

REPORT
ON THE APPLICATION OF THE 1974 RECOMMENDATION
CONCERNING EDUCATION FOR INTERNATIONAL UNDERSTANDING,
CO-OPERATION AND PEACE AND EDUCATION RELATING TO HUMAN RIGHTS
AND FUNDAMENTAL FREEDOMS
IN POLAND
in the period 2017-2020

Information about the respondent

Country:

Poland

Organization:

Ministry of Education and Science

Date of submission:

31 January 2021

Other contributors consulted during the completion of this questionnaire

Please indicate below the names of other organizations and contributors consulted during the completion of this questionnaire.

Government institutions including other Ministries (please specify):

Ministry of Higher Education and Science / Ministerstwo Nauki i Szkolnictwa Wyższego /
Ministry of Culture and National Heritage / Ministerstwo Kultury i Dziedzictwa Narodowego /
Ministry of Climate and Environment / Ministerstwo Klimatu i Środowiska /
Ministry of Development, Labour and Technology / Ministerstwo Rozwoju, Pracy i Technologii /
Ministry of Sport / Ministerstwo Sportu /
Government Plenipotentiary for Equal Treatment / Pełnomocnik Rządu do spraw Równego Traktowania /

National human rights institutions (please specify):

Local and regional authorities responsible for education (please specify):

Other local and regional authorities (please specify):

Organizations representing education stakeholders (e.g. teachers, students, parents, etc.) (please specify):

Council for Dialogue with the Young Generation / Rada Dialogu z Młodym Pokoleniem /
Polish Council of Youth Organizations / Polska Rada Organizacji Młodzieżowych /
The Council of Children and Youth of the Republic of Poland to the Minister of Education and Science / Rada Dzieci i Młodzieży Rzeczypospolitej Polskiej /
Youth Climate Council / Młodzieżowa Rada Klimatyczna /
Youth ecological Council / Młodzieżowa Rada Ekologiczna /

Other civil society organizations (please specify):

Coalition for Open education / Koalicja Otwartej Edukacji /
Fundacja Edukacja dla Demokracji
Civic Education Association / Społeczne Towarzystwo Oświatowe /
Citizens for Education / Obywatele dla Edukacji /
Polish Committee of the Helsinki Foundation for Human Rights / Polski Komitet Helsińskiej Fundacji Praw Człowieka /
Amnesty International Poland Association / Stowarzyszenie Amnesty International Polska /

Others (please specify):

Polish Committee for UNESCO / Polski Komitet do spraw UNESCO /

Questionnaire

A. Laws and policies (preamble and paras 4 and 7 of the 1974 Recommendation)

A1a. Please describe any specific national or sub-national laws, legislation or legal framework(s) in your country that govern the promotion of global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes¹ are mentioned explicitly or are inferred and what types or levels of education are covered.

The preamble of the Act of 14 December 2016 – *Education Law* stipulates that education in the Republic of Poland is a common good of the whole society, it is guided by the principles contained in the Constitution of the Republic of Poland, as well as the indications laid out in the Universal Declaration of Human Rights, International Covenant on Civil and Political Rights, and the Convention on the Rights of the Child. The education system in Poland shall provide inter alia:

- shaping pro-social attitudes with pupils, including through the possibility of participation in volunteering activities, conducive to active participation in social life;
- disseminating knowledge about the principles of sustainable development among children and youth, and shaping attitudes fostering its implementation on a local, national and global scale;
- dissemination of knowledge among children and youth on the principles of rational nutrition and prevention of food waste;
- shaping entrepreneurship attitudes in pupils conducive to active participation in economic life, including through the application of innovative programme, organisational, or methodological solutions in the education process (article 1 of the Act of 14 December – *Education Law*).

Educational (upbringing) function of the school

Schools and institutions of the Polish system of education respect human rights and support the educational role of the family. The educational activity of the school is one of the basic goals of the state educational policy. The system of values presented at school should provide each student with the conditions necessary for his/her development, prepare him/her to fulfil family and civic obligations on the basis of the principles of solidarity, democracy, tolerance, justice and freedom. During coherent activities combining education with upbringing, the sense of individual, cultural, national, regional and ethnic identity is strengthened and the sense of dignity of oneself and others is formed.

The aim of upbringing is to support the pupils in comprehensive development aimed at achieving full physical, emotional, intellectual, spiritual and social maturity. Introducing students to the world of values, including dedication, cooperation, solidarity, altruism, preparation for building social relationships conducive to the safe development of the student takes place not only during compulsory educational activities, but also during school trips, extracurricular and out of school activities.

In 2019, the regulations also introduced the obligation to conduct an annual diagnosis of students' developmental needs in the school environment, including protective and risk factors, with particular emphasis on the risks associated with the use of psychotropic substances, substitutes and new psychoactive substances. The head of the school or facility or an employee of the school or facility authorized by the head is responsible for the diagnosis.

The educational and preventive program is adopted by the parents' council in agreement with the pedagogical council. Therefore, it is the parents who have a significant impact on programs, projects, undertakings, and initiatives, including those implemented in cooperation with non-governmental organizations, in accordance with the earlier definition of the areas of intervention.

