

GUIDELINES FOR THE PREPARATION OF REPORTS BY MEMBER STATES ON THE APPLICATION OF THE 1974 RECOMMENDATION CONCERNING EDUCATION FOR INTERNATIONAL UNDERSTANDING, CO-OPERATION AND PEACE AND EDUCATION RELATING TO HUMAN RIGHTS AND FUNDAMENTAL FREEDOMS

I. Introduction

A. About the 1974 Recommendation

1. UNESCO's *1974 Recommendation concerning Education for International Understanding, Co-operation and Peace and Education relating to Human Rights and Fundamental Freedoms*¹ (the "*1974 Recommendation*") aims to promote international education and world peace through understanding, solidarity and cooperation. It was adopted on 19 November 1974 by the General Conference of UNESCO at its 18th session.

2. The *1974 Recommendation* applies to formal, non-formal and informal education and to all levels, from pre-primary to tertiary and adult education and lifelong learning. The General Conference recommended "*that Member States should apply*" the provisions included in the *1974 Recommendation* "*by taking whatever legislative or other steps*" that provide institutional (e.g. policies and legal frameworks) and pedagogical (e.g. curricula, teacher training, educational materials, equipment, and student assessment) support for its implementation, based on the "*objectives*", referred to in paragraph 4 of the *1974 Recommendation*, "*regarded as major guiding principles of education policy*" including: an international dimension and a global perspective on education, cultural diversity, interdependence, communication, rights and responsibilities, international solidarity and cooperation, and problem solving.

3. Today, the principles of the *1974 Recommendation* apply equally well to Education for Sustainable Development (ESD) and to Global Citizenship Education (GCED) and therefore represent a powerful tool for promoting the 2030 Agenda for Sustainable Development and in particular SDG Target 4.7 on the promotion of sustainable development and global citizenship through education, Target 12.8 on access to information on sustainable development and Target 13.3 on climate change education.

4. The General Conference in its 39th session recommended the use of the *1974 Recommendation* reporting process to support the implementation and monitoring of Target 4.7 of Sustainable Development Goal 4 (39 C/Resolution 79). The UNESCO Executive Board at its 209th session approved the use of the current guidelines for both the monitoring of the *1974 Recommendation* and the collection of data needed for the following global SDG indicator for which UNESCO is custodian (209 EX/Decision 18.II):

4.7.1, 12.8.1 and 13.3.1: *The extent to which (i) global citizenship education and (ii) education for sustainable development are mainstreamed in (a) national education policies; (b) curricula; (c) teacher education and (d) student assessment.*

5. Questions marked with an asterisk (*) will be used in the calculation of the respective indicators (**Table 1**). As approved by the Inter-Agency and Expert Group on the SDG Indicators, the indicators will be calculated for primary and secondary education only.

Table 1 Questions used in the calculation of the global SDG indicator for Targets 4.7, 12.8 and 13.3

Policies	Curricula	Teacher education	Student assessment

B. Reporting obligations

6. The General Conference, at its 18th session, when adopting the *1974 Recommendation* recommended “*that Member States submit [...] reports concerning the action taken by them in pursuance of this recommendation*”. Moreover, in accordance with Article VIII of UNESCO’s Constitution “*Each Member State shall submit to the Organization [...] reports [...] on the action taken upon the recommendations and conventions referred to in Article IV, paragraph 4.*”

7. Thus, **all UNESCO Member States are expected to report on the steps they have taken to implement the 1974 Recommendation** preferably by completing the following questionnaire. Such reporting takes place every four years.

II. Guidelines for completion of the questionnaire

8. This questionnaire and its accompanying guidelines are addressed to Ministers responsible for relations with UNESCO. The questionnaire is typically completed by Ministries of Education and other government authorities responsible for education. Responses should cover, as far as possible, education at all levels of government, including sub-national levels where applicable as well as education outside the government sector.

9. National respondents are encouraged to **consult widely** both within, across and beyond government, including with Ministries of Environment, with national human rights institutions, the education sector, civil society partners and others, as necessary, to gather the information needed to complete the questionnaire.

10. Responses to the seventh consultation should cover:

- (i) the time period 2017-2020;
- (ii) education at all levels of formal education from pre-primary to tertiary education as well as non-formal education;
- (iii) all levels of government that have responsibility for education within the country; and
- (iv) where possible, education outside the government sector.

11. To assist countries in responding to this questionnaire, UNESCO has developed the following set of global citizenship education and education for sustainable development themes. The list is based on a review of current common practices in many countries as well as a review of relevant literature. While the terms ESD and GCED may be used differently in some countries, the list of themes typically captures what are seen as key elements of Target 4.7. Please refer to the definitions of key terms in **Section III** before completing the questionnaire.

Global citizenship education and education for sustainable development

- 1. cultural diversity and tolerance
 - 1.1 international or intercultural understanding, solidarity and cooperation
 - 1.2 intercultural and interreligious dialogue
 - 1.3 local, national and/or global citizenship
- 2. gender equality education
 - 2.1 gender-based equal opportunities
 - 2.2 gender equality and justice
 - 2.3 gender roles, identity and stereotypes

3. human rights education
 - 3.1 equality and non-discrimination based on race, colour, language, religion, disability, political or other opinion, national or social origin, birth or other status
 - 3.2 human rights values, human dignity, justice, inclusion and participation
 - 3.3 respect for human rights and fundamental freedoms (as outlined in international conventions and declarations)
4. peace and non-violence
 - 4.1 friendly relations among peoples and nations
 - 4.2 challenging negative stereotypes, promoting peaceful solutions, learning to live together, including others and preventing violent extremism
 - 4.3 preventing all forms of violence including bullying, verbal abuse and gender-based violence
5. climate change education
 - 5.1 mitigation
 - 5.2 adaptation
 - 5.3 impact reduction
 - 5.4 early warning
6. environmental sustainability
 - 6.1 caring for the planet, protecting nature
 - 6.2 environmental justice
 - 6.3 biodiversity, water
7. human survival and well-being
 - 7.1 environmental health as it pertains to human well-being, disaster risk reduction
 - 7.2 health of the planet for future generations
 - 7.3 sustainable cities and communities
8. sustainable consumption and production
 - 8.1 responsible and sustainable lifestyles
 - 8.2 green economy, green jobs
 - 8.3 sustainable energy

