

**REPORT BY REPUBLIC OF TURKEY
ON THE APPLICATION OF THE 1974 RECOMMENDATION CONCERNING EDUCATION
FOR INTERNATIONAL UNDERSTANDING, CO-OPERATION AND PEACE AND
EDUCATION RELATING TO HUMAN RIGHTS AND FUNDAMENTAL FREEDOMS**

Information about the respondent

Country:

Türkiye

Organization:

Ministry of National Education

Date of submission:

09/02/2021

V. Other contributors consulted during the completion of this questionnaire

Please indicate below the names of other organizations and contributors consulted during the completion of this questionnaire.

Government institutions including other Ministries (please specify):

Ministry of National Education-MoNE

Council of Higher Education-CoHE

National human rights institutions (please specify):

Local and regional authorities responsible for education (please specify):

Other local and regional authorities (please specify):

Organizations representing education stakeholders (e.g. teachers, students, parents, etc.) (please specify):

Other civil society organizations (please specify):

Others (please specify):

Questionnaire

A. Laws and policies (preamble and paras 4 and 7 of the 1974 Recommendation)

A1a. Please describe any specific national or sub-national laws, legislation or legal framework(s) in your country that govern the promotion of global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes¹ are mentioned explicitly or are inferred and what types or levels of education are covered.

The following policy documents are main documents in terms of supporting global citizenship education (GCED) and education for sustainable development (ESD).

- 1) Presidency Annual Programs: Education policies are determined on the axis of sustainable development goals.
- 2) 11th Development Plan: Education policies under the title of “Education” constitute a source as a framework for long-term policy objectives and other policy documents.
- 3) Ministry of National Education 2023 Education Vision: It is the policy document that plans the transformation of the Turkish education system.
- 4) MoNE 2019-2023 Strategic Plan: Policy objectives are determined by giving priority to sustainable development.
- 5) In the Basic Law of National Education No.1739, there are some objectives that aims to raise individuals who are respectful to human rights and responsible for the society, and to ensure that individuals have a profession that will make them happy and contribute to the happiness of the society.
- 6) Vocational Education Law No. 3308
- 7) Higher Education Law No. 2547
- 8) MoNE Regulation on Secondary Education Institutions
- 9) MoNE Regulation on Lifelong Learning Institutions
- 10) National Action Plan to Combat Violence Against Women
- 11) National Program for Combating Child Labor

While determining educational policies and objectives that will serve sustainable development education, the above main policy documents are taken as a basis and studies based on these main policies and objectives are carried out in every field of education.

The official governmental entity to follow the issues about sustainable development goals and actions are the Presidency of Strategy and Budget. The website of the organization is given in A1b.

¹ See the schema described in paragraph 11 of Section II of these guidelines.

A1b. Please provide the full names of any laws, legislation or legal frameworks referred to in A1a and, where possible, web links to relevant documents.

8. Sustainable consumption and production	1	1	1	1	99	99	99	99

A3a. Please describe any specific current national or sub-national education policies, frameworks or strategic objectives in your country that promote global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes² are mentioned explicitly or are inferred and what types or levels of education are covered.

- 1) Sustainable development plans for Turkey have been prepared based on the international decisions and protocols.
- 2) Five-year development plans are prepared and published by the Presidency of Strategy and Budget, Presidency of Republic of Turkey. The recent eleventh development plan, which covers the period of time between 2019 and 2023, mentions out the vision, goals and principles of the plan and determines the educational goals for qualified people and a strong society. In this document, the education goal is given as “to raise productive and happy individuals who have self-confidence and a sense of responsibility, developed thinking, perception and problem solving skills, strong artistic and aesthetic feelings; who absorb national culture and democratic values; and who are innovative and entrepreneur, prone to using technology, and open to sharing and communication”. The policies and measures are presented based on the conditions and needs of Turkey. In the 11th Development Plan, there is a measure whose number is 536 as “Sustainable development and inclusive growth; it is possible through effective economic policies aiming at a stable economy and social policies aimed at a peaceful society together and in a coordinated manner. The development

² See the schema described in paragraph 11 of Section II of these guidelines.

perspective of the plan period has been prepared with an approach that includes all segments of the society such as children, youth, women, disabled people and the elderly, who require special policies.”