¹ See the schema described in paragraph 11 of Section II of these guidelines.

The educational and preventive program should include educational and preventive activities according to the knowledge and developmental age of students, the standards of respect for the dignity of others, responsibility for their own decisions, and the student's rights.

Preventive actions also relate to the methods of counteracting the manifestations of intolerance, including for national and ethnic minorities. The aims of education and teaching content adjusted to the age, experiences and cognitive abilities of students are defined in the core curriculum. The main duty of the school is to shape patriotic and civic attitudes, as well as a sense of national, cultural and individual identity and awareness. Hence, it becomes necessary to build good relationships between parents, teachers and students. A uniform approach to education which takes into account universal values is the right direction of eliminating or minimizing difficult educational situations and inappropriate behaviour of children and adolescents.

The school set of curricula and the educational and preventive curriculum of the school form a coherent whole and must take into account all the requirements described in the new core curriculum. Their preparation and implementation are the task of both the entire school and each teacher.

The purpose of the above-mentioned interactions is to equip students with the knowledge that all people have equal rights, regardless of where they are born, what they look like, what religion they profess and what their material status is. Schools are obliged to respect human rights, and in educational activities such as: history, ethics and knowledge of society, the content of teaching directly relates to shaping the attitudes of tolerance, issues of human rights and their protection, and civic attitudes.

The strategic framework for civic education and education for sustainable development is included in the main programming document on skills in Poland. It is the Integrated Skills Strategy 2030 (general part) adopted by the Council of Ministers on January 25, 2019. The Integrated Skills Strategy 2030 is consistent with the main national strategy - Strategy for Responsible Development adopted by the Council of Ministers on February 14, 2017.

The Integrated Skills Strategy 2030 also refers to the government programmes supporting the development of civil society, such as:

- Civil Society Organisations Development Programme for 2018-2030;
- Solidarity Corps – The Programme for the Support and Development of Long-term Volunteerism for 2018-2030;
- Government programme of Support for the Development of Polish Scout and Scouting Organisations for 2018-2030.

The Integrated Skills Strategy 2030 (detailed part). Policy to develop skills in line with the idea of lifelong learning, adopted by the Council of Ministers on 28 December 2020, is the operationalization of the priorities and main directions of activities included in the Integrated Skills Strategy 2030 (general part).

Children and youth participation in social life

The Council of Children and Youth of the Republic of Poland to the Minister of Education and Science (Rada Dzieci i Młodzieży Rzeczypospolitej Polskiej przy Ministrze Edukacji i Nauki Narodowej - earlier Minister of National Education) has been operating since 2016 – <https://www.gov.pl/web/edukacja-i-nauka/rada-dzieci-i-mlodziezy-rzeczypospolitej-polskiej-przy-ministrze-edukacji-i-nauki>. The Council's tasks include expressing opinions and submitting proposals on issues concerning children and adolescents in the scope of matters covered by the department of government administration for education and upbringing, in particular presenting opinions on planned changes and proposals of solutions, as well as promoting patriotic and civic attitudes and activity of young people in public life, who play a key role in creating civil society. The Council consists of 16 members and their deputies appointed by the Minister of Education and Science, one member and one deputy from each province.

In September 2019, the **Council for Dialogue with the Young Generation** was established - the first in the history of Poland, a civic body representing the interests of young people at the central level – <https://www.gov.pl/web/pozytek/rada-dialogu-z-mlodym-pokoleniem-lista>

The tasks of the of the Council for Dialogue with the Young Generation shall include in particular:

- 1) expressing opinions on issues concerning the application of the Act of 24 April 2003 *on Public Benefit Activity and Volunteer Work* (Dziennik Ustaw [*Polish Journal of Laws*] of 2020, item 1057) in the scope concerning the young generation;
- 2) expressing opinions on drafts of legal acts and government programmes in the scope concerning the young generation;
- 3) initiating and supporting actions aimed at increasing the level of civic participation of young people in the Republic of Poland;
- 4) creation of a dialogue forum between non-governmental organisations and other social institutions and public authorities in the scope concerning the young generation;
- 5) supporting the activities of civil dialogue institutions acting for the benefit of the young generation, including children and youth, with particular emphasis on youth councils of communes.

Council for Dialogue with the Young Generation consists, inter alia, of representatives of the President of the Republic of Poland, Commissioner for Child Rights, President of the Council of Ministers, minister responsible for education and upbringing matters, minister responsible for higher education and science matters, minister responsible for physical culture matters; Chair of the Public Benefit Committee, local government units, non-governmental organisations, unions and agreements of non-governmental organisations and entities listed in the Article 3 (3) of the Act of 24 April 2003 *on Public Benefit Activity and Volunteer Work*, and youth councils of communes, and the Parliament of the Students of the Republic of Poland (Parlament Studentów Rzeczypospolitej Polskiej).