III. Definitions of key terms

Term	Definition
Themes of global citizenship and education for sustainable development	
1. Cultural diversity and tolerance	<i>Education about and for diversity including language, ethnicity, race, religion as well as the development of tolerance, mutual respect and appreciation for cultural diversity. It includes intercultural and interreligious dialogue, understanding, solidarity and co-operation, and citizenship education.</i>
2. Gender equality education	<i>Education that addresses the wider issue of gender equality by promoting new attitudes and patterns of belief, transforming the way people think about traditional gender roles and helping to build long-term sustainable change. It examines how gender roles, activities, needs, opportunities, rights and entitlements affect men, women, girls and boys differently. It deals with the relationships between females and males, their access to and control of resources and the constraints they face relative to each other. It respects the rights of all learners – women, men, boys and girls – equally and gives equal access to learning opportunities, resources and protections. All learners benefit from and are treated in education equally without the limitations set by stereotypes, rigid gender roles and prejudices. It covers gender-based equal opportunities, gender equality and justice, and gender roles, identity and stereotypes.</i>
3. Human rights education	<i>Education that promotes universal respect for and observance of all human rights and fundamental freedoms and thus contributes, inter alia, to the prevention of human rights violations and abuses by providing persons with knowledge, skills and understanding and developing their attitudes and behaviours, to empower them to contribute to the building and promotion of a universal culture of human rights.</i> <i>It includes equality and non-discrimination, human rights values, dignity, justice, inclusion and participation and respect for human rights and fundamental freedoms.</i>
4. Peace and non-violence	<i>Education about peace and peace-building, mediation, conflict prevention and resolution, non-violence, reconciliation and living together peacefully. It includes advocating for friendly relations among peoples and nations, challenging negative stereotypes, promoting peaceful solutions, learning to live together and preventing violent extremism and other forms of violence including bullying.</i>
5. Climate change education	<i>Education to help people, in particular youth, understand, address, mitigate, and adapt to the impacts of climate change. It encourages changes in attitudes and behaviours needed to put the world on a more sustainable development path, and build a new generation of climate change-aware citizens.</i> <i>It covers various responses to climate change including mitigation, adaptation, impact reduction and early warning.</i>
6. Environmental sustainability	<i>Education about responsible interactions with the environment to avoid depletion or degradation and to promote environmental quality and health. It includes, caring for the planet and protecting nature, environmental justice, biodiversity and water.</i>
7. Human survival and well-being	<i>Education that promotes social well-being and harmony including in future generations due to healthy environmental systems. It includes health of the planet and environment related to human well-being, disaster risk reduction and sustainable cities and communities.</i>

8. Sustainable consumption and production	<i>Education on the use and production of resources, products and services that have a minimal adverse impact on the environment. It promotes resource and energy efficiency, sustainable infrastructure and green jobs. It includes responsible and sustainable lifestyles, the green economy and sustainable energy.</i>
Dimensions of learning	
Knowledge	<i>Factual information and understanding acquired through study and/or experience.</i>
Skills	<i>The ability to carry out a task well as a result of training, practice and innate aptitude. Skills may be physical, mental or both.</i>
Values	<i>Principles that form the foundation on which individuals conduct themselves and interact with others and with the environment around them.</i>
Attitudes and behaviours	<i>Ability to act on the basis of beliefs and knowledge acquired through study or experience.</i>
Levels of education	
Pre-primary	<i>Education designed to support children's early cognitive, physical, social and emotional development and introduce young children to organized instruction outside of the family context. Participants are usually aged from three years.</i>
Primary and secondary	<i>Education designed to:</i> <i>(i) provide students with fundamental skills in reading, writing and mathematics (i.e. literacy and numeracy) and establish a solid foundation for learning and understanding core areas of knowledge and personal development (primary education); and</i> <i>(ii) prepare students for further education at post-secondary and tertiary levels and for entry into the labour market (secondary education).</i> <i>It includes both general and vocational education.</i>
Tertiary	<i>Education designed to provide learning activities in specialised fields of education. It aims at learning at a high level of complexity and specialisation. It includes both what is commonly understood as academic education and advanced vocational or professional education.</i>
Types of education	
Adult education	<i>Education specifically targeted at individuals who are regarded as adults by their society to improve their technical or professional qualifications, further develop their abilities, enrich their knowledge with the purpose to complete a level of formal education, or to acquire, refresh or update their knowledge, skills and competencies in a particular field.</i>
Formal education	<i>Education that is institutionalized, intentional and planned through public organizations and recognized private bodies which – in their totality – constitute the formal education system of a country. Formal education programmes are recognized by the relevant national or sub-national education authorities. Formal education consists mostly of initial education (e.g., pre-primary, primary, secondary and tertiary education).</i>
Non-formal education	<i>Education that is an addition, alternative and/or a complement to formal education within the process of the lifelong learning of individuals. It is often provided to guarantee the right of access to education for all. It caters to people of all ages but does not necessarily apply a continuous pathway-structure. It may be short in duration and/or low-intensity, and it is typically provided in the form of short courses, workshops or seminars. Non-formal education mostly leads to qualifications that are not</i>

	<i>recognized by the relevant national or sub-national education authorities or to no qualifications at all. Non-formal education includes programmes on life skills including literacy and numeracy, work skills, and social or cultural development. Most types of adult education are also included.</i>
Vocational education	<i>Education that is designed for learners to acquire the knowledge, skills and competencies specific to a particular occupation or trade or class of occupations or trades. Vocational education may have work-based components (e.g. apprenticeships). Successful completion of such programmes leads to labour-market relevant vocational qualifications acknowledged as occupationally-oriented by the relevant national authorities and/or the labour market. Vocational education can be offered at secondary and post-secondary or tertiary levels of education.</i>

IV. Information about the respondent

Country:

MALAYSIA

Organization:

MINISTRY OF EDUCATION, MALAYSIA

Date of submission:

V. Other contributors consulted during the completion of this questionnaire

Please indicate below the names of other organizations and contributors consulted during the completion of this questionnaire.

