

GUIDELINES FOR THE PREPARATION OF REPORTS BY MEMBER STATES ON THE APPLICATION OF THE 1974 RECOMMENDATION CONCERNING EDUCATION FOR INTERNATIONAL UNDERSTANDING, CO-OPERATION AND PEACE AND EDUCATION RELATING TO HUMAN RIGHTS AND FUNDAMENTAL FREEDOMS

I. Introduction

A. About the 1974 Recommendation

1. UNESCO's 1974 *Recommendation concerning Education for International Understanding, Co-operation and Peace and Education relating to Human Rights and Fundamental Freedoms*¹ (the "1974 Recommendation") aims to promote international education and world peace through understanding, solidarity and cooperation. It was adopted on 19 November 1974 by the General Conference of UNESCO at its 18th session.

2. The 1974 *Recommendation* applies to formal, non-formal and informal education and to all levels, from pre-primary to tertiary and adult education and lifelong learning. The General Conference recommended "*that Member States should apply*" the provisions included in the 1974 *Recommendation* "*by taking whatever legislative or other steps*" that provide institutional (e.g. policies and legal frameworks) and pedagogical (e.g. curricula, teacher training, educational materials, equipment, and student assessment) support for its implementation, based on the "*objectives*", referred to in paragraph 4 of the 1974 *Recommendation*, "*regarded as major guiding principles of education policy*" including: an international dimension and a global perspective on education, cultural diversity, interdependence, communication, rights and responsibilities, international solidarity and cooperation, and problem solving.

3. Today, the principles of the 1974 *Recommendation* apply equally well to Education for Sustainable Development (ESD) and to Global Citizenship Education (GCED) and therefore represent a powerful tool for promoting the 2030 Agenda for Sustainable Development and in particular SDG Target 4.7 on the promotion of sustainable development and global citizenship through education, Target 12.8 on access to information on sustainable development and Target 13.3 on climate change education.

4. The General Conference in its 39th session recommended the use of the 1974 *Recommendation* reporting process to support the implementation and monitoring of Target 4.7 of Sustainable Development Goal 4 (39 C/Resolution 79). The UNESCO Executive Board at its 209th session approved the use of the current guidelines for both the monitoring of the 1974 *Recommendation* and the collection of data needed for the following global SDG indicator for which UNESCO is custodian (209 EX/Decision 18.II):

4.7.1, 12.8.1 and 13.3.1: *The extent to which (i) global citizenship education and (ii) education for sustainable development are mainstreamed in (a) national education policies; (b) curricula; (c) teacher education and (d) student assessment.*

5. Questions marked with an asterisk (*) will be used in the calculation of the respective indicators (**Table 1**). As approved by the Inter-Agency and Expert Group on the SDG Indicators, the indicators will be calculated for primary and secondary education only.

Table 1 Questions used in the calculation of the global SDG indicator for Targets 4.7, 12.8 and 13.3

Policies	Curricula	Teacher education	Student assessment
A2, A4, A5, E1a	B2, B3, B4, E1b	C2, C3, C4, C5, E1c	D2, D3, E1d

B. Reporting obligations

6. The General Conference, at its 18th session, when adopting the *1974 Recommendation* recommended “*that Member States submit [...] reports concerning the action taken by them in pursuance of this recommendation*”. Moreover, in accordance with Article VIII of UNESCO’s Constitution “*Each Member State shall submit to the Organization [...] reports [...] on the action taken upon the recommendations and conventions referred to in Article IV, paragraph 4.*”

7. Thus, **all UNESCO Member States are expected to report on the steps they have taken to implement the 1974 Recommendation** preferably by completing the following questionnaire. Such reporting takes place every four years.

II. Guidelines for completion of the questionnaire

8. This questionnaire and its accompanying guidelines are addressed to Ministers responsible for relations with UNESCO. The questionnaire is typically completed by Ministries of Education and other government authorities responsible for education. Responses should cover, as far as possible, education at all levels of government, including sub-national levels where applicable as well as education outside the government sector.

9. National respondents are encouraged to **consult widely** both within, across and beyond government, including with Ministries of Environment, with national human rights institutions, the education sector, civil society partners and others, as necessary, to gather the information needed to complete the questionnaire.

10. Responses to the seventh consultation should cover:

- (i) the time period 2017-2020;
- (ii) education at all levels of formal education from pre-primary to tertiary education as well as non-formal education;
- (iii) all levels of government that have responsibility for education within the country; and
- (iv) where possible, education outside the government sector.

11. To assist countries in responding to this questionnaire, UNESCO has developed the following set of global citizenship education and education for sustainable development themes. The list is based on a review of current common practices in many countries as well as a review of relevant literature. While the terms ESD and GCED may be used differently in some countries, the list of themes typically captures what are seen as key elements of Target 4.7. Please refer to the definitions of key terms in **Section III** before completing the questionnaire.