- 3) The following purpose is included in the 2019-2023 Strategic Plan of the Ministry of National Education, “All our students will be provided with the common values of our civilization and humanity and knowledge, skills, attitudes and behaviors suitable for the requirements of the age”. Within the scope of gender equality, there is a strategy in the 2019-2023 MoNE Strategic Plan, "Studies will be carried out to increase the participation of all students in secondary education, especially girls and groups that require special policies, and to reduce absenteeism and grade repetition." Within the scope of Human Survival and well-being, there is a strategy in the 2019-2023 MoNE Strategic Plan "qualification, participation and completion rates in lifelong learning will be increased in order to improve the work and life quality of individuals, and activities related to education and training for our citizens abroad will continue." In addition, many activities are ongoing to support this goal.
- 4) 2023 Education Vision was developed in Turkey. The main purpose of the 2023 Education Vision is to raise science-loving, skilled, and ethical individuals who take an interest in culture and are willing to use present and future skills for the well-being of humanity.

In terms of cultural diversity and tolerance in the 2023 Education Vision document there are policies under the target of “The Quality Of Early Childhood Education Will Be Improved For Disadvantaged Groups”, “Curricula will be developed for schools attended by children of migrants, foreigners under temporary protection, and agricultural workers as well as schools in villages and smaller settlement units. Curricula will be strengthened and accelerated and will support coexistent living.” and “In order to ensure the harmonization of children with special needs in early childhood education, pilot practices will be launched to deliver the necessary teacher training programs.”

Within the scope of human survival and well-being, there are some statements as targets in the 2023 Education Vision document, “Students will be introduced to the concept of social entrepreneurship and will be supported to become motivated to explore solutions to social problems.” and “Alternative early childhood education models with flexible timing arrangements will be implemented for children in rural and low-population settlement areas.”, “The nutrition needs of children in early childhood education attending schools with disadvantaged conditions will be met.”, “The early-childhood education materials and equipment needs of children from disadvantaged households will be supplied.”, “Basic materials supportive of child development will be provided to poor households as part of early childhood education.”, “Centers, workshops, and mobile bus classrooms will be commissioned in the context of scaling up community-based early childhood services.”

In terms of the importance of basic knowledge, skills and attitudes given in early childhood education, the statements “Pre-school education forms the first step of an education system for raising social welfare, supporting the social, cultural and sustainable economic development of our country.”, “Non-school learning environments –such as natural, historical, and cultural places, centers for science and arts, and museums – will be used

effectively in line with the curricula learning outcomes.” are important in terms of environmental sustainability within the scope of the 2023 Education Vision Document.

- 5) The recent curricula were published in 2018 by the Board of Education of the Ministry of National Education. “Environmental Education” has been offered to students as one of the elective courses. Many subjects related to ESD are included in the scope of many courses including Turkish, Life Sciences, Science and Social Sciences with an interdisciplinary approach. Considering the fact that many subjects related to environmental education are included in various courses and that the environmental education course is an elective course, the topics to be included in the content of this course are determined by considering the relevant content in other courses. In the Science Lesson Curriculum published in 2013, under the title of "Science-Technology-Society-Environment", the subject of sustainable development was included along with social scientific issues. However, its wide scope and its interdisciplinary nature made it necessary to teach environmental education as a separate course. On the other hand, the increasing environmental problems indicate that it would be appropriate to start environmental education at an earlier age. Therefore, “environmental education course” serves students to increase their sensitivity to the environment and to develop their sustainable life skills.
- 6) Ministry of National Education implements a project “Strengthening A Culture of Democracy”, which is co-financed by European Union and the Council of Europe, the aim of which is to integrate a democratic school culture that corresponds with universal core values as well as fundamental rights and freedoms into the education system. Reference Framework for Democratic Culture Competences was translated into Turkish and adapted to Turkish context. Within the scope of the Project, which will be piloted in 110 pilot schools in 10 provinces during 2021-2022 education year;
 - Democratic values and practices in schools and school communities will be strengthened via the teaching materials and the whole school model to be developed.
 - The capacity of stakeholders including policy makers, education administrators both in the ministry and at provincial level, inspectors, school principals, teachers will be Strengthened.
 - parents, and local civil society organisations (CSO) on democratic school culture will be strengthened.
 - Raising awareness activities on democratic school culture in and beyond schools will be conducted.

Depending on the Project, national dissemination of the results will be realized. Please see <http://tegm.meb.gov.tr/www/temel-egitimde-demokrasi-kulturunun-guclendirilmesi-projesi/icerik/603> for further details.

