

GUIDELINES FOR THE PREPARATION OF REPORTS BY MEMBER STATES ON THE APPLICATION OF THE 1974 RECOMMENDATION CONCERNING EDUCATION FOR INTERNATIONAL UNDERSTANDING, CO-OPERATION AND PEACE AND EDUCATION RELATING TO HUMAN RIGHTS AND FUNDAMENTAL FREEDOMS

I. Introduction

A. About the 1974 Recommendation

1. UNESCO's *1974 Recommendation concerning Education for International Understanding, Co-operation and Peace and Education relating to Human Rights and Fundamental Freedoms*¹ (the "1974 Recommendation") aims to promote international education and world peace through understanding, solidarity and cooperation. It was adopted on 19 November 1974 by the General Conference of UNESCO at its 18th session.

2. The *1974 Recommendation* applies to formal, non-formal and informal education and to all levels, from pre-primary to tertiary and adult education and lifelong learning. The General Conference recommended "*that Member States should apply*" the provisions included in the *1974 Recommendation* "*by taking whatever legislative or other steps*" that provide institutional (e.g. policies and legal frameworks) and pedagogical (e.g. curricula, teacher training, educational materials, equipment, and student assessment) support for its implementation, based on the "*objectives*", referred to in paragraph 4 of the *1974 Recommendation*, "*regarded as major guiding principles of education policy*" including: an international dimension and a global perspective on education, cultural diversity, interdependence, communication, rights and responsibilities, international solidarity and cooperation, and problem solving.

3. Today, the principles of the *1974 Recommendation* apply equally well to Education for Sustainable Development (ESD) and to Global Citizenship Education (GCED) and therefore represent a powerful tool for promoting the 2030 Agenda for Sustainable Development and in particular SDG Target 4.7 on the promotion of sustainable development and global citizenship through education, Target 12.8 on access to information on sustainable development and Target 13.3 on climate change education.

4. The General Conference in its 39th session recommended the use of the *1974 Recommendation* reporting process to support the implementation and monitoring of Target 4.7 of Sustainable Development Goal 4 (39 C/Resolution 79). The UNESCO Executive Board at its 209th session approved the use of the current guidelines for both the monitoring of the *1974 Recommendation* and the collection of data needed for the following global SDG indicator for which UNESCO is custodian (209 EX/Decision 18.II):

4.7.1, 12.8.1 and 13.3.1: *The extent to which (i) global citizenship education and (ii) education for sustainable development are mainstreamed in (a) national education policies; (b) curricula; (c) teacher education and (d) student assessment.*

5. Questions marked with an asterisk (*) will be used in the calculation of the respective indicators (**Table 1**). As approved by the Inter-Agency and Expert Group on the SDG Indicators, the indicators will be calculated for primary and secondary education only.

Table 1 Questions used in the calculation of the global SDG indicator for Targets 4.7, 12.8 and 13.3

Policies	Curricula	Teacher education	Student assessment

B. Reporting obligations

6. The General Conference, at its 18th session, when adopting the *1974 Recommendation* recommended “*that Member States submit [...] reports concerning the action taken by them in pursuance of this recommendation*”. Moreover, in accordance with Article VIII of UNESCO’s Constitution “*Each Member State shall submit to the Organization [...] reports [...] on the action taken upon the recommendations and conventions referred to in Article IV, paragraph 4.*”

7. Thus, **all UNESCO Member States are expected to report on the steps they have taken to implement the 1974 Recommendation** preferably by completing the following questionnaire. Such reporting takes place every four years.

II. Guidelines for completion of the questionnaire

8. This questionnaire and its accompanying guidelines are addressed to Ministers responsible for relations with UNESCO. The questionnaire is typically completed by Ministries of Education and other government authorities responsible for education. Responses should cover, as far as possible, education at all levels of government, including sub-national levels where applicable as well as education outside the government sector.

9. National respondents are encouraged to **consult widely** both within, across and beyond government, including with Ministries of Environment, with national human rights institutions, the education sector, civil society partners and others, as necessary, to gather the information needed to complete the questionnaire.

10. Responses to the seventh consultation should cover:

- (i) the time period 2017-2020;
- (ii) education at all levels of formal education from pre-primary to tertiary education as well as non-formal education;
- (iii) all levels of government that have responsibility for education within the country; and
- (iv) where possible, education outside the government sector.

11. To assist countries in responding to this questionnaire, UNESCO has developed the following set of global citizenship education and education for sustainable development themes. The list is based on a review of current common practices in many countries as well as a review of relevant literature. While the terms ESD and GCED may be used differently in some countries, the list of themes typically captures what are seen as key elements of Target 4.7. Please refer to the definitions of key terms in **Section III** before completing the questionnaire.

