

GUIDELINES FOR THE PREPARATION OF REPORTS BY MEMBER STATES ON THE APPLICATION OF THE 1974 RECOMMENDATION CONCERNING EDUCATION FOR INTERNATIONAL UNDERSTANDING, CO-OPERATION AND PEACE AND EDUCATION RELATING TO HUMAN RIGHTS AND FUNDAMENTAL FREEDOMS

I. Introduction

A. About the 1974 Recommendation

1. UNESCO's *1974 Recommendation concerning Education for International Understanding, Co-operation and Peace and Education relating to Human Rights and Fundamental Freedoms*¹ (the "1974 Recommendation") aims to promote international education and world peace through understanding, solidarity and cooperation. It was adopted on 19 November 1974 by the General Conference of UNESCO at its 18th session.

2. The *1974 Recommendation* applies to formal, non-formal and informal education and to all levels, from pre-primary to tertiary and adult education and lifelong learning. The General Conference recommended "*that Member States should apply*" the provisions included in the *1974 Recommendation* "*by taking whatever legislative or other steps*" that provide institutional (e.g. policies and legal frameworks) and pedagogical (e.g. curricula, teacher training, educational materials, equipment, and student assessment) support for its implementation, based on the "*objectives*", referred to in paragraph 4 of the *1974 Recommendation*, "*regarded as major guiding principles of education policy*" including: an international dimension and a global perspective on education, cultural diversity, interdependence, communication, rights and responsibilities, international solidarity and cooperation, and problem solving.

3. Today, the principles of the *1974 Recommendation* apply equally well to Education for Sustainable Development (ESD) and to Global Citizenship Education (GCED) and therefore represent a powerful tool for promoting the 2030 Agenda for Sustainable Development and in particular SDG Target 4.7 on the promotion of sustainable development and global citizenship through education, Target 12.8 on access to information on sustainable development and Target 13.3 on climate change education.

4. The General Conference in its 39th session recommended the use of the *1974 Recommendation* reporting process to support the implementation and monitoring of Target 4.7 of Sustainable Development Goal 4 (39 C/Resolution 79). The UNESCO Executive Board at its 209th session approved the use of the current guidelines for both the monitoring of the *1974 Recommendation* and the collection of data needed for the following global SDG indicator for which UNESCO is custodian (209 EX/Decision 18.II):

4.7.1, 12.8.1 and 13.3.1: *The extent to which (i) global citizenship education and (ii) education for sustainable development are mainstreamed in (a) national education policies; (b) curricula; (c) teacher education and (d) student assessment.*

5. Questions marked with an asterisk (*) will be used in the calculation of the respective indicators (**Table 1**). As approved by the Inter-Agency and Expert Group on the SDG Indicators, the indicators will be calculated for primary and secondary education only.

Table 1 Questions used in the calculation of the global SDG indicator for Targets 4.7, 12.8 and 13.3

Policies	Curricula	Teacher education	Student assessment

B. Reporting obligations

6. The General Conference, at its 18th session, when adopting the *1974 Recommendation* recommended “*that Member States submit [...] reports concerning the action taken by them in pursuance of this recommendation*”. Moreover, in accordance with Article VIII of UNESCO’s Constitution “*Each Member State shall submit to the Organization [...] reports [...] on the action taken upon the recommendations and conventions referred to in Article IV, paragraph 4.*”

7. Thus, **all UNESCO Member States are expected to report on the steps they have taken to implement the 1974 Recommendation** preferably by completing the following questionnaire. Such reporting takes place every four years.

II. Guidelines for completion of the questionnaire

8. This questionnaire and its accompanying guidelines are addressed to Ministers responsible for relations with UNESCO. The questionnaire is typically completed by Ministries of Education and other government authorities responsible for education. Responses should cover, as far as possible, education at all levels of government, including sub-national levels where applicable as well as education outside the government sector.

9. National respondents are encouraged to **consult widely** both within, across and beyond government, including with Ministries of Environment, with national human rights institutions, the education sector, civil society partners and others, as necessary, to gather the information needed to complete the questionnaire.

10. Responses to the seventh consultation should cover:

- (i) the time period 2017-2020;
- (ii) education at all levels of formal education from pre-primary to tertiary education as well as non-formal education;
- (iii) all levels of government that have responsibility for education within the country; and
- (iv) where possible, education outside the government sector.

11. To assist countries in responding to this questionnaire, UNESCO has developed the following set of global citizenship education and education for sustainable development themes. The list is based on a review of current common practices in many countries as well as a review of relevant literature. While the terms ESD and GCED may be used differently in some countries, the list of themes typically captures what are seen as key elements of Target 4.7. Please refer to the definitions of key terms in **Section III** before completing the questionnaire.

Global citizenship education and education for sustainable development

- 1. cultural diversity and tolerance
 - 1.1 international or intercultural understanding, solidarity and cooperation
 - 1.2 intercultural and interreligious dialogue
 - 1.3 local, national and/or global citizenship
- 2. gender equality education
 - 2.1 gender-based equal opportunities
 - 2.2 gender equality and justice
 - 2.3 gender roles, identity and stereotypes

3. human rights education
 - 3.1 equality and non-discrimination based on race, colour, language, religion, disability, political or other opinion, national or social origin, birth or other status
 - 3.2 human rights values, human dignity, justice, inclusion and participation
 - 3.3 respect for human rights and fundamental freedoms (as outlined in international conventions and declarations)
4. peace and non-violence
 - 4.1 friendly relations among peoples and nations
 - 4.2 challenging negative stereotypes, promoting peaceful solutions, learning to live together, including others and preventing violent extremism
 - 4.3 preventing all forms of violence including bullying, verbal abuse and gender-based violence
5. climate change education
 - 5.1 mitigation
 - 5.2 adaptation
 - 5.3 impact reduction
 - 5.4 early warning
6. environmental sustainability
 - 6.1 caring for the planet, protecting nature
 - 6.2 environmental justice
 - 6.3 biodiversity, water
7. human survival and well-being
 - 7.1 environmental health as it pertains to human well-being, disaster risk reduction
 - 7.2 health of the planet for future generations
 - 7.3 sustainable cities and communities
8. sustainable consumption and production
 - 8.1 responsible and sustainable lifestyles
 - 8.2 green economy, green jobs
 - 8.3 sustainable energy