Please see <https://www.coe.int/en/web/education/competences-for-democratic-culture> for the RFCDC which is the main document of the Project.

- 7) Ministry of National Education is conducting some projects related to human survival and well-being. For instance, disaster training content was created with the Natural Disasters

Insurance Institution (DASK), disaster training and first aid training was organized with the Turkish Red Crescent, school-based disaster training program was organized with Japan International Cooperation Agency (JICA). "Let's Move With Fun, Let's Eat Healthy Project" is carried out with the aim of providing healthy life skills to early childhood students.

- 8) In Women's Empowerment Action Plan 2018-2023, in terms of gender equality there are some statements, "Gender equality courses will be included in the undergraduate-graduate and pedagogical formation programs of education faculties or gender equality will be included in the content of the appropriate courses." and "Gender equality units will be established in the central organization of MoNE and Council of Higher Education (CoHE) and in universities.

At the higher education level, in accordance with the decision of the General Assembly dated 28.05.2015, published by CoHE in 2015, it was decided that the "gender equality" course should be included as a compulsory or elective course in accordance with the decision to be taken by the authorized committees of universities or to organize a scientific activity on this subject every semester.

Established with the decision of the General Assembly, the "Commission on Women's Studies in the Academy" created a "Higher Education Institutions Gender Equality Attitude Document" in order to reveal an understanding of gender equality within the framework of higher education institutions (Women's Empowerment Action Plan 2018-2023).

A3b. Please provide the full names of any education policies, frameworks or strategic objectives referred to in A3a and, where possible, web links to relevant documents.

Teacher education and training	99	99	99	99
Assessment of student outcomes	99	99	99	99

B. Curriculum (paras 4 and 10-19 of the *1974 Recommendation*)

B1a. Please describe in which ways GCED and ESD are mainstreamed in school curricula. Indicate whether topics are taught as standalone subjects or are integrated into the curricula of other subjects. Explain whether GCED and/or ESD themes³ are mentioned explicitly or are inferred and what types or levels of education are covered.

- 1) There is no standalone subjects under the names of Global Citizenship Education (GCED) and / or Sustainable Development Education (ESD) in our country. However, many of the themes listed under the aforementioned headings are included in our national curricula applied at pre-primary, primary, secondary and upper secondary education levels. These themes are covered in curricula, explicitly and / or implicitly, under a single discipline and / or with interdisciplinary approaches.
- 2) Curricula for primary and lower-secondary have teaching and learning of key competences part of their lifelong learning strategies. All Curricula, like languages, mathematics, science, identifies 8 key competences that are fundamental for each individual in a knowledge-based society in Turkey schools systems. Of these 8 key competences related to GCED and ESD are as follows.
 - Social and civic competences: ability to participate effectively and constructively in one's social and working life and engage in active and democratic participation, especially in increasingly diverse societies.
 - Sense of initiative and entrepreneurship: ability to turn ideas into action through creativity, innovation and risk taking as well as ability to plan and manage projects.
 - Cultural awareness and expression: ability to appreciate the creative importance of ideas, experiences and emotions in a range of media such as music, literature and visual and performing arts.
- 3) On the other hand, some courses' curricula have themes or units related to GCED and ESD (like social science, life science) while some of the courses made of separate subjects related to GCED and ESD directly (like human rights and citizenship, law and justice)
- 4) There is a lot of non-formal education program in Turkey about the SDGs. Each individual can take all of these courses in the public education centers. All of these educations and trainings are free of charge. A certificate is provided at the end of the education. Men and women can take these education, there is no limitation.

B1b. Please provide examples of curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents.

In all our curricula, under the title of Competencies, there are "social and civic competencies" which are aimed to be acquired by our students. In this context, students are equipped to fully participate in civil life based on knowledge of social and political concepts and structures, and a commitment to democratic and active participation.

In addition, for instance, among the aims of the Social Studies Curriculum (Primary School and Secondary School 4th, 5th, 6th and 7th Grades) is that students "to know the importance and ways of being a virtuous person by adopting national, moral values and universal values".

³ See the schema described in paragraph 11 of Section II of these guidelines.

In addition, this curriculum includes learning areas such as Global Connections, Production, Distribution and Consumption.