Government institutions including other Ministries (please specify):

- 1. Institute of Teacher Education Malaysia, Technical and Vocational Division MoE Malaysia*
- 2. Committee for Strategic Planning and Strengthening of General Courses for Higher Education Institutions, Ministry of Higher Education, Malaysia (MoHE)*
- 3. Department of Higher Education, MoHE*
- 4. Department of Polytechnic and Community College Education (MoHE)*
- 5. Ministry of Rural Development*

National human rights institutions (please specify):

-

Local and regional authorities responsible for education (please specify):

MARA, KEMAS, RISDA, PERDA & KEDA – formal education, JAKOA – non-formal education

Other local and regional authorities (please specify):

-

Organizations representing education stakeholders (e.g. teachers, students, parents, etc.) (please specify):

-

Other civil society organizations (please specify):

-

Others (please specify):

VI. Questionnaire

A. Laws and policies (preamble and paras 4 and 7 of the 1974 Recommendation)

A1a. Please describe any specific national or sub-national laws, legislation or legal framework(s) in your country that govern the promotion of global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes² are mentioned explicitly or are inferred and what types or levels of education are covered.

- The 1974 Environmental Quality Act - to ensure the protection and to enhance the quality of the environment ;
- The concept of sustainable development was also a focus in the Malaysia National Vision Policy implemented from 2001 to 2010 ;
- The pursuit for environmentally sustainable development to reinforce long-term growth was one of the thrusts in the 8th Malaysia Plan (2001-2005) and the subsequent Malaysia Plans to ensure balance between development needs and the environment exists ;
- Provisions of other frameworks for environment policies and strategies are the National Policy on Environment (2002), National Physical Plan (2005), the National Green Technology Policy and the National Climate Change Policy(2009).
- The National Philosophy of Education (NPE) in Malaysia written in 1988 serves as the basis for policy development on education and is in itself a promotion of GCED and ESD ;
- The principles of ESD are incorporated in the education system in Malaysia. The aspects of sustainable development are integrated in the National School Curriculum from preschool to secondary school ;
- The Malaysia Education Blueprint (2013-2025) which was launched in 2013 is a long term comprehensive plan built on five aspirations- access, quality, equity, unity and efficiency which are in principle, elements for inclusive and sustainable development;
- The GCED and ESD elements are embedded in the curricula - the Primary School Standard Curriculum (KSSR) and the Secondary School Standard Curriculum (KSSM) for all levels and subjects.
- KSSM and KSSR are built based on six pillars namely **communication; spirituality, attitudes and values; humanity; self appearance ; physical and aesthetic development** as well as **science and technology**. These six pillars are aligned with the basic domains of GCED and ESD - cognitive, social emotional and behavioural.
- The principles of GCED and ESD are integrated in teacher education in universities as well as in teacher education institutes in Malaysia.
- For higher education, the general law that governs its rules, regulations and practices is the Education Act 1996 (Act 550) and the National Education Philosophy which forms the core values of the act and processes covered by the act. For governance and implementation, this act is supported by several acts and strategic plans as listed below in subsection A1b.
- The right of Orang Asli to have access to education.

² See the schema described in paragraph 11 of Section II of these guidelines.

A1b. Please provide the full names of any laws, legislation or legal frameworks referred to in A1a and, where possible, web links to relevant documents.

- The 11th Malaysia Plan (2016-2020);
- The Malaysia Education Blueprint (2013-2025) ;
- Primary School Standard Curriculum or *Kurikulum Standard Sekolah Rendah* (KSSR) ;
- Secondary School Standard Curriculum or *Kurikulum Standard Sekolah Menengah* (KSSM) ;
- Education Act 1996 (Act 550)
- National Council on Higher Education Act 1996 (Act 546)
- Universities and University Colleges Act 1971 (Act 30)
- Private Higher Education Institutions Act 1996 (Act 555)
- Malaysia Education Blueprint 2013-2025
- Malaysia Education Blueprint 2015-2025 (Higher Education)
- Polytechnic and Community College Strategic Plan 2018 – 2025
- Aboriginal Peoples Act 1954 (Act 134), in Section 17.

7. Human survival and well-being	1	1	1	1	1	1	0	1
8. Sustainable consumption and production	1	1	1	1	1	1	0	1

A3a. Please describe any specific current national or sub-national education policies, frameworks or strategic objectives in your country that promote global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes³ are mentioned explicitly or are inferred and what types or levels of education are covered.

MOE

In Malaysia, GCED and ESD are not taught as subjects, but aspects of sustainable development and global citizenship are integrated in the Primary School Standard Curriculum (KSSR) and Secondary School Standard Curriculum (KSSM). The protection of the environment, climate change and other aspects of sustainable consumption and production are incorporated across the curriculum that aim to raise awareness and develop positive attitudes among the students.

MOHE

In 2015, Ministry of Higher Education (MOHE) launched the Malaysia Education Blueprint 2015–2025 (Higher Education) or the MEB (HE). The birth of MEB (HE) consolidates the Ministry's overriding aspiration to create a higher education system that ranks among the world's leading education systems and that enables Malaysia to compete in the global economy. MEB (HE) takes into account the aspirations from SDG 4 which is to "ensure inclusive and equitable quality education and promoting lifelong learning opportunities for all".

³ See the schema described in paragraph 11 of Section II of these guidelines.

The third shift of this plan namely Nation of Lifelong Learners is in line with the SDG 4 agenda that all learners acquire the knowledge and skills needed to promote sustainable development, including, among others, through education for sustainable development and sustainable lifestyles.

The system aspirations for higher education are in alignment towards developing an inclusive and equitable quality education. The five system aspirations cover **Access, Quality, Equity, Unity** and **Efficiency**. Each system aspiration has corresponding key indicators which the MOHE use to track the progress of outcomes.