III. Definitions of key terms

Term	Definition
Themes of global citizenship and education for sustainable development	
1. Cultural diversity and tolerance	<i>Education about and for diversity including language, ethnicity, race, religion as well as the development of tolerance, mutual respect and appreciation for cultural diversity. It includes intercultural and interreligious dialogue, understanding, solidarity and co-operation, and citizenship education.</i>
2. Gender equality education	<i>Education that addresses the wider issue of gender equality by promoting new attitudes and patterns of belief, transforming the way people think about traditional gender roles and helping to build long-term sustainable change. It examines how gender roles, activities, needs, opportunities, rights and entitlements affect men, women, girls and boys differently. It deals with the relationships between females and males, their access to and control of resources and the constraints they face relative to each other. It respects the rights of all learners – women, men, boys and girls – equally and gives equal access to learning opportunities, resources and protections. All learners benefit from and are treated in education equally without the limitations set by stereotypes, rigid gender roles and prejudices. It covers gender-based equal opportunities, gender equality and justice, and gender roles, identity and stereotypes.</i>
3. Human rights education	<i>Education that promotes universal respect for and observance of all human rights and fundamental freedoms and thus contributes, inter alia, to the prevention of human rights violations and abuses by providing persons with knowledge, skills and understanding and developing their attitudes and behaviours, to empower them to contribute to the building and promotion of a universal culture of human rights.</i> <i>It includes equality and non-discrimination, human rights values, dignity, justice, inclusion and participation and respect for human rights and fundamental freedoms.</i>
4. Peace and non-violence	<i>Education about peace and peace-building, mediation, conflict prevention and resolution, non-violence, reconciliation and living together peacefully. It includes advocating for friendly relations among peoples and nations, challenging negative stereotypes, promoting peaceful solutions, learning to live together and preventing violent extremism and other forms of violence including bullying.</i>
5. Climate change education	<i>Education to help people, in particular youth, understand, address, mitigate, and adapt to the impacts of climate change. It encourages changes in attitudes and behaviours needed to put the world on a more sustainable development path, and build a new generation of climate change-aware citizens.</i> <i>It covers various responses to climate change including mitigation, adaptation, impact reduction and early warning.</i>
6. Environmental sustainability	<i>Education about responsible interactions with the environment to avoid depletion or degradation and to promote environmental quality and health. It includes, caring for the planet and protecting nature, environmental justice, biodiversity and water.</i>
7. Human survival and well-being	<i>Education that promotes social well-being and harmony including in future generations due to healthy environmental systems. It includes health of the planet and environment related to human well-being, disaster risk reduction and sustainable cities and communities.</i>

8. Sustainable consumption and production	<i>Education on the use and production of resources, products and services that have a minimal adverse impact on the environment. It promotes resource and energy efficiency, sustainable infrastructure and green jobs. It includes responsible and sustainable lifestyles, the green economy and sustainable energy.</i>
Dimensions of learning	
Knowledge	<i>Factual information and understanding acquired through study and/or experience.</i>
Skills	<i>The ability to carry out a task well as a result of training, practice and innate aptitude. Skills may be physical, mental or both.</i>
Values	<i>Principles that form the foundation on which individuals conduct themselves and interact with others and with the environment around them.</i>
Attitudes and behaviours	<i>Ability to act on the basis of beliefs and knowledge acquired through study or experience.</i>
Levels of education	
Pre-primary	<i>Education designed to support children's early cognitive, physical, social and emotional development and introduce young children to organized instruction outside of the family context. Participants are usually aged from three years.</i>
Primary and secondary	<i>Education designed to:</i> <i>(i) provide students with fundamental skills in reading, writing and mathematics (i.e. literacy and numeracy) and establish a solid foundation for learning and understanding core areas of knowledge and personal development (primary education); and</i> <i>(ii) prepare students for further education at post-secondary and tertiary levels and for entry into the labour market (secondary education).</i> <i>It includes both general and vocational education.</i>
Tertiary	<i>Education designed to provide learning activities in specialised fields of education. It aims at learning at a high level of complexity and specialisation. It includes both what is commonly understood as academic education and advanced vocational or professional education.</i>
Types of education	
Adult education	<i>Education specifically targeted at individuals who are regarded as adults by their society to improve their technical or professional qualifications, further develop their abilities, enrich their knowledge with the purpose to complete a level of formal education, or to acquire, refresh or update their knowledge, skills and competencies in a particular field.</i>
Formal education	<i>Education that is institutionalized, intentional and planned through public organizations and recognized private bodies which – in their totality – constitute the formal education system of a country. Formal education programmes are recognized by the relevant national or sub-national education authorities. Formal education consists mostly of initial education (e.g., pre-primary, primary, secondary and tertiary education).</i>
Non-formal education	<i>Education that is an addition, alternative and/or a complement to formal education within the process of the lifelong learning of individuals. It is often provided to guarantee the right of access to education for all. It caters to people of all ages but does not necessarily apply a continuous pathway-structure. It may be short in duration and/or low-intensity, and it is typically provided in the form of short courses, workshops or seminars. Non-formal education mostly leads to qualifications that are not</i>

	<i>recognized by the relevant national or sub-national education authorities or to no qualifications at all. Non-formal education includes programmes on life skills including literacy and numeracy, work skills, and social or cultural development. Most types of adult education are also included.</i>
Vocational education	<i>Education that is designed for learners to acquire the knowledge, skills and competencies specific to a particular occupation or trade or class of occupations or trades. Vocational education may have work-based components (e.g. apprenticeships). Successful completion of such programmes leads to labour-market relevant vocational qualifications acknowledged as occupationally-oriented by the relevant national authorities and/or the labour market. Vocational education can be offered at secondary and post-secondary or tertiary levels of education.</i>

IV. Information about the respondent

Country:

Austria

Organization:

Federal Ministry of Education, Science and Research

Date of submission:

31.12.2020

V. Other contributors consulted during the completion of this questionnaire

Please indicate below the names of other organizations and contributors consulted during the completion of this questionnaire.