On 23 September 2020, the Regulation of the Council of Ministers of 22 September 2020 on the appointment of the **Government Plenipotentiary for Youth Policy** (Dziennik Ustaw [*Polish Journal of Laws*] of 2020, item 1631) entered into force <https://dziennikustaw.gov.pl/DU/2020/1631>. The Plenipotentiary's tasks include:

- 1) initiating activities and cooperation with government administration authorities, local government bodies, and non-governmental organisations in the scope of activities that increase the involvement of young people in public life;
- 2) coordinating dialogue between the government administration and socio-economic partners, non-governmental organisations, and local government authorities in the field of initiatives in the area of youth policy;
- 3) monitoring the work undertaken by government administration bodies and local government authorities in matters related to the situation of young people in Poland;
- 4) cooperation with the Council for Dialogue with the Young Generation in the field of issuing opinions on draft legal acts and presenting recommendations on the activities of government administration bodies and local government authorities in matters concerning youth;
- 5) coordinating the preparation and implementation – based on consultations conducted with a broad circle of stakeholders – a strategic document concerning state's actions in the area of youth policy.

On 31 March 2020, the Regulation of the Minister of Climate of 30 March 2020 on the establishment of the **Youth Climate Council** (Dziennik Urzędowy Ministra Klimatu [*Official Journal of the Minister of Climate*] of 2020, item 20) entered into force. The Youth Climate Council is an advisory body to the minister responsible for climate matters. The scope of the Council's activities includes expressing opinions on issues covered by government administration departments on climate and energy, in particular presenting opinions on planned changes in policies, strategies and legislative changes in the scope of the competence of the Minister of Climate, including proposals of solutions. The Council consists of 32 members aged 13-26, selected from among candidacies submitted as part of the recruitment process organised by the Ministry of Climate. The council members were nominated pursuant to the decision of the minister

responsible for climate matters of 8 September 2020 on the nomination of the Youth Climate Council members.

1 June 2020 the Minister of Environment and the Commissioner for Child Rights signed an agreement on the establishment of the **Youth Ecological Council**. The Council is composed of 32 persons aged 13-21 recruited from all over Poland. The first meeting took place on 30 September 2020 during the *Green Forum of the Youth*. The meetings are scheduled to be held at least once a quarter, with the participation of the minister responsible for environment matters and the Commissioner for Child Rights. The competences of the Youth Ecological Council include expressing opinions on matters covered by government administration activities concerning the environment, in particular presenting opinions on planned changes in policies, strategies and legislative changes in the scope of competence of the minister responsible for environment matters, including proposals of solutions. Apart from the advisory competence, the Council have a budget (PLN 32 thousand, provided by State Forests) which may allocate towards implementation of pro-ecological activities of children and youth. Project substantive partners are: State Forests (Lasy Państwowe), National Parks (Parki Narodowe) and the National Geological Institute (Państwowy Instytut Geologiczny).

On 31 December 2020 the regulation of the Minister of Justice of 21 December 2020 on the appointment of **Youth Council of Justice** (Dziennik Urzędowy Ministra Sprawiedliwości [*Official Journal of the Minister of Justice*] of 2020, item 264) <https://www.gov.pl/web/sprawiedliwosc/poz-532>. The aim of the Youth Justice Council is, above all, to create and promote attitudes focused on active cooperation in the development and building of legal awareness among young people, as well as involving young people in the dialogue on the judiciary and legal education in Poland. In addition, the Council will support activities undertaken by the Minister of Justice in the field of youth, at the same time undertaking initiatives that will serve to promote free legal aid and free civic counseling. The Council will consist of 12 to 24 members, aged 16-26, selected from among candidacies submitted as part of the recruitment process. The first round of recruitment started on 4 January and will have been carried out on 31 January 2021.

A1b. Please provide the full names of any laws, legislation or legal frameworks referred to in A1a and, where possible, web links to relevant documents.

- 1) Act of 14 December 2016 – Education Law (Dziennik Ustaw [*Polish Journal of Laws*] of 2020, item 910 – <https://dziennikustaw.gov.pl/DU/2020/910> - with further amendments)
- 2) Regulation of the Minister of National Education of 14 February 2017 *on the core curriculum for pre-school education and general education in primary schools, including for pupils with moderate or severe intellectual disability, general education for stage-one sectoral VET schools, general education for special schools preparing for employment, and general education for post-secondary schools* (Dziennik Ustaw [*Polish Journal of Laws*] of 2017, item 356) – <https://dziennikustaw.gov.pl/DU/rok/2017/pozycja/356> - with further amendments.
- 3) Regulation of the Minister of National Education of 30 January 2018 *on the core curriculum for upper secondary schools, technical upper secondary schools, and second-stage sectoral VET schools* (Dziennik Ustaw [*Polish Journal of Laws*] of 2018, item 467) - <https://dziennikustaw.gov.pl/DU/rok/2018/pozycja/467> - with further amendments.

B. Curriculum (paras 4 and 10-19 of the *1974 Recommendation*)

B1a. Please describe in which ways GCED and ESD are mainstreamed in school curricula. Indicate whether topics are taught as standalone subjects or are integrated into the curricula of other subjects. Explain whether GCED and/or ESD themes³ are mentioned explicitly or are inferred and what types or levels of education are covered.