Global citizenship education and education for sustainable development

- 1. cultural diversity and tolerance
 - 1.1 international or intercultural understanding, solidarity and cooperation
 - 1.2 intercultural and interreligious dialogue
 - 1.3 local, national and/or global citizenship
- 2. gender equality education
 - 2.1 gender-based equal opportunities
 - 2.2 gender equality and justice
 - 2.3 gender roles, identity and stereotypes

3. human rights education
 - 3.1 equality and non-discrimination based on race, colour, language, religion, disability, political or other opinion, national or social origin, birth or other status
 - 3.2 human rights values, human dignity, justice, inclusion and participation
 - 3.3 respect for human rights and fundamental freedoms (as outlined in international conventions and declarations)
4. peace and non-violence
 - 4.1 friendly relations among peoples and nations
 - 4.2 challenging negative stereotypes, promoting peaceful solutions, learning to live together, including others and preventing violent extremism
 - 4.3 preventing all forms of violence including bullying, verbal abuse and gender-based violence
5. climate change education
 - 5.1 mitigation
 - 5.2 adaptation
 - 5.3 impact reduction
 - 5.4 early warning
6. environmental sustainability
 - 6.1 caring for the planet, protecting nature
 - 6.2 environmental justice
 - 6.3 biodiversity, water
7. human survival and well-being
 - 7.1 environmental health as it pertains to human well-being, disaster risk reduction
 - 7.2 health of the planet for future generations
 - 7.3 sustainable cities and communities
8. sustainable consumption and production
 - 8.1 responsible and sustainable lifestyles
 - 8.2 green economy, green jobs
 - 8.3 sustainable energy

III. Definitions of key terms

Term	Definition
Themes of global citizenship and education for sustainable development	
1. Cultural diversity and tolerance	<i>Education about and for diversity including language, ethnicity, race, religion as well as the development of tolerance, mutual respect and appreciation for cultural diversity. It includes intercultural and interreligious dialogue, understanding, solidarity and co-operation, and citizenship education.</i>
2. Gender equality education	<i>Education that addresses the wider issue of gender equality by promoting new attitudes and patterns of belief, transforming the way people think about traditional gender roles and helping to build long-term sustainable change. It examines how gender roles, activities, needs, opportunities, rights and entitlements affect men, women, girls and boys differently. It deals with the relationships between females and males, their access to and control of resources and the constraints they face relative to each other. It respects the rights of all learners – women, men, boys and girls – equally and gives equal access to learning opportunities, resources and protections. All learners benefit from and are treated in education equally without the limitations set by stereotypes, rigid gender roles and prejudices. It covers gender-based equal opportunities, gender equality and justice, and gender roles, identity and stereotypes.</i>
3. Human rights education	<i>Education that promotes universal respect for and observance of all human rights and fundamental freedoms and thus contributes, inter alia, to the prevention of human rights violations and abuses by providing persons with knowledge, skills and understanding and developing their attitudes and behaviours, to empower them to contribute to the building and promotion of a universal culture of human rights.</i> <i>It includes equality and non-discrimination, human rights values, dignity, justice, inclusion and participation and respect for human rights and fundamental freedoms.</i>
4. Peace and non-violence	<i>Education about peace and peace-building, mediation, conflict prevention and resolution, non-violence, reconciliation and living together peacefully. It includes advocating for friendly relations among peoples and nations, challenging negative stereotypes, promoting peaceful solutions, learning to live together and preventing violent extremism and other forms of violence including bullying.</i>
5. Climate change education	<i>Education to help people, in particular youth, understand, address, mitigate, and adapt to the impacts of climate change. It encourages changes in attitudes and behaviours needed to put the world on a more sustainable development path, and build a new generation of climate change-aware citizens.</i> <i>It covers various responses to climate change including mitigation, adaptation, impact reduction and early warning.</i>
6. Environmental sustainability	<i>Education about responsible interactions with the environment to avoid depletion or degradation and to promote environmental quality and health. It includes, caring for the planet and protecting nature, environmental justice, biodiversity and water.</i>
7. Human survival and well-being	<i>Education that promotes social well-being and harmony including in future generations due to healthy environmental systems. It includes health of the planet and environment related to human well-being, disaster risk reduction and sustainable cities and communities.</i>

8. Sustainable consumption and production	<i>Education on the use and production of resources, products and services that have a minimal adverse impact on the environment. It promotes resource and energy efficiency, sustainable infrastructure and green jobs. It includes responsible and sustainable lifestyles, the green economy and sustainable energy.</i>
Dimensions of learning	
Knowledge	<i>Factual information and understanding acquired through study and/or experience.</i>
Skills	<i>The ability to carry out a task well as a result of training, practice and innate aptitude. Skills may be physical, mental or both.</i>
Values	<i>Principles that form the foundation on which individuals conduct themselves and interact with others and with the environment around them.</i>
Attitudes and behaviours	<i>Ability to act on the basis of beliefs and knowledge acquired through study or experience.</i>
Levels of education	
Pre-primary	<i>Education designed to support children's early cognitive, physical, social and emotional development and introduce young children to organized instruction outside of the family context. Participants are usually aged from three years.</i>
Primary and secondary	<i>Education designed to:</i> <i>(i) provide students with fundamental skills in reading, writing and mathematics (i.e. literacy and numeracy) and establish a solid foundation for learning and understanding core areas of knowledge and personal development (primary education); and</i> <i>(ii) prepare students for further education at post-secondary and tertiary levels and for entry into the labour market (secondary education).</i> <i>It includes both general and vocational education.</i>
Tertiary	<i>Education designed to provide learning activities in specialised fields of education. It aims at learning at a high level of complexity and specialisation. It includes both what is commonly understood as academic education and advanced vocational or professional education.</i>
Types of education	
Adult education	<i>Education specifically targeted at individuals who are regarded as adults by their society to improve their technical or professional qualifications, further develop their abilities, enrich their knowledge with the purpose to complete a level of formal education, or to acquire, refresh or update their knowledge, skills and competencies in a particular field.</i>
Formal education	<i>Education that is institutionalized, intentional and planned through public organizations and recognized private bodies which – in their totality – constitute the formal education system of a country. Formal education programmes are recognized by the relevant national or sub-national education authorities. Formal education consists mostly of initial education (e.g., pre-primary, primary, secondary and tertiary education).</i>
Non-formal education	<i>Education that is an addition, alternative and/or a complement to formal education within the process of the lifelong learning of individuals. It is often provided to guarantee the right of access to education for all. It caters to people of all ages but does not necessarily apply a continuous pathway-structure. It may be short in duration and/or low-intensity, and it is typically provided in the form of short courses, workshops or seminars. Non-formal education mostly leads to qualifications that are not</i>