Government institutions including other Ministries (please specify):

Federal Ministry of Education, Science and Research; Federal Ministry of Climate Action, Environment, Energy, Mobility, Innovation and Technology; Austrian Development Agency

National human rights institutions (please specify):

Local and regional authorities responsible for education (please specify):

Other local and regional authorities (please specify):

Organizations representing education stakeholders (e.g. teachers, students, parents, etc.) (please specify):

Advisory board on Transformative Education at the Austrian National Commission for UNESCO; Strategy Group Global Learning/Global Citizenship Education; Center for Migration, Multilingualism and Human Rights Education (Ko.M.M.M.) at the University College

Other civil society organizations (please specify):

Environmental Umbrella Organisation; ÖKOBÜRO (Alliance of the Austrian Environmental Movement)

Others (please specify):

Austrian Ecolabel for Educational Institutions; Forum Environmental Education ; CliMates Austria; JUMP platform (youth platform); Sustainability Forum Illmitz

VI. Questionnaire

A. Laws and policies (preamble and paras 4 and 7 of the 1974 Recommendation)

A1a. Please describe any specific national or sub-national laws, legislation or legal framework(s) in your country that govern the promotion of global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes² are mentioned explicitly or are inferred and what types or levels of education are covered.

Pre-Primary Education: With regard to the constitutional distribution of competencies in Austria according to Art. 14 Para. 4 lit. b of the Federal Constitutional Act, the responsibility for the legislation and enforcement in matters of elementary education lies with the federal states. They regulate the framework conditions for institutions for early childhood education and care and finance them accordingly. However, since 2008 the federal government has been investing continuously in the expansion of the early childhood education and care area as well as in the compulsory contribution-free kindergarten year before entering school as well as in early language support on the basis of an Art. 15a B-VG agreement between the federal government (Bund) and the regional authorities (Länder). The curriculum of the educational institutions for elementary education (BAfEP) promotes GCED as well as ESD themes.

Primary/Secondary Education (including Vocational Education): Schools also have responsibilities to educate and inform about topics that cannot be allocated to individual subjects. Account must be taken of these as teaching principles in the teaching of as many subjects as possible. The purpose of such principles of instruction is to help attain those educational tasks of school which require an interdisciplinary cooperation of several subjects of instruction. All teachers as well as school supervisory boards and administrations are invited to promote an effective implementation of all cross-curricular educational principles into their educational practice.

Teaching principles apply to all school levels and all types of school and ensure an interdisciplinary approach. Their contents are regulated by so called basic decrees. The features of the tasks and issues dealt with by these teaching principles are the ability to draw on life experiences, to see things clearly and to solve problems. These skills allow pupils to acquire knowledge independently in wider contexts.

The following teaching principles are related to the themes outlined in this consultation:

- Health promotion
- Intercultural education
- Media literacy
- Citizenship education
- Reflexive gender education and equality
- Sexuality education
- Environmental education
- Road safety education
- Economic and consumer education

Health Promotion does not only include information on health issues and the influence on the behaviour of the individual, but also the design of a health-promoting living space.

² See the schema described in paragraph 11 of Section II of these guidelines.

Intercultural Education as a teaching principle empowers teachers and students to respectfully deal with diversity in a multicultural society. The according general ordinance (2017) refers to the international framework, i.e. the 2030 Agenda and its Sustainable Development Goals, the UNESCO Guidelines on Intercultural Education etc.

Citizenship Education - including its global dimension of Citizenship Education -

- highlights the role of Austria in Europe and globally, and communicates an understanding of existential and global relationships and problems of humanity; [...]
- shows that a just order of peace and a fair distribution of resources are necessary for humanity's survival, and that these demand a global, concerted effort, but also need to be understood as a personal obligation. [...]"

Reflexive Gender Education and Gender Equality (Directive No. 21/2018): This teaching principle gives University Colleges for Teacher Education, boards of education (education directorates) and schools an orientation framework regarding equal opportunities for girls and boys independently of their social background, culture or religion. It provides a central impetus for gender-appropriate teaching and learning cultures in schools, i.e. to reflect and dismantle gender stereotypes and sexism in all its scope. All facets of (patriarchal) role norms and gender inequalities should be addressed - whether in so-called majority society (e.g., sexism in advertising) or in so-called minority communities (e.g., "honourable behavioural demands" on girls). The principle is based on the concept of universal girls' and women's rights that are not challenged by culture or religion.

Environmental Education for Sustainable Development is strongly linked to other teaching principles such as *Economic and Consumer Education* and *Road Safety Education*. Environmental education contributes to a sustainable development of society and highlights how the complex interaction of various social influences has led to the current state of our environment. It can strengthen awareness, a sense of responsibility, and the skills which allow pupils to shape their future. Environmental education promotes the acquisition of competences needed to understand the finiteness of our natural resources, and contributes to shaping the environment and society in a forward-looking manner, based on solidarity and responsibility.

Tertiary: Universities Act Among the guiding principles to be observed by the universities in pursuance of their objects are: gender equality; equality of opportunity; special attention to the needs of the handicapped; reconciliation of study/work with child care and care of dependents (§2).

Several technical and organisational requirements are regulated through the Universities Act, e.g. the establishment of an organisational unit responsible for the coordination of activities relating to equal opportunities, the advancement of women and gender research; a career advancement plan for women and an equal opportunities plan; the duty of career advancement for women; working groups on equal opportunities responsible for combating gender discrimination as well as discrimination on the basis of ethnicity, religion or conviction, age, or sexual orientation by university governing bodies and for advising and supporting the university's members and governing bodies in connection with these issues. Universities have to report on gender equality indicators in the context of an annual intellectual capital report.

Amendment (2018) to the Universities Act --> Sustainable Development is to be integrated into the performance agreements 2019-2021 between Universities and the Federal Ministry of Education, Science and Research (0,5% of the overall budget can be retained by the federal minister).

To ensure the implementation of measures for the social dimension in teaching as well as the inclusion of underrepresented groups into HE, the federal minister can retain up to 0,5% of the overall university budget.