As part of their program autonomy, universities independently create study programmes (including postgraduate study programmes), and in the case of studies (and postgraduate studies) preparing for the profession of a teacher working in an education system unit – obligatorily taking into account the standard of teacher education. The standard defines the learning outcomes. And in their study programmes (postgraduate study programmes) for individual fields of study, the universities define classes (subjects) assigning them appropriate learning outcomes and curriculum content that provide to achieve these outcomes.

B1b. Please provide examples of curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents.

³ See the schema described in paragraph 11 of Section II of these guidelines.

***B2** Please indicate which GCED and ESD themes are taught as part of the curriculum at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

3.3 respect for human rights and fundamental freedoms (as outlined in international conventions and declarations)	1	1	1	1

C. Teacher education (including the training of trainers and educators) (paras 4 and 33-37 of the 1974 Recommendation)

C1a. Please describe in which ways GCED and ESD are mainstreamed in initial training and in continuing professional development of teachers, trainers and educators. Indicate whether all teachers, trainers and educators or only some are required to receive training to teach GCED and/or ESD.

The content of GCED and ESD is present in the scope specified in the provisions of the Regulation of the Minister of Science and Higher Education of 25 July 2019 on the standard of education preparing for the teaching profession (Dziennik Ustaw [Polish Journal of Laws] of 2019, item 1450, as amended). The regulation is the basis for the creation of teacher education programs for full-time and postgraduate studies by universities.

The obligatory tasks of public in-service training institutions run by local government (the voivodeship, powiat or commune) include organizing and providing in-service training for teachers, inter alia, on the implementation of the core curricula, including the development of curricula. Therefore, in-service teacher training institutions conduct teacher training to implement all the content contained in the core curricula defined for individual subjects and types of classes at individual educational stages.

Teachers receive proposals of training / improvement in the field of global education and sustainable development, including:

- in the Education Development Centre (ORE - a nationwide education institution, subordinated to the Ministry of National Education),
- in local vocational training institutions,
- through the activities of the Global Education Coordinators network (run by ORE),
- as part of the "Etyka nie tylko dla Smyka" [*Ethics not only for Kid*] programme.

The proposed forms of professional development take into account the issues (in terms of knowledge, values, attitudes and behaviour) concerning:

- cultural diversity / tolerance,
- human rights,
- climate change,
- non-violence,
- sustainable consumption and production.

Elements of global and civic education at primary and secondary school levels are introduced: cross-curricularly (topics are included in different subjects, but not in all of them), through the implementation of integrated content (mainly at the level of early childhood education).

In Poland, there is also the **Civic Education Centre (CEO** - <https://ceo.org.pl/programy>) - it implements educational programs (annual or several years) that involve teaching staff, principals and students, conducts trainings, workshops for pedagogical councils, Internet courses and postgraduate studies for teachers and principals, publishes textbooks on knowledge about society and educational materials for work with young people.

Currently, the CEO implements approx. 37 educational programmes, including:

- programs that introduce activating teaching methods, formative assessment and develop teacher collaboration, changing the school's work culture;
- programs encouraging students to undertake activities in the field of: voluntary work, self-governance and entrepreneurship at school and in the local environment;
- global and ecological education programs explaining how the modern world works, how to take care of it and of the environment and on each other responsibly;

- cultural and media education programs that develop critical thinking and encourage conscious participation in and creation of culture;
- programs translating the world of local, national and European politics and encouraging involvement in public life;
- programs supporting building good relationships in the classroom based on respect for diversity and helping to tackle difficult topics.

C1b. Please provide examples of teacher training policies or curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents. If possible, include examples related to initial training and to continuing professional development.

Related to initial training:

Regulation of the Minister of Higher Education and Science of 25 July 2019 on the standard of education preparing for the teaching profession (Dziennik Ustaw [*Polish Journal of Laws*] of 2918, item 1450) - <https://dziennikustaw.gov.pl/DU/rok/2019/pozycja/1450>, with further amendments.

Related to in-service teacher training:

Regulation of the Minister of National Education of 28 May 2019 on teacher training institutions - <https://dziennikustaw.gov.pl/DU/rok/2019/pozycja/1045>

*C2 Please indicate whether teachers, trainers and educators are trained to teach GCED and ESD during initial or pre-service training and/or through continuing professional development. Please enter the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Initial or pre-service training				
For teachers of selected subjects only (in which GCED or ESD are typically taught)	1	1	1	1
For teachers of other subjects	1	1	1	1
Continuing professional development

Attitudes and behaviours	1	1	1	1

*C5 Please indicate whether teachers, trainers and educators are trained to use the following approaches to teach GCED and ESD in primary and secondary education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Global citizenship and education for sustainable development
GCED/ESD are taught as separate subject(s)	0
Cross curriculum approach (e.g. GCED/ESD are taught in more than one subject but not throughout the curriculum)	1
Integrated approach (e.g. GCED/ESD are taught throughout the whole curriculum)	0
Whole school approach (e.g. GCED/ESD are integrated in the school ethos, management, governance, curriculum, teacher training, teaching practices, the learning environment, and in learning experiences in the community and life outside school)	1

D. Student assessment (paras 4 and 5 of the *1974 Recommendation*)

D1a. Please describe in which ways GCED and ESD are covered in student assessments and examinations. Indicate whether students are assessed only on their knowledge of and skills related to the topics being tested or also on their values, attitudes and/or behaviours.