	<i>recognized by the relevant national or sub-national education authorities or to no qualifications at all. Non-formal education includes programmes on life skills including literacy and numeracy, work skills, and social or cultural development. Most types of adult education are also included.</i>
Vocational education	<i>Education that is designed for learners to acquire the knowledge, skills and competencies specific to a particular occupation or trade or class of occupations or trades. Vocational education may have work-based components (e.g. apprenticeships). Successful completion of such programmes leads to labour-market relevant vocational qualifications acknowledged as occupationally-oriented by the relevant national authorities and/or the labour market. Vocational education can be offered at secondary and post-secondary or tertiary levels of education.</i>

IV. Information about the respondent

Country:

Georgia

Organization:

The Ministry of Education, Science, Culture and Sport of Georgia

Date of submission:

18/12/2020

V. Other contributors consulted during the completion of this questionnaire

Please indicate below the names of other organizations and contributors consulted during the completion of this questionnaire.

Government institutions including other Ministries (please specify):

National human rights institutions (please specify):

Local and regional authorities responsible for education (please specify):

Other local and regional authorities (please specify):

Organizations representing education stakeholders (e.g. teachers, students, parents, etc.)(please specify):

Other civil society organizations (please specify):

Others (please specify):

VI. Questionnaire

A. Laws and policies (preamble and paras 4 and 7 of the 1974 Recommendation)

A1a. Please describe any specific national or sub-national laws, legislation or legal framework(s) in your country that govern the promotion of global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes² are mentioned explicitly or are inferred and what types or levels of education are covered.

The issue of environmental rights of information and education is mentioned at the level of the Constitution of Georgia:

“Article 29 - Right to environmental protection

1. Everyone has the right to live in a healthy environment and enjoy the natural environment and public space. Everyone has the right to receive full information about the state of the environment in a timely manner. Everyone has the right to care for the protection of the environment. The right to participate in the adoption of environment-related decisions shall be ensured by law.

2. Environmental protection, rational use of natural resources and sustainable ecologic development shall be ensured by law, taking into account the interests of current and future generations.”

According to the Georgian Law on Environmental Protection adopted by the Parliament of Georgia:

“Article 8 - Education in the field of environmental protection

1. A unified system of environmental education shall be set up in order to raise the environmental awareness of society and train relevant specialists. The system includes a network of educational institutions, personnel training and qualification upgrading institutions.

2. The Legal Entity under Public Law (LEPL) - The Environmental Information and Education Centre (the Centre) shall be set up within the system of the Ministry to support the environmental awareness raising in the society, training, retraining, certification, teaching of relevant specialists and the upgrade of their qualification.”

Actions under the overall objective 2 and 3 are explicitly describing the steps to undertake in embedding ESD and Global citizenship education in Unified Strategy of Education and Science of Georgia 2017-2021:

- Overall objective 2. Enhance education quality for students’ life skills development, seamless transition and better academic outcomes
- Overall objective 3. Improve education environment

The National Curriculum, which is a normative document and is approved by the Minister of Education, Science, Culture and Sport, and which is mandatory for all schools in Georgia, covers issues of global citizenship and sustainable development.

The above-mentioned topics are covered in the subject standards of the Social Sciences and Natural Sciences.

In Law of Georgia on Vocational Education are indicated Georgia’s main policy goals in the field of vocational education. State policy goals include support of social inclusion, personal and professional development of an individual and support of life-long learning. These goals are meant to be achieved

² See the schema described in paragraph 11 of Section II of these guidelines.

through many steps, including ensuring linkage of vocational education to general, higher education, and flexibility of vocational education, preparing individual for employment and entrepreneurial activity, ensuring diverse forms of teaching-learning etc. The law is in a line with the association agreement and aims achieving activities indicated in the agreement, including recommendations on key competences for lifelong learning. Law of Georgia on Vocational Education was adopted by the parliament of Georgia in 2018 and created a legal basis for significant changes in VET system.

GCED and ESD themes are not explicitly mentioned in the law, but it creates basis for key competences development in VET.

Though not explicitly mentioned in the national legal acts on higher education the **Law on Higher Education** and **Authorization Standards of Higher Education Institutions** as well as **National Qualifications Framework** promote in general citizenship and sustainable development education which is further embedded in the regulatory documents and educational programs of higher education institutions.

According to the Article 3. (1, a) of the **Law of Georgia on Higher Education**, “promotion of the development of Georgian and global cultural values, orientation towards the ideals of democracy and humanism essential for the existence and development of a civil society is one of the goals of higher education.”