University of Applied Sciences Act and Private Universities Act Universities of Applied Sciences and Private Universities are required to give regard to gender equality and a balanced representation of the sexes in all positions and offices, to present an equal opportunities plan and to report on gender equality measures.

Hochschulgesetz (Federal Act on the University Colleges of Teacher Education) Gender mainstreaming is mandatory for university colleges of teacher education; duty of Career Advancement for Women; working groups on equal opportunities responsible for combating gender discrimination as well as discrimination on the basis of ethnicity, religion or conviction, age, or sexual orientation by governing bodies and for advising and supporting the members and governing bodies in connection with these issues.

In impact-oriented management of public administration, planning is done in the form of yearly budget targets, with performance indicators to assess the success of the measures. Attention is paid in particular to the actual equality of women and men, which plays an essential role in this process. In addition, Austria applies the instrument of impact assessment to ensure that goals and measures are defined for all regulatory or larger endeavours of the Federal Government and that the impacts on concrete policy areas are systematically assessed.

In the assessments in individual policy areas (impact dimensions), there are major content overlaps with the SDGs, for instance in the equality of women and men and in measures concerning the environment and climate action. Impact assessment is therefore a tool that increases the transparency, traceability and coherence of policy decisions in favour of sustainable development.

Overarching: The Federal Development Cooperation Act (Entwicklungszusammenarbeitsgesetz, EZA-G, 2002) is the national legal basis for the Austrian Development Agency's (ADA's) funding strategy "Development Communication and Education in Austria".

A1b. Please provide the full names of any laws, legislation or legal frameworks referred to in A1a and, where possible, web links to relevant documents.

8. Sustainable consumption and production	1	1	9	99	1	1	99	99

A3a. Please describe any specific current national or sub-national education policies, frameworks or strategic objectives in your country that promote global citizenship education (GCED) and/or education for sustainable development (ESD). Explain whether GCED and/or ESD themes³ are mentioned explicitly or are inferred and what types or levels of education are covered.

Pre-Primary Education: The compulsory cross-state educational framework plan (BildungsRahmenPlan) conveys content of ESD as well as GCED. The application of the "Living Values, Creating Values. Building of Values in Early Childhood Education and Care Institutions" manual is mandatory. It teaches children through interfaith education and diversity pedagogy important values of living together, such as respect, equality and tolerance. This makes an important contribution to Global Citizenship Education.

Primary/Secondary (including Vocational Education): Educational Concerns extend beyond the structural content of individual school subjects and take account of overarching themes that are important for pupils' personal development and lifestyles, and are also socially relevant. Educational concerns complement the formal interdisciplinary teaching principles (see A1a). Several of them are related to the scope of this consultation, such as Global Learning/Global Citizenship Education, Development Education and Education for Sustainable Development (not to be confused with Environmental Education for Sustainable Development, which is one of the teaching principles, see above).

The implementation of the Reference Framework of Competences for Democratic Culture (Council of Europe) and related Citizenship Education programmes in the school setting ensure quality Global Citizenship Education to all young people. Examples for measures:

- Raising awareness through communication work (newsletter, social media, etc.)
- Offering various tools and materials (explanatory film, activities in the framework of the Austrian Citizenship Days; Teacher Self Reflection Tool: Becoming a "Democratic" teacher ...)
- Networking with NECE focus group members (e.g. the Austrian NGO Land der Menschen, which is testing RFCDC in the context of its workshops)

The Austrian Strategy for Education for Sustainable Development aims to support a trans-formation of awareness toward sustainability among teachers and learners alike, and also to interlink the actors. The strategy covers formal and non-formal education, lifelong learning and vocational education. The following themes are explicitly mentioned: gender equality education, health promotion, environmental sustainability, peace and non-violence, rural development, climate change education, human survival and well-being, sustainable consumption and production, cultural diversity, justice and non-violence.

Within the framework of the National Action Plan for Entrepreneurship Education, sustainable Entrepreneurship Education is pursued in accordance with the SDGs. As physical education in school is concerned, the goals at

- primary education level is, to develop a whole physical way to be able to act in various situations that sport offers at this age level
- secondary education level is, to develop appropriate physical skills and values in order to participate in different sport-cultures and different sports after leaving school.
- as non-formal education is concerned, Austria is aiming at implementing the "daily hour" of physical education.

Tertiary: At the level of higher education policy-making, the Federal Ministry of Education, Science and Research (BMBWF) fosters the implementation of Agenda 2030 by incorporating it in key government

³ See the schema described in paragraph 11 of Section II of these guidelines.

strategy documents such as the Austrian National Development Plan for Public Universities (GUEP) from 2019 onwards (GUEP 2019-2024 and GUEP 2022-2027).

In January 2020 Universities Austria (uniko) adopted a manifesto for sustainability, which consists of six points recognising the responsibility of universities for sustainability in teaching, research, knowledge exchange and university management, and supports the objectives of the “Fridays for Future” movement for global climate justice.

National Strategy on the Social Dimension of Higher Education (2017): Gender equality and Cultural diversity are mentioned explicitly, there are quantitative targets for gender equality in all tertiary studies and for people with migrant background participating in tertiary education. The strategy addresses tertiary education as well as transition into tertiary education.

Overarching: The Three-Year Programme on Austrian Development Policy (whole-of government strategy) mentions the importance of Global Citizenship Education for general education. The Strategy Development Communication and Education in Austria (2010) is the strategic framework of the Austrian Development Agency’s funding activities in Austria, which contribute to the implementation of the Sustainable Development Goals, especially to SDG 4.7.

Teacher education and training	9	1	99	1
Assessment of student outcomes	9	1	99	1

B. Curriculum (paras 4 and 10-19 of the 1974 Recommendation)

B1a. Please describe in which ways GCED and ESD are mainstreamed in school curricula. Indicate whether topics are taught as standalone subjects or are integrated into the curricula of other subjects. Explain whether GCED and/or ESD themes⁴ are mentioned explicitly or are inferred and what types or levels of education are covered.