Global citizenship education and education for sustainable development

- 1. cultural diversity and tolerance
 - 1.1 international or intercultural understanding, solidarity and cooperation
 - 1.2 intercultural and interreligious dialogue
 - 1.3 local, national and/or global citizenship
- 2. gender equality education
 - 2.1 gender-based equal opportunities
 - 2.2 gender equality and justice
 - 2.3 gender roles, identity and stereotypes

3. human rights education
 - 3.1 equality and non-discrimination based on race, colour, language, religion, disability, political or other opinion, national or social origin, birth or other status
 - 3.2 human rights values, human dignity, justice, inclusion and participation
 - 3.3 respect for human rights and fundamental freedoms (as outlined in international conventions and declarations)
4. peace and non-violence
 - 4.1 friendly relations among peoples and nations
 - 4.2 challenging negative stereotypes, promoting peaceful solutions, learning to live together, including others and preventing violent extremism
 - 4.3 preventing all forms of violence including bullying, verbal abuse and gender-based violence
5. climate change education
 - 5.1 mitigation
 - 5.2 adaptation
 - 5.3 impact reduction
 - 5.4 early warning
6. environmental sustainability
 - 6.1 caring for the planet, protecting nature
 - 6.2 environmental justice
 - 6.3 biodiversity, water
7. human survival and well-being
 - 7.1 environmental health as it pertains to human well-being, disaster risk reduction
 - 7.2 health of the planet for future generations
 - 7.3 sustainable cities and communities
8. sustainable consumption and production
 - 8.1 responsible and sustainable lifestyles
 - 8.2 green economy, green jobs
 - 8.3 sustainable energy

III. Definitions of key terms

Term	Definition
Themes of global citizenship and education for sustainable development	
1. Cultural diversity and tolerance	<i>Education about and for diversity including language, ethnicity, race, religion as well as the development of tolerance, mutual respect and appreciation for cultural diversity. It includes intercultural and interreligious dialogue, understanding, solidarity and co-operation, and citizenship education.</i>
2. Gender equality education	<i>Education that addresses the wider issue of gender equality by promoting new attitudes and patterns of belief, transforming the way people think about traditional gender roles and helping to build long-term sustainable change. It examines how gender roles, activities, needs, opportunities, rights and entitlements affect men, women, girls and boys differently. It deals with the relationships between females and males, their access to and control of resources and the constraints they face relative to each other. It respects the rights of all learners – women, men, boys and girls – equally and gives equal access to learning opportunities, resources and protections. All learners benefit from and are treated in education equally without the limitations set by stereotypes, rigid gender roles and prejudices. It covers gender-based equal opportunities, gender equality and justice, and gender roles, identity and stereotypes.</i>
3. Human rights education	<i>Education that promotes universal respect for and observance of all human rights and fundamental freedoms and thus contributes, inter alia, to the prevention of human rights violations and abuses by providing persons with knowledge, skills and understanding and developing their attitudes and behaviours, to empower them to contribute to the building and promotion of a universal culture of human rights.</i> <i>It includes equality and non-discrimination, human rights values, dignity, justice, inclusion and participation and respect for human rights and fundamental freedoms.</i>
4. Peace and non-violence	<i>Education about peace and peace-building, mediation, conflict prevention and resolution, non-violence, reconciliation and living together peacefully. It includes advocating for friendly relations among peoples and nations, challenging negative stereotypes, promoting peaceful solutions, learning to live together and preventing violent extremism and other forms of violence including bullying.</i>
5. Climate change education	<i>Education to help people, in particular youth, understand, address, mitigate, and adapt to the impacts of climate change. It encourages changes in attitudes and behaviours needed to put the world on a more sustainable development path, and build a new generation of climate change-aware citizens.</i> <i>It covers various responses to climate change including mitigation, adaptation, impact reduction and early warning.</i>
6. Environmental sustainability	<i>Education about responsible interactions with the environment to avoid depletion or degradation and to promote environmental quality and health. It includes, caring for the planet and protecting nature, environmental justice, biodiversity and water.</i>
7. Human survival and well-being	<i>Education that promotes social well-being and harmony including in future generations due to healthy environmental systems. It includes health of the planet and environment related to human well-being, disaster risk reduction and sustainable cities and communities.</i>