Access

As Malaysia aspire to have one of the most educated and skilled workforce in the region, higher education enrollment rate is targeted to be more than 70%, Master and PhD enrollment rate to be more than 8% by 2025, to be on par with the highest enrollment levels in the Association of Southeast Asian Nations (ASEAN). This will require an additional 1.1 million places mainly through growth in the Technical and Vocational Education and Training (TVET), private HLIs and online learning. Enrollment for TVET in 2019 is 245,908 (35.6%).

Quality

Malaysia evaluates its higher education system quality aspiration against the quality of the system, quality of the institutions and quality of graduates. By the quality of the system, Malaysia targeted to be ranked in the top 25 countries for research output based on U21 Ranking System (Malaysia is ranked at 27th for overall U21 Ranking for 2020). By the quality of the institutions: Malaysia aims to have one Malaysian university to be ranked in the top 25 in Asia, two universities to be ranked in the top 100 globally, and four universities to be ranked in the top 200 by 2025 (according to QS World University Rankings). According to QS World University Rankings 2021, one university is ranked in the top 100 globally and four others are ranked in the top 200 globally. By the quality of graduates, Malaysia targeted the graduate employability to be increased to more than 80% by 2025. Currently, Malaysia has achieved 86.2% of graduate employability with more than 130,000 international students in HLIs in 2019.

Equity

MOHE aims to ensure equity in higher education, giving every student the opportunity to fulfil his or her full potential regardless of location, race, sex or socio economic background. Similarly, the Ministry recognizes the important of providing equitable access to education opportunities for special need due to disabilities. (Enrolment for students with disabilities 2019 is at 1791 (0.14%). With more pressing demands for an inclusive higher education for the disabled persons, in 2012, MOHE had issued an Instruction for Implementation of Action Plans to Improve Teaching and Learning for Students with Disabilities (OKU) at all Public Universities. This instruction for implementation of action plans was used in determining/deciding the best practices of inclusive education that comply with international standards, which to be implemented at the university level throughout the country. This consequently led to the formulation of a Guideline for the Implementation of the Policy for Persons with Disabilities Inclusion in HEIs in 2019. MOHE will regularly review student outcome data on performance gaps, and is committed to improve the enrolment rate and completion rate of students from socio-economically disadvantaged backgrounds and communities.

Unity

Given Malaysia's multi-ethnic society, MOHE aspires to create an education system that provides students with shared values, shared experiences, and common aspirations by embracing diversity. Patriotism and Unity Index has been developed in 2017 to indicate the level of unity, including the degree of general trust among ethnic groups, the extent of religious and racial tolerance, and social interaction between students of different communities. The goal is to develop talent that can contribute towards creating a cohesive society from among diverse communities,

whether in neighbourhoods, local communities, schools, universities, or workplaces.

Efficiency

Malaysia is deeply committed to higher education and invest in higher education. Hence, MOHE is focusing on improving the overall efficiency and productivity of higher learning institutions. Specifically, the Ministry will seek to produce larger numbers of graduates at the same cost, without compromising on educational quality or restricting access to eligible students. For instance, the cost per student and the cost per graduate in the higher education system will be closely monitored. On the efficiency of resources, it is accessed through the U21 Ranking System, where Malaysia is currently ranked at the 12th out of 50 countries on resources committed to higher education.

Ministry of Rural Development

The Rural Development Policy 2030(RDP 2030) has summarised the "Prosperous, Inclusive, Sustainable and Holistic Rural Living" vision as the main agenda of rural development approach in Malaysia by 2030. Through the RDP 2030, the Government is highly committed to reduce and eventually eliminate the gap between urban and rural communities in terms of quality of life, creating economic opportunities as well as providing a conducive social environment to motivate rural communities especially the youths to remain in the rural area.

The vision of RDP 2030 is "Prosperous Rural Living", which creates thriving rural communities in various aspects; including social, economy, culture and environment. This vision will ensure that the development will benefits all, regardless of race, religion, social status, gender and age. The target of "Prosperous Rural Living" vision is to ensure a balanced and sustainable development that complements each other in social, economic and environmental aspects.

The policy statement is developed in accordance with the 10 thrusts of rural development that support RDP 2030's vision and mission. The related thrusts promoted GCED & ESD as follows:

- 1. THRUST 03: EXCELLENT HUMAN CAPITAL**
Excellent, viable and sustainable rural human capital; and fulfilling future human resources need through an excellent quality education system.
- 2. THRUST 05: EMINENT RURAL YOUTH**
Empowerment of rural youths with outstanding personality as well as knowledgeable, highly-skilled, patriotic, creative, innovative, and enjoy sustainable income through entrepreneurship.
- 3. THRUST 06: PROGRESSIVE RURAL WOMEN**
Rural women that are advanced in all aspects of life, including in economy, education, health, social and leadership.
- 4. THRUST 09: BIODIVERSITY AND SUSTAINABLE ENVIRONMENT**
Preservation and conservation of biodiversity and environment through a sustainable development approach; Enhancing community awareness and responsibility as well as promoting an environmental- friendly way of life.

Strategies indicate for related thrusts as follows:

- 1. THRUST 03: EXCELLENT HUMAN CAPITAL**
 - i. Strengthen rural communities with knowledge and soft skills as well as technical knowledge (hard skills);
 - ii. Enhance the marketability of rural human capital in various sectors;

- iii. Improve and provide a comprehensive infrastructure including strengthen professionalism for teachers in MRSM;
- iv. Equip the rural communities with skills required for 4IR;
- v. Conserve, preserve, promote and protect the culture, arts and heritage of the rural communities;
- vi. Increase opportunities for skills training for dropout students;
- vii. Upgrade the preschool education system in terms of physical infrastructure, teacher's professionalism and syllabus;
- viii. Increase parental involvement and cooperation in the early childhood education;
- ix. Improve nutrition and health of children in nursery, kindergarten and preschool including for special needs children;
- x. Continue providing general schooling aids and per capita grant to poor children in nursery, kindergarten, preschool including for special needs children;
- xi. Develop a "first-class mentality" among the rural communities; and
- xii. Strengthen unity among the multi-racial communities

2. THRUST 05: EMINENT RURAL YOUTH

- i. Establish TVET as the leading choice of education among rural youths;
- ii. Improve the quality of education in line with the needs of the Fourth Industrial Revolution (4IR);
- iii. Strengthen Teaching and Learning methods that emphasize on practical training;
- iv. Increase involvement of innovative and creative youth in the high-income economic sector;
- v. Enhance appreciation of history and socio-cultural as well as national development policies; and
- vi. Expand self-development programs that emphasize on religious and cultural values, local customs as well as recreational and sports activities

3. THRUST 06: PROGRESSIVE RURAL WOMEN

- i. Increase opportunities for women to participate in the economy and entrepreneurship sector;
- ii. Optimize women capacity and employment rates;
- iii. Increase women's ownership of productive assets, investment and savings; and
- iv. Increase health awareness and access to health services.