Primary/Secondary: For teachers, curricula form the basis for their independent, responsible teaching and educational work. It is teachers' duty to help individual pupils achieve the objectives specified in the curriculum through suitable lesson planning and design. The curricula also mention the importance of transdisciplinary approaches and the fact that school is a place of social experience, where it should be possible to deal with global topics, differing opinions and alternative approaches in experimental and creative ways. In addition, school is a sort of microcosm of society shaped by cultural and social diversity and therefore facilitates learning to deal with societal heterogeneity, conflicts and differing interests and generally to live in a world of diversity.

In addition to the cross-curricular approach mentioned under A1a and A1b, GCED and ESD are also part of the curricula of various subjects in all school types at all levels. In "History, Social Science and Citizenship Education" (grade 6-8), modules with longitudinal and cross-sections are provided for dealing with historical and political topics. The lessons should – according to the connection between global, continental, national, regional and local aspects – give an insight into the history and politics of different areas, make their interconnectedness clear and thus relate in particular to intercultural and global learning.

Through school-autonomous curriculum regulations, additional emphases can be set on themes regarding this consultation in the form of optional subjects and non-binding exercises. School networks such as the Austrian members of the ASPnet, ÖKOLOG schools, Fairtrade schools, e.e.si Entrepreneurship schools, Climate Alliance schools and schools awarded with the Austrian Ecolabel set thematic priorities regarding the scope of this consultation.

Tertiary: Austrian universities have, from the start, accepted the challenges of sustainability and education for sustainable development and have involved these in their curricula (in reference to university governance, § 1 UG 2002).

B1b. Please provide examples of curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents.

Primary/Secondary:

Curriculum for History and Social Studies/Citizenship Education (2016): www.politik-lernen.at/dl/mnoNJKJKonmomJqx4IJK/Gesetzesblatt_113_Verordnung_18_Mai_2016.pdf

The Curriculum for Secondary School defines five areas of education as a basis for cross-curricular collaboration. The educational area "People and society" is intended to provide an understanding of social (including political, economic, legal, environmental and cultural) correlations. Teaching has to contribute to democracy based on human rights. Humanity, solidarity, tolerance, justice, equality and environmental consciousness are guiding values. General Didactic Principles include diversity and inclusion, equality of opportunity and gender equality, reflective coeducation and gender sensitive pedagogy. <https://www.ris.bka.gv.at/Dokumente/Bundesnormen/NOR40207228/NOR40207228.pdf>

The curriculum for primary school suggests health related topics such as hygiene, nutrition, clothing etc. In Physical Education and Sports, pupils should learn how to exercise in natural environment, learning how to treat the natural environment with respect.

⁴ See the schema described in paragraph 11 of Section II of these guidelines.

https://www.bmbwf.gv.at/dam/jcr:b89e56f6-7e9d-466d-9747-fa739d2d15e8/lp_vs_gesamt_14055.pdf

An example from the curriculum Physical Education and Sports in secondary school: Pupils should participate in sports with the topic of self-defense, learning how to deal with power and violence.

<https://www.ris.bka.gv.at/GeltendeFassung.wxe?Abfrage=Bundesnormen&Gesetzesnummer=10008568>

<https://www.ris.bka.gv.at/GeltendeFassung.wxe?Abfrage=Bundesnormen&Gesetzesnummer=20007850>

Tertiary: The network UniNEtZ – universities and sustainable development (www.uninetz.at) organizes inter-university lectures with different universities (Ringvorlesungen: e.g. <https://www.uibk.ac.at/international/aurora/sdg/>; <https://triplen.unileoben.ac.at/>)

*B2 Please indicate which GCED and ESD themes are taught as part of the curriculum at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education

3.3 respect for human rights and fundamental freedoms (as outlined in international conventions and declarations)	1	1	1	9

C. Teacher education (including the training of trainers and educators) (paras 4 and 33-37 of the *1974 Recommendation*)

C1a. Please describe in which ways GCED and ESD are mainstreamed in initial training and in continuing professional development of teachers, trainers and educators. Indicate whether all teachers, trainers and educators or only some are required to receive training to teach GCED and/or ESD.

Pre-primary: Teachers in the pre-primary education field (ISCED 0) are trained in teacher training colleges for early childhood education. In their five-year form, they impart comprehensive general education as well as a professional attitude, specialist knowledge and skills which are required to fulfil the educational tasks in Early Childhood Education and Care (ECEC) services and institutions. This includes contents in the subject areas religion, languages and communication, general education, early childhood education (0 to 6 years) – theory and practice, expression, design and physical education as well as subjects within the school's autonomy.

Intercultural Learning, Diversity and Inclusive Pedagogy are part of the curricula of teacher training colleges for early childhood education. Conveying values such as human rights, tolerance, gender equality is an essential part of the curriculum in the course of training. The curriculum of the educational institutions for elementary education (BAfEP) also includes instructions for pedagogues on how to deal sensitively with aspects of diversity, culture, gender etc.

Primary and secondary: Teachers in Austria are being trained through tertiary bachelor's and master's programmes (ISCED 6 and 7) at universities and university colleges of teacher education. These cooperate as part of four regional development alliances throughout Austria to ensure that students can choose from the respective regional, jointly established study offers within an alliance.

Students enrolled in teacher training programmes for primary level are obliged to select at least one special focus (e.g. inclusive teaching, social pedagogy, early childhood education, multilingualism, or focus on a specialist educational area).

Teachers of secondary-level general education choose two fields of study or one field of study and one specialisation (e.g. inclusive teaching, social pedagogy; multilingualism, media education).

The educational objectives and training areas are set out in the respective federal laws (Universities Act 2002, Act on the Organisation of University Colleges of Teacher Education, Act on Quality Assurance in Higher Education) by means of framework specifications (according to Federal Act on the New Teacher Training Scheme).

The detailed design of the curricula is the responsibility of the educational establishments, therefore the curricula for teacher training programmes have different emphases. The topic of Global Citizenship is present in several teacher training curricula for primary education, secondary general education and vocational education.

University colleges of teacher training offer demand-oriented courses and in-service training seminars at schools and across schools as well as specific university courses. The broad spectrum of content includes in particular human rights education and peace education, but also environmental education, globalisation and sustainability, which take into account topics such as climate change, biodiversity and consumer behaviour.