According to the same article (3, j) In order to achieve the goals determined by paragraph 1 of this article higher education institutions shall ensure access to and openness of higher education, academic freedom, opportunity to acquire higher education at any time during a person’s lifetime, participation of the academic personnel, scientific personnel and students in the process of making decisions and monitoring of their execution, publicity and transparency in managing a higher education institution and in competitions conducted in the institution, prohibition of any forms of discrimination in the field of higher education, including discrimination on any ground such as academic, ethnic, social or religious affiliation, and/or opinion, sex and other grounds.

Authorization Standards of Higher Education Institutions ensure that Higher education Institutions work in compliance with the internal and external quality standards, including creating relevant teaching environment based on promotion of global citizenship and sustainable development. **The National Qualification Framework** establishes what knowledge, skills, and responsibilities should a person have for obtaining the document verifying the completion of the relevant level of higher education.

The Legal Entity under Public Law (LEPL) - The Environmental Information and Education Centre (the Centre) shall be set up within the system of the Ministry to support the environmental awareness raising in the society, training, retraining, certification, teaching of relevant specialists and the upgrade of their qualification.”

A1b. Please provide the full names of any laws, legislation or legal frameworks referred to in A1a and, where possible, web links to relevant documents.

*A2 Please indicate which GCED and ESD themes are covered in national or sub-national laws, legislation or legal frameworks on education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown, 99 = not applicable (e.g. where the given level of government is not responsible for education)

	National				Sub-national			
	Pre-primary	Primary/secondary	Tertiary	Non-formal	Pre-primary	Primary/secondary	Tertiary	Non-formal
1. Cultural diversity and tolerance		1	1		99	99	99	99
2. Gender equality		1	1		99	99	99	99
3. Human rights		1	1		99	99	99	99
4. Peace and non-violence		1	1		99	99	99	99
5. Climate change		1	1 (VET) -0 (HE)		99	99	99	99
6. Environmental sustainability		1	1 (VET) -0 (HE)		99	99	99	99
7. Human survival and well-being		1	1 (VET) -0 (HE)		99	99	99	99
8. Sustainable consumption and production		1	1 (VET) -0 (HE)		99	99	99	99

A3a. Please describe any specific current national or sub-national education policies, frameworks or strategic objectives in your country that promote global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes³ are mentioned explicitly or are inferred and what types or levels of education are covered.

In Natural Sciences (Separately in Biology, Physics, and Chemistry), ESD is presented as one of the outcomes:

- Assessing the advances in Natural Sciences and technologies in terms of the principles of sustainable development.

In Geography, ESD is reflected in one of the main directions “**Sustainable Development and Security**”:

- Identifying a caring attitude towards the environment;
- Understanding the environmental, social and economic importance of sustainable development for the well-being of the population;
- Assess the results of human activities (anthropogenic impact) on the environment;
- Identify signs of various types of natural disasters;
- Analyze the causes of occurrence; Understand the importance of measures to prevent / mitigate them; Adherence to safety rules.

As for Citizenship, the GCED and/or ESD are presented also as one of the outcomes: Understanding the principles of sustainable development and act accordingly.

Key competences development in Vocational education are inferred in Unified Strategy for Education and Science for 2017-2021, Vocational Education Reform Strategy (2013-2020) and their action plans. Both strategies aim development of VET system and programs, which will be labour market oriented and will support key competences development.

Number of frameworks support promotion of ESD as following:

National Environmental Action Programme of Georgia (NEAP) 2017-2021 – the document covers the environmental activities to be implemented within 5 years period in all directions of the environmental management including the issues of environmental education and awareness for sustainable development.

The new draft document of **Education for Sustainable Development – Georgian National Strategy and Action Plan** (ESD – GNSAP) is elaborated by the LEPL Environmental Information and Education Centre under the Ministry of Environmental Protection and Agriculture of Georgia in cooperation with the Ministry of Education, Science, Culture and Sport of Georgia with the financial support of GIZ. Implementation process of the strategy and action plan will be coordinated by LEPL Environmental Information and Education Centre.

The goal of this strategy and action plan is to ensure that education for sustainable development in Georgia provides all citizens of Georgia with the knowledge, skills, values, and attitudes necessary to live sustainably and foster environmentally responsible changes in society. The document is planned to be approved by the order of the Minister of Environmental Protection and Agriculture of Georgia. The e-version of the document will be accessible at the official web-page of the Ministry of

³ See the schema described in paragraph 11 of Section II of these guidelines.

Environmental Protection and Agriculture of Georgia: www.mepa.gov.ge and the official web-page of LEPL Environmental Information and Education Centre: www.eiec.gov.ge.

National Biodiversity Strategy and Action Plan of Georgia 2014-2020 - the document covers the educational and awareness raising activities including the awareness for sustainable development.

Concept of Eco-educational Activities of Protected Areas and Strategy of Eco-educational Activities of Protected Areas - the documents are the action plans for the Agency of Protected Areas of the Ministry of Environmental Protection and Agriculture of Georgia to implement environmental educational activities and raise environmental awareness about the protected areas.

National Forest Concept for Georgia prepared by the Ministry of Environmental Protection and Agriculture of Georgia and National Forestry Agency of Georgia, approved by the Georgian Parliament in 2013 and National Forestry Program establishes a sustainable forest management system in Georgia. Among the eight Chapters of the document, 2 chapters are on “education and science”, and “awareness and involvement of the society” to ensure sustainable forestry management.