4. THRUST 09: BIODIVERSITY AND SUSTAINABLE ENVIRONMENT

- i. Promote green agricultural practices among the rural communities; and
- ii. Integrate traditional knowledge in rural environmental management with the involvement of rural communities

Types of education covered: Preprimary, secondary, tertiary (TVET) & non-formal education in Ministry of Rural Development (MRD) education institutions lead by MARA, KEMAS, LKW (PERDA and KEDA), and JAKOA.

A3b. Please provide the full names of any education policies, frameworks or strategic objectives referred to in A3a and, where possible, web links to relevant documents.

*A4. Please indicate which GCED and ESD themes are covered in national or sub-national education policies, frameworks or strategic objectives affecting each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	1	1	1
2. Gender equality	1	1	1	1
3. Human rights	1	1	1	1
4. Peace and non-violence	1	1	1	1
5. Climate change	1	1	1	1
6. Environmental sustainability	1	1	1	1
7. Human survival and well-being	1	1	1	1
8. Sustainable consumption and production	1	1	1	1

*A5 Please indicate whether national or sub-national education policies, frameworks or strategic objectives on education provide a mandate to integrate GCED and ESD in the following areas by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown, 99 = not applicable (e.g. where the given level of government is not responsible for education)

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
National				
Design or revision of the curricula	1	1	1	99
Setting of programme learning objectives	1	1	1	99
Textbook development	1	1	0	99
Teacher education and training	1	1	1	99
Assessment of student outcomes	1	1	1	99
Sub-national				
Design or revision of the curricula	1	1	0	99
Setting of programme learning objectives	1	1	0	99
Textbook development	1	1	0	99
Teacher education and training	1	1	0	1
Assessment of student outcomes	1	1	0	1

B. Curriculum (paras 4 and 10-19 of the *1974 Recommendation*)

B1a. Please describe in which ways GCED and ESD are mainstreamed in school curricula. Indicate whether topics are taught as standalone subjects or are integrated into the curricula of other subjects. Explain whether GCED and/or ESD themes⁴ are mentioned explicitly or are inferred and what types or levels of education are covered.

MOE

GCED and ESD are not taught as standalone subjects. They are embedded and integrated in the school curricula in all subjects at all levels. Elements of climate change like protection of the environment, global warming and greenhouse effect, sustainable consumption and production are incorporated across the curriculum.

In 2019 Civics Education was reintroduced, focusing on good citizenry in the context of self, family, school, community and global – integrated through teaching and learning in the classroom, extracurricular, weekly assembly and school activities.

MOHE

In Malaysia, one of the criteria for curriculum approval and implementation is to embed the content of the General Education Subjects (MPU) into the curriculum as mandated by the Malaysian

⁴ See the schema described in paragraph 11 of Section II of these guidelines.

Cabinet Paper 2013. MPU modules comprises two compulsory general courses (e.g., 4-6 credits for a bachelor's degree programme and 2-3 credits for a certificate or diploma programme), namely (1) Appreciation of Ethics and Civilisations; and (2) Philosophy and Current Issues). The first course covers Malaysian core principles and values, ethnic diversity of Malaysian and historical perspectives leading to the formation of Malaysian identity and Malaysia as a nation-state. On the other hand, the second course seeks to provides basic philosophical thinking approach in handling current and contemporary issues of national and global significance. These compulsory courses are complemented by several more electives under the themes of soft skills, knowledge about Malaysia and citizenship, and aspects of service learning, to complete the whole package of the MPU module. The learning outcomes for all MPU courses are guided by the MQF learning outcome domains and clusters which include coverage on GCED and ESD.

On the other hand, The Department of Polytechnic and Community College Education (DPCCE) also commits to ESD and GCED through the curriculum and green initiatives.

Curriculum in polytechnics and community colleges is designed and responded to the learning outcome clusters that aligned to the aspirations of National Education Philosophy. The learning clusters prescribe personal and ethical competencies that build up characters of the graduates of polytechnics and college communities to be good and functional citizens.

DPCCE also has shown dedication to the SDGs and green technology through the curriculum design and implementation at the institutions. Blueprint POLYGreen 2015-2020 (BPPM) and Blueprint SmartGreen Polytechnic Community College 2021-2026 (BSGPC) are published to be used by all institutions.

The elements of ESD and GCED are taught to all students of polytechnics and community colleges in Malaysia through general studies courses. General studies courses are made compulsory for all students to enroll and pass. These courses highlight the values of embracing world cultures and to function in today's society.

B1b. Please provide examples of curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents.

MOE

Aspects or elements of ESD are integrated in the KSSR and KSSM. As an example, in the form Two (Grade 8) Science Curriculum, elements of climate change are introduced as part of the Learning Objectives and Learning Outcomes under the theme 'Man and the Variety of Living Things'. The learning objective for this particular theme is 'to evaluate the role of man in maintaining the balance in nature. The learning outcomes expected from this theme are :

- i) explain the effects of human activities on the balance in nature ;
- ii) describe how man solves problems related to environment ; and
- iii) justify that human need a stable, productive and balanced ecosystem.

Other examples of environmental issues under the theme include the global climate change, habitat destruction, species extinction, air, soil and water pollution, loss of wetlands, solid waste management, deforestation, land overuse, over fishing and toxin in the environment.

Another example is in the Geography subject for Form One (grade 7). The element of climate change is introduced as part of the Learning Objectives and Learning Outcomes under the theme 'The Influence of Weather and Climate '.