A special focus is placed on the 2030 agenda. Some university colleges of teacher education engage as ÖKOLOG school network partners. Currently, there is a lack of chairs for gender related subjects in Austria. Consequently, just occasional modules are provided.

As far as physical education and sport is concerned, the GCED and ESD topics are mainstreamed according to the interests of the teacher trainer. The curricula for teacher training contain overall outlines for GCED and ESD but no specific anchoring in subjects.

Members of the advisory board on “Transformative Education/Global Citizenship Education” at the Austrian Commission for UNESCO (see section I2 for a further, comprehensive statement of the advisory board) point out that generally, ESD and GCED are not mainstreamed in teacher education. Some of the themes are part of programmes for specific subjects (e.g., Geography, Biology, Chemistry, Religion) and to a certain extent are integrated in pedagogical training. Consequently, the themes addressed in this survey are optional and stand-alone in the curricula of teacher training, not structurally anchored and neither offered in a building-up nor in-depth manner. The advisory board is concerned that student teachers might enter the teaching profession after a six-year course of study without relevant competences for most of the diversity dimensions such as inclusion, migration pedagogy, multilingualism and religious plurality. This could be seen as a threat to the successful implementation of GCED in Austrian schools.

C1b. Please provide examples of teacher training policies or curricula in which GCED and/or ESD are mainstreamed and, where possible, web links to relevant documents. If possible, include examples related to initial training and to continuing professional development.

The regional development alliance South-East connecting four University Colleges of Teacher Education and four universities in three federal states of Austria have defined and integrated several transversal key competences and skills into the training programme: Diversity, Multilingualism, Interculturality, Interreligiosity, Gender, Global Citizenship Education, Inclusion of Minorities and Vulnerable Groups (esp. disabled), Media and Digital competencies, Language and Literacy. https://www.lehramt-so.at/wp-content/uploads/2019/07/BA_LA_SekAB_19W.pdf

In a collaboration with partner institutions, the University of Klagenfurt is offering its third Global Citizenship Education course (started in the academic year 2019/20). The second phase took place from 2015 – 2018. The Master’s Programme combines Citizenship Education, Global Learning, Intercultural Learning and Peace Education in an interdisciplinary approach. Course participants develop knowledge and didactic competences that allow them to create adequate teaching and learning processes. The course is organised on a modular basis, with an even balance between theory and practice. It is extra-occupational, blocked and lasts for a total of six semesters. The programme was honoured with the Austrian Sustainability Award 2018. http://www.globaleslernen.at/fileadmin/user_upload/PDF/Berichte/GlobalCitizenshipEdu_engl2019_online.pdf

The Vorarlberg university college of teacher education has a focus on Global Education at primary level.

The University College of Teacher Education Salzburg is offering a course in Reflexive Gender Education. <https://www.phsalzburg.at/fort-und-weiterbildung/angebot/hochschullehrgaenge/hlg-rgp/>

A National Center for Psychosocial Health promotion offers materials and in-service training for teachers on emotional and social personality development (stress management, resilience, mindfulness, trauma education, peer education), self-reflection and self-care. www.hepi.at

The Forum Environmental Education organises an annual ESD summer academy for educators and multipliers in formal and non-formal education on all levels. Based on the train-the-trainer approach, it offers theoretical inputs, practical workshops and the opportunity to try out various methods in the sense of ESD. An essential point is to create space for changing perspectives and for new ways of thinking and acting. Dimensions of learning are: knowledge, skills, values and attitudes and behaviours. There is an annually changing focus topic.

<https://www.umweltbildung.at/unsere-angebote/sommerakademie/>

The Strategy Group Global Learning/Global Citizenship Education organises an annual conference on different aspects of Global Citizenship Education, in recent years with a strong focus on the 2030 Agenda. <http://www.globaleslernen.at/aktivitaeten/aktuelle-veranstaltungen.html>

The University College of Teacher Education Vienna supports the idea of trainings for teachers, trainers and educators when dealing with ideas and principles of GCED and ESD. E.g., "Citizenship Education in the Context of Austrian Social Structure" is explicitly mentioned in the Curriculum Bachelor Primary School Teacher Education. ESD has been part of university didactics since 2017. University college staff work out ideas to support the SDGs in their teaching. Many ESD and GCED themes are implicit parts of seminars, e.g. cultural diversity and tolerance, human rights and gender equality. One example from in-service training taking into account SDGs 4 and 10: "Concepts and models for appreciative guidance of multilingual children"

<https://www.ph-online.ac.at/ph-wien/wbLv.wbShowLVDetail?pStpSpNr=256625&pSpracheNr=1>

The University College of Teacher Education Vienna has designed an International Programme for Erasmus+ exchange teacher students at the university college. GCED is part of the qualification profile.

<https://www.phwien.ac.at/28-hochschullehrgaenge-und-fortbildungsangebot/lehrgaenge/3111-international-programme-teacher-training>

The Competence Centre for Migration, Multilingualism and Human Rights Education (Ko.M.M.M.) at the University College of Teacher Education Vienna is charged with consulting, networking and initiating research development projects related to the aspects of multilingualism, migration and human rights education. The team arranges events and teacher trainings and supports selected national and international initiatives. Since 2018, an annual conference on human rights education for teachers, teacher trainers and teacher student is organised. For the 2020 online edition, the SDGs and GCED were put on the agenda.