Waste Management Strategy for 2016-2030 and National Action Plan for 2016-2020 - the documents pay a certain attention to the needs for raising public awareness, noting that “it is necessary to raise the level of education and develop skills in society in this regard that can be achieved by promotion of formal and informal education, particularly by way of developing and implementing appropriate programs for all age groups. The waste management principles, hierarchy, and understanding the role of people in improving waste management effectiveness must become a significant component of school and pre-school training programs, as well as for extensive public awareness raising campaigns, media campaigns”. So, the ninth objective of the National Waste Management Strategy is aimed at “strengthening the capacities of the public sector at the national and local levels, as well as contributing to strengthening and raising public awareness”.

Freedom, Rapid Development, Prosperity - Government Platform 2016-2020 - Education is one of the most important priorities of the Government of Georgia. The government plans to develop the education system, which will equip children, young people and adults with respective theoretical knowledge and practical skills and ensure in-depth understanding of national and universal values, thus raising civil awareness. Environmental education and environmental awareness activities will be continued and expanded. All of these efforts will provide grounds for economic and social development as well.

Small and Medium-sized Enterprises (SME) Development Strategy of Georgia 2016-2020 - business sector, and especially the Small and Medium-sized Enterprises (SMEs) play an important role in the development of the economy, contributing significantly to sustainable and inclusive growth. The document covers the awareness raising activities including the awareness for sustainable development.

One of the **nationalized Sustainable Development Goals**, (Goal 12: Ensure sustainable consumption and production patterns), particularly, the target (12.8) is to ensure that people everywhere have the relevant information and awareness for sustainable development and lifestyles in harmony with nature by 2030

Education for Sustainable Development at the primary school level - In 2017 Ministry of Education and Science, in cooperation with the Environmental Information and Education Center added principles of

sustainable development to the criterias of estimation of school textbooks at Primary school level. According to the existing changes, the principles of sustainable development are reflected as a cross-curriculum approach in the school textbooks from 2018.

Second National Action Program to Combat Desertification 2014-2022 - the operational objective 1 of the NAP is on advocacy, awareness raising and education. Its main aim is to support the development of the NR of the UNCCD and its alignment to the UNCCD 10 year strategy by a participatory, overall and transparent approach.

A3b. Please provide the full names of any education policies, frameworks or strategic objectives referred to in A3a and, where possible, web links to relevant documents.

*A4. Please indicate which GCED and ESD themes are covered in national or sub-national education policies, frameworks or strategic objectives affecting each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	0	1	1	0
2. Gender equality	0	1	1	0
3. Human rights	0	1	1	0
4. Peace and non-violence	0	1	1	0
5. Climate change	1	1	1	1
6. Environmental sustainability	1	1	1	1
7. Human survival and well-being	1	1	1	1
8. Sustainable consumption and production	1	1	1	1

*A5 Please indicate whether national or sub-national education policies, frameworks or strategic objectives on education provide a mandate to integrate GCED and ESD in the following areas by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown, 99 = not applicable (e.g. where the given level of government is not responsible for education)

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
National				
Design or revision of the curricula		1	1	1
Setting of programme learning objectives		1	1	1
Textbook development		1	1	1
Teacher education and training		1	1	1
Assessment of student outcomes		1	1	
Sub-national				
Design or revision of the curricula		99	99	
Setting of programme learning objectives		99	99	
Textbook development		99	99	
Teacher education and training		99	99	
Assessment of student outcomes		99	99	

B. Curriculum (paras 4 and 10-19 of the 1974 Recommendation)

B1a. Please describe in which ways GCED and ESD are mainstreamed in school curricula. Indicate whether topics are taught as standalone subjects or are integrated into the curricula of other subjects. Explain whether GCED and/or ESD themes⁴ are mentioned explicitly or are inferred and what types or levels of education are covered.

National Curriculum covers all levels of General education. All GCED and ESD themes mentioned in the document are presented both implicitly and explicitly. For example, in Natural Sciences Sustainable development and Safety are one of the main directions in the subject standards, they also cover equality and equity topics. The achievements of the Natural Sciences are also assessed in terms of the principles of sustainable development; also in Citizenship one of the main themes is Global citizenship, which includes peacemaking and environmental topics.

As mentioned above, since adoption of a new law on vocational education (2018) vocational education system in Georgia switched to modular system from subject based one. GCED and ESD related topics in VET programs are taught in standalone general modules, particularly in “Civil Education” and “Foundations of environmental protection”. These modules are designed based on European council recommendation on “Key competences for Life Long Learning”. Since VET programs are competence based, abovementioned topics are also inferred in the field related modules.

Comment regarding question B5: please, note that existing VET general module “Civil education” does not cover all topics mentioned in the question, but it is now under revision and will cover mentioned topics.

B1b. Please provide examples of curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents.

<http://www.mes.gov.ge/content.php?id=7147&lang=geo&fbclid=IwAR1-fH35Can1LyW21iWZYifBryEkMqNaJiizNO0gGU6xfXf6Ej0NKFswv74> (40/6)

Example: GCED is included in the following VET programs: „Artistic Fabrics“, „Hair and Beauty Services“, „Sawing industry” and etc.

⁴ See the schema described in paragraph 11 of Section II of these guidelines.

***B2** Please indicate which GCED and ESD themes are taught as part of the curriculum at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance		1	1	1

C. Teacher education (including the training of trainers and educators)(paras 4 and 33-37 of the 1974 Recommendation)

C1a. Please describe in which ways GCED and ESD are mainstreamed in initial training and in continuing professional development of teachers, trainers and educators. Indicate whether all teachers, trainers and educators or only some are required to receive training to teach GCED and/or ESD.