The elements of climate change for example, are also integrated in other subjects like languages and other social study subjects to further enhance students' knowledge and skills on climate change from the cultural and heritage perspectives. Religious and faith-based approaches also highlight the importance of earth preservation as reflected in the religious studies and Moral subject.

More recently, MoE Malaysia embarked on the pilot project to embed GCED elements through project- based learning in four subjects – History, Geography, Maths and Science.

C. Teacher education (including the training of trainers and educators) (paras 4 and 33-37 of the *1974 Recommendation*)

C1a. Please describe in which ways GCED and ESD are mainstreamed in initial training and in continuing professional development of teachers, trainers and educators. Indicate whether all teachers, trainers and educators or only some are required to receive training to teach GCED and/or ESD.

MOE

Elements of Education for Sustainable Development (ESD) and Global Citizenship Education (GCED) are included in the teacher training curriculum. Human rights, sexuality education and human governance are integrated in all teacher training programs offered by the Institute of Teacher Education (ITE).

MOHE

To ensure the MPU modules are delivered at HEIs as prescribed by the MPU guidelines, a series of Training of Trainers (TOT) has been conducted from time to time for MPU teachers and lecturers at HEIs. The TOTs include how to effectively deliver content and case studies with embedded elements of GCED and ESD, through active learning session and project-based assignment, which are then assessed based on the stipulated course learning outcomes. The TOTs also share good and best practices in delivering MPU courses even in the situation of a large class size.

As for Polytechnic and Community College the element of ESD and GSED are emphasis to all DPCCE lecturer through teaching competency certificate @ Instructional Leadership and Andragogy Development Course [Kursus Kepimpinan Instruksional dan Pembangunan Andragogi (KIPA)].

The courses will equip lecturers with technical and vocational education skills and knowledge which is parallel with the national education needs and the industry standard practice.

Lecturers will also be trained to lead their institutions and engage with the stakeholders based upon the rules and regulations as stated in national standards and policies.

Regular upskilling and refresher courses will ensure lecturers are highly skilled in applying technology to improve the efficiency and skills training needs of industry and country

Lecturers are expected / encouraged to adhere to code of ethics and professional conduct when dealing with the stakeholders, communities and industries.

C1b. Please provide examples of teacher training policies or curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents. If possible, include examples related to initial training and to continuing professional development.

MOE

The Teacher Institute of Education Malaysia (ITE/IPGM) has developed a guideline namely 'Garis Panduan Pembangunan dan Semakan Kurikulum Institut Pendidikan Guru' (Guidelines for Development and Review of Teacher Education Curriculum) in 2019. The guidelines are built to ensure that all programs offered by ITE/IPGM are designed and reviewed according to current educational needs and requirements.

MOHE

The dominant teaching-learning techniques recommended during the TOT training sessions for delivering MPU courses are based on "high impact educational practices" (HIEP) originally introduced by American Association of Colleges and Universities (AACU), where these techniques were adapted for implementation for Malaysian context by the HIEPs taskforce from at MOHE as well as another taskforce for HIEPS for MPU. As inculcation of elements of GCED and ESD requires certain level of student engagement with their subject, their peers and their facilitators, the adoption of HIEP has been found to be effective in guiding the student to attain the course learning outcomes.

For Polytechnic and Community College, KIPA is a mandatory requirement under the Code Of Practice For Accreditation Program (COPTPA) which requires all TVET educators to obtain accreditation and teaching competency certificates.

*C2 Please indicate whether teachers, trainers and educators are trained to teach GCED and ESD during initial or pre-service training and/or through continuing professional development. Please enter the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Initial or pre-service training				
For teachers of selected subjects only (in which GCED or ESD are typically taught)	1	1	0	9
For teachers of other subjects	1	1	0	9
Continuing professional development				
For teachers of selected subjects only (in which GCED or ESD are typically taught)	1	1	1	9
For teachers of other subjects	1	1	0	9

*C3 Please indicate on which GCED and ESD themes pre-service or in-service training is available for teachers, trainers and educators at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	1	1	9
2. Gender equality	1	1	1	9
3. Human rights	1	1	1	9
4. Peace and non-violence	1	1	1	9
5. Climate change	1	1	1	9
6. Environmental sustainability	1	1	1	9
7. Human survival and well-being	1	1	1	9
8. Sustainable consumption and production	1	1	1	9

*C4 Please indicate whether teachers, trainers and educators are trained to teach the following dimensions of learning in GCED and ESD. Please enter the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Knowledge	1	1	1	1
Skills	1	1	1	1
Values	1	1	1	1
Attitudes and behaviours	1	1	1	1

*C5 Please indicate whether teachers, trainers and educators are trained to use the following approaches to teach GCED and ESD in primary and secondary education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Global citizenship and education for sustainable development
GCED/ESD are taught as separate subject(s)	0
Cross curriculum approach (e.g. <i>GCED/ESD are taught in more than one subject but not throughout the curriculum</i>)	0
Integrated approach (e.g. <i>GCED/ESD are taught throughout the whole curriculum</i>)	1
Whole school approach (e.g. <i>GCED/ESD are integrated in the school ethos, management, governance, curriculum, teacher training, teaching practices, the learning environment, and in learning experiences in the community and life outside school</i>)	1

D. Student assessment (paras 4 and 5 of the 1974 Recommendation)

D1a. Please describe in which ways GCED and ESD are covered in student assessments and examinations. Indicate whether students are assessed only on their knowledge of and skills related to the topics being tested or also on their values, attitudes and/or behaviours.

MOE

Realising the importance of a more holistic assessment, Malaysia is changing its assessment system to be in tandem with global development through the school-based assessment (SBA). SBA has changed two important dimensions of assessment – from total reliance on norm-referenced to more emphasis on criterion-referenced and formative function of assessment. This will allow teachers to focus more time on learning and growth, cultivating and developing social emotional as well as behavioural skills. Most importantly SBA will provide teachers the space and opportunities to pursue and practice the necessary teaching and learning approaches related to GCED and ESD.