8. Sustainable consumption and production	<i>Education on the use and production of resources, products and services that have a minimal adverse impact on the environment. It promotes resource and energy efficiency, sustainable infrastructure and green jobs. It includes responsible and sustainable lifestyles, the green economy and sustainable energy.</i>
Dimensions of learning	
Knowledge	<i>Factual information and understanding acquired through study and/or experience.</i>
Skills	<i>The ability to carry out a task well as a result of training, practice and innate aptitude. Skills may be physical, mental or both.</i>
Values	<i>Principles that form the foundation on which individuals conduct themselves and interact with others and with the environment around them.</i>
Attitudes and behaviours	<i>Ability to act on the basis of beliefs and knowledge acquired through study or experience.</i>
Levels of education	
Pre-primary	<i>Education designed to support children's early cognitive, physical, social and emotional development and introduce young children to organized instruction outside of the family context. Participants are usually aged from three years.</i>
Primary and secondary	<i>Education designed to:</i> <i>(i) provide students with fundamental skills in reading, writing and mathematics (i.e. literacy and numeracy) and establish a solid foundation for learning and understanding core areas of knowledge and personal development (primary education); and</i> <i>(ii) prepare students for further education at post-secondary and tertiary levels and for entry into the labour market (secondary education).</i> <i>It includes both general and vocational education.</i>
Tertiary	<i>Education designed to provide learning activities in specialised fields of education. It aims at learning at a high level of complexity and specialisation. It includes both what is commonly understood as academic education and advanced vocational or professional education.</i>
Types of education	
Adult education	<i>Education specifically targeted at individuals who are regarded as adults by their society to improve their technical or professional qualifications, further develop their abilities, enrich their knowledge with the purpose to complete a level of formal education, or to acquire, refresh or update their knowledge, skills and competencies in a particular field.</i>
Formal education	<i>Education that is institutionalized, intentional and planned through public organizations and recognized private bodies which – in their totality – constitute the formal education system of a country. Formal education programmes are recognized by the relevant national or sub-national education authorities. Formal education consists mostly of initial education (e.g., pre-primary, primary, secondary and tertiary education).</i>
Non-formal education	<i>Education that is an addition, alternative and/or a complement to formal education within the process of the lifelong learning of individuals. It is often provided to guarantee the right of access to education for all. It caters to people of all ages but does not necessarily apply a continuous pathway-structure. It may be short in duration and/or low-intensity, and it is typically provided in the form of short courses, workshops or seminars. Non-formal education mostly leads to qualifications that are not</i>

	<i>recognized by the relevant national or sub-national education authorities or to no qualifications at all. Non-formal education includes programmes on life skills including literacy and numeracy, work skills, and social or cultural development. Most types of adult education are also included.</i>
Vocational education	<i>Education that is designed for learners to acquire the knowledge, skills and competencies specific to a particular occupation or trade or class of occupations or trades. Vocational education may have work-based components (e.g. apprenticeships). Successful completion of such programmes leads to labour-market relevant vocational qualifications acknowledged as occupationally-oriented by the relevant national authorities and/or the labour market. Vocational education can be offered at secondary and post-secondary or tertiary levels of education.</i>

IV. Information about the respondent

Country:

Japan

Organization:

Ministry of Education, Culture, Sports, Science and Technology (MEXT)

Date of submission:

28 December, 2020

V. Other contributors consulted during the completion of this questionnaire

Please indicate below the names of other organizations and contributors consulted during the completion of this questionnaire.

Government institutions including other Ministries (please specify):

National human rights institutions (please specify):

Local and regional authorities responsible for education (please specify):

Other local and regional authorities (please specify):

Organizations representing education stakeholders (e.g. teachers, students, parents, etc.)
(please specify):

Other civil society organizations (please specify):

Others (please specify):

VI. Questionnaire

A. Laws and policies (preamble and paras 4 and 7 of the *1974 Recommendation*)

A1a. Please describe any specific national or sub-national laws, legislation or legal framework(s) in your country that govern the promotion of global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes² are mentioned explicitly or are inferred and what types or levels of education are covered.

The Basic Act on Education that defines the purpose and goals of education, is not a law specifically to promote GCED and / or ESD, but the topics that should be addressed in ESD and GCED as given below are explicitly mentioned or inferred, and education covering early childhood education to lifelong learning that complies with the laws and regulations must be taught.

Cultural diversity and tolerance: Article 2, item (v), Article 15

Gender equality: Article 2, item (iii), Article 4

Human rights: Preamble, Article 2, item (iii)

Peace and non-violence: Preamble, Article 1

Climate change: Article 2, item (iv)

Environmental sustainability: Article 2, item (iv)

Human survival and wellbeing: Preamble

Sustainable consumption and production: Article 2, item (iv)

A1b. Please provide the full names of any laws, legislation or legal frameworks referred to in A1a and, where possible, web links to relevant documents.