English teachers were trained in "project-based learning" during 2018-2019 years, where the project topics were entirely SDG, and since 2015 center has been participating in the project "The world's largest lesson", where also English, geography, civics and sometimes other Subject teachers (STEM) also work collaboratively on sustainable development projects. These topics are in the training modules in civics, geography, art, history and languages. Centre regularly promotes trainings and professional development activities on SDG.

In the training for principals' coaches, center had training on the implementation of a unified approach of sustainable development in the Whole-school approach in ESD. Also within the program e-Twinning teachers have trainings and projects about climate change. To promote main topic of 2020 "Climate Change and Environmental Challenges", eTwinningplus program staff prepared training module: "Integrating Climate Change in Education - How to Respond to Students' Increased Interest in Climate Change" - (8 Hour). The aim of the training module was to promote use of the sustainable Development Goals in learning, to help teachers to integrate climate change into teaching, curriculum and raise students' awareness of their competencies towards sustainability. 120 teachers were trained with new module.

As part of the training teachers planned eTwinning project on the topic climate change and uploaded on eTwinning portal.

TPDC is planning to conduct 6, 12 and 20 contact hour trainings on Education for Sustainable Development (ESD) in the whole-school approach for all subject and status teachers. TPDC has also started 3 year program with UNESCO APCEIU for GCED implementation. EIEC implemented the Preschool Environmental Education Program across the whole country in 2016-2019. Within the framework of the program, 1963 educators and methodists from 1600 preschool institutions are trained and able to integrate it in their teaching process. During the trainings, educators and Methodists were provided with a special guidebook - Preschool Environmental Education which was elaborated according to the environmental component of the state standard for school readiness of the Ministry of Education, Science, Culture and Sport and contains following topics: biodiversity around us, water and energy conservation, waste management. The book is also available online for them as well as they can contact EIEC for additional consultations and recommendations. Most of the kindergartens have already integrated the program that is confirmed in the EIEC contest "Green Award" announced for kindergartens to motivate the educators as well as to evaluate integration of environmental principles in preschool education institutions according to the training materials. The contest is annual and the number of participants increases year by year.

One of the priority of the Ministry of Environmental Protection and Agriculture of Georgia is environmental and agricultural education, therefore, this year EIEC started working on a new program - Environmental and Agricultural Education in School as a continuation successful implementation of Preschool Environmental Education Program. To facilitate it in the general educational system, the EIEC has elaborated a textbook - "Environmental and Agricultural Education in School". It is developed for the primary school teachers and includes the important topics of both environmental and

agricultural fields that are easily adaptable for primary school (I-VI classes) children. It is an extra material for the teacher, supporting formal and informal education activities.

The topics are divided into eight independent books: sustainable development concept; biodiversity conservation; conservation and sustainable management of water resources, air protection from pollution, climate change and the reduction of natural hazards, waste management; land management and combat desertification; agriculture, food security and quality

The textbook is developed in accordance with the requirements of the Ministry of Education, Science, Culture and Sport of Georgia and complies with the ongoing reforms and existing standards of the educational system.

The next step is to launch an even larger-scale process including the training of primary school teachers and school representatives across the country to properly integrate the issues outlined in the textbook into the learning process

Educational resources have been developed for Preschool and School Decision Makers within the framework of the project “Scaling up Multi-Hazard Early Warning System and the Use of Climate Information in Georgia” which reflects the management of disaster risk phases. It should be noted that information meetings with teachers were held this year, and training in this direction is planned from the next year.

C1b. Please provide examples of teacher training policies or curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents. If possible, include examples related to initial training and to continuing professional development.

Benchmarks which define competences of educational programmes with regard to specific directions or field/specialization considering appropriate levels of education is based on the National Qualifications Framework and European Qualifications Framework. Sector Benchmarks in Education was approved in 2018, ESD is underlined as an essential competence for future teachers. Starting from 2018 newly accredited programs will consist courses on SD, GCED, ESD. “Teacher knows the goals and principles of sustainable development; Recognizes the principles of sustainable development in a person’s development; Teacher is socially and environmentally responsible and could apply SD, GCED, ESD related activities into everyday work, to integrate in the subject goals”

Teachers professional standards are explaining the requirements to the competences of teachers, within the teaching and learning strategies development of higher order thinking skills with various diverse and interactive methods are mentioned to raise environmental and social responsibility among students based on principles of SD; requirements to leading and mentor teachers are also prescribing them to initiate activities that promote global and digital citizenship education, ESD and SDGs.

National Center for Teacher Professional Development has released publication “Ecoliteracy”, “Interactive methods in practice” also online newspaper for educators <http://www.mastsavlebeli.ge> (“mastsavlebeli” in Georgian means teacher) regularly publishes articles related to ESD and SD. Modern school management is in print, and incorporates a unified school approach to the introduction of sustainable development.