MOHE

Student assessments and examination in HEIs consist of these elements:

- Case studies
- Project Paper
- Peer Assessment
- Event/Programmes
- Continuous Assessment
- Simulation
- Service learning

Meanwhile, student assessment and examination in Polytechnic and Community College of Malaysia assess students' knowledge and skills related to the topics being tested as well as assessing students' values, attitudes and/or behaviours.

Assessment in polytechnic and community college is designed to comply with our curriculum and ensure the learning outcomes are achievable. In addition, students values, attitude and behaviours are assessed through alternative assessment.

*D2 Please indicate whether the GCED and ESD themes below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	1	1	1
2. Gender equality	1	1	1	1
3. Human rights	1	1	1	1
4. Peace and non-violence	1	1	1	1
5. Climate change	1	1	1	1
6. Environmental sustainability	1	1	1	1
7. Human survival and well-being	1	1	9	9
8. Sustainable consumption and production	1	1	9	9

*D3 Please indicate which of the dimensions of learning in GCED and ESD below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Knowledge	1	1	1	1
Skills	1	1	1	1
Values	1	1	1	1
Attitudes and behaviours	1	1	1	1

E. Mainstreaming of GCED and ESD in laws and policies, curricula, teacher education and student assessment (paras 4-5, 7, 10-19 and 33-37 of the 1974 Recommendation)

*E1 Based on your responses to questions in the previous four sections (laws and policies, curricula, teacher education and student assessment) please indicate to what extent global citizenship education (GCED) and education for sustainable development (ESD) are mainstreamed⁵ in (a) education laws and policies, (b) curricula (c) teacher education (including the training of trainers and educators) and (d) student assessment in your country. Please enter the appropriate number in each white cell in the table below.

KEY:

- 0 Not at all** *GCED and ESD are not mainstreamed.*
- 1 Partially** *Some GCED and/or ESD themes⁶ are mainstreamed. Select this option if GCED is mainstreamed but ESD is not (or vice versa).*
- 2 Extensively** *Most GCED and ESD themes are mainstreamed.*
- 9 Not known** *It is not known whether GCED and ESD are mainstreamed or not.*
- 99 Not applicable** *The given level of government does not have responsibility for the given component (policies, curricula, teacher education or student assessment) and/or does not have responsibility for the given level or type of education. This may occur at the national level in federal countries where education is the responsibility of individual states or at the sub-national level in small countries where there is only one level of government.*

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
National				
(a) Education laws and policies	1	1	2	1
(b) Curricula	2	2	2	1
(c) Teacher education	2	2	1	1
(d) Student assessment	1	1	2	1
Sub-national				
(a) Education laws and policies	1	1	0	1
(b) Curricula	2	2	0	1
(c) Teacher education	2	2	0	1
(d) Student assessment	1	1	0	1

⁵ GCED and ESD are mainstreamed if their themes are mentioned explicitly in relevant documents and are expected to be implemented by the relevant authorities (e.g. Ministries, regional or local education authorities), educational institutions (e.g. schools, colleges and universities) and/or education professionals (e.g. teachers, lecturers, trainers and educators) as appropriate.

⁶ Refer to the schema in paragraph 11 of Section II of these guidelines.

F. Technical and vocational education and training (paras 25-29 of the 1974 Recommendation)

F1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in technical and vocational education and training. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

MOE

Technical and Vocational Education is one of the focus areas in the education transformation in Malaysia to close the demand gap for skilled workers as well as to retain youth who are not academically inclined in schools. It is therefore imperative that TVET promote growth and efficiency that support sustainable development. Although GCED and ESD are not taught as subjects in TVET, GCED and ESD elements are embedded in many TVET programmes and initiatives to ensure harmonisation between economic prosperity, environment and social well-being.

Among the initiatives are as follows:

- Community Service Component – as part of the TVET programme where students are given the space to develop their social, communication and leadership skills. The component will provide opportunity for students to function as an individual as well as community members - understand, appreciate and take positive actions in the community through project-based initiatives. Teaching and learning will be conducted in the form of interactive lectures, group discussions, experience-based learning through group activities and volunteerism.
- Innovation of the AQUAFERA by one of the vocational colleges - produced from Moringa olifera extract, termanilia cattapa dan fermented bacteria to stabilize water and soil pH level and, to treat waterborne diseases – as part of sustainable environment
- The introduction of sustainable urban farming as part of Siswapreneur Innovation Challenge 2019 (Young Entrepreneur Innovation Challenge for Undergraduate 2019).

MOHE

Major initiatives taken to promote GCED and/or ESD in technical and vocational education and training include:

- a) structured training targeted for the lecturers are conducted to ensure the lecturers have professional competencies.
- b) green technology compliance course to all students as an additional certificate which awarded them as Green Collar Worker.

<https://drive.google.com/open?id=1H0KutjautNc1x4X2LhCt7DwGE2Xuhba8>
<https://drive.google.com/open?id=1ekFnJ4HQf0qS1MNp9fH5YytgA0Sm2pqh>
<https://drive.google.com/open?id=1J29eNt5syzeRV1qU9QihYXB3VWWz7AKX>

G. Adult education (para 30 of the 1974 *Recommendation*)

- G1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in adult education and other forms of non-formal education including youth education, out-of-school education, etc. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

Initiatives taken by Department of Polytechnic and Community College Education to promote GCED and/or ESD in adult education and other forms of non-formal education including youth education, out-of-school education are to:

- a. develop and strengthen innovative programs – Skill based training programs are specially designed for the Tahfiz/Pondok (Islamic School) students to expand the access for these students to TVET education. Community Entrepreneurship Programme is also designed to produce highly skilled entrepreneurs in the community and improve the socio-economic status of the local community
- b. conduct reskilling and upskilling programs with industry - various skills based, customized and professional programs are conducted to enhance career development of industry personnel
- c. strengthen the Life Long Learning infrastructure - by using integrated data platforms to encourage greater community involvement
- d. increase promotional activities – dissemination of information, courses & trainings, success stories and other relevant information via National Life Long Learning Portal, social media and available platforms

-

H. Research and International Co-operation (paras 41-45 of the 1974 *Recommendation*)

- H1 Please describe what kinds of research or experimentation have been carried out to improve the implementation of GCED and/or ESD. Describe briefly how the results of such activities have influenced education policies, curricula and/or teaching practices.