Similarly, with the Human Rights, Citizenship and Democracy Curriculum (Primary School 4th Grade), it is aimed for students to attain knowledge and skills such as "seeking reconciliation in solving problems related to common life, taking responsibility for the improvement and development of coexistence conditions".

Law and Justice is one of the elective courses in the 6th, 7th or 8th grades of secondary school. The main purpose of the Law and Justice Curriculum is to ensure that students gain basic legal knowledge, skills and values related to law and justice, and have a developed awareness of law and justice and become law literate individuals.

There are curriculums for courses such as Social Sciences (Primary School 1, 2 and 3. Grades), Science (Primary and Secondary School 3, 4, 5, 6, 7 and 8th Grades), Environmental Education, Our City, Democracy and Human Rights, Biology and Geography (9, 10, 11 and 12 Grades). In these courses and related curricula, the contents of cultural diversity and tolerance, gender equality, human rights, peace and non-violence, environmental sustainability, climate change and human survival and wellbeing themes are also mentioned. These curricula cover primary and secondary education levels.

Regarding human survival and wellbeing, there are educational attainments related to disaster education in Social Studies, Science, Geography, English and Turkish course's curricula. Additionally, there are themes related to financial literacy and entrepreneurship in Mathematics and History courses.

These curriculums and other related curriculums can be accessed at <http://mufredat.meb.gov.tr/Programlar.aspx>.

3.3 respect for human rights and fundamental freedoms (as outlined in international conventions and declarations)	1	1	1	1

C. Teacher education (including the training of trainers and educators) (paras 4 and 33-37 of the *1974 Recommendation*)

C1a. Please describe in which ways GCED and ESD are mainstreamed in initial training and in continuing professional development of teachers, trainers and educators. Indicate whether all teachers, trainers and educators or only some are required to receive training to teach GCED and/or ESD.

In the Turkey's Education Vision 2023 policy paper, GCED and/or ESD are mainstreamed implicitly in initial training and in continuing professional development of teachers, trainers and educators. In this document, it is noted that the initial training and continuing professional development programmes should be prepared by considering GCED/ESD themes. All professional development programmes are open to all teachers, trainers and educators who are flexible in choosing the course they would like to teach.

Source : https://2023vizyonu.meb.gov.tr/doc/2023_VIZYON_ENG.pdf.

C1b. Please provide examples of teacher training policies or curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents. If possible, include examples related to initial training and to continuing professional development.

Below is some of the selection of the courses:

- Distance Education, Development of Design and Management Skills Course of School Administrators in the Context of Inclusive Education
- Renewable Energy Resources (Wind and Solar Energy) Training Course
- New Approaches in Museum Education Course
- Peer Mediation Course
- Effective Speaking Course
- School-Based Disaster Education

***C2** Please indicate whether teachers, trainers and educators are trained to teach GCED and ESD during initial or pre-service training and/or through continuing professional development. Please enter the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Initial or pre-service training				
For teachers of selected subjects only (in which GCED or ESD are typically taught)	1	1	1	9
For teachers of other subjects	1	1	1	9
Continuing professional development				
For teachers of selected subjects only (in which GCED or ESD are typically taught)	1	1	1	9
For teachers of other subjects	1	1	1	9

***C3** Please indicate on which GCED and ESD themes pre-service or in-service training is available for teachers, trainers and educators at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	1	1	9
2. Gender equality	1	1	1	9
3. Human rights	1	1	1	9
4. Peace and non-violence	1	1	1	9
5. Climate change	1	1	1	9
6. Environmental sustainability	1	1	1	9
7. Human survival and well-being	1	1	1	9
8. Sustainable consumption and production	1	1	1	9

*C4 Please indicate whether teachers, trainers and educators are trained to teach the following dimensions of learning in GCED and ESD. Please enter the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Knowledge	1	1	1	9
Skills	1	1	1	9
Values	1	1	1	9
Attitudes and behaviours	1	1	1	9

*C5 Please indicate whether teachers, trainers and educators are trained to use the following approaches to teach GCED and ESD in primary and secondary education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Global citizenship and education for sustainable development
GCED/ESD are taught as separate subject(s)	1
Cross curriculum approach (e.g. <i>GCED/ESD are taught in more than one subject but not throughout the curriculum</i>)	1
Integrated approach (e.g. <i>GCED/ESD are taught throughout the whole curriculum</i>)	0
Whole school approach (e.g. <i>GCED/ESD are integrated in the school ethos, management, governance, curriculum, teacher training, teaching practices, the learning environment, and in learning experiences in the community and life outside school</i>)	0

D. Student assessment (paras 4 and 5 of the *1974 Recommendation*)

D1a. Please describe in which ways GCED and ESD are covered in student assessments and examinations. Indicate whether students are assessed only on their knowledge of and skills related to the topics being tested or also on their values, attitudes and/or behaviours.