The teaching content included in the core curriculum is also the requirements for external examinations. Therefore, the examination requirements included in the core curriculum may be checked in an external examination.

To verify the learning outcomes achieved in education preparing for the teaching profession in studies and postgraduate studies, in accordance with the standard, diverse forms of checking are used. They are adequate to the category of knowledge, skills or social competences to which these effects relate (written exams, oral exams, direct observation of the future teacher while performing activities appropriate for a given professional task). The method of organization of education, also in terms of verification of the achieved learning outcomes, is the responsibility of the entity providing the education.

*D2 Please indicate whether the GCED and ESD themes below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	0	1	1	9
2. Gender equality	0	1	1	9
3. Human rights	0	1	1	9
4. Peace and non-violence	0	1	1	9
5. Climate change	0	1	1	9
6. Environmental sustainability	0	1	1	9
7. Human survival and well-being	0	1	1	9
8. Sustainable consumption and production	0	1	1	9

*D3 Please indicate which of the dimensions of learning in GCED and ESD below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Knowledge	0	1	1	9
Skills	0	1	1	9
Values	0	1	1	9
Attitudes and behaviours	0	1	1	9

E. Mainstreaming of GCED and ESD in laws and policies, curricula, teacher education and student assessment (paras 4-5, 7, 10-19 and 33-37 of the 1974 Recommendation)

*E1 Based on your responses to questions in the previous four sections (laws and policies, curricula, teacher education and student assessment) please indicate to what extent global citizenship education (GCED) and education for sustainable development (ESD) are mainstreamed⁴ in (a) education laws and policies, (b) curricula (c) teacher education (including the training of trainers and educators) and (d) student assessment in your country. Please enter the appropriate number in each white cell in the table below.

KEY:

0 Not at all

GCED and ESD are not mainstreamed.

1 Partially

Some GCED and/or ESD themes⁵ are mainstreamed. Select this option if GCED is mainstreamed but ESD is not (or vice versa).

2 Extensively

Most GCED and ESD themes are mainstreamed.

9 Not known

It is not known whether GCED and ESD are mainstreamed or not.

99 Not applicable

The given level of government does not have responsibility for the given component (policies, curricula, teacher education or student assessment) and/or does not have responsibility for the given level or type of education. This may occur at the national level in federal countries where education is the responsibility of individual states or at the sub-national level in small countries where there is only one level of government.

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
National				
(a) Education laws and policies	2	2	1	99
(b) Curricula	2	2	1	99
(c) Teacher education	2	2	1	99
(d) Student assessment	2	2	2	99
Sub-national				
(a) Education laws and policies	99	99	99	99
(b) Curricula	99	99	99	99
(c) Teacher education	99	99	99	99
(d) Student assessment	99	99	99	99

⁴ GCED and ESD are mainstreamed if their themes are mentioned explicitly in relevant documents and are expected to be implemented by the relevant authorities (e.g. Ministries, regional or local education authorities), educational institutions (e.g. schools, colleges and universities) and/or education professionals (e.g. teachers, lecturers, trainers and educators) as appropriate.

⁵ Refer to the schema in paragraph 11 of Section II of these guidelines.

F. Technical and vocational education and training (paras 25-29 of the 1974 Recommendation)

- F1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in technical and vocational education and training. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

GCED and ESD in formal education in the education system are included in the core curriculum of general education for a given stage of education.

G. Adult education (para 30 of the 1974 Recommendation)

- G1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in adult education and other forms of non-formal education including youth education, out-of-school education, etc. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

Adult education is divided into formal education (carried out in schools for adults, in second-cycle industry schools and post-secondary schools and in out-of-school forms, as well as within higher education) and non-formal education (carried out outside educational programs in the education system and higher education system).

GCED and ESD in formal education in the education system are included in the core curriculum of general education.

Below there is a description of a part of the area of non-formal education in Poland supported under government programs for the development of civil society.

In 2017, the Parliament adopted an act establishing the National Institute of Freedom - Centre for the Development of Civil Society – <https://dziennikustaw.gov.pl/DU/rok/2017/pozycja/1909>

The Institute is a government executive agency that operates programs for the sustainable development of civil society in both territorial and thematic dimensions (<https://niw.gov.pl/>). Small organizations that promote the ethos of activities for the community and cherishes the local heritage are given special support.