There are many research that has been carried out by MOHE to improve the implementation of Education for Sustainable Development. The Ministry of Higher Education (MOHE) always supports and encourages quality basic research which contributes in areas of importance to the Malaysian economy and society.

This includes research that enhances the quality of education in promoting peace and human rights. MOHE's Fundamental Research Fund Program (Program Dana Penyelidikan Fundamental KPT) covers four (4) main grant schemes:

- (i) Fundamental Research Grant Scheme (FRGS);
- (ii) Prototype Research Grant Scheme (PRGS);
- (iii) Transdisciplinary Research Grant Scheme (TRGS); and
- (iv) Long-term Research Grant Scheme (LRGS).

The importance of fundamental research under MOHE is to spearhead and cultivate knowledge creation, talent development and global academic excellence. In year 2020, MOHE has been allocated a total of RM 250 million to fund this program which focuses on basic research that produces new theories, concepts and ideas. The targeted research results are high-impact publications, talent

generation (PhD and Masters students) as well as significant research impact on society, industry, government and academia.

Some of the studies that has been funded under this program in relation to Education for Sustainable Development (ESD), indigenous people (Orang Asli) in Malaysia, bully management, disability and gender roles are:

1. A TVE Stakeholder Defined Curricular Framework for Education for Sustainable Development (ESD): Reorienting TVE teacher training Programmes for Sustainability Education.
2. Formulating the Education Ecosystem Efficiency Index, EEI by extending aboriginal worldview theory in the context of Orang Asli in Malaysia.
3. Establishing Therapeutic Landscape Model for Children with Learning Disabilities in Malaysia berjumlah RM 63,100 oleh penyelidik USM Tahun 2020.
4. Exploring Gender-Responsive Dimensions for STEM Teachers: Towards Developing a Fundamental Gender-Responsive Framework.

Besides, MyPAiR programme was established in year 2019. The MyPAiR program is one of the initiatives outlined under the Eighth Strategy and is the implementation of the Second Focus 2019 Budget initiative which ensure's the wellbeing of Malaysians. This program aims to enhance research cooperation between Higher Education Institutions (HEIs) with local industries as well as international agencies in strategic areas. MyPAiR was introduced to strengthen the capabilities and drive Malaysian research excellence through strategic partnerships and collaborations.

Research sharing and collaboration is not limited to sharing expertise but also covers a wider concept. Malaysia has the appropriate capacity to embark on a broader network of research collaborations. The principles of financing MyPAiR are in the form of matching funds, research scope and genuine collaboration. Total allocation so far has reached RM30,000,000.00 through one off allocation in year 2019. Among the success story of MyPAiR is establishing research cooperation relations with countries such as the United Kingdom, Japan, France, and Spain. This brings capacity development into a broader context at a international level. Various international technology, information and expertise exchange, opportunity to use such facilities among the most advanced laboratories in the world.

Researchers can participate in attachment programs at collaborative partner universities. Expanding domestic research: ensuring Malaysian R&D is relevant and remains competitive globally. This can help strengthen the strategic relationship between countries through the exchange of knowledge, experience, and technology in the scientific and technical fields that will benefit researchers in higher education institutions, departments, agencies and industries in the country. This opens up creation of profitable green opportunities which could attract investment opportunities from outside companies especially from collaborative partner countries such as Japan. Besides, this international research collaboration also helps in developing synergies between the research communities to create a structured and sustainable research network that is of high standard and internationally recognized.

Ministry of Higher Education also actively invest in various research promoting activities such as establishing The Higher Institution Centers of Excellence (HiCoE). This Programme is implemented by the Department of Higher Education to drive IPT research excellence in niche research. Through this programme, Department of Higher Education gives HiCoE rating to the Center of Excellence (CoE) which is of high performance in the field of niche research.

Recognized HICoE has immediate impact on the production of new research talents, the publication of high-impact journals as well as the production of innovations that can benefit academia, industry, government, community and environment. Periodic performance monitoring will be carried out to ensure implementation in line with the objectives of the HICoE program as well as a basis for the subsequent distribution of HICoE research funds.

The timeline of HICoE is attached to show various projects carried out by Higher Institutions of Learning in various fields throughout 2010-2019.

BATCH 1 2010	BATCH 2 2012	BATCH 3 2015	BATCH 4 2016	BATCH 5 2017	BATCH 6 2019

Joint research projects on GCED and/or ESD with foreign institutions	0	0	1	9
Other activities (please specify):	-	-	Students exchange, Internship programmes	-

I. Any other comments

I1 Please indicate whether your country has faced any constraints, in particular related to global or national crises, including natural disasters, in implementing the 1974 Recommendation during the reporting period.

- Constraints on teachers' time within the apparently overcrowded curricula, GCED and ESD are usually conceptualised by many teachers as 'add-ons', rather than a holistic change in teaching and learning practices.
- Focus on pen and paper scores in the national exams which in some ways impede the holistic approach to GCED and ESD although current efforts by the education sector to move to a more holistic assessment – the SBA.
- The challenge to get commitments from all levels of the community NOT only from teacher to ensure a more profound impact at all levels since GCED and ESD are transformative and nurturing in the implementation process.

- 12 Please provide any other relevant information or clarifications regarding the implementation of the 1974 Recommendation or the mainstreaming of GCED and ESD in your country's education system.

- The COVID19 pandemic has highlighted the importance to further strengthen efforts to build teachers' and students' resilience through continuous communication in raising awareness, understand the risks across sectors, reaching consensus and building trust.
- COVID-19 have also raised concerns about the overall mental well-being of children and youth. The Ministry of Education (MoE) in collaboration with the Ministry of Health (MoH) has embarked on a programme called *Student's Mental Well-Being in the New Normal* to promote positive mental health of all students and to respond to specific well-being concerns and issues during this challenging time. While traditional academic skills are important, COVID-19 has highlighted the importance to further strengthen efforts to develop cognitive, social, emotional and behavioural skills to ensure children are resilient in this crisis - the most in-demand skills that today's learners need in a rapidly changing world.