***C2** Please indicate whether teachers, trainers and educators are trained to teach GCED and ESD during initial or pre-service training and/or through continuing professional development. Please enter the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Initial or pre-service training				
For teachers of selected subjects only (in which GCED or ESD are typically taught)	1	1	1	9
For teachers of other subjects	1	1	1	9
Continuing professional development				
For teachers of selected subjects only (in which GCED or ESD are typically taught)	1	1	1	1
For teachers of other subjects	1	1	1	1

***C3** Please indicate on which GCED and ESD themes pre-service or in-service training is available for teachers, trainers and educators at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	0	1	0
2. Gender equality	1	1	1	1
3. Human rights	1	0	1	0
4. Peace and non-violence	1	1	1	1
5. Climate change	1	1	0	1
6. Environmental sustainability	1	1	1	1
7. Human survival and well-being	1	1	1	9
8. Sustainable consumption and production	1	1	1	1

*C4 Please indicate whether teachers, trainers and educators are trained to teach the following dimensions of learning in GCED and ESD. Please enter the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Knowledge	1	1	1	1
Skills	1	1	1	1
Values	1	1	1	1
Attitudes and behaviours	1	1	1	1

*C5 Please indicate whether teachers, trainers and educators are trained to use the following approaches to teach GCED and ESD in primary and secondary education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Global citizenship and education for sustainable development
GCED/ESD are taught as separate subject(s)	0
Cross curriculum approach (e.g. <i>GCED/ESD are taught in more than one subject but not throughout the curriculum</i>)	1
Integrated approach (e.g. <i>GCED/ESD are taught throughout the whole curriculum</i>)	0
Whole school approach (e.g. <i>GCED/ESD are integrated in the school ethos, management, governance, curriculum, teacher training, teaching practices, the learning environment, and in learning experiences in the community and life outside school</i>)	0

D. Student assessment (paras 4 and 5 of the *1974 Recommendation*)

D1a. Please describe in which ways GCED and ESD are covered in student assessments and examinations. Indicate whether students are assessed only on their knowledge of and skills related to the topics being tested or also on their values, attitudes and/or behaviours.

Pre-primary education teacher students are assessed not only on their knowledge and skills but also on their values, attitudes and behaviours regarding GCED as well as ESD themes. The focus lies on GCED. This happens on the one hand in the course of the admission interviews and on the other hand in the course of their work at the practice kindergartens. The prospective staff is being observed during the training period.

Primary/secondary: Whether students' competencies and knowledge relating to gender equality, gender stereotypes and history of gender is assessed or not, depends on the respective teachers.

In tertiary education, student assessments are based on knowledge and skills related to the topics being tested.

*D2 Please indicate whether the GCED and ESD themes below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
1. Cultural diversity and tolerance	1	9	0	
2. Gender equality	1	0	0	
3. Human rights	1	9	0	
4. Peace and non-violence	1	9	0	
5. Climate change	1	9	0	
6. Environmental sustainability	1	9	0	
7. Human survival and well-being	1	9	0	
8. Sustainable consumption and production	1	9	0	

*D3 Please indicate which of the dimensions of learning in GCED and ESD below are generally included in student assessments or examinations at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Knowledge	1	9	1	9
Skills	1	9	1	9
Values	1	9	9	9
Attitudes and behaviours	1	9	9	9

E. Mainstreaming of GCED and ESD in laws and policies, curricula, teacher education and student assessment (paras 4-5, 7, 10-19 and 33-37 of the 1974 Recommendation)

*E1 Based on your responses to questions in the previous four sections (laws and policies, curricula, teacher education and student assessment) please indicate to what extent global citizenship education (GCED) and education for sustainable development (ESD) are mainstreamed⁵ in (a) education laws and policies, (b) curricula (c) teacher education (including the training of trainers and educators) and (d) student assessment in your country. Please enter the appropriate number in each white cell in the table below.

KEY:

0 Not at all

GCED and ESD are not mainstreamed.

1 Partially

Some GCED and/or ESD themes⁶ are mainstreamed. Select this option if GCED is mainstreamed but ESD is not (or vice versa).

2 Extensively

Most GCED and ESD themes are mainstreamed.

9 Not known

It is not known whether GCED and ESD are mainstreamed or not.

99 Not applicable

The given level of government does not have responsibility for the given component (policies, curricula, teacher education or student assessment) and/or does not have responsibility for the given level or type of education. This may occur at the national level in federal countries where education is the responsibility of individual states or at the sub-national level in small countries where there is only one level of government.

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
National				
(a) Education laws and policies	1	2	1	9
(b) Curricula	1	1	1	9
(c) Teacher education	1	1	1	1
(d) Student assessment	1	0	1	9
Sub-national				
(a) Education laws and policies	9	9	99	9
(b) Curricula	9	1	99	9
(c) Teacher education	9	1	99	9
(d) Student assessment	9	9	99	9

⁵ GCED and ESD are mainstreamed if their themes are mentioned explicitly in relevant documents and are expected to be implemented by the relevant authorities (e.g. Ministries, regional or local education authorities), educational institutions (e.g. schools, colleges and universities) and/or education professionals (e.g. teachers, lecturers, trainers and educators) as appropriate.

⁶ Refer to the schema in paragraph 11 of Section II of these guidelines.

F. Technical and vocational education and training (paras 25-29 of the 1974 Recommendation)

F1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in technical and vocational education and training. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

80% of the 15 to 19 years old students attend TVET schools providing technical and/or vocational training in addition to a broad general education. The teaching principles and educational concerns outlined in section A also apply to teaching at TVET schools.

The National Action Plan of Entrepreneurship Education pursues sustainable Entrepreneurship Education in accordance with the SDGs. e.e.si (Entrepreneurship Education for Innovation at School) is a school network for VET schools (schools of business administration). In an Entrepreneurship School, measures to encourage entrepreneurial thinking, personality forming and education towards responsible citizens (TRIO model) are an integral part of teaching and day-to-day school life. Entrepreneurship education and school development should move forward jointly and include all school stakeholders.

The SDGs are important points of reference for e.e.si schools. The Entrepreneurship Summit is the main event of the annual Global Entrepreneurship Week in Austria. Recent summits had a strong focus on the SDGs.

GCED and ESD topics are mainstreamed in all curricula of VET teacher education. Some additional examples: Master's programme in secondary vocational education and training with a focus on "Sustainability Management in Health and Nutrition": Education for Sustainable Development is implemented in interdisciplinary projects. There is an emphasis on democratic responsibility and action.

Impact: In the context of their master's theses, students develop and implement sustainable concepts in VET. In-service VET teacher training include manifold offers related to GCED and ESD topics, e.g. -Intercultural competences -Interculturality in everyday school life -Global Goals and Solving Challenges - Learning with the UN Model -Living sustainability - What can I do, what can WE change together? -Already changing the world today? - How teachers can work for climate justice. and many more.