Currently, the Institute is developing 6 programs to support the creation of a strong civil society:

- (1) **The NGO Emergency Support Programme** – it gives a financial aid for organizations that have been affected by the coronavirus epidemic. The aim of this programme is an ad hoc institutional support for organizations and assistance in initiating local actions to combat the effects of the epidemic (<https://niw.gov.pl/nasze-programy/program-covid-19/>);
- (2) **Civic Initiatives Fund** – subsidy programme for non-governmental organizations, under which projects aimed at increasing the involvement of citizens and non-governmental organizations in public life are co-financed (<https://niw.gov.pl/nasze-programy/fio/>);
- (3) **Civil Society Organizations Development Programme for 2018-2030** – programme of direct support for the development of Polish civic organizations, including those dealing with adult education (<https://niw.gov.pl/nasze-programy/proo/>);
- (4) **Corps of Solidarity** – programme for 2018-2030 aimed at comprehensive support for a long-term volunteerism and relationship between a volunteer and an institution using its services (<https://niw.gov.pl/nasze-programy/korpus-solidarnosci/>);
- (5) **Programme of Support for the Development of Polish Scout and Scouting Organizations for 2018-2030** – it is a new form of support for scouting organizations, which are an important partner of the state in activities for the development and education

of young people. Scouting activity is referring to the achievements of the world scouting and the Polish scouting movement (<https://niw.gov.pl/nasze-programy/program-wsparcia-harcerstwa/>);

- (6) **Program for Supporting the Development of Folk Universities for 2020-2030** – the Council of Ministers adopted this program in June 2020. The aim of this program is to develop adult education in the form of Grundtvigian folk universities (<https://niw.gov.pl/nasze-programy/uniwersytety-ludowe/>).

Examples of best practices of the civil society involvement in the area of GCED and ESD:

Akademia Edukacji Antydyskryminacyjnej (Academy of Anti-Discrimination Education) – a cyclical course for teachers, educators of informal education <https://ajcf.pl/akademia-edukacji-antydyskryminacyjnej-5/>. The course equips teachers with knowledge and skills to teach respect and confront hatred. During 6 weekend sessions participants learn to identify and respond to prejudice including, but not limited to, racism, antisemitism, homophobia and anti-Roma racism. During the Academy participants:

- examine the mechanisms of stereotyping, prejudice and discrimination including their manifestations in classrooms
- learn and try new teaching methods for tackling exclusion and hatred
- discuss, prepare and implement their own classroom projects under the supervision of a dedicated mentor

Organizers – Auschwitz Jewish Center, in partnership with Towards Dialogue Foundation and Museum of the History of Polish Jews; supported by the Remembrance, Responsibility and Future Foundation (EVZ).

Szkolne Grupy Praw Człowieka Amnesty International (Amnesty International School Groups of Human Rights) <https://amnesty.org.pl/co-robimy/edukacja/szkolne-grupy/> - bring together young people who, with the support of a teacher (a group tutor), promote human rights in their school and local community. The tutor, as well as the Group's coordinator (a person selected from among young people), remains in contact with the Amnesty International office, which supports the Group in its activities.

Program Szkoła Dialogu Forum Dialogu (School of Dialogue programme) <http://dialog.org.pl/szkola-dialogu/pl/dla-szkol-7/dla-nauczyciela/> - Forum for Dialogue is the largest and oldest Polish non-governmental organization engaging in Polish/Jewish dialogue. In the School of Dialogue programme they educate Polish youth about local Polish/Jewish heritage and inspire them to act. The educational program aims to get students of secondary-level schools acquainted with the history of Jews in Poland as well with their contribution to the social, cultural and economic development of the country and their own towns. Participants explore their local Jewish history and culture and then present what they've learned to other local residents through various activities organized within the town.

Program Szkoła z Klasą 2.0 (Classy School 2.0) <https://www.szkolazklasa.org.pl/programy/szkola-z-klasa/> - a comprehensive school development program, based on design thinking approach, which helps schools to become modern and engaged learning environments. The main goals are to develop students responsibility, enhance empowerment, develop creativity and collaboration. The program supports teachers and directors through on-site trainings, workshops and online coaching for every school. The program operates since 2002, including schools of all educational levels from all over Poland. It has already involved over 9000 schools, 120 000 teachers and a million students. Program is operated by Szkoła z Klasą Foundation with the support of Polish-American Freedom Foundation and in cooperation with the Centre for Citizenship Education.

Tydzień Konstytucyjny (Constitution Week) <http://stowarzyszenieholda.pl/projekty/tydzien-konstytucyjny/> - project operated by *Stowarzyszenie im. Holdy*. As part of the project, legal

practitioners conduct lessons on the importance of the Constitution in the lives of citizens. All this to show how much the Constitution influences the daily affairs of each of us. Lawyers also talk about the law, hate speech, or conduct workshops so that children see how the law works in practice and how it can affect their lives. Since 2016, 8 editions have been held, in which approx. 4,000 lawyers conducted classes for approx. 20,000 students from over 2,500 schools across Poland.

H. Research and International Co-operation (paras 41-45 of the 1974 *Recommendation*)

- H1 Please describe what kinds of research or experimentation have been carried out to improve the implementation of GCED and/or ESD. Describe briefly how the results of such activities have influenced education policies, curricula and/or teaching practices.

- H2 Please indicate which types of activities are available that promote international co-operation at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Hosting of international meetings on GCED and/or ESD	9	9	9	1
Participation in international meetings abroad on GCED and/or ESD	1	1	1	1
Support for programmes hosting foreign students, researchers and/or teachers	9	9	1	1
Membership of international networks including ASPnet	1	1	1	9
Joint research projects on GCED and/or ESD with foreign institutions	1	1	1	1
Other activities (please specify):				

I. Any other comments

- 11 Please indicate whether your country has faced any constraints, in particular related to global or national crises, including natural disasters, in implementing the 1974 Recommendation during the reporting period.