Basic Act on Education

<https://www.mext.go.jp/en/policy/education/lawandplan/title01/detail01/1373798.htm>

² See the schema described in paragraph 11 of Section II of these guidelines.

*A2 Please indicate which GCED and ESD themes are covered in national or sub-national laws, legislation or legal frameworks on education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown, 99 = not applicable (*e.g. where the given level of government is not responsible for education*)

	National				Sub-national			
	Pre-primary	Primary/secondary	Tertiary	Non-formal	Pre-primary	Primary/secondary	Tertiary	Non-formal
1. Cultural diversity and tolerance	1	1	1	1	99	99	99	99
2. Gender equality	1	1	1	1	99	99	99	99
3. Human rights	1	1	1	1	99	99	99	99
4. Peace and non-violence	1	1	1	1	99	99	99	99
5. Climate change	1	1	1	1	99	99	99	99
6. Environmental sustainability	1	1	1	1	99	99	99	99
7. Human survival and well-being	1	1	1	1	99	99	99	99
8. Sustainable consumption and production	1	1	1	1	99	99	99	99

A3a. Please describe any specific current national or sub-national education policies, frameworks or strategic objectives in your country that promote global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes³ are mentioned explicitly or are inferred and what stypes or levels of education are covered.

In Japan, ESD is promoted through the following education policies and frameworks.

- The development of the builders of a sustainable society was referred to in the new National Curriculum Standards (Public Notice of March 2017, Public Notice of March 2018) and in the Third Basic Plan for the Promotion of Education (Cabinet decision of June 2018).
- The cultivation of the leaders of sustainable community development based on the idea of ESD is indicated in the Fifth Basic Environment Plan (Cabinet Decision of April 2018).
- The basic policy for the promotion of Environmental Conservation Activities, Motivating Participation in Environmental Conservation, Environmental Education, and Collaborative Efforts (Cabinet Decision of June 2018) was amended, in which the need to transform the consciousness of the public and for proactive efforts in the form of "conservation of the sustainable society and environment to which we aspire" were explicitly mentioned.
- The importance of supporting the adoption of "ESD for 2030" and enhancing ESD in Japan and abroad to achieve the SDGs was explicitly mentioned in the SDGs Implementation Guiding Principles Revised Edition (decided by the SDGs Promotion Headquarters in December 2019), and in addition, the SDGs Action Plan also positions ESD as an initiative to develop human resources who will be responsible for leading the achievement of the SDGs.
- The "ESD Implementation Plan" was formulated as a plan that contributes to the commitment of each stakeholder, including the government.
- The "Roundtable Meeting on Education for Sustainable Development(ESD)" comprising stakeholders from NPOs, educational institutions, local governments, companies, etc. was held, and opinions were exchanged on measures to promote ESD.
- In Japan, the UNESCO Associated Schools are positioned as "ESD Promotion Centers" and they work to promote ESD. The National Conference of UNESCO Associated Schools is held once a year to provide opportunities for schools across the country to share examples of excellent ESD initiatives.
- Based on the SDGs, the new National Curriculum Standard and reform of the UNESCO Associated School system by UNESCO, "A Guide to Promoting ESD (Education for Sustainable Development)" was revised in May 2018 and is being used in teacher training. ..

³ See the schema described in paragraph 11 of Section II of these guidelines.

The promotion of ESD at all educational stages, both formal and non-formal, is regulated through these efforts.

B. Curriculum (paras 4 and 10-19 of the *1974 Recommendation*)

B1a. Please describe in which ways GCED and ESD are mainstreamed in school curricula. Indicate whether topics are taught as standalone subjects or are integrated into the curricula of other subjects. Explain whether GCED and/or ESD themes⁴ are mentioned explicitly or are inferred and what types or levels of education are covered.

The National Curriculum Standard for Kindergartens (Public Notice 2017) and the new National Curriculum Standards for Elementary Schools, Lower Secondary Schools and Upper Secondary

⁴ See the schema described in paragraph 11 of Section II of these guidelines.

Schools (Public Notice of March 2017, Public Notice of March 2018) advocate the development of the builders of a sustainable society, and efforts are being made across the subjects.

B1b. Please provide examples of curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents.

The National Curriculum Standard for Kindergartens (Public Notice 2017) and the new National Curriculum Standards for Elementary Schools, Lower Secondary Schools and Upper Secondary Schools (Public Notice of March 2017, Public Notice of March 2018) advocate the development of the builders of a sustainable society.