National benchmarks for HEIs initial teacher training <https://eqe.ge/ka/posts/1823/umaghlesi-ganatilebis-dargobrivi-makhasiatebeli>

Teacher Professional standard <https://matsne.gov.ge/ka/document/view/4841342?publication=0>

Existing information is available here: <http://eiec.gov.ge>

***C2** Please indicate whether teachers, trainers and educators are trained to teach GCED and ESD during initial or pre-service training and/or through continuing professional development. Please enter the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Initial or pre-service training				
For teachers of selected subjects only (in which GCED or ESD are typically taught)				1
For teachers of other subjects	1			1
Continuing professional development				
For teachers of selected subjects only (in which GCED or ESD are typically taught)				
For teachers of other subjects				

***C3** Please indicate on which GCED and ESD themes pre-service or in-service training is available for teachers, trainers and educators at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	1	1	0
2. Gender equality	1	1	1	0
3. Human rights	1	1	1	0
4. Peace and non-violence	1	1	1	0
5. Climate change	1	1	1	1
6. Environmental sustainability	1	1	1	1
7. Human survival and well-being	1	0	0	1
8. Sustainable consumption and production	1	0	0	1

*C4 Please indicate whether teachers, trainers and educators are trained to teach the following dimensions of learning in GCED and ESD. Please enter the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Knowledge		1	1	
Skills		1	1	
Values		1	1	
Attitudes and behaviours		1	1	

*C5 Please indicate whether teachers, trainers and educators are trained to use the following approaches to teach GCED and ESD in primary and secondary education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Global citizenship and education for sustainable development
GCED/ESD are taught as separate subject(s)	
Cross curriculum approach (e.g. GCED/ESD are taught in more than one subject but not throughout the curriculum)	1
Integrated approach (e.g. GCED/ESD are taught throughout the whole curriculum)	0
Whole school approach (e.g. GCED/ESD are integrated in the school ethos, management, governance, curriculum, teacher training, teaching practices, the learning environment, and in learning experiences in the community and life outside school)	1

D. Student assessment (paras 4 and 5 of the 1974 Recommendation)

D1a. Please describe in which ways GCED and ESD are covered in student assessments and examinations. Indicate whether students are assessed only on their knowledge of and skills related to the topics being tested or also on their values, attitudes and/or behaviours.

In higher education, students assessment is based on generalized learning outcomes, described in National Qualifications Framework with 'knowledge and understanding' that implies a result of assimilation of information, facts, principles, theories, theoretical and practical methods linked with the learning or activity field, "skill" as ability to fulfill specific task and use knowledge necessary for problem solving or/and with 'responsibility and autonomy' that implies application of knowledge and skills with relevant quality of values and independence.

VET programs consist of modules, GCED and ESD topics are integrated in general modules as learning outcomes. Because of the fact that VET system is competence based, students are assessed on the competences, which unites knowledge, skills, values and attitudes/behavior.

Comment regarding question D3: In VET programs are assessed competences, which includes all four dimensions (knowledge, skills, values and attitudes/behavior).

GCED and ESD are covered in student assessment and examinations in Georgia in several ways:

1. The chain of teachers' professional development includes standardized examinations both in professional competence and subject matter knowledge. The National Assessment and Examinations Center has been conducting the abovementioned exams since 2010. The test for professional competence assesses applicant's (teacher or candidate teacher) ability to teach, also the level of understanding various methods to create learning environment in accordance with GCED and ESD principles.
2. As Civic Education is a part of the national curricula, the National Assessment and Examination Center has been conducting standardized exam for teachers in the following field since 2011.
3. University entrants are given Civic Education as one of the optional subjects during the National University Entrance Examinations.
4. Gender and Ethnicity issues are also highlighted during international and national research projects carried out by the National Assessment and Examinations Center.

*D2 Please indicate whether the GCED and ESD themes below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	1	1(VET)-9 (HE)	1
2. Gender equality	1	1	1(VET)-9 (HE)	1
3. Human rights	1	1	1(VET)-9 (HE)	1
4. Peace and non-violence	1	1	1(VET)-9 (HE)	1
5. Climate change	1	1	1(VET)-9 (HE)	1
6. Environmental sustainability	1	1	1(VET)-9 (HE)	1
7. Human survival and well-being	1	1	1(VET)-9 (HE)	1
8. Sustainable consumption and production	1	1	1(VET)-9 (HE)	1

*D3 Please indicate which of the dimensions of learning in GCED and ESD below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Knowledge	1	1	1	9
Skills	1	1	1	9
Values	1	1	1	9
Attitudes and behaviours	1	1	1 (VET) – 9 (HE)	9

E. Mainstreaming of GCED and ESD in laws and policies, curricula, teacher education and student assessment (paras 4-5, 7, 10-19 and 33-37 of the 1974 Recommendation)

*E1 Based on your responses to questions in the previous four sections (laws and policies, curricula, teacher education and student assessment) please indicate to what extent global citizenship education (GCED) and education for sustainable development (ESD) are mainstreamed⁵ in (a) education laws and policies, (b) curricula (c) teacher education (including the training of trainers and educators) and (d) student assessment in your country. Please enter the appropriate number in each white cell in the table below.

KEY:

0 Not at all

GCED and ESD are not mainstreamed.

1 Partially

Some GCED and/or ESD themes⁶ are mainstreamed. Select this option if GCED is mainstreamed but ESD is not (or vice versa).

2 Extensively

Most GCED and ESD themes are mainstreamed.

9 Not known

It is not known whether GCED and ESD are mainstreamed or not.

99 Not applicable

The given level of government does not have responsibility for the given component (policies, curricula, teacher education or student assessment) and/or does not have responsibility for the given level or type of education. This may occur at the national level in federal countries where education is the responsibility of individual states or at the sub-national level in small countries where there is only one level of government.