- 12 Please provide any other relevant information or clarifications regarding the implementation of the 1974 Recommendation or the mainstreaming of GCED and ESD in your country's education system.

Ref. point A2, point B2 and point B5, column „Tertiary education”:

The information concerns education in particular fields of study covered by the standard of education preparing for the teaching profession.

The standard of educating subject teachers and pre-school and early-school education teachers refers to the core curriculum of general education (requires the provision of substantive preparation in the scope of the core curriculum).

Ref. point A and point B

Psychological and pedagogical aid

Psychological and pedagogical assistance provided to children and adolescents in kindergartens, schools and institutions consists in identifying and satisfying individual development and educational needs as well as identifying individual psychophysical abilities and environmental factors influencing its functioning in a kindergarten, school and institution, in order to support development potential and create conditions for its active and full participation in the life of the kindergarten, school and institution, and in the social environment. The need to provide a child with psychological and pedagogical assistance may result, inter alia, from experiencing violence.

Education to values, including subjective, dignified and equal treatment of students, plays a significant role. Schools provide each student with the conditions necessary for his/her development, prepare them to fulfill family and civic obligations based on the principles of solidarity, democracy, tolerance, justice and freedom. These tasks are obligatory for all teachers, school staff and the headmaster with pedagogical supervision over the activities carried out in the school.

Pursuant to the provisions of the Education Law Act, pedagogical supervision covers the observance of children's rights and the rights of a student, and the dissemination of knowledge about these rights. The Centre for Education Development and teacher training centres throughout Poland improve the competences of school headmasters and teachers by conducting numerous trainings, conferences and seminars on educational and preventive activities, including the implementation of student, child and human rights.

Ref. point C

The UNESCO Associated Schools Network (UNESCO ASPnet) has been operating in Poland since 1956. It currently has 110 member schools and 5 schools that have completed the candidate period and are waiting for certification.

The aim of the network is to enable its members to develop a sense of belonging to a global community in their students. Currently, one of the priorities of ASPnet is to disseminate knowledge about the Sustainable Development Goals (SDGs) adopted in 2015 in the 2030 Agenda and to

support activities aimed at achieving them. ASPnet focuses in particular on Objective 4.7 - including Education for Informed World Citizens (GCED) and Education for Sustainable Development (ESD).

Member of ASPnet commit to:

- use innovative and participatory teaching methods,
- provide a safe, sustainable, peaceful, inclusive and effective learning environment for all of their students,
- cooperate with schools in their own country and in other countries.
- participate, in each school year, in at least one global or regional project, competition or campaign proposed by UNESCO or in related national activities,
- celebrate of at least two days established by the United Nations.

Ref. point C and point E

The regulations governing the area of higher education and science guarantee the autonomy of Polish universities, including broad program autonomy. The Act of July 20, 2018 – *Law on Higher Education and Science* (Dziennik Ustaw [*Polish Journal of Laws*] of 2020, item 85, with further amendments), in force from October 1, 2018, increased the independence of universities and put more emphasis on improving the quality of education.

The general requirements for the study program are specified in the provisions of the Regulation of the Minister of Science and Higher Education of September 27, 2018 *on studies* (Journal of Laws, item 1861, as amended). In the current system, the Minister of Education and Science does not have the competence to introduce specific content or subjects to study programs in the fields of study provided by universities.

System solutions for establishing study programs in the fields of study grant universities the freedom to shape the didactic offer and establish study programs. Study programs are assessed and improved by the university. Moreover, an external evaluation is systematically performed - the institution evaluating the quality of the studies is the Polish Accreditation Committee. Only in the case of 11 professions (doctor, dentist, pharmacist, nurse, midwife, laboratory diagnostician, physiotherapist, paramedic, veterinarian, architect, teacher), the curriculum must comply with the education standards specified in the regulation of the minister responsible for higher education and science. These education standards constitute a set of rules and requirements in the field of education regarding the method of organization of education, persons conducting this education, general and specific learning outcomes, as well as the method of verification of the achieved learning outcomes (in most cases, the need to define education standards results from the obligation to implement the law to the Polish legal system).

There are no specific regulations or special study programs for the training of academic teachers. Nevertheless, attention should be paid to the preamble of the Act of July 20, 2018 - *Law on Higher Education and Science*, which refers to learning the truth and transferring knowledge from generation to generation, as well as conducting scientific activity based on the indicated principles:

- *each scientist is responsible for the quality and reliability of research and for educating the young generation,*
- *universities and other research institutions carry out a mission of particular importance for society: they make a key contribution to the innovation of the economy, contribute to the development of culture, and shape moral standards in public life.*

Ref. point C, point F and point G

The Ministry of Climate and Environment carries out projects in the field of environmental education, including education about climate change and sustainable environment. Ministerstwo Klimatu i Środowiska realizuje przedsięwzięcia z zakresu edukacji ekologicznej, w tym edukacji o zmianach klimatu, zrównoważonym środowisku.