Other (please specify)								
Technology and Home Economics	1	1	1	0	1	1	1	1

*B4 Please indicate the approaches used to teach GCED and ESD in primary and secondary education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Global citizenship and education for sustainable development
GCED/ESD are taught as separate subject(s)	0
Cross-curriculum approach (<i>e.g. GCED/ESD are taught in more than one subject but not throughout the curriculum</i>)	1
Integrated approach (<i>e.g. GCED/ESD are taught throughout the whole curriculum</i>)	1
Whole school approach (<i>e.g. GCED/ESD are integrated in the school ethos, management, governance, curriculum, teacher training, teaching practices, the learning environment and in learning experiences in the community and life outside school</i>)	1

B5 Please indicate which human rights education themes are taught as part of the curriculum at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
2. Human rights education	1	1	1	
3.1 equality and non-discrimination based on race, colour, language, religion, disability, political or other opinion, national or social origin, birth or other status	1	1	1	
3.2 human rights values, human dignity, justice, inclusion and participation	1	1	1	
3.3 respect for human rights and fundamental freedoms (as outlined in international conventions and declarations)	1	1	1	
Remarks: In regards to Non-formal education, it is difficult to answer such questions since the educational contents, forms, and instructors vary.				

C. Teacher education (including the training of trainers and educators) (paras 4 and 33-37 of the *1974 Recommendation*)

C1a. Please describe in which ways GCED and ESD are mainstreamed in initial training and in continuing professional development of teachers, trainers and educators. Indicate whether all teachers, trainers and educators or only some are required to receive training to teach GCED and/or ESD.

In line with the reference to the development of the builders of a sustainable society in the new National Curriculum Standards (Public Notice of March 2017, Public Notice of March 2018) and the Third Basic Plan for the Promotion of Education (Cabinet Decision of June 2018), the concept of ESD was also included in the training for novice teachers and the continuous training for professional development, and most of the teachers take part in this training in accordance with their career stage.

C1b. Please provide examples of teacher training policies or curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents. If possible, include examples related to initial training and to continuing professional development.

The Ministry of Education, Culture, Sports, Science and Technology and the Japanese National Commission for UNESCO prepared "A Guide to Promoting ESD" (hereinafter referred to as "Guide") in March 2016 (later revised in May 2018), and use of the Guide is encouraged in nationwide training.

Support was provided for 44 ESD educator training institutions (ESD Consortium and ASPUnivNet), and many teachers participated in competency-building activities.

Since 2019, financial support (subsidies) has been provided for projects such as teacher training and curriculum development so as to promote education (ESD) to develop leaders for achievement of the SDGs, which are being implemented by universities, the boards of education and other organizations.

In addition, "training for teachers and staff as a leader of environmental education and learning promotion" organized by the Ministry of the Environment and supported by the Ministry of Education, Culture, Sports, Science and Technology is held every year and train ESD practitioners by utilizing A Guide to Promoting ESD. This training consists of a curriculum design course which is mainly for elementary and lower and upper secondary school teachers and staff, and a program design course which is mainly for school teachers and staff, companies / associations staff, students, etc. (In FY 2019, the curriculum design course was conducted twice in Tokyo and instructors were dispatched to 11 areas. Also, the program design course was conducted in 9 areas.)

Training for teachers and staff as a leader of environmental education and learning promotion (Japanese only)

https://jeef.or.jp/activities/esd_teacher/

We provide opportunities for Japanese teachers to be dispatched overseas to exchange and share knowledge and experiences including those related to the promotion of ESD in schools.

In some cases, trainings on SDGs or ESD are included in the teacher license-renewal course held at universities.

*C2 Please indicate whether teachers, trainers and educators are trained to teach GCED and ESD during initial or pre-service training and/or through continuing professional development. Please enter the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Initial or pre-service training				
For teachers of selected subjects only (in which GCED or ESD are typically taught)	1	1	1	
For teachers of other subjects	1	1	1	
Continuing professional development				
For teachers of selected subjects only (in which GCED or ESD are typically taught)	1	1	1	
For teachers of other subjects	1	1	1	
Remarks: In regards to Non-formal education, it is difficult to answer such questions since the educational contents, forms, and instructors vary.				

*C3 Please indicate on which GCED and ESD themes pre-service or in-service training is available for teachers, trainers and educators at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	1	1	
2. Gender equality	1	1	1	
3. Human rights	1	1	1	
4. Peace and non-violence	1	1	1	
5. Climate change	1	1	1	
6. Environmental sustainability	1	1	1	
7. Human survival and well-being	1	1	1	
8. Sustainable consumption and production	1	1	1	
Remarks: In regards to Non-formal education, it is difficult to answer such questions since the educational contents, forms, and instructors vary.				