- 1) Students are assessed in primary and secondary education in terms of the curricula. As the curricula includes GCED and ESD themes, students are assessed on their knowledge, skills, values, attitudes and/or behaviours about these themes.
- 2) In pre-primary education, there are progress reports for students's assessments.
- 3) Turkey participated in the OECD Study on « Social and Emotional Skills » which is an international survey that identifies and assesses the conditions and practices that foster or hinder the development of social and emotional skills for 10 and 15-years-old students. The Study aims to:

- Provide participating cities and countries with information on their students' social and emotional skills.
- Identify factors in students' home, school and peer environments that promote or hinder the development of social and emotional skills.
- Explore how broader policy, cultural and socio-economic contexts influence these skills.
- Demonstrate that valid, reliable, comparable information on social and emotional skills can be produced across diverse populations and settings.

*D2 Please indicate whether the GCED and ESD themes below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	1	1	1
2. Gender equality	1	1	1	1
3. Human rights	1	1	1	1
4. Peace and non-violence	1	1	1	1
5. Climate change	1	1	1	1
6. Environmental sustainability	1	1	1	1
7. Human survival and well-being	1	1	1	1
8. Sustainable consumption and production	1	1	1	1

*D3 Please indicate which of the dimensions of learning in GCED and ESD below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Knowledge	1	1	1	1
Skills	1	1	1	1
Values	1	1	1	1
Attitudes and behaviours	1	1	1	1

E. Mainstreaming of GCED and ESD in laws and policies, curricula, teacher education and student assessment (paras 4-5, 7, 10-19 and 33-37 of the 1974 Recommendation)

*E1 Based on your responses to questions in the previous four sections (laws and policies, curricula, teacher education and student assessment) please indicate to what extent global citizenship education (GCED) and education for sustainable development (ESD) are mainstreamed⁴ in (a) education laws and policies, (b) curricula (c) teacher education (including the training of trainers and educators) and (d) student assessment in your country. Please enter the appropriate number in each white cell in the table below.

KEY:

0 Not at all

GCED and ESD are not mainstreamed.

1 Partially

Some GCED and/or ESD themes⁵ are mainstreamed. Select this option if GCED is mainstreamed but ESD is not (or vice versa).

2 Extensively

Most GCED and ESD themes are mainstreamed.

9 Not known

It is not known whether GCED and ESD are mainstreamed or not.

99 Not applicable

The given level of government does not have responsibility for the given component (policies, curricula, teacher education or student assessment) and/or does not have responsibility for the given level or type of education. This may occur at the national level in federal countries where education is the responsibility of individual states or at the sub-national level in small countries where there is only one level of government.

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
National				
(a) Education laws and policies	2	2	2	2
(b) Curricula	2	2	2	2
(c) Teacher education	2	2	1	9
(d) Student assessment	2	2	1	1
Sub-national				
(a) Education laws and policies	99	99	99	99
(b) Curricula	99	99	99	99
(c) Teacher education	99	99	99	99
(d) Student assessment	99	99	99	99

⁴ GCED and ESD are mainstreamed if their themes are mentioned explicitly in relevant documents and are expected to be implemented by the relevant authorities (e.g. Ministries, regional or local education authorities), educational institutions (e.g. schools, colleges and universities) and/or education professionals (e.g. teachers, lecturers, trainers and educators) as appropriate.

⁵ Refer to the schema in paragraph 11 of Section II of these guidelines.

F. Technical and vocational education and training (paras 25-29 of the 1974 Recommendation)

F1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in technical and vocational education and training. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

The following studies in cooperation with UNICEF have been implemented so far:

- Prevention of child labor
- Integration studies of foreign children under temporary protection in our country through vocational education
- Informing counselors and coordinator technical teachers
- Counsellors' Handbook, Coordinator Teacher Handbook, Master Trainer Handbook; Psycho-social Support Modules books for vocational education center students were prepared, published and sent to relevant schools.

