSA and SIP ratings. The second visit should be made after the mid-term to review and assess SSA and SIP progress.
2. In the process of assessment and review, DEOs/TEOs/ADEOs/ATEOs will identify areas for support and improvement. They have to prioritize the areas of support and make necessary arrangements to avail support from relevant agencies.
3. DEOs/TEOs/ADEOs/ATEOs should submit PMS current ratings of schools to EMSSD in the months of April-May and PMS review ratings in the months of September-October.

Follow up actions on School PMS

- Annual data on PMS from Dzongkhags and Thromdeys are collated and processed by the EMSSD. Data from schools' EPS, GNH and ALS of classes III, VI, X and XII and the pass percentage of classes IX and XI are taken into account to generate a more comprehensive performance school ranking.
- Annual ranking of top ten schools are declared at four levels of schools (III, VI, X and XII) and are recognised through award of certificates.
- PMS ranking focuses on identifying schools that need improvement and support.
- Reports of the consultative meetings with schools/ dzongkhags/ thromdeys and suitable recommendations are communicated to relevant organisational units in the Ministry of Education (MoE) for intervention and support.

School Performance Management System

School Self Assessment

What is School Performance Management System (PMS)?

PMS is a system of continuous improvement at all schools which provides schools and Dzongkhags with tools to identify the needs for improvement and support such as professional development programmes, basic infrastructures and facilities, teacher deployment, maintaining standard student-teacher ratio, etc.

The principle of PMS is to create transparency in school performance with the focus on quality of education and increase access to education to all.

What are the key elements and tools of PMS?

PMS consists of three elements which are also used as tools for holistic assessment of schools. These are:

1. School Self Assessment (SSA)
2. School Improvement Plan (SIP) and
3. School Performance Scorecards
 - a. Academic Learning Scorecard (ALS)
 - b. Enabling Practices Scorecard (EPS) and
 - c. Gross National Happiness Scorecard (GNH)

1. What is School Self Assessment (SSA)?

SSA is a tool which is used by schools to reflect and assess their performance in a systematic and comprehensive manner. It takes into account the functioning of school leadership and management, students learning outcome, students and teachers engagement and their wellbeing.

2. What is School Improvement Plan (SIP)?

SIP is a tool used by schools to prepare an improvement plan by setting targets for the academic year. SIP is prepared after the exercise on SSA where the schools are in a position to identify areas for improvement.

Aims of SSA and SIP

- Is to assess and identify strengths and weaknesses of school;
- Is to review and develop action plans to improve the school performance; and
- Is to guide the implementation of all the provisions on a continuous basis creating enabling conditions to enhance learning.

Key Areas for School Self Assessment

Teaching-learning of curriculum forms the main basis for assessment. However, it is important to assess other dimensions which contribute to intellectual and physical development of students. Therefore, SSA has the following six key areas with indicators for assessment:

1. Leadership and Management practices;
2. Green School Domain:
 - (i) Physical Ambience;
 - (ii) Psycho-Social Ambience;
3. Curriculum Practices: Planning and Delivery;
4. Holistic Assessment;
5. Broader Learning Domain and
6. School-Community Vitality.

Who will use SSA?

Principal, Teachers, Students' leaders, School Management Board and Office staff.

How to use SSA:

1. The SSA should be used by schools TWICE a year. It should be used in the beginning of the academic year to determine the current level of school performance and after mid-term to review the achievement of the first term and reprioritize strategies and resources for the rest of the year.
2. The Principal, teachers, student leaders, office staff, and members of the School Management Board (SMB) should rate the relevant indicators/key areas individually and later come to an agreement on the rating for each indicator. The agreed ratings should be recorded in a form as overall school rating with justifications and evidences.
3. The indicators of Curriculum Practices and Holistic Assessment can be used by monitors for classroom observation to strengthen School Level Monitoring and Support Services (SLMSS).
4. All the indicators in SSA should be achieved by creating an enabling environment.

Who will use SIP?

Principal, Teachers, Students' leaders, School Management Board and Office staff.

How to use SIP:

1. SIP should be developed in the beginning of the year by taking the current ratings of the identified indicators (measurable indicators) from the overall school ratings of SSA. It should be reviewed after the mid-term.
2. The school should decide on the target ratings for the SIP indicators of the current year.
3. All ratings should be in whole number.
4. Develop specific, measurable, achievable, relevant and time bound (SMART) actions to achieve the target of each indicator.
5. Put a timeline for completion against each action,
6. Reflect the person who is responsible for the actions to be implemented in the remarks column.
7. Add any other indicators from SSA that you would like to improve upon. (Select not more than 2-5 indicators).
8. The current ratings and SMART actions in SIP should be validated in the beginning of the year by DEOs/TEOs/ADEOs/ATEOs.
9. The school should prepare GNH Progress Wheel by taking the average ratings of six key areas from SIP.
10. The SIP should be reviewed and rated after the mid-term and review ratings are based on progress made by the school. These ratings are again validated by DEOs/TEOs/ADEOs/ATEOs during their second visit.

Note: The overall SSA ratings and SIP are used by DEOs/TEOs/ADEOs/ATEOs during the PMS review exercise.

GNH Progress Wheel

The SIP should be depicted as GNH Progress Wheel. While depicting GNH Progress Wheel, follow the steps given below:

- Transfer the average ratings of each of the six key areas from SIP into the GNH Progress Wheel;
- Plot the current ratings and join the points to show the current level of school performance web;
- Plot the target ratings to create the second web;
- Shade the area between two webs;
- During the review time, plot the third web to assess the progress. The lines can be in different colours to make it more attractive and distinct;