*C4 Please indicate whether teachers, trainers and educators are trained to teach the following dimensions of learning in GCED and ESD. Please enter the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Knowledge	1	1	1	
Skills	1	1	1	
Values	1	1	1	
Attitudes and behaviours	1	1	1	
Remarks: In regards to Non-formal education, it is difficult to answer such questions since the educational contents, forms, and instructors vary.				

*C5 Please indicate whether teachers, trainers and educators are trained to use the following approaches to teach GCED and ESD in primary and secondary education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Global citizenship and education for sustainable development
GCED/ESD are taught as separate subject(s)	0
Cross-curriculum approach (<i>e.g. GCED/ESD are taught in more than one subject but not throughout the curriculum</i>)	1
Integrated approach (<i>e.g. GCED/ESD are taught throughout the whole curriculum</i>)	1
Whole school approach (<i>e.g. GCED/ESD are integrated in the school ethos, management, governance, curriculum, teacher training, teaching practices, the learning environment and in learning experiences in the community and life outside school</i>)	1

D. Student assessment (paras 4 and 5 of the *1974 Recommendation*)

D1a. Please describe in which ways GCED and ESD are covered in student assessments and examinations. Indicate whether students are assessed only on their knowledge of and skills related to the topics being tested or also on their values, attitudes and/or behaviours.

In the pupils and students' learning assessments in elementary and secondary education, not only knowledge and skills, but also abilities to think, make judgement and express themselves and motivation to learn, and humanity are assessed. In addition, a personal evaluation based on the specific efforts of each pupil and student is assessed as well. With regard to kindergartens, an assessment is conducted to capture the growth of young children in terms of the "basics of knowledge and skills", "the basics for thinking, decision-making, expression, etc." and "ability to learn, humanity, etc.". In higher education, we believe that each institution appropriately assesses students based on the aims and purposes of GCED and ESD.

*D2 Please indicate whether the GCED and ESD themes below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	1	1	
2. Gender equality	1	1	1	
3. Human rights	1	1	1	
4. Peace and non-violence	1	1	1	
5. Climate change	1	1	1	
6. Environmental sustainability	1	1	1	
7. Human survival and well-being	1	1	1	
8. Sustainable consumption and production	1	1	1	
Remarks: In regards to Non-formal education, it is difficult to answer such questions since the educational contents, forms, and instructors vary.				

*D3 Please indicate which of the dimensions of learning in GCED and ESD below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre- primary	Primary and secondary	Tertiary	Non-formal education
Knowledge	1	1	1	
Skills	1	1	1	
Values	1	1	1	
Attitudes and behaviours	1	1	1	
Remarks: In regards to Non-formal education, it is difficult to answer such questions since the educational contents, forms, and instructors vary.				

E. Mainstreaming of GCED and ESD in laws and policies, curricula, teacher education and student assessment (paras 4-5, 7, 10-19 and 33-37 of the *1974 Recommendation*)

*E1 Based on your responses to questions in the previous four sections (laws and policies, curricula, teacher education and student assessment) please indicate to what extent global citizenship education (GCED) and education for sustainable development (ESD) are mainstreamed⁵ in (a) education laws and policies, (b) curricula (c) teacher education (including the training of trainers and educators) and (d) student assessment in your country. Please enter the appropriate number in each white cell in the table below.

KEY:

0 Not at all	<i>GCED and ESD are not mainstreamed.</i>
1 Partially	<i>Some GCED and/or ESD themes⁶ are mainstreamed. Select this option if GCED is mainstreamed but ESD is not (or vice versa).</i>
2 Extensively	<i>Most GCED and ESD themes are mainstreamed.</i>
9 Not known	<i>It is not known whether GCED and ESD are mainstreamed or not.</i>
99 Not applicable	<i>The given level of government does not have responsibility for the given component (policies, curricula, teacher education or student assessment) and/or does not have responsibility for the given level or type of education. This may occur at the national level in federal countries where education is the responsibility of individual states or at the sub-national level in small countries where there is only one level of government.</i>

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
National				
(a) Education laws and policies	2	2	2	2
(b) Curricula	2	2	2	99
(c) Teacher education	2	2	2	99
(d) Student assessment	2	2	2	99
Sub-national				
(a) Education laws and policies	2	2	2	2
(b) Curricula	2	2	2	99
(c) Teacher education	2	2	2	99
(d) Student assessment	2	2	2	99

⁵ GCED and ESD are mainstreamed if their themes are mentioned explicitly in relevant documents and are expected to be implemented by the relevant authorities (e.g. Ministries, regional or local education authorities), educational institutions (e.g. schools, colleges and universities) and/or education professionals (e.g. teachers, lecturers, trainers and educators) as appropriate.