Additionally;

Vocational Training Program (MEK) has been initiated and continues. In this context, it is ensured that foreign children under temporary protection and Turkish citizens who are out of school are identified through home and workplace visits and are directed to education levels appropriate to their situation.

In vocational and technical education, students gain the skills demanded by the sector in real business environments and graduate ready for employment. In addition, it is also important to use the resources in schools effectively and to bring them into the economy. As a result of the productions made in vocational and technical education schools in 2020, a contribution of approximately 500 million TL was made to the economy.

G. Adult education (para 30 of the 1974 Recommendation)

G1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in adult education and other forms of non-formal education including youth education, out-of-school education, etc. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

- 1- There is an opportunity for people at any age in public education centers. People can take either general or vocational education free of charge. There is 3616 different kind of course programme that includes literature, vocational and language courses.
- 2- Programs aiming to provide knowledge, skills and competence in different fields for all segments of the society are carried out in the continuous education centers within the body of higher education institutions. Apart from academic programs, these centers, which enable cooperation with various social segments, public institutions, private sector and international organizations, provide courses, seminars, conferences, vocational training programs, certificate programs, corporate trainings, language programs and trainings for personal development for all age groups and in all subjects needed. In addition, trainings

in various areas can be provided in practice and research centers other than continuing education centers.

H. Research and International Co-operation (paras 41-45 of the 1974 Recommendation)

H1 Please describe what kinds of research or experimentation have been carried out to improve the implementation of GCED and/or ESD. Describe briefly how the results of such activities have influenced education policies, curricula and/or teaching practices.

- 1) A project "Strengthening Preschool and Primary School Teacher Education Programs and Restructuring them in terms of Inclusiveness" is carried out on inclusive education based on issues such as cultural diversity and respect for human rights. The focus will be on the structure and content of the programs, course content, program strategies and tools so as to ensure that teachers who receive pre-service education and teachers in the first year of teaching have pedagogical knowledge and skills related to inclusive education. The project process continues.
- 2) Ministry of National Education implements a project "Strengthening A Culture of Democracy", which is co-financed by European Union and the Council of Europe, the aim of which is to integrate a democratic school culture that corresponds with universal core values as well as fundamental rights and freedoms into the education system. Reference Framework for Democratic Culture Competences was translated into Turkish and adapted to Turkish context. Within the scope of the Project, which will be piloted in 110 pilot schools in 10 provinces during 2021-2022 education year;
 - Democratic values and practices in schools and school communities will be strengthened via the teaching materials and the whole school model to be developed.
 - The capacity of stakeholders including policy makers, education administrators both in the ministry and at provincial level, inspectors, school principals, teachers will be Strengthened.
 - parents, and local civil society organisations (CSO) on democratic school culture will be strengthened.
 - Raising awareness activities on democratic school culture in and beyond schools will be conducted.

Depending on the Project, national dissemination of the results will be realized.

- 3) Ministry of National Education is conducting some other projects related to human survival and well-being. For instance, disaster training content was created with the Natural Disasters Insurance Institution (DASK), disaster training and first aid training was organized with the Turkish Red Crescent, school-based disaster training program was organized with Japan International Cooperation Agency (JICA). "Let's Move With Fun,

Let's Eat Healthy Project" is carried out with the aim of providing healthy life skills to early childhood students.

H2 Please indicate which types of activities are available that promote international co-operation at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Hosting of international meetings on GCED and/or ESD	1	1	1	1
Participation in international meetings abroad on GCED and/or ESD	1	1	1	1
Support for programmes hosting foreign students, researchers and/or teachers	1	1	1	1
Membership of international networks including ASPnet	1	1	1	1
Joint research projects on GCED and/or ESD with foreign institutions	1	1	1	1
Other activities (please specify):				

I. Any other comments

I1 Please indicate whether your country has faced any constraints, in particular related to global or national crises, including natural disasters, in implementing the 1974 Recommendation during the reporting period.

- 1) In Turkey, all formal and non-formal education activities are planned and carried out at national level, and there is no specific policy implemented at sub-national level.
- 2) The Covid-19 pandemic caused difficulties in achieving educational goals on various issues.

I2 Please provide any other relevant information or clarifications regarding the implementation of the 1974 Recommendation or the mainstreaming of GCED and ESD in your country's education system.