The activities carried out by the Ministry of Climate and Environment are primarily activities in the field of informal education, where the assumed learning process takes place throughout the life of the individual, based on experience and through daily activities, as well as the nature of activities in the field of non-formal education, e.g. by organizing online workshops. The target groups of the information and educational activities initiated by the Ministry are, in the first place, adults, e.g. running households, and in the second - school youth and educators. Educational activities are based on the provisions of the Act of 27 April 2001 – *Environmental Protection Law* (Dziennik Ustaw [Polish Journal of Laws] of 2020, item 1219, with further amendments), in which the aspect of environmental education is raised, as well as in strategic dimension, in the provisions of the *State Environmental Policy 2030 - development strategy in the field of environment and water management* (Polityka ekologiczna państwa 2030 – strategia rozwoju w obszarze środowiska i gospodarki wodnej PEP2030), in which the detailed objective / direction of intervention with a horizontal dimension was indicated: Environment and education. Developing ecological competences (knowledge, skills and attitudes) of the society". In accordance with PEP2030, activities implemented under the above-mentioned direction of intervention contribute to the implementation of SDGs: 2, 4, 6, 11, 12, 13 and 14.

The strategic basis for educational activities, in the formal and non-formal dimension, are documents focused on the formal education path and the professional qualifications development

Ref. to point D2 and point D3

Assessment and examination are not used in pre-primary education. At the end of this stage of education, a diagnosis of the child's readiness to study at school is carried out, taking into account the skills specified in the core curriculum. The diagnosis concerns the child's development in the physical, emotional, social and cognitive dimensions

General comment by the Helsinki Foundation for Human Rights, concerning the issues of human rights and civic education

In its information, the Ministry of National Education cites a number of documents and programs that formally and significantly define the framework of the education system, its basic goals, tasks and values. Human rights issues or elements of civic education appear in the core curricula. However, there is a lack of good educational materials and interesting lesson scenarios. The rights are discussed in the context of fulfilling obligations.

The term of "gender equality" does not exist in the core curriculum. The term "tolerance" appears in the context of shaping civic attitudes, among others responsibility, concern for the common good and tolerance. It is not known whether the scope of understanding of this term is sufficient. The core curriculum provides for school classes on non-discrimination. In practice, it looks different.

The participation of young people in the decision-making process in matters of school life seems to be a good indicator of the condition of civic education in Polish schools. In the alternative report⁶ to the government report on the implementation of the Convention on the Rights of the Child, it is noted that formal education law gives schools and students the tools to take into account children's voices and integrate them into school life. The student council is an institution well enacted in law, however it still remains a missed opportunity, and sometimes even a fiction. Meanwhile, research by UNICEF Poland⁷ shows that the vast majority of children wish to have greater influence on decisions taken at school.

School statutes that rank as school constitutions often contain long catalogues of rights and duties. In general, however, these are provisions about various privileges and rights resulting from

⁶ <https://fdds.pl/wp-content/uploads/2020/09/Alternative-Report-Poland.pdf>

⁷ Prawa dziecka z perspektywy dzieci, rodziców i nauczycieli. Raport z badań. UNICEF Polska 2019 <https://unicef.pl/co-robimy/publikacje>

the school's tasks, sometimes mixed without hierarchy with human rights. A catalogue of rights constructed in this way is an example of a misunderstanding of the essence of human rights.

The 2019 UNICEF research⁸ shows that 1/3 of parents do not know whether the information on the rights of the child is provided at school, while the majority declare that this information is sufficient.

The child's rights have been included for years in future teachers' training curriculum, still only 45% of them deem the knowledge obtained at the university adequate⁹.

The results of the UNICEF research correspond to the analysis contained in the Integrated Skills Strategy 2030, which states, inter alia, that "in formal education, too little attention is paid to shaping social competences and attitudes related to them. The promotion of individual progress, common in the Polish educational system, discourages cooperation, while research indicates better results of group activities participants than of individual ones. The "handing in" style of teaching which is still dominant in Polish schools and which insufficiently uses the potential of group work does not help the development of social competences. Both in the relationship between teachers and students, between the principal and teachers, and between the supervising institutions and the school itself, the dominance of control, evaluation and requirements over support, cooperation and trust is noticeable¹⁰.

Based on our experience in conducting long-term education on human rights, both among students and teachers, we can conclude that knowledge of human rights and civic education is treated very formally, not to say superficially, as if the understanding and use of knowledge and skills were irrelevant. Generally, students know the names of international documents, the dates of their creation, can name a few laws, but do not really understand what these rights mean in everyday life. For example, that human rights result from the relationship between power authority and the individual, and the authority has a duty to respect their rights, that they cannot limit them without appropriate statutory provisions, and these must comply with standards, etc. This conclusion seems to be confirmed by the opinions of academic teachers.

Recommendations included in the alternative report show significant differences in the assessment of the state of education on human rights and civic education by the Ministry of National Education and by non-governmental organizations¹¹:

"Conducting systematic child's rights education among children as well as professionals working with children and for their benefit."

"Expanding teaching content regarding civic education by information showing children and youth mechanisms of involvement in social life, motivating and preparing them for full-value engagement in decision-making."

"Proactive conduct by the government of activities to combat all manifestations of discrimination."

"Implementing systemic anti-discrimination education."