⁶ Refer to the schema in paragraph 11 of Section II of these guidelines.

F. Technical and vocational education and training (paras 25-29 of the *1974 Recommendation*)

F1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in technical and vocational education and training. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

In Japan, the UNESCO Associated Schools have been positioned as centres for promoting ESD, and ESD has been promoted mainly by the UNESCO Associated Schools. The UNESCO Associated Schools include several commercial high schools and technical high schools, which are also working on ESD from a TVET perspective. Some good practices in the related schools are given below.

- Nagoya Commercial High School: Activities related to the environment and biodiversity
Students came to realise through learning about the relationship between Fujimae-Higata's "reed" plants and the natural environment that "water resources and the water environment" and "ecosystem protection" are important issues. They conducted research to establish an environmental conservation activity as an industry that links together ecology and business, and conducted awareness-raising activities.

- Aichi Commercial High School: Education relating to human rights

In an information society, since correct understanding of information morals is an important matter that leads to protecting one's own rights and the rights of others, the protection of rights such as intellectual property rights, portrait rights, etc. is taught in the subject "Information Processing".

- Akita Commercial High School: Learning about environmental issues (ecological business)"
The goal is to develop the ability to take action towards building a "sustainable society" that balances ecology (ecosystem conservation) and business (commercial and economic activities). Lecturers were invited to give talks to the students so that they could learn about protecting the environment from various angles, and based on these talks, the students created the "Akita Commercial High School Environmental Protection Manifest" and took a straw poll.

- National Institute of Technology, Ishikawa College: Activities relating to overseas training (international understanding)

In recent years, a wave of globalization has spread even to local companies, and companies in the Hokuriku region are also expanding their corporate activities by establishing bases such as factories overseas. In addition, the world's major markets are shifting from Western to Asia, and in particular, the development of Southeast Asia has been remarkable. For this reason, overseas training was conducted mainly in Southeast Asia for fourth year students in the second semester, giving an opportunity to see the remarkable development of Asian countries with their own eyes.

G. Adult education (para 30 of the *1974 Recommendation*)

- G1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in adult education and other forms of non-formal education including youth education, out-of-school education, etc. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

The "ESD Japan Youth Conference" is held every year to promote exchanges and collaboration among young (18-35 year-old) leaders who are engaged in ESD, and about 50 people participate on each occasion. By having the participants of this conference work in educational settings and ESD practice sites throughout Japan, the results of the conference are widely returned to students and citizens, producing secondary and tertiary ripple effects. For example, in the schools, the participants share their learning with other teachers, and a new ESD program is implemented throughout the school, which has the effect of expanding the range of learning for all of the students.

In promoting ESD, we recommend cooperating with various stakeholders including the local community, which leads to dissemination and awareness-raising of the SDGs and ESD in the region that includes the adults.

H. Research and International Co-operation (paras 41-45 of the *1974 Recommendation*)

- H1 Please describe what kinds of research or experimentation have been carried out to improve the implementation of GCED and/or ESD. Describe briefly how the results of such activities have influenced education policies, curricula and/or teaching practices.

From 2014 to 2018, with the support of the Ministry of Education, Culture, Sports, Science and Technology, the boards of education and universities took the lead to form an ESD consortium together with the UNESCO Associated Schools, which are the centres for promoting ESD. The "ESD Consortium Project" was implemented to promote exchanges between the UNESCO Associated Schools inside Japan and overseas, and many activities were carried out to improve the implementation of ESD and further disseminate it. As examples of this project, we will introduce the "Yokohama City ESD Promotion Consortium" of the Yokohama City Board of Education and the "ESD Consortium on Global Human Resource Development through the Training of Teachers" of Hiroshima University.

In response to the revision of the National Curriculum Standards, the Yokohama City Board of Education fully incorporated ESD in the school management and curriculum organization of Yokohama City Elementary School, and in order to disseminate ESD in the schools in the city, the school management and educational activities and curriculum design were reviewed, and the school calendar and competencies were clarified with an awareness of ESD. In addition, teacher exchanges and lesson research were conducted to enhance the practices of ESD. Specifically,

the Yokohama City ESD Promotion Consortium was established, and teaching, training, and exchanges were carried out by the ESD promotion schools, and the outcomes of these activities were compiled as activity casebooks and training materials for the teachers and staff.