The SPAR Academy Vienna (SPAR's vocational school for apprentices) together with the World Wildlife Fund created the Green Champions Apprentices Programme for a Sustainable Future. The aim is to empower apprentices from the food retail trade to become actively involved in the discourse of global environmental goals and also to act as multipliers in their social environment. Link: <https://www.wwf.at/de/spar-akademie>

G. Adult education (para 30 of the 1974 Recommendation)

- G1 Please describe any major initiatives that have been undertaken to promote GCED and/or ESD in adult education and other forms of non-formal education including youth education, out-of-school education, etc. Describe briefly the outcomes and impact of such initiatives and provide examples of good practices.

The Austrian Lifelong Learning Strategy - LLL:2020 is an instrument to look at different actions at various stages of learning, from early childhood education and care to school and higher education, continuing/adult education and training and education in the post-professional phase of life. The strategy is based on five guidelines which complement each other (life stage orientation, focus on learners, lifelong guidance, competence orientation, promotion of participation in lifelong learning). In all guidelines gender equality and social justice, quality, sustainability, efficiency and innovation are taken into consideration. The strategy pursues a holistic approach, which cannot only be reduced to educational issues, but incorporates different policy areas of education, integration, the labour market, economy as well as social, financial and regional issues and aims at concerted action.

The Adult Education Initiative is a programme that provides courses in basic education and enables adults who have not acquired school-leaving qualifications to do so. The aim of the Adult Education Initiative is to open up better access opportunities to the labour market and to support social integration.

Young people and adults living in Austria, regardless of origin and previous education, have the opportunity to acquire basic skills free of charge, even after the end of their school-based education. The Austrian Development Agency funds projects promoting GCED and ESD in adult education and other forms of non-formal education including youth education and out-of-school education. The projects focus on civic participation and contribute to developing social skills and to understanding complex global interdependencies. Good practice examples:

- “Global Learning in extracurricular youth work 2016-2017” has contributed to the implementation of Global Learning in youth work by providing education material and training for youth workers <https://bjv.at/portfolio-items/projekt-our-world/>
- The Austrian CSO Südwind has offered innovative material and training for youth and projects for youth organisations. <https://www.suedwind.at/bilden/jugendarbeit/>

H. Research and International Co-operation (paras 41-45 of the 1974 Recommendation)

- H1 Please describe what kinds of research or experimentation have been carried out to improve the implementation of GCED and/or ESD. Describe briefly how the results of such activities have influenced education policies, curricula and/or teaching practices.

Austria is a Member of the Schools for Health in Europe network foundation (SHE) <https://www.schoolsforhealth.org/>

The UniNetZ project aids inter- and intra-university networking and the integration of the SDGs in areas of university life such as research, teaching, student initiatives, management and administration, and aims over the long term to make a significant contribution to sustainable development in Austria. <https://www.uninetz.at/>

Adult education institutions engage in numerous initiatives of research and collaboration – e. g. EU programmes such as Erasmus+ and Horizon 2020 - with the intent of improving their educational programmes.

National Coordinators for the Implementation of the European Agenda for Adult Learning exchange with EU member states in the realm of basic education.

H2 Please indicate which types of activities are available that promote international co-operation at each level of education by entering the appropriate number in each white cell.

KEY: 0 = no, 1 = yes, 9 = unknown

	Pre-primary	Primary and secondary	Tertiary	Non-formal education
Hosting of international meetings on GCED and/or ESD	0	1	1	1
Participation in international meetings abroad on GCED and/or ESD	0	1	1	1
Support for programmes hosting foreign students, researchers and/or teachers	0	0	1	9
Membership of international networks including ASPnet	0	1	1	1
Joint research projects on GCED and/or ESD with foreign institutions	0	1	9	9
Other activities (please specify):				

I. Any other comments

- 11 Please indicate whether your country has faced any constraints, in particular related to global or national crises, including natural disasters, in implementing the 1974 Recommendation during the reporting period.

The Covid-19 pandemic has had major implications on the education system and has disrupted tertiary education; most of the teaching was moved online and some Higher Education Institutions have reported that measures to promote the social dimension have been delayed. Evidence suggests a re-traditionalisation and a global backlash concerning gender equality affecting the education system (resistance, polarisation, erosion of rights referring to the freedom of religion etc.) Re-traditionalisation of gender roles and gender based violence is reinforced in the context of the current COVID pandemic.

- 12 Please provide any other relevant information or clarifications regarding the implementation of the 1974 Recommendation or the mainstreaming of GCED and ESD in your country's education system.

Experts of the Advisory Board on Transformative Education at the Austrian National Commission for UNESCO consider the definitions of GCED and ESD used in this questionnaire as not appropriate to represent the spirit and the very idea of GCED and (to a minor degree) of ESD.

Some assumptions that seem to be behind the questions about the curricula and the teacher education seem problematic and the generalizing approach does not allow for an adequate

Definitely, GCED and ESD are not mainstreamed in teacher education (initial training), even if there are very timid first steps (like to establish GCED as “guiding principle”, but not as a course, in the teacher education programmes in some Southern Austrian universities). However, there are several well established training programmes (further education) for GCED as well as for ESD in Austria. T

he Strategy Group Global Learning/Global Citizenship Education was founded in 2003 with the aim of promoting the implementation of Global Learning/ Global Citizenship Education in the Austrian education system and of contributing to networking in the field of Global Learning. The Strategy Group understands GCED and ESD as pedagogical concepts that aim to provide a deeper understanding of global interdependencies, of connections between ecological, social and economic dimensions of sustainable development and of the importance of political decisions and of the necessity of a profound transformation. This overarching perspective is to be explicitly emphasised and it is to be elaborated on the basis of various topics.

In summary, we can state that there are a number of activities and efforts by teachers, teacher trainers, experts and NGOs to strengthen and implement GCED and ESD in the Austrian education system. However, there is no overarching national strategy for this, therefore GCED and ESD are not mainstreamed in national education policies, curricula and teacher education.