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
National				
(a) Education laws and policies		2	2	
(b) Curricula		2	2 (VET)- 1(HE)	
(c) Teacher education		1	1 (VET) – 99 (HE)	
(d) Student assessment		2	2 (VET) -1 (HE)	
Sub-national				
(a) Education laws and policies		99	99	
(b) Curricula		99	99	
(c) Teacher education		99	99	
(d) Student assessment		99	99	

⁵ GCED and ESD are mainstreamed if their themes are mentioned explicitly in relevant documents and are expected to be implemented by the relevant authorities (e.g. Ministries, regional or local education authorities), educational institutions (e.g. schools, colleges and universities) and/or education professionals (e.g. teachers, lecturers, trainers and educators) as appropriate.

⁶ Refer to the schema in paragraph 11 of Section II of these guidelines.

F. Technical and vocational education and training (paras 25-29 of the 1974 Recommendation)

F1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in technical and vocational education and training. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

During the reform of vocational education programs (2014-2018) the programs were revised, after adoption of a new law on vocational education (2018) the system step by step switched to modular programs from subject based ones aimed integration of key competencies into modules. New VET educational standards include modules developing the 8 key Competences. GCED and ESD topics are integrated as specific learning outcomes in VET programs. In order to comply with the recommendations of the Council of the European union of 22 May 2018 on key competences for lifelong learning (2018/C 189/01) "Civil Education" module is now under revision (most of the topics are integrated in this particular module).

TPDC is giving trainings to VET teachers and principals of VET institutions in "Developing of Entrepreneurship competence". There are some learning outcomes in terms of ESD (mostly on sustainable consumption and production) in the module of "Developing of Entrepreneurship competence".

Entrepreneurial training includes the principles of sustainable development, as well as the newly approved teachers standard include the competencies of sustainable development as a mandatory requirement, the standard has been developed with the support of the World Bank and is awaiting approval.

LEPL Environmental Information and Education Centre has developed the Module - "Environmental Outlook", which was established in vocational programmes from September 2018 and is mandatory for the following professions: Veterinary, Agriculture, Gardening, Hotel Business, Restaurant Business, Food Technology and Art Work.

Vocational colleges have been conducting forest worker's courses with an updated program since 2017. The program is successfully implemented in 4 vocational schools of Georgia fully funded by the state. The module of climate-smart agriculture is being developed in order to promote the new approach in the country and introduce it in vocational colleges.

G. Adult education (para 30 of the 1974 Recommendation)

- G1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in adult education and other forms of non-formal education including youth education, out-of-school education, etc. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

In order to upgrade the skills of the adult population and meet the demands of the labour market, the ministry began working on adult education system development in the context of formal education. The ministry developed legal framework for LLL –The new law on vocational education (adopted by the parliament of Georgia in 2018) acknowledges adult education. Since 2019 there are short-term vocational training and retraining courses for adults in the system that issue a state-recognized certificate. Any legal entity (an educational institution, a private company etc.) that meets the relevant standards, can obtain the right to implement short-term courses and get a state financing. The law also made it possible to validate nonformal/informal education. It created flexible connection between different levels of education. In order to support LLL, ministry developed “Establishment of Life Long Entrepreneurial Learning (LLEL) at all levels of Education 2019-2020” action plan and approved relevant working group.

Adult education programs might be either training or retraining programs that aim upskilling according to the requirement of the employers and are approved by the national center for education quality enhancement. Thus, GCED and ESD topics are included according to the needs from employer’s side.

LEPL Environmental Information and Education Centre organizes the activities in order to support environmental education and raise public environmental awareness through lectures, seminars, conferences, eco projects, including planting, greening, clean up actions and other environmental activities for different target groups to raise awareness. Furthermore, the Centre organizes trainings for the staff of the Ministry of Environmental Protection and Agriculture of Georgia and other public officials.

H. Research and International Co-operation (paras 41-45 of the 1974 Recommendation)

- H1 Please describe what kinds of research or experimentation have been carried out to improve the implementation of GCED and/or ESD. Describe briefly how the results of such activities have influenced education policies, curricula and/or teaching practices.

Survey on “Environmental Education in Georgia”, 2014 - The goal of the study was to evaluate environmental education in the direction of formal (at all levels of education: preschool, general, vocational and higher education) and non-formal education and identify current achievements and challenges in Georgia. Also, to assess whether the existing approaches contribute to the formation of the right attitude and the acquisition of relevant knowledge and skills towards the environment in children/schoolchildren/students. The research identified the existing problems and developed recommendations that are taken into account by the Ministry of Education, Science, Culture and Sport of Georgia and reflected in the action plan and strategy of ESD developed by the Centre (EIEC).

“Survey on Public Knowledge, Attitude and Practice (KAP) assessment in relation to Biodiversity and Environmental issues (Georgia)”, 2016 - The data presented in this report come from a nationally representative survey of Georgian citizens. The survey was designed to assess the knowledge, attitudes

and practice in regards to biodiversity and ecosystem services. It was a comprehensive look at Georgian's general attitudes towards biodiversity and the environment.

H2 Please indicate which types of activities are available that promote international co-operation at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Hosting of international meetings on GCED and/or ESD			1	
Participation in international meetings abroad on GCED and/or ESD		1	1	
Support for programmes hosting foreign students, researchers and/or teachers			1	
Membership of international networks including ASPnet				
Joint research projects on GCED and/or ESD with foreign institutions			1	
Other activities (please specify):				

I. Any other comments

- I1** Please indicate whether your country has faced any constraints, in particular related to global or national crises, including natural disasters, in implementing the 1974 Recommendation during the reporting period.

--

- I2** Please provide any other relevant information or clarifications regarding the implementation of the 1974 Recommendation or the mainstreaming of GCED and ESD in your country's education system.

--