Based on the thinking that, in order to enhance ESD, it is important to train the teachers educating the human resources who will be responsible for building a sustainable society, Hiroshima University established a consortium with the goal of training teachers and promoting exchanges between the UNESCO Associated Schools in collaboration with industry, government and academia, and has been holding teacher training sessions and seminars for students who wish to become teachers in charge of ESD at educational institutions in the near future. In addition, since Hiroshima is a Global Peace City, in order to be able to create an education program that develops global human resources who will be able to contribute to world peace, Hiroshima University has been planning diverse teacher training such as overseas training on the theme of peace education and education on international understanding for in-service teachers and university students, and has focused on teacher training to develop human resources with problem-solving skills and a global mindset, who will be able to contribute to global peace. In addition, teacher workshops and lectures have been held on developing the competencies related to ESD, and as well as large-scale workshops, the university increased the number of medium-sized workshops and lectures to provide more training opportunities for teachers, and pursued the educational content necessary to develop leaders of ESD.

In order to share the outcomes of the activities of these consortiums inside and outside the region, under the co-sponsorship of the affiliated universities, the Prefectural Federation of UNESCO Associated Schools in Hiroshima, the Prefectural Federation of the UNESCO Association in Hiroshima, companies and various organizations, in July and December 2018, an ESD workshop for global human resource development, and presentations and a workshop on practical research organized by the UNESCO Associated Schools and Hiroshima Prefecture ESD Award-winning schools were held. At the workshops, efforts were made to visualize the activities of the UNESCO Associated Schools through lectures given by researchers involved in ESD, reports on the practices of schools working on ESD, and dissemination of the results, and these workshops became forums for mutual information exchange among the UNESCO Associated Schools. In addition, participants other than the UNESCO Associated Schools were proactively encouraged to participate and opportunities were provided to attend the excellent practical presentations in order to promote the spread of ESD and to improve the competencies of the teachers and students wishing to become teachers.

H2 Please indicate which types of activities are available that promote international co-operation at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Hosting of international meetings on GCED and/or ESD	1	1	1	1
Participation in international meetings abroad on GCED and/or ESD	1	1	1	1
Support for programmes hosting foreign students, researchers and/or teachers	1	1	1	1
Membership of international networks including ASPnet	1	1	1	1
Joint research projects on GCED and/or ESD with foreign institutions	1	1	1	1
Other activities (please specify):				

I. Any other comments

I1 Please indicate whether your country has faced any constraints, in particular related to global or national crises, including natural disasters, in implementing the 1974 Recommendation during the reporting period.

☐ Covid-19

In Japan, from the perspective of putting the health and safety of the children first and preparing in advance for the risk of infection due to the large number of children and teachers gathering for a prolonged period of time on a daily basis, at the request of the government, the elementary schools, lower secondary schools, upper secondary schools, schools for special needs education and vocational schools were temporarily closed from March 2nd. After the spring break, the government declared a state of emergency on April 7, and many schools closed once again. Subsequently, the schools were reopened sequentially from the latter half of May, and at the time of June 1, about 98% of schools had reopened. In addition, as of April 10, 2020, more than 90% of the universities and

colleges of technology postponed the start of their regular classes or conducted distance learning (including plans). As of June 1, about 90% of the universities and colleges of technology started teaching classes (including interviews and distance learning), but in the current situation where society as a whole has to live with COVID-19 for a long period of time, it is necessary to continue to take measures in order to balance infectious disease control with guaranteeing healthy learning for the students.

○ Natural disasters

Kyushu floods in July 2020

Typhoon Hagibis (October 2019)

Typhoon Faxai (September 2019)

Typhoon Danas (July 2019)

South Kyushu floods (July 2019)

2018 Hokkaido Eastern Iburi Earthquake (September 2018)

Japan floods in July 2018

2018 Osaka earthquake (June 2018)

In the affected areas, human and physical damage occurred, and measures such as temporary closure and shortened classes were taken.

- 12 Please provide any other relevant information or clarifications regarding the implementation of the 1974 Recommendation or the mainstreaming of GCED and ESD in your country's education system.

In Japan, the mainstreaming of ESD in school education has been achieved through the following two points.

- The development of the builders of a sustainable society was referred to in the new National Curriculum Standards (Public Notice of March 2017, Public Notice of March 2018) and the Third Basic Plan for the Promotion of Education (Cabinet Decision of June 2018). As a result, it is expected that education will be developed that incorporates the idea of "education for sustainable development" for the pupils and students of all kindergartens, elementary, lower secondary and upper secondary schools throughout the country.
- The UNESCO Associated Schools have been positioned as centres for promoting ESD and efforts have been made to promote the UNESCO Associated Schools. As of 2020, there are 1,120 UNESCO Associated Schools in Japan, and they contribute to the spread and mainstreaming of ESD in school education in Japan.
